# Degree-Granting Programs

**Name of Department:** Philosophy, Part 2 (PSLO: Formal logical technique)

**Complete a separate template for every degree & certificate.**

Because the template did not have enough room to complete my plan, I am submitting it in two parts. Part 2 shows my primary focus, which is on the skills learned in our logic courses. The PSLO focuses on learning formal logical argumentative technique, which is one of the most challenging skills for our students. Because our program is small, we will be evaluating the relevant SLOs ever term the course is offered to ensure we get a meaningful sample size and can evaluate trends over time.
