Success is not a place at which one arrives but rather the spirit with which one undertakes and continues the journey.

CERTIFICATION OF THE INSTITUTIONAL SELF-STUDY REPORT

DATE: ______________________________________

TO: Accrediting Commission for the Community and Junior Colleges, Western Association of Schools and Colleges

FROM: Las Positas College
3000 Campus Hill Drive
Livermore, CA 94551-7623

This Institutional Self-Study Report is submitted for the purpose of assisting in the determination of the institution’s accreditation status.

We certify that there was broad participation by the campus community, and we believe the self-study accurately reflects the nature and the substance of this institution.

DeRionne Pollard, Ph.D.
College President

Joel L. Kinnamon, Ed.D.
President, Governing Board

J. Laurel Jones, Ed.D.
Accreditation Liaison Officer

Gregory Daubenmire
President, Academic Senate

Tiffanny Breger
President, Associated Students

Karen Zeigler
President, Classified Senate

Maureen O’Herin
Faculty Accreditation Chair
ACKNOWLEDGEMENTS

Las Positas College expresses gratitude and appreciation for the following groups and individuals for their support and contributions to the self-study process and the self-study report.

Gratitude is expressed to the:

• Chairs and Members of Each Standard Team
• Chabot-Las Positas Community College District Office
• Accreditation Steering Team:
  - Maureen O’Herin
  - John Gonder
  - Jeff Sperry
  - Amber Machamer
  - DeRionne P. Pollard
  - Laurel Jones
• Self-Study Editor: Mike Sato
• Graphic Designer: Kyle Ogden
• Photographer: Giavanna Ortiz Di Candia

Special thanks to Sharon Gach for support staff assistance and to Deanna Horvath for additional photography.
OVERVIEW AND DEMOGRAPHICS

GENERAL COMMENTS

Las Positas College is one of two separately accredited colleges in the Chabot-Las Positas Community College District. Las Positas College principally serves citizens from the communities of Dublin, Livermore, and Pleasanton, and several unincorporated areas including Sunol and North Livermore. Chabot College, located in Hayward, serves the western portion of the district, which includes the communities of Ashland, Castro Valley, Cherryland, Fairview, Hayward, San Leandro, San Lorenzo, and Union City.

Three community college districts- Contra Costa Community College District, Peralta Community College District, and Ohlone Community College District—flank the Chabot-Las Positas Community College District to the north and south.

This report includes data published by various city, county, regional, state, and national sources, as well as data from our district Institutional Database. Much of the data comes from the Association of Bay Area Government (ABAG) research unit 2005 Projections. This report includes data through 2015 in most cases. Data from Census 2000 as well as from the CCBenefits Strategic Planner Tool were also used. Student data comes from the Institutional Research Data Base and data on staff comes from the Employee Data File.

The college began as an extension center of Chabot College in 1963, offering 24 classes and enrolling 820 students at Livermore High School and two other sites. By 1965, the program had expanded and moved to Granada High School in Livermore; it subsequently grew to include Amador and Dublin High Schools as well. The district purchased the 147 acre Livermore site that same year, intending to develop a comprehensive community college. However, in 1970 and again in 1972, bond issues to build the rural college failed -despite the Tri-Valley voters’ overwhelming support- because the district’s largest voting population lived outside the service area for the proposed college. Lacking funds to develop a comprehensive community college, the Board of Trustees voted to develop a small education center at the Livermore site. On March 31, 1975, “Valley Campus” opened as the Livermore Education Center of Chabot College.

Las Positas College has since developed into a fully accredited, comprehensive institution. In 1988, the college was designated by the Board of Governors to be an independent college. Las Positas College received full accreditation on January 7, 1991, from the Accrediting Commission of Community and Junior Colleges of the Western Association of Schools and Colleges. Accreditation was reaffirmed in 1997 and 2003.
OVERVIEW AND DEMOGRAPHICS

As of 2008, LPC offers 21 Associate of Arts degrees, 17 Associate of Science degrees, and 46 certificate programs. A majority of our courses transfer, as well. In addition, the college offers community education course geared toward personal development.

On March 2, 2004, Alameda County voters and those Contra Costa County voters within the district’s boundaries approved Measure B, the $498 million dollar Chabot-Las Positas Community College District capital improvement (construction) bond, which provided the college with $217 million dollars. The college has been fully engaged in the process of designing and building new facilities, redesigning older facilities, and building programs and services to fill these spaces to meet the needs of students and the community.

OVERVIEW OF TRI-VALLEY AREA

POPULATION

Table 1 displays projected populations increases to 2015 [source: Association of Bay Area Governments (ABAG)]. Generally, the Las Positas College service and surrounding areas will experience large increases in total population. Both Alameda and nearby Contra Costa counties are expected to experience 8% increases in population between 2005 and 2015. However, the Las Positas College service area will have a more accelerated increase in population. Combined, the sub-regional areas of Dublin, Livermore, and Pleasanton will experience a nearly 20% increase in population in just 10 years. Dublin will have the largest increase with 16,300 or 40% new residents. Livermore will have a gain of 12,200 or 16% new residents. Pleasanton is projected to add 8,300 residents, which is a 12% increase in population.

The adjacent area of Danville is expected to add only 1000 new residents, or 2%. San Ramon’s increase will be much larger, adding 12,201 or 23% new residents.

Although projections were revised down in 2005, the Tri-Valley continues to grow in the number of residents and businesses. The pace of that growth may ebb and flow, but Las Positas College serves an ever-increasing number of residents and businesses seeking trained workers, and it strives to accommodate that growth.

Race/Ethnicity

Table 2 shows the population of the state, county, and service-area cities based upon Census 2000 figures. The Census 2000 Race/Ethnicity categories were different from previous census collections. For the first time, respondents were able to choose more than one race to identify themselves. Additionally, for the purpose of this table, Hispanic or Latino is not considered a racial category. Being of Hispanic or Latino origin is considered an ethnicity that does not indicate any race. Those who indicated Hispanic origin formed one category, and all others formed a “Not Hispanic or Latino” category, which was then subdivided by racial categories. Reading the categories down the left column, Hispanics and Latinos are 32.4% of the population of California. The remaining 67.6% of the non-Hispanic residents of the state break down into the following racial categories: White - 46.7%, Black - 6.4%, American Indian - .5%, Asian - 10.8%, Native Hawaiian/Other Pac. Islander - .3%, some other race - .2%, and Two or more races – 2.7%. While 46.7% of California, 50.0% of the Bay Area, and 40.9% of Alameda County are White, in the Las Positas Service Area cities of Livermore, Pleasanton and Dublin 74.4%, 75.8%, and 62.3% of residents are White. These cities have grown more diverse in recent years, but are still more racially homogeneous than the county or state. However, the Las Positas College student body was roughly 54% White in 2007. Las Positas College draws a student body that is somewhat more diverse than its two closest surrounding cities.
TABLE 3 shows projections based upon race/ethnicity for the year 2002-2015. This data is for the county of Alameda. White non-Hispanics and African Americans will have the least growth at 9% and 5% respectively. American Indians/Alaskan Natives will have a 13% increase, although this is only about 700 individuals. There will be a large increase in the percentage of White Hispanics (40%) and Asians (42%). There will also be a sizable increase is the percentage of White Hispanics (40%) and Native Hawaiian/Pacific Islander (34%), although this is only roughly 3000 people. There will also be a sizable increase in the percentage of people who are two or more races (33%). As the county of Alameda continues to increase in racial diversity, our local area will undoubtedly increase in racial diversity as well. It is important that Las Positas College continue to increase its ability to meet the needs of diverse populations.

OVERVIEW AND DEMOGRAPHICS

Labor Market

Table 4 shows the total projected number of jobs between 2005 and 2015. Alameda County is expected to add 137,470 jobs, which is 18%. This should be compared to the 8% population growth. Contra Costa County is expected to add 66,020 jobs, or 18%, in ten years. The expected population increase for Contra Costa County is 8%. Dublin is expected to add 46% more jobs, compared to a projected 40% population increase. Livermore is expected to add 37% more jobs, and Pleasanton is expected to add 23% more jobs. Danville and San Ramon are expected to add 10% and 24% more jobs, respectively. These 2005 job projections are higher than the 2002 projections forecasted by ABAG. It is interesting to note that while job forecasts increased, population forecasts were revised down in 2005 from the 2002 projections.

Source: ABAG Projections 2005

Table 5 displays projected job growth by occupation from 2005 to 2015 for the county of Alameda. Occupations have been sorted from most additional new and replacement jobs to the least. Occupations with the highest expected number of jobs will be “Office and administrative support and occupations” and “Sales and related occupations,” with 47,701 and 42,622 new and replacement jobs expected in the next 10 years. “Food Preparations and serving related occupations” is expected to add 27,084 jobs. However, many of these jobs do not require a college education or specialized training. “Production occupations” and “Transportation and material moving occupations” will add 19,983 and 18,014 new jobs respectively. “Management occupations” will add 13,506 jobs, and these occupations do require a college degree or some specialized training. “Education, training, and library occupations,” which do require a college degree or specialized training, will add 12,730 jobs. “Business and financial operations occupations” and “Healthcare practitioners and technical occupations,” both of which require a college degree or specialized training, will add 9,690 and 9,165 new positions respectively. Computer and mathematical science occupations will add roughly 500 jobs.

OVERVIEW AND DEMOGRAPHICS

Tables 6 and 7 show projected job growth based on industries. Table 6 shows the industries with high growth projected between 2005 and 2015, and Table 7 shows industries expected to have medium growth. In some cases certain industries are shown with subcategories, while others display only the major category total. Industries with subcategories are of particular interest to Las Positas College because they likely require post-secondary training or a college degree. The industry of “Health care and social assistance” will experience a 47% increase, or 38,014 jobs. This industry includes the subcategories of ambulatory health care services (47%), hospitals (46%), nursing and residential care facilities (51%), and social assistance (47%). There will be a 29% increase in the industry of “Professional and technical services” or 24,359 jobs. Subcategories that are likely to see large increases are accounting and bookkeeping services (213%), computer systems design and related services (28%), management and technical consulting services (35%), and other professional and technical services (65%).

OVERVIEW AND DEMOGRAPHICS

Table 7 shows the industries projected to have medium growth. As with the previous table, certain industries of interest include subcategory projections. “Arts, entertainment, and recreation” will experience a 24% overall increase, which is 5,227 jobs. Subcategory projections are as follows: performing arts and spectator sports (30%), museums, historical sites, zoos, and parks (51%), and amusements, gambling, and recreation (11%). “Information” is projected to have a 22% (5,601 jobs) increase by 2015. Subcategories of “Information” that are expected to grow are as follows: publishing industries, except Internet (33%), motion picture and sound recording industries (362%), broadcasting, except Internet (78%) and Internet publishing and broadcasting (140%). The other “Information” subcategories that are expected to drop are telecommunications (-53%), and ISPs, search portals, and data processing (-39%). The industry of “Finance and insurance” is expected to grow 18% (5,439 jobs). Growth subcategories of “Finance” are monetary authorities - central bank (165%), securities, commodity contracts, investments (34%), and insurance carriers and related activities (31%).

Summary

The population will increase at a much higher rate in the Tri-Valley area compared to the county of Alameda. Although this population increase is somewhat less than was projected in 2002, the Las Positas College service area will continue to see strong growth in population between 2002-2015. The three cities of Dublin, Livermore, and Pleasanton will see a 20% increase in population by 2015.

Racial diversity will continue to increase. Although the Las Positas College service area is less diverse than the county, its student body is more diverse than its surrounding cities. The service area is expected to increase in diversity, especially in the proportion of Asians and Hispanics (White and non-White).

Jobs projections are larger in 2005 than they were in the 2002. There will be large increases in the numbers of jobs in the county (18%) and our service area (31%). Occupations that will experience particular growth will be office and administrative support occupations; sales and related occupations; management occupations; education, training, and library occupations; and business and financial operations occupations. Industries that will experience growth are health care and social assistance; professional and technical services; arts, entertainment, and recreation; information; and finance and insurance.
OVERVIEW AND DEMOGRAPHICS

STUDENT DEMOGRAPHICS

The headcount at Las Positas College experienced a drop in fall 2003 as a direct result of the midyear cuts in spring 2003. The headcount is just now recovering from that drop. However, enrollments are increasing at a faster rate. The college has roughly the same number of students as it did in fall 2002 at the college’s peak, but those students are taking more units.

Chart 1: Headcounts and Enrollments Fall 1997-Fall 2007

Chart 2 shows that the number of students attending full-time (12 units or more) increased from 23% in 1997 to 37% in fall 2007. The proportion of students enrolling in less than 6 units has fallen from 49% in fall 1997 to 34% in fall 2007.

Chart 2: Number of Units Fall 1997-Fall 2007
Overview and Demographics

This increase in the number of full-time students coincides with the decrease in the number of students who worked full-time. Students working 40 hours or more comprised 40% of the incoming student population in 1997 (new, returning, and transferring-in students). In fall 2003 and 2004, the number of students working full-time was down to 21%. Starting in fall 2005, that number started to rise, and in fall 2007 it was back up to 44%. However, in fall 2007, 22% of students reported that they did not work at all. This is a substantial increase from the amount who did not work at all the previous few semesters.

Chart 3: Hours Worked
(New and Returning Students Only)

Chart 4 shows the age distribution of LPC students. The proportion of students 19 or younger has increased steadily, as has the proportion of students 20-24. The proportion of students who are 25+ has steadily declined. This is consistent with other trends such as the number of full-time students, the number of students who do not work at all, and the declining proportion of returning students (see chart 5).

Chart 4: Age Distribution
The most remarkable trend in Student Type over the past 10 years is the dramatic decrease in the number of “Returning” students (students who have been out of the college for at least one semester). There has also been a steady increase in the proportion of “New” students (students who have never attended college), and “Continuing” students (students who attended LPC the prior semester).

Chart 6 shows the race/ethnicity of LPC students. The proportion of self-identified White students has gone from 74% to 54% in 10 years. The proportion of Hispanic students has gone up from 10% in 1997 to 16% in 2007. Additionally, the proportion of Asian students has more than doubled from 5% in 1997 to 11% in 2007. The proportion of African America students has remained steady at roughly 3% each semester. LPC is becoming increasingly diverse primarily in the larger numbers of Hispanic and Asian students. The number of Other/Unknown has also increased from 9% to 16%. This is more a manifestation of students declining to state their race than an increase in diverse groups. This is a trend also seen in staff data. On surveys, people are increasingly not indicating their race/ethnicity.
OVERVIEW AND DEMOGRAPHICS

The proportion of students wishing to obtain a BA after completing an AA degree has increased from 27% in fall 1997 to 36% in fall 2007. The proportion of students pursuing a terminal AA degree has decreased, as has the proportion of students enrolled to gain job-related skills. The proportion of students who are undecided about the educational goal has remained relatively steady at 21%.

Chart 8 shows course success rates for all LPC courses. Course success is a grade of C or better. Nonsuccess is a D or an F. The course success rate has declined slightly over the past few years. While the withdrawal rate has remained the same, the non-success rate had increased from 9% in 1997 to 14% in 2007. Part of the reason is possibly the addition of Distance Education (DE) courses, which have a much higher non-Success rate than face-to-face courses. It’s also possible that with more students taking more units, they are not able to keep up with their coursework.
OVERVIEW AND DEMOGRAPHICS

English Basic Skills course success rates are presented in Chart 9. After a rise in fall 2003 to 77%, the success rate dropped to a low of 66% in fall 2006, and in fall 2007 it rose to 74%. The rate of withdrawal has declined over the years, while the rate of non-success is increasing.

Chart 10 shows success rates in basic skills math courses. Since fall 1997, success rates have dropped from 62% to 48%. This is due to increases in both non-success and withdrawal rates. Faculty in both English and math courses are in the process of studying basic skills courses and developing strategies and changes to the programs to increase retention. Currently there are work groups focusing on assessment test scores and cut-offs, curriculum, text books, and examination of the number of levels in the developmental education programs.
While there are some annual fluctuations, there has been a steady increase in the number of certificates and awards. In the past three years we have seen less growth and, in fact, some decrease in the number of AA/AS awards. This is likely due to the cuts made in 2003 when the college cut courses and lost enrollments. We are now seeing the effect of those cuts. The “lag” time between those cuts and the number of degrees awarded would be a few years. Since enrollments have only recently stabilized, we may see this lag continue for a few years before it reverses itself.
Chart 12 shows the number of transfers to CSU/UC. There is a steady increase in the number of transfers to both CSU and UC.
OVERVIEW AND DEMOGRAPHICS

Chart 13 shows the actual vs. expected transfer rate for LPC. This data comes from the Transfer Rate Study of California Community Colleges (2005-06 Report) produced by the California Community College Chancellor’s Office.

**Actual transfer rate:** Of those who enrolled in a California Community College (CCC) as a first-time student in a fall term and, who, within a period of six years 1) attempted transfer-level math or English (regardless of outcome) and 2) completed at least 12 units in the CCC system, the percentage who transferred to a four-year college or university nationwide.

**Expected transfer rate:** The actual transfer rate is calculated for each community college and adjusted for five factors that are outside the control of local colleges: academic preparedness index, percentage of students over the age of 25, county per capita income, county unemployment rate, and miles to the nearest CSU.

LPC’s actual transfer rate is higher than the expected transfer rate.

![Chart 13: Actual vs. Expected Transfer Rates](chart.png)
OVERVIEW AND DEMOGRAPHICS

FACULTY AND STAFF

The data for staff comes from the Employee Data File, an extract from the dynamic Banner Human Resource files. As such, it contains only hired positions, not vacant positions. This represents a limitation to interpreting this information. There is a considerable undercount of classified employees. Often, classified positions are hourly-on call, and those positions tend not to be in the employee data file. As such, specific data on classified is not presented. The counts of administrators and faculty in the employee data file tend to be closer to the actual number and are considered reliable to use in this analysis. For a true count of positions, the College Organizational chart should be used, and vacant positions should be counted; however, this analysis is aimed at employee demographics. The Organization Chart data does not contain demographic data.

Chart 19 shows the proportion of staff by hiring year in 2001 and 2007. As of fall 2007 over 57% of staff and faculty had been hired in the past 7 years. 32% were hired between 2005-2007.
OVERVIEW AND DEMOGRAPHICS

Chart 18 shows the age distribution of LPC staff in 1995/2001/2007. The 2007 data shows 30% are age 56 or older. These employees will likely retire in the next 5-10 years.

Chart 16 shows the number of full-time to part-time faculty. Given our increasing enrollment, LPC has been hiring both full-time and part-time faculty to keep up with that demand.

Chart 16: Number of Full-Time vs. Part-Time Faculty 1995/2001/2007
OVERVIEW AND DEMOGRAPHICS

Chart 17 shows the proportion of full-time faculty to part-time faculty. LPC makes a consistent effort to meet or exceed the 75/25% rule.

Chart 18 shows the proportion of administrators to faculty. While in 1995 and 2001 Administrators were 4%, in 2007 they fell a percentage point.
OVERVIEW AND DEMOGRAPHICS

Chart 19 shows the proportion of administrators to full-time faculty. Each year the proportion of administrators decreases relative to the proportion of full-time faculty. In recent years the college has not hired new administrative positions while hiring roughly 4-7 new faculty positions a year.
OVERVIEW AND DEMOGRAPHICS

Chart 20 shows the race/ethnicity distribution of all staff. In 1995 and 2001, the proportion of White staff to all other categories was 79%. While that portion goes down in 2007 to 70%, that move was entirely the result of more staff declining to state race, not a true increase in diversity.
ELIGIBILITY REQUIREMENTS FOR ACCREDITATION

1. **Authority:** Las Positas College has the authority to operate as a degree-granting institution based on its continuous accreditation by the Accrediting Commission for Community and Junior Colleges of the Western Association of Schools and Colleges, an institutional accrediting body recognized by the Commission of Recognition of Postsecondary Accreditation and the U.S. Department of Education. This authority is published on the tenth page of the college catalog, and it can be found in several places on the college website as well.

   Documentation available upon request.

2. **Mission:** The current Las Positas College mission statement was revised and board-approved in 2003. The mission is regularly reviewed and has been recently revised to reflect the commitment of the college to meet the educational needs of the students and of the community. The mission statement is published on page of eight of the college catalog and is on the college website under About Las Positas. The college mission is concordant with the mission of the district, which can be found on the district website under Board of Trustees.

   Documentation available upon request.

3. **Governing Board:** The Chabot/Las Positas Community College District is governed by a Board of Trustees that consists of seven members elected by the county at large and two non-voting student trustees elected by the students of the two colleges. The communities - elected trustees represent the entire district (Castro Valley, Dublin, Hayward, Livermore, Pleasanton, San Leandro, Sunol and Union City) and are elected for four-year staggered terms. The student trustees serve a one-year term. The function of the board is to determine policies, establish rules and regulations, and oversee the use of financial and other resources to ensure that they are used to provide a sound educational program consistent with the mission and goals of the district. The President of the Board of Trustees is one of the community-elected trustees and is selected by the trustees on an annual basis.

   The Board of Trustees invites public interest in the activities of the board. Agendas of each board meeting are published in local newspapers, and agendas and minutes are posted on the district website. Every board agenda includes an item for Statements from the Public on Non- Agenda Items. Members of the Board of Trustees have no employment, family, ownership, or personal financial interests related to either the colleges or the district. The board has and enforces a conflict of interest policy.

   Documentation available upon request.

4. **Chief Executive Officer:** The Las Positas College President serves as the chief executive officer for the college and is responsible for the development of all programs and services and for the administration and operation of the college. The president was appointed by the Board of Trustees after a nationwide search. The president does not sit on the Board of Trustees for the
ELIGIBILITY REQUIREMENTS FOR ACCREDITATION

district as a voting member but attends and participates in all district board meetings as the college representative.

Documentation available upon request.

5. Administrative Capacity: The college has a sufficient number of administrators to effectively manage the college’s programs and services. All administrators are selected using appropriate statewide minimum qualifications and district guidelines and have the education and experience needed to perform their assigned duties.

Documentation upon request.

6. Operational Status: The institution is operational, with approximately 9000 students enrolled in fall 2008. Most of these students are enrolled in courses that lead to degrees, certificates, or transfer.

Documentation available upon request.

7. Degrees: Las Positas College offers 38 associate degree programs and 46 certificate programs. Thirty-six percent of Las Positas College students have a stated goal of receiving an AA or AS degree and transferring, 8% have a goal of receiving an AA or AS without transferring, and 12% have a goal of transferring without receiving a degree.

Documentation available upon request.

8. Educational Programs: Las Positas College degree programs are congruent with the college’s mission to provide a learner-centered education, with its values statement reflecting academic excellence. Programs are based on recognized higher education fields of study and conform to nationally recognized standards for content, length, quality, and rigor. Student outcomes are currently specified for approximately 53% of Las Positas courses, with the rest scheduled for completion within the Student Learning Outcomes Planning cycle timeline. Student learning outcomes are being developed for certificates and majors. Degree-level student learning outcomes have been completed as college Core Competencies and will be reviewed within the program review cycle. Degree programs, including major requirements, specific area requirements and general education requirements are designed to include 60 units of credit or two full-time years.

Documentation available upon request.

9. Academic Credit: Credit for all coursework is awarded based on the Carnegie unit, the standard generally accepted in degree-granting institutions of higher education. When the Curriculum Committee approves a course, the awarding of credit is carefully reviewed for
ELIGIBILITY REQUIREMENTS FOR ACCREDITATION

compliance with Title 5 of the Education Code. Appropriate information about course credit is provided in the college catalog on page 60 with specific course unit information found under Course Descriptions Information beginning on page 55 of the college catalog. The catalog is available in print, online, and in CD format.

Documentation available upon request.

10. Student Learning and Achievement: The college’s Student Learning Outcomes Assessment Cycle process is currently working on defining the program learning outcomes, which will include assessment methods that will demonstrate that students who complete Las Positas College programs achieve the stated outcomes regardless of where or how they complete program requirements. Core Competencies that include general education courses have been developed and are included on the Student Learning Outcomes website.

Documentation available upon request.

11. General Education: Las Positas College requires that any student receiving an AA or AS degree satisfactorily completes the college and general education requirements, basic competency requirements, and specific area requirements, in addition to the requirements of the student’s major. All General Education requirements are listed in the Catalog. Additionally, Las Positas College requires proficiency in American Cultures and Mathematics.

General education requirements include:

a. Language and Rationality
b. Mathematics (Proficiency)
c. Natural Sciences
d. Humanities
e. Social and Behavioral Sciences
f. Wellness
g. American Institutions
h. American Cultures (Proficiency)

Each course that meets these requirements has defined learning outcomes noted as core competencies. The courses that meet these requirements have the rigor that is appropriate for the degree-applicable courses.

Documentation available upon request.

12. Academic Freedom: The Las Positas College statement on academic freedom is in the Faculty Handbook. In addition, the Faculty Association contract has a notation on academic
ELIGIBILITY REQUIREMENTS FOR ACCREDITATION

freedom. The college adheres to the Chabot/Las Positas College District statement on academic freedom found in board policy 4320.

The academic freedom statement includes the following statement:

Academic Freedom exists and is nurtured in our community for the common good of all citizens. Students, faculty, administrators and society itself derive benefits from the practice of academic freedom with its open search for truth and its free exposition. Academic freedom is fundamental for the protection of the instructor’s right in teaching and the student’s right in learning in the classroom and on the campus. Academic freedom carries with it responsibilities correlative with rights, such responsibilities being implicit in all freedoms and assured by all members of the college to ensure the rights of others.

Documentation available upon request.

13. Faculty: Las Positas has 106 full-time faculty and 254 part-time faculty. The college has an additional 100 faculty especially hired for the Administration of Justice program. All faculty, whether full-time or part-time, meet at least the minimum requirements established by the Board of Governors for California Community Colleges. The core of full-time faculty is sufficient in size and experience to support all of the institution’s educational programs. The statement of faculty responsibilities are noted within the Academic Senate website and are also noted in the Faculty Association contract.

Documentation available upon request.

14. Student Services: Las Positas College provides a wide range of student services including counseling, orientation, assessment, financial aid, transfer and career information, health services, and disabled student services. The focus of all student services is to help students successfully meet their educational goals.

Documentation available upon request.

15. Admissions: Las Positas College is an open access institution. The college admission policy is published in the college catalog beginning on page 12, and it clearly states the qualifications for admission to the college and its programs.

Documentation available upon request.

16. Information and Learning Resources: Las Positas College maintains a full-service library for student use. The library offers a wide range of print material including books, periodicals, and newspapers, as well as access to a vast array of electronic databases. LPC Library has a resource-sharing agreement with the other district library at Chabot College. Items are transferred between libraries when requested by faculty or students. LPC Library encourages use of and provides instruction in LINK+, an interlibrary loan platform used by local Bay...
ELIGIBILITY REQUIREMENTS FOR ACCREDITATION

Area public libraries. Also, LPC Library has a formal arrangement with California State University East Bay that enables Las Positas College students to check out materials from the University library when showing a current, valid Las Positas College student identification card.

The Innovation Center assists the faculty with instructional design and with technology classroom support, and serves as professional development for faculty wishing to use instructional technology. There are several Academic Support Resources on campus including the award winning Integrated Learning Center, the Tutorial Reading Center, the Academic Center of Excellence (for college athletics), the Writing Center, the Computer Center and several computer and discipline labs where students and faculty have Internet access.

Documentation available upon request.

17. Financial Resources: The Chabot/Las Positas Community College District is funded by local property taxes and state apportionment. The district develops a budget, which is board approved. Using a district allocation process, the district distributes a portion of the district funds to Las Positas College, and the college independently develops an operating budget to support and improve student learning programs and services. In addition, Las Positas College is the recipient of several grants that enhance the ability to provide program and services for students and staff. The college is financially stable.

Documentation available upon request.

18. Financial Accountability: The district undergoes an annual external audit by a firm of certified public accountants. The accountants present and explain the audit at a Board of Trustees meeting. Las Positas College is included in the audit as a sub-unit. Neither the district nor the college shows a deficit at any time during the eligibility application process. Audits for the last two years are available upon request.

Documentation available upon request.

19. Institutional Planning and Evaluation: Las Positas College has both an operational planning and evaluation process and a strategic/future planning and evaluation process. Operational planning occurs in the program review process. This occurs across the campus within instruction and student services, and will be implemented in institutional programs that either offer services or that integrate into the other planning processes beginning in 2009.

The college began its educational master plan process in 2003. In 2005, a revised master plan was created for 2005-2015 with updates to the plan in 2006 and in 2007. The educational master plan incorporated both an internal and external scan that was conducted after the 2003 accreditation site visit. External and internal scans, along with a comprehensive consultant college-wide forum schedule, created the current educational master plan model. Recommendations from program review have become a part of the educational master plan.
ELIGIBILITY REQUIREMENTS FOR ACCREDITATION

and are used as a part of the institutional budget and planning outcomes process. Areas of responsibility for Institutional Planning and Evaluation lie across the campus. Several shared governance committees participate in the recommendation process including the Planning and Budget Committee, the Staff Development Committee, the Curriculum Committee, the Facilities Committee, the Academic Senate, the College Council and the Distance Education and Technology Committees. Assessment of planning begins at the program review level with ultimate oversight of the planning and evaluation process lying within the College Council and its review. The program review cycle is a four year cycle and the educational master plan cycle is a ten year cycle with a yearly review and update.

Documentation available upon request.

20. Public Information: The Las Positas College Catalog is available in print, on the web, and on CD. The catalog contains all of the following information in precise, accurate, and current entries:

- Official Name, Address, Telephone Number and Website address of the College
- Educational Mission
- Course, Program and Degree Offerings
- Academic Calendar and Program Length
- Academic Freedom Statement
- Available Financial Aid
- Available Learning Resources
- Names and Degrees of Administrators and Faculty
- Requirements for:
  - Admissions
  - Student Fees and Other Financial Obligations
  - Degree, Certificates, Graduation and Transfer
- Major Policies Affecting Students including:
  - Academic Regulations, Including Academic Honesty
  - Nondiscrimination
  - Acceptance of Transfer Credits
  - Grievance and Complaint Procedures
  - Sexual Harassment
  - Refund of Fees
ELIGIBILITY REQUIREMENTS FOR ACCREDITATION

Many of these and other policies and procedures are to be found in the Schedule of Classes, the Student Handbook, the Faculty Handbook, and District Rules and Regulations.

Documentation available upon request.

21. Relations with the Accrediting Commission: Las Positas College adheres to the eligibility requirements and accreditation standards of the Commission and describes itself in identical terms to all agencies. The college communicates any changes in its accredited status and agrees to disclose all information required by the Commission to carry out its accrediting responsibilities.

Documentation available upon request.
ELIGIBILITY REQUIREMENTS FOR ACCREDITATION

STATEMENT OF ASSURANCE

We hereby certify that Las Positas College continues to meet the eligibility requirements for accreditation.

This diagram represents the leadership structure of Chabot College and Las Positas College.
CHABOT-LAS POSITAS COMMUNITY COLLEGE DISTRICT:
Delineation of Functions Map

The Chabot-Las Positas Community College District (CLPCCD) Delineation of Functions Map is intended to illustrate how the two colleges and the district manage the distribution of responsibility by function. Map creation was based on criteria outlined in the Policy and Procedures for the Evaluation of Institutions in Multi-College/Multi-Unit Districts or Systems section of the Accreditation Reference Handbook, a publication of the Accrediting Commission for Community and Junior Colleges (ACCJC) and Western Association of Schools and Colleges (WASC).

The Delineation of Functions Map indicates the level and type of responsibility.

Codes and explanations used:

P = Primary Responsibility: Primary responsibility indicates leadership and oversight of a specified function which may include design, development, implementation and successful integration.

S = Secondary Responsibility: Secondary responsibility indicates support of a specified function which may include feedback, input, and communication to assist with successful integration.

SH = Shared Responsibility: Shared responsibility indicates that the district and colleges are equally responsible for the leadership and oversight of a specified function which may include design, development, implementation, and facilitation of input, feedback, and communication for successful integration.

N/A = Not Applicable: Neither the district nor colleges has responsibility.
# STANDARD I: INSTITUTIONAL MISSION AND EFFECTIVENESS

## A. MISSION
The institution has a statement of mission that defines the institution's broad educational purposes, its intended student population, and its commitment to achieving student learning.

<table>
<thead>
<tr>
<th></th>
<th>College</th>
<th>District</th>
</tr>
</thead>
<tbody>
<tr>
<td>1.</td>
<td>The institution establishes student learning programs and services aligned with its purposes, its character, and its student population.</td>
<td>P</td>
</tr>
<tr>
<td>2.</td>
<td>The mission statement is approved by the governing board and published.</td>
<td>SH</td>
</tr>
<tr>
<td>3.</td>
<td>Using the institution's governance and decision-making processes, the institution reviews its mission statement on a regular basis and revises it as necessary.</td>
<td>SH</td>
</tr>
<tr>
<td>4.</td>
<td>The institution's mission is central to institutional planning and decision-making.</td>
<td>SH</td>
</tr>
</tbody>
</table>

## B. IMPROVING INSTITUTIONAL EFFECTIVENESS
The institution demonstrates a conscious effort to produce and support student learning, measures that learning, assesses how well learning is occurring, and makes changes to improve student learning. The institution also organizes its key processes and allocates its resources to effectively support student learning. The institution demonstrates its effectiveness by providing 1) evidence of the achievement of student learning outcomes and 2) evidence of institution and program performance. The institution uses ongoing and systematic evaluation and planning to refine its key processes and improve student learning.

<table>
<thead>
<tr>
<th></th>
<th>College</th>
<th>District</th>
</tr>
</thead>
<tbody>
<tr>
<td>1.</td>
<td>The institution maintains an ongoing, collegial, self-reflective dialogue about the continuous improvement of student learning and institutional processes.</td>
<td>P</td>
</tr>
<tr>
<td>2.</td>
<td>The institution sets goals to improve its effectiveness consistent with its stated purposes. The institution articulates its goals and states the objectives derived from them in measurable terms so that the degree to which they are achieved can be determined and widely discussed. The institutional members understand these goals and work collaboratively toward their achievement.</td>
<td>P</td>
</tr>
<tr>
<td>3.</td>
<td>The institution assesses progress toward achieving its stated goals and makes decisions regarding the improvement of institutional effectiveness in an ongoing and systematic cycle of evaluation, integrated planning, resource allocation, implementation, and re-evaluation. Evaluation is based on analyses of both quantitative and qualitative data.</td>
<td>P</td>
</tr>
<tr>
<td>4.</td>
<td>The institution provides evidence that the planning process is broad-based, offers opportunities for input by appropriate constituencies, allocates necessary resources, and leads to improvement of institutional effectiveness.</td>
<td>P</td>
</tr>
</tbody>
</table>
## STANDARD II: STUDENT LEARNING PROGRAMS AND SERVICES

### A. INSTRUCTIONAL PROGRAMS

The institution offers high-quality instructional programs in recognized and emerging fields of study that culminate in identified student outcomes leading to degrees, certificates, employment, or transfer to other higher education institutions or programs consistent with its mission. Instructional programs are systematically assessed in order to assure currency, improve teaching and learning strategies, and achieve stated student learning outcomes. The provisions of this standard are broadly applicable to all instructional activities offered in the name of the institution.

<table>
<thead>
<tr>
<th></th>
<th>College</th>
<th>District</th>
</tr>
</thead>
<tbody>
<tr>
<td>1.</td>
<td>The institution demonstrates that all instructional programs, regardless of location or means of delivery, address and meet the mission of the institution and uphold its integrity.</td>
<td>P</td>
</tr>
<tr>
<td>a.</td>
<td>The institution identifies and seeks to meet the varied educational needs of its students through programs consistent with their educational preparation and the diversity, demographics, and economy of its communities. The institution relies upon research and analysis to identify student learning needs and to assess progress toward achieving stated learning outcomes.</td>
<td>P</td>
</tr>
<tr>
<td>b.</td>
<td>The institution utilizes delivery systems and modes of instruction compatible with the objectives of the curriculum and appropriate to the current and future needs of its students.</td>
<td>P</td>
</tr>
<tr>
<td>c.</td>
<td>The institution identifies student learning outcomes for courses, programs, certificates, and degrees; assesses student achievement of those outcomes; and uses assessment results to make improvements.</td>
<td>P</td>
</tr>
<tr>
<td>2.</td>
<td>The institution assures the quality and improvement of all instructional courses and programs offered in the name of the institution, including collegiate, developmental, and pre-collegiate courses and programs, continuing and community education, study abroad, short-term training courses and programs, programs for international students, and contract or other special programs, regardless of type of credit awarded, delivery mode, or location.</td>
<td>SH</td>
</tr>
<tr>
<td>a.</td>
<td>The institution uses established procedures to design, identify learning outcomes for, approve, administer, deliver, and evaluate courses and programs. The institution recognizes the central role of its faculty for establishing quality and improving instructional courses and programs.</td>
<td>P</td>
</tr>
<tr>
<td>b.</td>
<td>The institution relies on faculty expertise and the assistance of advisory committees when appropriate to identify competency levels and measurable student learning outcomes for courses, certificates, programs including general and vocational education, and degrees. The institution regularly assesses student progress towards achieving those outcomes.</td>
<td>SH</td>
</tr>
<tr>
<td>c.</td>
<td>High-quality instruction and appropriate breadth, depth, rigor, sequencing, time to completion, and synthesis of learning characterize all programs.</td>
<td>SH</td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>---</td>
<td>-------------------------------------------------------------------------------------------</td>
<td>---</td>
</tr>
<tr>
<td>d.</td>
<td>The institution uses delivery modes and teaching methodologies that reflect the diverse needs and learning styles of its students.</td>
<td>SH</td>
</tr>
<tr>
<td>e.</td>
<td>The institution evaluates all courses and programs through an on-going systematic review of their relevance, appropriateness, achievement of learning outcomes, currency, and future needs and plans.</td>
<td>SH</td>
</tr>
<tr>
<td>f.</td>
<td>The institution engages in ongoing, systematic evaluation and integrated planning to assure currency and measure achievement of its stated student learning outcomes for courses, certificates, programs including general and vocational education, and degrees. The institution systematically strives to improve those outcomes and makes the results available to appropriate constituencies.</td>
<td>SH</td>
</tr>
<tr>
<td>g.</td>
<td>If an institution uses departmental course and/or program examinations, it validates their effectiveness in measuring student learning and minimizes test biases.</td>
<td>P</td>
</tr>
<tr>
<td>h.</td>
<td>The institution awards credit based on student achievement of the course's stated learning outcomes. Units of credit awarded are consistent with institutional policies that reflect generally accepted norms or equivalencies in higher education.</td>
<td>P</td>
</tr>
<tr>
<td>i.</td>
<td>The institution awards degrees and certificates based on student achievement of a program's stated learning outcomes.</td>
<td>P</td>
</tr>
</tbody>
</table>

3. The institution requires of all academic and vocational degree programs a component of general education based on a carefully considered philosophy that is clearly stated in its catalog. The institution, relying on the expertise of its faculty, determines the appropriateness of each course for inclusion in the general education curriculum by examining the stated learning outcomes for the course. General education has comprehensive learning outcomes for the students who complete it, including the following:

   a. An understanding of the basic content and methodology of the major areas of knowledge: areas include the humanities and fine arts, the natural sciences, and the social sciences.

   b. A capability to be a productive individual and life long learner: skills include oral and written communication, information competency, computer literacy, scientific and quantitative reasoning, critical analysis/logical thinking, and the ability to acquire knowledge through a variety of means.

   c. Recognition of what it means to be an ethical human being and effective citizen: qualities include an appreciation of ethical principles; civility and interpersonal skills; respect for cultural diversity; historical and aesthetic sensitivity; and the willingness to assume civic, political, and social responsibilities locally, nationally, and globally.

4. All degree programs include focused study in at least one area of inquiry or in an established interdisciplinary core.
5. Students completing vocational and occupational certificates and degrees demonstrate technical and professional competencies that meet employment and other applicable standards and are prepared for external licensure and certification.  

6. The institution assures that students and prospective students receive clear and accurate information about educational courses and programs and transfer policies. The institution describes its degrees and certificates in terms of their purpose, content, course requirements, and expected student learning outcomes. In every class section students receive a course syllabus that specifies learning objectives consistent with those in the institution’s officially approved course outline.  

<p>| | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
</tr>
</thead>
</table>
| a. | The institution makes available to its students clearly stated transfer-of-credit policies in order to facilitate the mobility of students without penalty. In accepting transfer credits to fulfill degree requirements, the institution certifies that the expected learning outcomes for transferred courses are comparable to the learning outcomes of its own courses. Where patterns of student enrollment between institutions are identified, the institution develops articulation agreements as appropriate to its mission.  

<p>| | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
</tr>
</thead>
</table>
| b. | When programs are eliminated or program requirements are significantly changed, the institution makes appropriate arrangements so that enrolled students may complete their education in a timely manner with a minimum of disruption.

<th></th>
<th></th>
</tr>
</thead>
</table>
| c. | The institution represents itself clearly, accurately, and consistently to prospective and current students, the public, and its personnel through its catalogs, statements, and publications, including those presented in electronic formats. It regularly reviews institutional policies, procedures, and publications to assure integrity in all representations about its mission, programs, and services.  

7. In order to assure the academic integrity of the teaching-learning process, the institution uses and makes public governing board-adopted policies on academic freedom and responsibility, student academic honesty, and specific institutional beliefs or worldviews. These policies make clear the institution’s commitment to the free pursuit and dissemination of knowledge.  

<p>| | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
</tr>
</thead>
</table>
| a. | Faculty distinguishes between personal conviction and professionally accepted views in a discipline. They present data and information fairly and objectively.  

<p>| | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>

</tbody>
</table>

### B. STUDENT SUPPORT SERVICES

The institution recruits and admits diverse students who are able to benefit from its programs, consistent with its mission. Student support services address the identified needs of students and enhance a supportive learning environment. The entire student pathway through the institutional experience is characterized by a concern for student access, progress, learning, and success. The institution systematically assesses student support services using student learning outcomes, faculty and staff input, and other appropriate measures in order to improve the effectiveness of these services.

<table>
<thead>
<tr>
<th></th>
<th>College</th>
<th>District</th>
</tr>
</thead>
<tbody>
<tr>
<td>1.</td>
<td>The institution assures the quality of student support services and demonstrates that these services, regardless of location or means of delivery, support student learning and enhance achievement of the mission of the institution.</td>
<td>P</td>
</tr>
<tr>
<td>2.</td>
<td>The institution provides a catalog for its constituencies with precise, accurate, and current information concerning the following: a. General Information, b. Requirements, c. Major Policies Affecting Students, d. Locations or publications where other policies may be found.</td>
<td>P</td>
</tr>
<tr>
<td>3.</td>
<td>The institution researches and identifies the learning support needs of its student population and provides appropriate services and programs to address those needs.</td>
<td>P</td>

C. LIBRARY AND LEARNING SUPPORT SERVICES

Library and other learning support services for students are sufficient to support the institution's instructional programs and intellectual, aesthetic, and cultural activities in whatever format and wherever they are offered. Such services include library services and collections, tutoring, learning centers, computer laboratories, and learning technology development and training. The institution provides access and training to students so that library and other learning support services may be used effectively and efficiently. The institution systematically assesses these services using student learning outcomes, faculty input, and other appropriate measures in order to improve the effectiveness of the services.

<table>

D. FINANCIAL RESOURCES
Financial resources are sufficient to support student learning programs and services and to improve institutional effectiveness. The distribution of resources supports the development, maintenance, and enhancement of programs and services. The institution plans and manages its financial affairs with integrity and in a manner that ensures financial stability. The level of financial resources provides a reasonable expectation of both short-term and long-term financial solvency. Financial resources planning is integrated with institutional planning.

<table>
<thead>
<tr>
<th>College</th>
<th>District</th>

<tr>
<td>d.</td>
<td>The institution practices effective oversight of finances, including management of financial aid, grants, externally funded programs, contractual relationships, auxiliary organizations or foundations, and institutional investments and assets.</td>
</tr>
<tr>
<td>e.</td>
<td>All financial resources, including those from auxiliary activities, fund-raising efforts, and grants are used with integrity in a manner consistent with the mission and goals of the institution.</td>
</tr>
<tr>
<td>f.</td>
<td>Contractual agreements with external entities are consistent with the mission and goals of the institution, governed by institutional policies, and contain appropriate provisions to maintain the integrity of the institution.</td>
</tr>
<tr>
<td>g.</td>
<td>The institution regularly evaluates its financial management processes, and the results of the evaluation are used to improve financial management systems.</td>
</tr>
<tr>
<td>3.</td>
<td>The institution systematically assesses the effective use of financial resources and uses the results of the evaluation as the basis for improvement.</td>
</tr>
</tbody>
</table>
A. DECISION-MAKING ROLES AND PROCESSES
The institution recognizes that ethical and effective leadership throughout the organization enables the institution to identify institutional values, set and achieve goals, learn, and improve.

1. Institutional leaders create an environment for empowerment, innovation, and institutional excellence. They encourage staff, faculty, administrators, and students, no matter what their official titles, to take initiative in improving the practices, programs, and services in which they are involved. When ideas for improvement have policy or significant institution-wide implications, systematic participative processes are used to assure effective discussion, planning, and implementation.

2. The institution establishes and implements a written policy providing for faculty, staff, administrator, and student participation in decision-making processes. The policy specifies the manner in which individuals bring forward ideas from their constituencies and work together on appropriate policy, planning, and special-purpose bodies.

   a. Faculty and administrators have a substantive and clearly defined role in institutional governance and exercise a substantial voice in institutional policies, planning, and budget that relate to their areas of responsibility and expertise. Students and staff also have established mechanisms or organizations for providing input into institutional decisions.

   b. The institution relies on faculty, its academic senate or other appropriate faculty structures, the curriculum committee, and academic administrators for recommendations about student learning programs and services.

3. Through established governance structures, processes, and practices, the governing board, administrators, faculty, staff, and students work together for the good of the institution. These processes facilitate discussion of ideas and effective communication among the institution’s constituencies.

4. The institution advocates and demonstrates honesty and integrity in its relationships with external agencies. It agrees to comply with Accrediting Commission standards, policies, and guidelines, and Commission requirements for public disclosure, self-study and other reports, team visits, and prior approval of substantive changes. The institution moves expeditiously to respond to recommendations made by the Commission.

5. The role of leadership and the institution’s governance and decision-making structures and processes are regularly evaluated to assure their integrity and effectiveness. The institution widely communicates the results of these evaluations and uses them as the basis for improvement.
B. BOARD AND ADMINISTRATIVE ORGANIZATION

In addition to the leadership of individuals and constituencies, institutions recognize the designated responsibilities of the governing board for setting policies and of the chief administrator for the effective operation of the institution. Multi-college districts/systems clearly define the organizational roles of the district/system and the colleges.

<table>
<thead>
<tr>
<th></th>
<th>College</th>
<th>District</th>
</tr>
</thead>
<tbody>
<tr>
<td>1.</td>
<td>The institution has a governing board that is responsible for establishing policies to assure the quality, integrity, and effectiveness of the student learning programs and services and the financial stability of the institution. The governing board adheres to a clearly defined policy for selecting and evaluating the chief administrator for the college or the district/system.</td>
<td>S</td>
</tr>
<tr>
<td>a.</td>
<td>The governing board is an independent policy-making body that reflects the public interest in board activities and decisions. Once the board reaches a decision, it acts as a whole. It advocates for and defends the institution and protects it from undue influence or pressure.</td>
<td>S</td>
</tr>
<tr>
<td>b.</td>
<td>The governing board establishes policies consistent with the mission statement to ensure the quality, integrity, and improvement of student learning programs and services and the resources necessary to support them.</td>
<td>S</td>
</tr>
<tr>
<td>c.</td>
<td>The governing board has ultimate responsibility for educational quality, legal matters, and financial integrity.</td>
<td>S</td>
</tr>
<tr>
<td>d.</td>
<td>The institution or the governing board publishes the board bylaws and policies specifying the board’s size, duties, responsibilities, structure, and operating procedures.</td>
<td>S</td>
</tr>
<tr>
<td>e.</td>
<td>The governing board acts in a manner consistent with its policies and bylaws. The board regularly evaluates its policies and practices and revises them as necessary.</td>
<td>S</td>
</tr>
<tr>
<td>f.</td>
<td>The governing board has a program for board development and new member orientation. It has a mechanism for providing for continuity of board membership and staggered terms of office.</td>
<td>S</td>
</tr>
<tr>
<td>g.</td>
<td>The governing board’s self-evaluation processes for assessing board performance are clearly defined, implemented, and published in its policies or bylaws.</td>
<td>S</td>
</tr>
<tr>
<td>h.</td>
<td>The governing board has a code of ethics that includes a clearly defined policy for dealing with behavior that violates its code.</td>
<td>S</td>
</tr>
<tr>
<td>i.</td>
<td>The governing board is informed about and involved in the accreditation process.</td>
<td>SH</td>
</tr>
<tr>
<td>j.</td>
<td>The governing board has the responsibility for selecting and evaluating the district/system chief administrator (most often known as the chancellor) in a multi-college district/system or the college chief administrator (most often known as the president) in the case of a single college. The governing board delegates full responsibility and authority to him/her to implement and administer board policies without board interference and holds him/her accountable for the operation of the district/system or college, respectively. In multi-college districts/systems, the governing board establishes a clearly defined policy for selecting and evaluating the presidents of the colleges.</td>
<td>S</td>
</tr>
</tbody>
</table>
2. The president has primary responsibility for the quality of the institution he/she leads. He/she provides effective leadership in planning, organizing, budgeting, selecting and developing personnel, and assessing institutional effectiveness.

The district/system regularly evaluates district/system role delineation and governance and decision-making structures and processes to assure their integrity and effectiveness in assisting the colleges in meeting educational goals. The district/system widely communicates the results of these evaluations and uses them as the basis for improvement.
RESPONSES TO PREVIOUS SELF-STUDY RECOMMENDATIONS

RESPONSES TO 2003 RECOMMENDATIONS

RECOMMENDATION # 1:

The team recommends that the College expand its capacity for conducting research, develop an agenda to assess student learning outcomes and institutional effectiveness, and publish its findings to support planning.

RESPONSE 2009:

The midterm report to WASC (March, 2006) reported that the college had completed the expansion for capacity of research through its procurement of updated survey software applications that allow the college to conduct research that can specifically address the area of student learning outcomes and institutional effectiveness. In the last three years, the college has developed and implemented several surveys that have gone to college constituents and that have promoted the communication of data (both through the survey and through campus wide data publications). Campus-wide data is accessible through town meetings and through the Office of Institutional Research and Planning website. Since the midterm report, the college has also committed to a temporary part time Office of Institutional Research and Planning staff member, dedicated to the continued implementation of data analysis tools, responsive data retrieval and appropriate data dissemination, especially as it relates to the College Basic Skills Initiative and the work done on assessment score validation.

The college has also purchased, implemented and become a statewide model for eLumen, the software package that instructional and student service programs are using to house developed student learning outcomes and outcomes assessments; additionally, eLumen publishes all student learning outcomes cycles to the community at large. The college purchased eLumen in the summer of 2006. During the academic year 2006-2007, pilot groups began using eLumen to enter their Student Learning Outcomes. The college-wide effort of adding Student Learning Outcomes to eLumen began in fall 2007 and college assessments began in spring 2008. Using eLumen as a research and data entry tool for student learning outcomes has increased college awareness to both process and implementation of the student learning outcomes initiative. Outcomes data is published through the district ClassWeb homepage for students and the public to view. Publication of learning outcomes information on ClassWeb allows students to review specific outcomes to courses in which they may choose to enroll. The college’s eLumen contact has provided eLumen with feedback on the software which they have incorporated into their software updates. eLumen funded the college’s representative to attend a student success conference in San Jose, where she presented the college’s implementation of eLumen to the attending California community colleges. Findings developed from student learning outcomes assessment have been developed by the Student Learning Outcomes Committee and are available to faculty and staff of discipline specific programs through the college web site: www.laspositascollege.edu/slo.

Expansion for research that relates to student learning has also been addressed through increased release time for faculty leadership within the Student Learning Outcomes Committee, which has been divided between the implementation of the Student Learning Outcomes planning...
RESPONSES TO PREVIOUS SELF-STUDY RECOMMENDATIONS

and review cycle and the leadership and implementation of the eLumen software. Both faculty positions work directly with the Director of Institutional Research and Planning on continued research, assessment, and publication of findings through the monthly meetings of the committee. The Director of Institutional Research and Planning is a committee member as well. A timeline for Student Learning Outcomes development, assessment, and evaluation has been developed and disseminated through the program review process to ensure that college research is fully accessible throughout all planning programs and to ensure that data resulting from Student Learning Outcomes processes is a part of the college planning and resource allocation model.

Over the past two years (2006 and 2007) the college has focused on the Student Learning Outcomes cycle to ensure that all disciplines had developed and assessed outcomes. Beginning in 2008 the disciplines will be able to review the outcomes assessments and begin data analysis on the link to both program and institutional effectiveness. In 2008, The Student Learning Outcomes Committee has begun reviews of best practice models for this final phase of integration of outcomes into the college’s measurements for effectiveness and, along with College Council, will discuss and develop training for faculty on the use of the SLO assessment data to increase both course and program effectiveness. Within the review process, the committee has made reports to the Academic Senate on working with the program review planning model to integrate the Student Learning Outcomes process into the program review process and to identify core performance indicators for learning outcomes. The integration of research within the program review process provides disciplines with a single report that can be linked to institutional effectiveness and disseminated to both the external and internal college communities. Further discussion of integrated planning is addressed in the college response to recommendation #2.

RECOMMENDATION #2:

The team recommends that College leadership and governance groups evaluate relationships among various planning programs and activities and create an approach for integrated and coordinated planning that provides evidence that financial planning supports institutional goals.

RESPONSE 2009:

The midterm report (March, 2006) reported that the college initiated, developed and implemented a comprehensive educational master plan that has served as the quantifiable measure for the institution’s long term financial planning as it relates to institutional goals.

Since the educational master plan process concluded in 2005, the college has reviewed and updated the plan every year to ensure that planning has been actualized with resource allocation and to verify that the college goals are reviewed for currency and for effectiveness. This is a college-wide process, noted on the website of the Office of the President. In 2006, 2007, and 2008, the Office of Academic Services developed, implemented, evaluated, and revised its own program review process as well. By spring 2009, the program review model will integrate all planning initiatives including Student Learning Outcomes, Curriculum/Content Review into one planning document that will then be subsumed into the long range plans noted in the college’s educational master plan. The integration of instructional and student services planning with an
RESPONSES TO PREVIOUS SELF-STUDY RECOMMENDATIONS

upcoming unit program review model, along with the integration of the program review planning model into the larger institutionally based educational master plan, will allow the college to develop, implement, evaluate, and track the progress of planning and goal setting on both a yearly basis and on a long term basis which ultimately promotes both strategic planning and visionary planning. Finally, the college is undergoing its “non-instructional” unit program review with an integration cycle that seamlessly articulates into the existing four-year Academic and Student Services program review cycle.

Responsible committee representation for planning occurs in the Planning and Budget Committee, the College Council, and the Program Review Task Force, a direct report to the Academic Senate. Efforts of academic and student services disciplines become part of the working model of Academic Senate and Student Services constituents and goals for specific types of instructional and student services program review planning are sent to appropriate shared governance committees campus wide. Within that context, possible allocation sources are identified and planned for in advance. Resource allocation opportunities that run through the Planning and Budget committee are part of the make up of the committee agendas. Resource allocations that come from additional sectors or committees are also listed within the program review process so that programs can advocate for financial supports from a myriad of areas across the institution, including staff development, Foundation grants and allocated program review goal funding through the Office of Academic Services. A list of all possible allocation sources is included in the program review model. In addition, in fall 2008 a program review goals database will be completed so that institutional allocation sectors (Planning and Budget Committee, Staff Development Committee, etc.) can be notified of college planning requests at their first fall meeting ensuring that agendas will be developed that link planning to college business on a yearly basis.

The college has begun its review of Effectiveness Models in 2008 through initial discussions at the Student Learning Outcomes Committee. Although there is initial effectiveness data available through current program review process, the College Council will review models and recommend a model to be integrated into all institutional planning processes.

The midterm report also noted two additional achievements that demonstrate the institution’s commitment to financial planning with the local bond allocations running through the Facilities Committee and the Las Positas College Foundation assisting the college in its fiscal planning opportunities with Foundation resources. Both resources are included in the program review process. Additional institutional planning documents from both the Technology Committee and the Distance Education Committees are available as well, with the latter a direct response to the college’s 2007 Substantive Change Report. The college is also undergoing the development of a Staff Development program and plan to recommend to the president for implementation in the fall of 2009. Further information regarding planning, programs, and activities are discussed in Standards One and Two.
RESPONSES TO PREVIOUS SELF-STUDY RECOMMENDATIONS

RECOMMENDATION #3:

The team recommends that College and District leadership evaluate and define responsibility and processes for planning and financial oversight, as well as for other common functions at the College and District. Other common functions to collaboratively assess may include, but need not be limited to, human resources, information technology, research, and business services.

RESPONSE 2009 – GENERAL:

The 2004 Progress Report stated that the college has continued to define responsibilities and processes for district/college planning and functions. The function map developed by the district is one outcome of those definitions. Although the college and district need to continue these discussions in light of the new leadership at the district as well as the college, the recommendation for more assessment has progressed. The district formed an Administrative Process and Procedures Task Force (APPTF) to review existing documentation and to determine what informal processes needed to be codified. The task force reviewed the district business and administrative functions with specific studies completed on the process and effect of payroll, financial aid, and facilities planning and construction. This task force, before it disbanded, also developed guiding principles for district procedures.

The 2006 midterm report separated out responses to this recommendation by district sector including: Business Services and Human Resources. At the college level, a separate response included research. The summary of those completed goals remains the same with a few changes and additions due to a change in leadership at the district and due to many technology driven procedures that have provided a difference in process noted in the 2006 midterm report. Las Positas College has expanded its Self-study for 2009 to include Information Technology as well. Additional information on each sector can be found in Standards One, Three, and Four.

RESPONSE 2009 – BUSINESS SERVICES:

Budget: Following the 2003 Accreditation Visit, the district conducted a Strategic Cost Management approach to developing a framework for defining programs and services in terms of how they meet the needs of students and to look at the mission, goals, and activities of the colleges and the district. This study was incorporated into the District Strategic Plan. For Business Services, the district and college continue to work within the confines of Board Policy 2012. The Vice Chancellor of Business Services reports directly to the Chancellor and has the following key positions within his direct supervision: Director of Facilities Planning; Maintenance and Operations; Purchasing and Administrative Business Operations. At each respective college, there is also a Vice President of Administrative Services who works with the district Vice Chancellor on Business Services planning and processes.

A District Budget Study Group was formed to discuss budget communication and timelines to ensure that the colleges were aware of the process and development of annual budgets. Although this group has not met within the last few years, it is a standing committee that considers FTES targets, procedures for allocation of revenue, procedures for review of the model, and procedures for establishing new categories and definitions. The first restructured meeting of the District
RESPONSES TO PREVIOUS SELF-STUDY RECOMMENDATIONS

Budget Study group was held in December 2008 with continued meetings calendared throughout spring of 2009.

Board policy #2012 continues to drive the roles and responsibilities noted in the 2003 recommendation response with one noted change in the reports line. With the hiring of a new Director of Human Resources (now Vice Chancellor of Human Resources), the district has changed the direct report of Payroll to Human Resources. This decision helps to streamline the process of hiring and timesheets as well as offering an oversight at the employee induction level within the district. Oversight of financial reporting continues to be a joint process between district business services administration and the Vice Presidents of Business Services from both colleges, who hold meetings twice monthly.

The consultant report completed by School Services of California and noted in the 2006 midterm response was conducted, and a district developed budget development calendar was implemented for the colleges. This calendar defines deadlines, and identifies individuals/groups responsible for budget development. The calendar promotes shared responsibility and mutual accountability at the college and at the district level. Finally, the district and college budget officers meet twice a month to review and plan for budget issues and allocation discussions.

RESPONSE 2009 – RESEARCH:

As noted in the midterm report, Las Positas College has its own Office of Institutional Research and Planning, but there is no corresponding district function at this time. As noted, there are several institutional reports generated from the Las Positas College Office of Institutional Research and Planning on a regular basis. Reports are derived from the program review process, discipline and unit specific needs, state mandated reports, and reports for the developmental education planning and assessment process. These reports include: ACCC Annual Report to the Board; EXPO Survey/Student Profiles; Graduation Survey; Student Satisfaction Survey; Diversity Data 2005; 2007; 2005-2007 Comparisons; Skill Development and Demographics Report 2001; 2003; 2005; 2007 Comparisons; Environmental Scan for Master Planning; Annual Student Demographics Report; Fast Fact (Semester-to-semester changes in student profiles); 2007 Focus Group Study on Dialogue; Annual High School Report, and the ARCC (Accountability Reporting for Community Colleges).

Each institutional report is placed on the Office of Institutional Research and Planning website and also communicated to the campus at large through a variety of means for planning and evaluation purposes. Access to research information is available to the district for any district planning or initiatives that arise.

The Las Positas College Office of Institutional Research and Planning regularly collaborates with the Chabot Office of Research and Grants. Chabot College has a larger staff that assists LPC in the production of reports common to both colleges, such as the student characteristics report, benchmarking data, and course sequencing data.

In the fall of 2008, the Las Positas College Office of Institutional Research and Planning added a temporary part-time position to the staffing for the research office. This additional hire continues to respond directly to the need for continued data especially within the context of the college’s
RESPONSES TO PREVIOUS SELF-STUDY RECOMMENDATIONS

yearly average of 3% growth in student body. This growth extends to additional opportunities for research which, in turn, ensures that the college works to meet district need for data as well. The current Accountability Reporting for Community Colleges (ARCC) presentation given to the board each year is one example of this extended collaboration.

This additional research position specifically assists in the documentation and communication of basic skills data and other types of student success data. Compiled data will be readily available to the district Vice Chancellor of Educational Planning for a collaborative determination of possible grant applications and for use in the district’s future planning for off-site learning opportunities.

RESPONSE 2009 – HUMAN RESOURCES:

Since the midterm report was filed, the district has hired a new Director of Human Resources in 2007 (now titled the Vice Chancellor of Human Resources). Within that leadership change some key technology procedures have been added to process that have assisted the college and the district in responsibly verifying, streamlining and formalizing processes and ensuring that the college and the district are utilizing common forms and functions as we complete necessary transactions for hire, evaluation, and planning purposes. In addition, improved electronic forms and a streamlined board process assure lines of responsibility and improves processes.

Included in some of the updated procedures have been electronic forms for personnel hiring, a draft for hiring process and procedure manual and electronic forms for many of the district and college functions as they relate to the Faculty Association contract. The Office of Human Resources also conducts monthly meetings at each campus to facilitate discussion on process changes, form changes, and board packet changes.

For continued effective communication and role delineation one of the college staff acts as a liaison to the Human Resource staff at the district office. As noted in the midterm report the centralization of the comprehensive services offered in Human Resources remains at the district office; however, the full-time classified staff member who acts as the liaison augments those services and functions and works directly with the sectors at the college so that communication is centralized and maintained as well as assisting the college in making sure processes are enacted in a consistent and timely manner. This employee often works at the district Office of Human Resources to train and learn new procedures, process, and policy and then shares that training with the campus at large.

Human Resources: Board Policies 4006 and 4012 provide district policy regarding faculty and staff diversity as well as equal employment and selection. These policies are reviewed in accordance with Title 5 regulations and will be enforced by a new position to be hired at the district. The position will be in charge of the promotion of equity in recruitment, employment, and promotion of employees to bring about employee representation of age, gender, and ethnic groups. District Human Resources is also hiring for leadership in the area of Emergency Training and Safety regulations so that the college can be provided adequate training and service in regard to state and federal emergency response.
RESPONSES TO PREVIOUS SELF-STUDY RECOMMENDATIONS

Functions of Human Resources noted in the midterm report remain the same with the addition of Payroll direct reporting instead of what was previously noted under District Business Services.

RESPONSE 2009 – INFORMATION TECHNOLOGY:

Recommendation Three noted the “may include but not be limited to” section to Business Services, Research, Human Resources, and Information Technology. Although not included in the midterm report, the college believes that significant strides have been made between the district and the college in its definition of information technology and corresponding responsibility and function.

The college has an Information Technology staff of five classified staff and managers. In addition to the Information Technology staff at the college, Las Positas College also has two full-time classified staff that assist in maintaining the Blackboard system and other technology related processes as they pertain to instruction. All of these college staff work directly with the District Information Technology staff to maintain systems, provide feedback for system improvement, and work through system upgrades. The staff at the college also collaborates with the district in order to provide consistent service with technologies in the classroom, in the office, and through our system wide MIS system. Responsibilities common to both the college and the district are noted in the district/college responsibility chart developed by the District Office.

Since 2006, the district has worked with the college Information Technology staff on implementing several software and system supports that have assisted the college in building consistent process and delivery via technology. These collaborative initiatives have included the eLumen software that houses our district wide Student Learning Outcomes data; the new portal project/software currently being implemented district wide, Luminis; DegreeWorks, a tool to assist Student Services programs in auditing student transcripts, and the online grading and attendance reporting process. These collaborations directly affect college planning and assist programs and services in becoming more effective and in streamlining outdated paper processes.

The Director of the Information Technology staff at district has been an active participant in the college Technology Committee and has helped to respond to the 2008 Technology Plan. In addition, the 2008 Distance Education plan developed by the college as a part of the institutional response to online learning has also been sent for review to the district Information Technology staff so that the college can continue with planning that can be supported with both the backbone infrastructure and the internal processes necessary for continued planning and implementation.

Finally, the college submitted and had approved its Substantive Change report to WASC, (March 20, 2007). The approval of this report continues to develop and implement collaborative opportunities within Information Technology for the college and district to maintain and increase quality technology applications within the instructional area.
RESPONSES TO PREVIOUS SELF-STUDY RECOMMENDATIONS

RECOMMENDATION #4:

The team recommends that the College develop and implement a regular cycle for the review and revision of all course outlines that includes clearly stated learning objectives, anticipated outcomes, and methods of assessment.

RESPONSE 2009:

As noted in the September 21st 2004 Progress Report on Recommendations from the Accreditation Commission, the college has completed this recommendation with the Curriculum Handbook, the Curriculum Review section of the cyclical systematic program review, and the current completion of the integrated outline for all courses offered throughout the college. The Title 5 guidelines for integrated outlines have been institutionalized through the college integrated outline. Those catalog courses noted as outstanding have been completed and sent through the curriculum approval process. In addition, the college has created and approved both a Program Introduction Process and a Program Discontinuance/Revitalization Process to ensure that new programs will be created within the integrated outline model and courses no longer meeting student need can be inactivated according to a faculty driven response.

Two documents responded to this recommendation: the Progress Report on Recommendations from the Accreditation Commission (September 21, 2004) and the midterm report (March, 2006). The college has documented its compliance with the requirements of Title 5 Section 55002 by developing an integrated course outline of record for all faculty to use in their current curriculum development. Within the revised program review process, the faculty are asked to update their curriculum every four years, with bi-annual updates included. The timeline for consistent curriculum review has been imbedded within the program review model and began it implementation for regular and consistent review in fall 2008.

The college has taken an aggressive stand in assisting faculty with the pedagogical and quality analysis involved in curriculum development by including a workshop on Curriculum Development in the yearly New Faculty Orientation Staff Development series, and in fall 2008 the college held its first all campus Curriculum Celebration created to train all faculty in Instructional Design, Academic Senate Curriculum updates and the Curriculum/Content Review cycle integration into the program review model. Systematic review and evaluation of curriculum development has been incorporated into the Curriculum Review section of the college program review model.

Additional online training modules in alternative assessments, best practices curriculum models noted through the statewide Academic Senate conferences, and other pertinent curriculum training is available on the Innovation Center website.

In its recent Substantive Change Report (March 2007), the college was commended for its best practices model of curriculum course outline development and the training provided for faculty who are interested in creating curriculum that requires an understanding of online methodology and learning techniques. As of this self-study, all of the college’s scheduled curriculum courses have been rewritten to comply with the integrated course curriculum model, with all new course proposals directed to the online curriculum model, process, and procedures. In addition,
RESPONSES TO PREVIOUS SELF-STUDY RECOMMENDATIONS

the college curriculum committee chair and Vice President of Academic Services are working collaboratively with the District Curriculum Committee to review, evaluate, and possibly implement Curricunet, a software package, to further ensure regular review cycles.

RECOMMENDATION # 5:

The team recommends that College and District leadership evaluate, delineate and communicate their respective roles and responsibilities related to economic development.

RESPONSE 2009:

During 2004 and 2005, the leadership of both colleges and the district had a series of meetings which evaluated and delineated respective roles and responsibilities in regards to economic development activities. That process yielded mission statements and frameworks for economic development activities for Las Positas College and the district office. That analysis process also recommended that there be an ongoing task force specific to economic development coordination. Due to a series of leadership changes, that subsequent task force did not convened, but has not recently met as of fall 2008. However, the district and the college will be meeting in spring 2009 to evaluate the current status of roles and responsibilities.

In the meantime, the college has moved forward with economic development activities within the mission and framework established in the 2004 and 2005 meetings, and used existing structures and processes to communicate and coordinate economic development activities at the college and across the district. These structures and processes include district wide leadership meetings held in 2004 and 2005, in which economic development was one topic of many, with respective roles and responsibilities across both campuses and at the district offices discussed. Topics of collaboration include joint grant activities, curriculum approval processes, the Tri-Valley Educational Collaborative, and updates to the Board of Trustees regarding economic development work developed and implemented by the college. This process has been fruitful and served the local economy and the college very well. The college is very proud of its record of economic development work (independently as well as collaboratively within our district and across the northern California region).

The framework developed in 2004 and 2005 identified the college economic development activities as occurring within the two broad areas of Vocational Occupational Education (more recently referred to as Career Technical & Workforce Preparation) and Economic Development.

Following are some highlighted activities in these areas which have occurred since the last accreditation visit.
RESPONSES TO PREVIOUS SELF-STUDY RECOMMENDATIONS

Vocational Occupational: Career Technical Education/Workforce Development

1. Career Pathways & Articulation with High Schools, Regional Occupation Program’s and 4-Year Higher Education Institutions
   - Since 2003, LPC revitalized and expanded our approach to aligning Career Pathways with secondary partners.
   - The LPC program (HeadStart on College) was selected as one of 15 “Practices with Promise” in California in 2007 [link]
   - Annually over 600 high school students from 3 counties (Alameda, Contra Costa and San Joaquin) earn college credit at LPC for completion of these courses while still in high school.
   - The program is documented and communicated to all partners (including the District) via a publicly accessible website with a link from the college home page [link]
   - LPC also has numerous transfer agreements in career focused areas with 4 year institutions, documented via the ASSIST database.

2. Degrees, Certificates and Courses Responding to Local Employment Trends
   - Since the mid-term progress report, LPC has developed or revised the following career focused degrees, certificates, and courses.
   - In response to local and regional demand, LPC is developing a pathways program in Allied Health, with four pathways of transfer, clinical (currently surgical technician and EMT), administrative, and health and human services.
   - All curricular changes and developments are communicated within the district and externally to our k-12 partners in a variety of modalities, including semi-annual advisory board meetings, monthly Tri-Valley Educational Collaborative meetings, bi-monthly board meetings, annual board curriculum reports, and the curriculum development process which includes coordination across the colleges.

3. Apprenticeship
   - Working collaboratively with the district office of Contract Education and Bridgestone Firestone, the college developed a for-credit automotive apprentice program.
   - In partnership with the Carpenters Training Council of Northern California, and Pleasanton Unified School District, the college is transitioning existing non-credit apprenticeship programs (administered by the school district) to college credit programs. The college has approved courses, degrees, and certificates in Carpentry, Millwrights, and Piledrivers and is awaiting program approval from the state chancellor’s office along with transfer of RSI fiscal support from the CDE to the college. In the meantime, the
RESPONSES TO PREVIOUS SELF-STUDY RECOMMENDATIONS

college has developed course level credit by examination agreements in these areas and 950 apprentices have earned from 1.5 to 10 units of college credit to date, along with 150 apprentices who have completed 4 to 12 units of work experience for on-the-job training.

4. Internship

- LPC continues to enhance the Internship program to provide work based learning opportunities for students. Internship is now offered every semester and over the summer, and annually approximately 120 students participate in internships in a variety of career areas (mainly in the 12 career pathway focuses identified in 1c above).

Economic Development

1. Community/Regional Long Term Partnerships

- Las Positas College and Safeway Stores, Retail Management Certificate Program: this program continues to grow, and annually 4-5 courses in this 10 unit certificate program are offered on-site at various Safeway locations in the college’s service area, allowing Safeway to develop supervisors from existing employees.

- Carpenters Training Council of Northern California: previously described under apprenticeship programs, this partnership serves 1400 apprentices annually who contribute significantly to the building construction industry of Northern California.

2. Allied Health with Valley Care Hospitals: In partnership with Chabot College and Valley Care, the college is increasing the pipeline of trained nurses in the region. In partnership with Valley Care and our K-12 partners, the college was successful in obtaining an SB70 quick start grant for Allied Health, and has used those funds to develop a program to train surgical technicians and medical administrative assistants.

- Allied Health further development: leveraging success with the SB70 quick start grant, the college was awarded an JDIF and IDRC beginning in 2008 to do further development in Surgical Technician and related areas. This will be a regional partnership with Skyline and Santa Rosa colleges.

- General Motors: The college continues to partner with GM to serve as the Regional Training Center of Northern California to provide training and certification of GM automotive technicians.

- California Bureau of Automotive Repair: the college partners with BAR to serve the community as a local smog check station, and in the process provide internship opportunities and access to advanced training and equipment for LPC students.

3. Special Populations

- In addition to the normal focus on special populations which is well supported by Student Services, the college has also developed a specific focus on recruiting and retaining women in non-traditional fields, primarily automotive and welding. This region, the state, and the US in general are experiencing a significant shortfall in qualified welders. Regionally, there is high demand for automotive service technicians and service writers as well. The college is supported in this effort by being part
RESPONSES TO PREVIOUS SELF-STUDY RECOMMENDATIONS

of an 8 California Community College National Science Foundation/Women in Technology initiative http://www.iwitts.com/html/calwomentech_sites.html

4. Community Education continues to offer fee based courses that respond to community needs.

5. Awarded Grants that Align with College Mission (Since 2004)
   - SB70 Allied Health Quickstart (described above)
   - East Bay - Tri-Valley Community Collaborative Career Technical Education/Economic and Workforce Development Pathways grant (with Chabot, district & k-12 partners)
   - i. East Bay - Tri-Valley Community Collaborative Workforce Innovation Partnerships grant (with Chabot, district & k-12 partners)
   - JDIF (Job Development Incentive Training): Surgical Technician
   - IDRC (Industry Driven Regional Collaborative): Surgical Technician
   - BARTPC

6. Support Services to Business
   - Developing the LPC Entrepreneurial Resource Center website, for fall 08 launch.
   - Faculty participate in local city economic development organizations.
   - Faculty and administrators participate in various Tri-Valley Business Council task forces providing input and collaboration from education.
   - Provide interns and provide opportunity for local industry employees to enroll in work experience and further develop job related soft skills.

The review of accomplishments and evaluation of the 2004 and 2005 committee work will take place in the spring of 2009. Included in that discussion will be the change in leadership and new vision for continued economic development collaborations and partnerships between the colleges and the district, as well as continued community outreach and participation in the college’s growing Career Technical programming. Additional information can be found in Standard Two.
RESPONSES TO PREVIOUS SELF-STUDY RECOMMENDATIONS

RECOMMENDATION #6:

The team recommends that the College and District implement clearly defined hiring procedures for all categories of employees, and assure that those procedures are clearly and consistently communicated in writing to all who participate in hiring.

RESPONSE 2009:

The Office of Human Resources has developed and approved an Administrative Hiring Manual, a Supervisor/Confidential Hiring Manual, and a Classified Hiring Manual for full-time and part-time members. The current Draft for Review for Recruitment and Selection Procedure for Contract Faculty is awaiting Academic Senate review and approval. It should be noted that loss of leadership within the Human Resources area in 2006 and 2007 has pushed back the original adoption of the date from May 2006 to fall 2008. In fall 2008, additional discussions have taken place with both colleges’ Academic Senates.

The piloted formal orientations to selection committees were completed in 2006. This process is also currently being revised and will be available to all screening committees district wide with the hiring of an additional district Human Resources classified position whose responsibility will lie in actualizing both the Hiring Process and Orientation across the district beginning in fall 2008. Additional personnel added to the District Human Resources unit will incorporate continued training and mandated compliance to diversity and equity practices associated with the hiring process. Additional information can be found in Standard Three.

RECOMMENDATION #7:

The team recommends that the College assign responsibility for the implementation of a consistent hiring process for part-time faculty.

RESPONSE 2009:

This recommendation was completed with the 2006 midterm report. The process noted within that report continues to be the hiring process for part-time faculty. One noted addition to the process is the addition of the adjunct seniority process implemented with the Faculty Association contract beginning in 2005. The process for initial hire remains the same; however, once hired, adjunct faculty now have a seniority process for continued employment that is also linked to their evaluation process. The contractual implications associated with the adjunct seniority process have forced the college and the district to continue to review the adjunct hiring process for adherence to the contract, and continued discussion regarding consistency of process occurs with the bargaining units.
RESPONSES TO PREVIOUS SELF-STUDY RECOMMENDATIONS

RECOMMENDATION #8:

The team recommends that the College devise and implement the means for the regular and timely evaluation of administrators.

RESPONSE 2009:

The previous progress report noted the current evaluation process for administrators outlined in Board Policy 4120 with the accompanying evaluation process available through district Human Resources. This online evaluation instrument has a corresponding timeline that accommodates a three-year evaluation cycle: the third year is a comprehensive evaluation, and the other two years are annual evaluations. The current calendar for administrative evaluations is being reviewed to ensure an organized review in conjunction with administrative goals.

This recommendation was completed with the midterm report and has not changed since that report. Administrators continue to undergo both an annual evaluation process and a comprehensive evaluation process with new administrators undergoing the comprehensive evaluation every 2 years and then every three years thereafter. Board Policy 4120 states that each administrator shall be evaluated annually. This process includes goal setting, appraisal, and formal feedback. Forms are available under the district office of Human Resources website.

The timeline for completion has allowed the college to formally begin this process in 2005-2006. All Las Positas College administrators hired before on during 2005/2006 have undergone both the annual evaluation and the comprehensive evaluation. Hires beyond 2006 are in process. Additional information on administrative evaluation can be found in Standard Three.

RECOMMENDATION #9:

The team recommends that the College and the District actively promote the principles of equity and staff diversity inherent in its policies and assign responsibility for incorporating those principles into processes and programs.

RESPONSE 2009:

The Campus Change Network noted in the midterm report continues to serve Las Positas College in the coordination of campus wide discussions and activities that serve to provide a peer led learning effort to support the principles of equity and staff diversity. Primary responsibility for an institutional diversity plan, outreach, and development has resided within this initiative. The Campus Change Network Committee is not a shared governance committee and has purposefully chosen to accept representation from throughout the campus constituencies without any restriction on numbers of participants. The intent of the Campus Change Network is to provide both a breadth and depth process to understanding diversity, valuing diversity, and encouraging diverse perspectives across the college. Updates to the Campus Change Network activities are housed in the educational master plan.

For 2007-2008, the Campus Change Network the incorporation of a mission statement as a part of its charge. It reads:
RESPONSES TO PREVIOUS SELF-STUDY RECOMMENDATIONS

“Campus Change Network is dedicated to increasing diversity, equity and inclusion through dialogue, reflection and action. We will create this environment by modeling culturally competent leadership; supporting and encouraging honest communication, risk taking and openness; reinforcing the principles of equity and diversity in word and deed; and, being a catalyst for educating and empowering our community. We remain learners on our journey towards social justice, and we approach our work with conviction, courage and compassion.”

Areas of responsibility for the incorporation of this mission included a speaker series, a brown bag series/discussion group, and a possible web presence for the mission and activities of the Network. The Campus Change Network is also incorporating its activities around several “keys” to the Network guiding principles. These principles include:

1. Cooperative Inquiry
2. Time to Think and Plan
3. Messy is Ok
4. Students are the focus
5. Leadership is key
6. Build institutional capacity
7. Be patient – it is a long term commitment
8. Learn, then learn some more

The Las Positas College Campus Change Network Capacity Building Plan draft (3/2/07) is available upon request and follows up with specific goals and activities as they relate to the Campus Change Network Mission. Areas of commitment for 2007 and 2008 were built upon the over-arching white paper noted below and distributed to the college at the Flex Day February 16th, 2006 event.

Campus Change Network: Building on Today – Planning for the Future

Historically, community colleges have served as the central, and often the only, bridge to opportunity for Californians who would otherwise not have access to higher education.

Las Positas College is committed to being a bridge to opportunity for all people, by educating the community about our programs, and providing them with equitable access to the college and its services. This past year, Las Positas College was selected as one of eight California Community Colleges to work on strengthening access and equity efforts through a peer-led learning effort called the Campus Change Network. The Campus Change Network involves the coordination and formation of a network, where participating colleges can collaborate and dedicate time to strengthening their student equity plans and/or identifying new areas they would like to apply an access and equity lens.

The Las Positas College Campus Change Network Team identified three initial areas of focus, to support and enhance these efforts (2006).
RESPONSES TO PREVIOUS SELF-STUDY RECOMMENDATIONS

1. Building Cultural Awareness (Campus Climate)

Las Positas College has many special events to celebrate diversity. However, it is important to go beyond celebrating differences at special events, by building permanent representations that reflect the diversity in our community. For example, as the college build’s new facilities, murals or other décor could be added that celebrate diverse ethnic groups. The goal, within a two-year period is for the campus to have permanent representations that reflect the different cultures/ethnic groups in our community.

In order to build a more diverse campus community, it is also important for the college to develop its own definition of diversity. We plan to hold numerous forums to begin this discussion, which could include bringing in guest speakers or going on field trips. The goal within the next year is to develop a campus-wide definition of diversity.

Additionally, faculty must drive equity, access, and diversity as curricular content in their courses. One of the college core competencies for Student Learning Outcomes is Respect and Responsibility; Diversity. As faculty design course and discipline outcomes, faculty can create their own measurements for efforts in this area.

2. Outreach and Recruitment (For Students, Faculty, Staff and Administrators)

In order to better educate the community about the educational opportunities at Las Positas College, it is important to develop diverse media, and deliver this information in a collaborative fashion. Las Positas College staff and faculty provide outreach in numerous ways; however, sometimes they are not aware of the work that their colleagues are involved in. Thus, it is critical to consider an Outreach Coordinator to help the college build upon and coordinate current efforts. This individual would be the campus point person for outreach in the community and could and assist staff with the coordination and implementation of efforts/events. Examples of these activities include:

High School Outreach - Each counselor is assigned at least one high school to work with. The counselor goes to different events, works with the high school counselors/administration to make sure that students are aware of the college’s programs, application deadlines, testing dates, etc. Financial Aid, DSPS, an academic programs also do high school outreach. The Outreach Coordinator could support our counselors, faculty, and staff at different events. One of the network’s goals is to bring online assessment (Accuplacer) to the high schools. Thus, interested students could establish their math, English and chemistry placements before having to come to the Las Positas College Campus.

St. Michael’s Project – In order to build a more diverse student population at Las Positas College, it must go beyond traditional recruitment methods. One such effort the college is currently working on is with St. Michael’s Church. The pastor is assisting the college in reaching out to a large Spanish speaking population in the Tri-Valley Community. The goal is to increase the diversity of the student population, by educating this group about opportunities and making the campus more accessible through supportive services and scholarships. In spring 2009, the college will be hosting a large event for this group on the Las Positas College Campus.
RESPONSES TO PREVIOUS SELF-STUDY RECOMMENDATIONS

Faculty and Staff Outreach – In order to serve a more diverse student population, the college needs to have a faculty and staff that represent the diversity in the community. In order to assist with this effort, it’s important that Las Positas College go beyond traditional means of advertising its positions, by reaching out to more diverse groups. The goal would be to have more diverse qualified pools of applicants, which hopefully would lead to a more diversified faculty and staff. The network will establish a working group alongside the senates to review outreach efforts and hiring practices in the district.

Student Ambassadors – In order to reach out to a diverse community, many different recruitment strategies must be implemented. Through the use of student ambassadors, the college can take a multi-generational approach to relate to a broader number of people. Through the assistance of the college’s diverse student population, the college can show the community that getting an education at Las Positas College is possible for all people, no matter one’s ethnicity, age, socioeconomic and/or disabled background. The goal would be to increase college enrollments by helping the community to better identify with the college as a place that is not only accessible, but also ideal for improving one’s education and livelihood.

The Outreach Committee will continue to develop new and innovative ideas to assist the college with its efforts to educate and recruit members of the community to attend Las Positas College.

3. Basic Skills Student Success (Building the success rate for transferable coursework completion)

In order to promote student success for all students, the governing board of each community college is required to adopt a student equity plan for each college in the district (Title 5). The student equity plan contains “student success indicators” as they relate to the Board of Governors policy on student equity implementation. “Success indicators” are measurable standards used to determine areas for which various population groups may be impacted by issues of equal opportunity.

One area in Las Positas College’s Student Equity Plan the college needs to improve upon is its ESL and Basic Skills completion. The data shows that only 26% of math students and 33% of English students who start in a basic skills courses move on to complete a transferable course within a two-year period. The measurable goal is to significantly improve upon these percentages within a two-year period.

To assist with this effort, the college provides specialized support services for this population. For example, specialized counselors could be hired to work with cohort groups of students to closely monitor their progress and provide intervention services. Through the basic skills initiative, the college will be implementing embedded counseling, increased opportunities for learning communities, and Early Alert. Additionally, faculty in basic skills and specifically the Integrated Learning Center are involved in working with these groups of cohort students. In addition, resources such as book scholarships and transportation assistance are provided to those students in need.

The college will continue its efforts to actively promote these principles through this Network and through the expansion of its philosophy and goals into existing committees and goals within the campus structure. This will include training in the inclusion of diversity and equity within college course outlines, continued speaker series on pertinent topics, and additional programs that promote the mission of the Campus Change Network.
RESPONSES TO PREVIOUS SELF-STUDY RECOMMENDATIONS

Responsibility at the district level resided with the then Human Resources Director, who in 2006 resigned from the position. In 2005, the Human Resource Director started a formal hiring process training which included ethnicity/diversity issues. The director met with each hiring committee which included the Chair (Administrator) and gave a formal presentation on diverse committee representation, diversity of applicants, and the inclusion of diversity sensitive questions within the interview process. This training was then passed on to the Hiring Committee Chairs as a part of each chair’s responsibility. During the fall of 2008, the college also provided an additional Employment and Employee Relations position designed to support staff diversity in the recruitment and employment processes.

Campus responsibility for review of committee membership and review of committee screening process and questions, as they relate to diversity and equity resides with one of the Dean’s of Student Services, who works with the chair of the hiring committee on both processes.

In 2006, Student Services was responsible for the development and submittal of the college Student Equity Plan. Within this plan is an outreach initiative geared towards the success of African American male students within the college student population. Efforts in this initiative began in the fall of 2008.

Working with Academic Services, the college is also embarking on its final phase of the Basic Skills Initiative. The Basic Skills Initiative continues to serve our diverse student population with learning communities, increased student support, and many activities designed to promote the philosophy of equity. Specific activities that support that philosophy include the Inter-Collegiate Athlete program called ACE (Academic Center for Excellence) which provides the college’s athletes with much needed tutorial support, many clubs for students of diverse backgrounds and needs, and diversity programs offered as a function of many of the college’s discipline departments. These diverse programs include supportive events in the foreign language area, the English as a second language area, and psychology. Continued work with embedded counseling, Early Alert, and staff development for the implementation of learning communities will take place in spring 2009.

Spring 2009 will find the Staff Development Committee co-sponsoring a professional development event with Curriculum Committee and Campus Change Network to assist faculty in the development of curriculum and programs that incorporate the themes of diversity and equity as part of the course outline. In addition to this workshop, the Campus Change Network hopes to develop a series of continued professional development workshops to discuss diversity inclusion within instructional assessments and classroom management. Curriculum programs under development or being considered for development include an ethnic studies program and a women’s studies program. Additional information on the principles of equity and staff diversity can be found in all standards.
ORGANIZATION OF THE SELF-STUDY

In spring of 2007, Las Positas College established a steering committee to facilitate the accreditation process. A faculty member and administrator, along with the Accreditation Liaison Officer were selected to work collaboratively as co-chairs. These candidates were approved by their constituency groups. The steering committee worked together to find co-chairs, one classified and one faculty, to head each of the standards in the self-study, taking into account experience, constituency representation, gender, and ethnicity. Each standard was also assigned a resource support team, comprised of administrators selected on the basis of expertise, as well as committee and processes participation. Student representatives were assigned through the Associated Student Body Government.

Steering committee: Dr. Laurel Jones, VP Academic Services, Dr. Amber Machamer, Institutional Researcher, Maureen O’Herin, Faculty Chair, Dr. DeRionne Pollard, President

Editor: Mike Sato, Faculty

Technical Support: John Gonder, Faculty - Wiki Wizard, Jeff Sperry, Classified- Document Czar
ORGANIZATION OF THE SELF-STUDY

Comprised of administrators, faculty, classified staff, and students, the Las Positas College Accreditation Team represented a variety of constituencies, providing the foundation for college-wide participation and collaboration in the self-study process. To ensure a consistent voice for the final draft of the self-study, an editor was selected by the steering committee, based on expertise and overall experience with and knowledge of the college. In addition, the steering committee put in place a technical support group to help with documentation and electronic distribution and discussion of self-study drafts.

Over summer 2007, the steering committee and the technical support team began work preparing for the year ahead, creating:

- The Las Positas College Document Repository. This would serve as the database, available college-wide, of all documents needed as evidence for the self-study;
- A Wiki site for accreditation, which would serve as the college-wide discussion board for drafts of the self-study;
- A writing template for each section of the self-study, providing a guide for the standard committees once they began drafting;
- Tentative timelines.

August 15, 2007, at the academic year’s first town meeting (attended by all administration, faculty and classified staff), an overview of the accreditation process was presented and the importance of college-wide involvement and participation in the self-study process was stressed. A question and answer period following the presentation began the college-wide dialogue that would continue throughout the self-study process.

On August 16, 2007, the Accreditation Team attended an “Accreditation Kick-Off party,” using the day to review the timeline, process, and committee membership. After the meeting (T-shirts and goody-bags in hand), the team was energized and ready to begin the project.

To continue the dialogue on campus, the Institutional Researcher held focus groups with each of the major college committees during August and September, 2007.

In September 2007, letters were sent out electronically and in campus mail to all classified staff and full-time/adjunct faculty, inviting them to select a standard on which to serve, based on expertise, division/department knowledge, and experience with committees and processes. Final selection of membership for each standard was made by the steering committee based on the staff member’s choices, as well as the goal of creating diverse teams that represented the wide-ranging constituencies of the college. By the end of October 2007, membership for each standard was established and published college wide.
ORGANIZATION OF THE SELF-STUDY

COMMITTEE MEMBERSHIP – ACCREDITATION TEAMS:

STANDARD 1: Tim Heisler and Diana Navarro-Kleinschmidt (co-chairs)

_Resources Support Staff_: Sylvia Rodriguez & Rich Butler

_Full Time Faculty_: Randy Taylor, Paul Torres, Leslie Gravino, Stuart Mc Elderry, Abby McCann, Mary Campbell, Sarah Thompson, Zina Rosen-Simon, James Dobson, Lindell Bruce

_Classified Staff_: Elizabeth Noyes, Karen Zeigler

_Student Representative_: Christian Blanco

STANDARD 2: Tom Orf and Scott Vigallon (co-chairs)

_Resources Support Staff_: Jeff Baker, Neal Ely, & Marge Maloney

_Full Time Faculty_: Karen Pihl, Michael Schwarz, Catherine Eagan, Christina Lee, La Vaughn Hart, Cheryl Warren, Tina Inzerilla, Frances Hui, Andrea Alvarado, Angella VenJohn, Marilyn Marquis, Rajeev Chopra, Michelle Gonzales, Teri Henson, Nan Ho, Candy Klaschus, Steven Bundy, Jim Gioia, Cindy Keune, Richard Grow, Richard Dry, Lauren Hasten, Cindy Rosefield, Eric Harpell, Jason Morris, Keith Level

_Classified Staff_: Karen Kit, Greg Johns, Laura Sparks, Andi Schreibman, Virginia Edwards

_Part Time Faculty_: Jeanne Virgilio (and classified), Victoria George

_Student Representative_: Amanda Cervantez

STANDARD 3: Elena Cole and Heidi Ulrech (co-chairs)

_Resources Support Staff_: Bob Kratochvil and Birgitte Ryslinge

_Full Time Faculty_: Mike Ansell, Gina Webster, Lisa Everett, Janet Brehe, Scott Miner, Karin Spirn, Kevin Ankoviak, Dale Boercker, Jane McCoy, Barbara Morrissey, Ken Ross, Jill Carbone, Justin Garoupa, Brian Hagopian, Toby Bielawski, Tiina Hukari, Moh Doud, Bob D’Elena, Jeremiah Bodnar, Adeliza Flores, Ron Johanson, Ruth Hanna, Fredda Cassidy, Terry Johnson, Brenda Weak

_Classified Staff_: Connie Reding, Natasha Mosset, Steve Gunderson, Martha Konrad, Valerie Ball

_Part Time Faculty_: Heidi McMichael (available for editing and feedback)

_Student Representative_: Sudharsan Dwaraknath
ORGANIZATION OF THE SELF-STUDY

Full Time Faculty: TeriAnn Bengiveno, Nancy Wright, John Ruys, Craig Kutil

Classified Staff: William Eddy, Frances DeNisco

Student Representative: Kayla Moreland
ORGANIZATION OF THE SELF-STUDY

On September 21, 2007, the accreditation team attended and sponsored an accreditation self-study one-day workshop in conjunction with Chabot College and Napa College. This workshop, led by members of the Western Association of Schools and Colleges, provided the foundation upon which the team began its self-study process.

Throughout fall 2007, the Steering Committee presented updates and reminders of the self-study process at town meetings and division meetings.

In spring 2008, Las Positas College launched its formal self-study writing with an all day workshop on February 14. In the collegial Las Positas College way, the day began with a breakfast that included an array of valentines decorating the tables, reminding all of just how romantic accreditation can be! After breakfast, the Standard Committees went to breakout sessions to work on their sections of the self-study. Computers were available in each room, and everyone had access to the Document Repository and administrative support. At the end of the day, the whole group met together to reflect on the work accomplished.

By April 4, 2008, the committees completed their first draft of the self-study. Each section of the draft was posted on the LPC Accreditation Wiki site. The entire college community, Chabot College and the District Office were invited to review this draft and offer suggestions using the comment tool on the Wiki site. This allowed universal access to the document and a chance for everyone to comment on the draft and review the comments of others, creating dialogue across all constituencies. After the open review period (April 9-23), the original authors and editor reviewed the comments posted on the Wiki and made changes and revisions to the draft as needed. This was completed on May 19th and became Draft 2. Over summer 2008, the editor revised the draft.

The accreditation steering committee took lead responsibility for completing the abstracts, organization of the self-study, eligibility requirements for accreditation, and responses to recommendations. The college’s institutional researcher drafted the demographics section.

The complete 3rd Draft, including the editor’s revisions and the steering committee’s preamble, was made available to the campus, again using the Wiki for comments and dialogue, on August 15, 2008.9

At the beginning of fall 2008, the faculty chair of the accreditation steering committee presented a self-study process update to the college community at a town hall meeting. After reviewing the completed 3rd draft of the self-study, the accreditation steering committee decided to solicit content experts to review each of the self-study standards. An administrator and a faculty member, knowledgeable about key components, were selected to review each standard for accuracy and completeness. These reviews were completed and submitted to the self-study editor by November 12, 2008. In addition, steering committee members met with the team working on Theme abstracts at the beginning of fall 2008. A draft of the Theme abstracts was complete and posted on the Wiki in November 2008.

9 Previous Drafts on the Wiki
ORGANIZATION OF THE SELF-STUDY

At the October 7 college flex day, the accreditation steering committee’s faculty chair and institutional researcher led accreditation workshops in which faculty members reviewed the self-study planning agendas for accuracy and consistency.

The steering committee also gauged whether the self-study accurately reflected the processes of the college by facilitating focus group discussions. These forums were held December 2, 2008 through December 5, 2008, at different times and on different days in order to accommodate as many schedules as possible.

The steering committees also had the college SLO committee review and provide feedback concerning all sections of the self-study that referenced the student learning outcomes and assessment cycle on campus.

Footnoting the documentation in the self-study was the final project of fall 2008, and was completed December, 2008. A final college-wide review of the self-study draft was completed by February 12, 2009.
ORGANIZATION OF THE SELF-STUDY

ACCREDITATION TIME-LINE
TENTATIVE SCHEDULE – UPDATED JANUARY 2009

Summer 2007:
• Set-up focus groups
• Draft surveys
• Training and reference book
• Training workshops
• wiki set up
• Establish “Document Czar”

Fall 2007:
August 16 Flex-day
• Steering Committee and Chairs training workshop
August/September
• Feedback on drafts of surveys
• Draft of faculty and staff sign-up for Standard Committee flyer
August/September Focus groups
September 21 WASC training for Steering Committee and Chairs
September Faculty and staff sign-up for Standard Committee teams
October Type up Focus groups report
Early October Print surveys
Mid October Launch Surveys (Student and Staff)
November Scan/correct surveys
December Town Hall meeting
• Overview of accreditation process
• Standard Committees meet

Spring 2008:
February 14 Flex-day
• Self-study Launch Day Committee work sessions and wiki training for all
February - April: Complete 1st Draft and post on wiki for open comments
• 1st drafts of sub-sections are written by committee members
• Drafts submitted to Co-Chairs by April 4
• Co-Chairs review drafts and submit to Jeff Sperry to post on wiki by April 9
• April 9-23: campus reviews and comments on 1st draft, using wiki
ORGANIZATION OF THE SELF-STUDY

April 28-May 19 Complete 2nd Draft
  • Original authors/experts make edits, based on wiki comments, and submit to chairs
  • May 20 - Steering committee and editor (Michael Sato) review 2nd draft

Summer 2008:
  • Michael Sato edits 2nd draft
  • Steering Committee writes Preamble and Introduction to Self-Study
  • Expert Reviews
  • 3rd Draft complete by end of Summer

Fall 2008:
  August Flex-day Training to edit 3rd draft- emphasis on Planning Agendas
  October Campus reviews and comments on 3rd draft, using wiki
  October/November Expert reviews (administrators and assigned faculty w/ stipend)
  October Themes completed and posted
  November/December Drafts to Michael Sato as completed
  December 1-5 Focus groups on each standard

Spring 2009:
  January Meeting with graphic designer
  January 30 Comprehensive draft completed
  February Final all-campus review
  April Re-run Staff Survey on key variables for addendum update
  April Draft to Board of Trustees and to College Council
  May Run staff data from fall 2007 and spring 2009 for addendum update
  Summer Submit Self-study to WASC.
  Summer Begin addendum update to be given to site visit team in October 2009

Fall 2009:
  Site Visit
THEMES

INTRODUCTION

As a precursor to your accreditation reading adventure, Las Positas College is providing the six themes as the framework through which you see the picture of our travels. Since our last accreditation visit in 2003 the college, like Gulliver, has travelled to many lands and exotic places in our efforts to secure student success as a part of their educational voyage. This introductory section, through example, provides the context of our thematic response as an institution of higher learning. The undertakings and achievements highlighted in this section are the road signs of that journey, and they mark both progress and new directions in Institutional Commitments, Evaluation, Planning and Improvement, Student Learning Outcomes, Organization, Dialogue, and Institutional Integrity. Although the journey is never finished, Las Positas College is proud of the accomplishments represented here, and we offer them as demonstrations of collective steps forward that improve student learning. As you peer through the lens of Las Positas, and come to know us for our response to the standards, remember the stepping stones we have trodden to become the college we are today. We wish you well on this adventure and look forward to a continued dialogue with the team regarding new roads we may wish to travel.
THEMES

THEME 1

INSTITUTIONAL COMMITMENTS

For the life of Las Positas College, we have been on a journey formed by our commitment to students. This commitment to students has several dimensions, one of which is a commitment to diversity, inclusion, and equity. As a part of our vision and continued presence in the community, the college’s face is changing to represent the needs of our ever-changing landscape.

Las Positas College’s commitment to providing high-quality education involved the creation of the Campus Change Network (CCN). CCN was created four years ago and is “dedicated to increasing diversity, equity and inclusion through dialogue, reflection and action. We will create this environment by: modeling culturally competent leadership; supporting and encouraging honest communication, risk-taking and openness reinforcing the principles of equity and diversity in word and deed; and being a catalyst for education and empowering our community. As learners on our journey towards social justice, we approach our work with conviction, courage and compassion.” CCN is comprised of administrators, staff, faculty and students. This group meets monthly and has also participated in annual retreats.

In the 2007/2008 academic year, subcommittees were created to implement CCN’s mission. The subcommittees facilitated activities and projects including a Speakers Series, Brown Bag Discussions, and Web Presence. The Speakers Series comprised one event the first Friday of every month to enable both campus and community to participate in campus change. Events included a panel discussion celebrating National Coming Out Day and an evening with Dr. Doris Allen. The theme for the Brown Bag Discussions was “privilege”, and it included an exploration of “Unpacking the Knapsack,” as well as a viewing and discussion of the film “Mirrors of Change: Making Whiteness Visible.”

The theme for the fall 2008 Brown Bag Series was cultural competency, and for spring 2009, it is students of the future. The fall theme for the Speakers Series was “Exploring the American Landscape: Celebrating our Diversity.” Both themes exemplify CCN’s mission to increase diversity and equity through dialogue and action.

CCN is also examining ways to infuse the group’s goals into the curriculum and hiring practices, and documenting the impact CCN members have on campus constituencies by creating a “sphere of influence” report. This report documents other groups to which each CCN member belongs and how those groups may be influenced by the work that CCN is doing.

CCN, through its mission and programs, encourages understanding and respect for diversity. As a teaching and learning campus community, we promote the mission of Las Positas College with the focus of diversity and equity as it relates to all aspects of the institutional mission. This focus continues to guide the CCN as we support lifelong student learning.

As the college moves to its future, the commitment to campus change will change the look of education as it delivered to our dynamic community. These changes will reflect college-wide discussion and, ultimately, college-wide outcomes as they relate to diversity, inclusion, and equity.
THEMES

THEME 2
EVALUATION, PLANNING, AND IMPROVEMENT

Las Positas College participates in ongoing institutional evaluation and improvement to ensure our students receive the best educational experience possible. As with other journeys, this one continues to move us forward by trial and error and by continued discussions with faculty and staff on how the college can both simplify and integrate this theme across the institution. Las Positas College considers itself a learning college, where the students’ needs are prioritized in all institutional processes and decision making. The theme of evaluation, planning, and improvement is vital to the success of students, and the college is committed to increasing its capacity to make this process meaningful for students’ educational goals and achievement.

The planning cycle is comprised of goal setting, resource distribution, implementation, and evaluation. Evaluation focuses on student achievement, student learning, and the effectiveness of processes, policies, and organization. Improvement is achieved through an ongoing and systematic cycle of evaluation, integrated planning, implementation, and re-evaluation.

The institution relies upon integration of all three of these processes for ongoing development of programs and services. The college pursues all avenues available to develop, implement, and maintain these processes as they relate to the goals and overall mission of the college.

In 2001, the College Enrollment Management Committee (CEMC) was formed to help disciplines to develop schedules that would maximize access for students and offer students a broad range of choices to help them complete their educational goals. The development of the CEMC was faculty-driven and program-focused. The disciplines work with the CEMC to determine the number of sections of each course offered by a discipline, the comprehensiveness of course offerings, and the scheduling of classes to maximize students access, success, and equity. Discipline coordinators submit discipline plan proposals to the CEMC each fall semester, and through a deliberative process, the CEMC assesses the aggregate plans relative to college enrollment and productivity goals.

The CEMC has been a model of evaluation, planning, and improvement as they relate to scheduling, program planning, evaluation of program effectiveness, and program improvement. The data derived from the process serves the college in other processes as well, including resource allocation, curriculum, and facilities efficiency.

Las Positas College has been energetically engaged with process development and change through evaluation, planning, and improvement. This journey has taken the college from its small, familial origin to an institution with close to 9000 students, all with unique educational needs. Along the way, Las Positas College has made a commitment to improving itself with reviews and evaluation of college planning as it spans the activities of the institution. LPC’s future will be shaped by increased access to data, increased numbers of full-time faculty to assist in college planning and improvement, and increased awareness of its changing student body as it relates to evaluation, planning, and improvement college wide.
THEMES

THEME 3
STUDENT LEARNING OUTCOMES

Student learning outcomes have marked Las Positas College’s path long before they became a focus of the accreditation process. The path has had some rocky patches, but the faculty of the college have not only been committed to the importance of outcomes; they have continued to develop and implement programs that infuse outcomes based learning at every juncture. One of these programs is our College Foundation Semester.

The College Foundation Semester (CFS) at Las Positas College is a learning community. The program has its roots in The Digital Bridge Academy (DBA) which began at Cabrillo College’s Watsonville Center campus and serves a predominately Latino population. College Foundation Semester students are under-prepared, under-represented, and considered unlikely to succeed in college. Often at risk for financial or social problems, students find in CFS a path to a hope for a college education and a fulfilling career. For each of the faculty and staff involved in the program, one word comes to mind when describing this program: transformative—not only in terms of what happens to students, but also to the faculty themselves.

The program at Las Positas College began in 2005, after two faculty attended a two-week workshop headed by Diego James Navarro, the founder of the Digital Bridge Academy. During the intensive training, faculty played the role of the students attending their first two weeks of the program. In fall 2005, these faculty actually taught the class, Foundations/Learning Success (GNST 100), at Las Positas College. The program is an interdisciplinary and holistic approach to learning that includes courses in math, English, computer information systems, and psychology-counseling.

Since 2005, more faculty have attended the training, and three have become master teachers who are able to train others. Presently, the college has trained two counselors, two mathematics instructors, one English instructor, and one computer instructor. Other faculty and student services representatives, who have not yet received the formal training, are nonetheless committed to the program’s philosophy and goals.

In fall 2008, the College Foundation Semester entered its third year. During the fall, the group of faculty and staff met once a week to discuss the progress of their students. There are now two cohorts of students: one of the cohorts is for athletes, and the Athletic Director works in conjunction with CFS to recruit eligible athletes.

The development of Student Learning Outcomes is one of the commitments threaded throughout the standards. Both the college’s principles and the ACCJC/WASC standards insist that the institution consciously and robustly demonstrate the effectiveness of its effort to produce and support student learning by developing an SLO cycle.

Affective learning outcomes at the core of the program were cited in the model program, the Digital Bridge Academy, and the CFS includes them in each of its course syllabi. Examples of these are:
THEMES

- Students will attend every class.
- Students will come to class on time.
- Students are prepared for class and complete homework on time.
- Students pay attention in class, stay focused and do not distract others from doing their work.
- Students can define disruptive behavior.
- Students will make and keep agreements.
- Students will respect instructors and each other.
- Students will fully participate in activities.

In addition to the above, each class has its own set of learning outcomes.

Las Positas College has been diligent in ensuring that student success at all levels is included within its outcomes processes and assessments. The College Foundation Semester is an example of the college’s commitment to providing basic skills for all eligible students and for providing exceptional faculty and staff committed to the student learning outcomes so vital to the program.
THEMES

THEME 4
ORGANIZATION

Las Positas College has in place the organizational structure to develop, implement, and review programs, curricula, and services that promote student learning. Following the shared governance model, faculty, classified staff, students, and administrators play different, yet equally important, roles in the decision-making processes on campus. The college’s commitment to prioritizing student needs in all decision making characterizes these processes. As Las Positas College continues its exploration into the intentional organizational use of student learning throughout the institution, there will be extended opportunity to evaluate our organizational structure by how well it supports learning.

The committee structure on campus offers all constituent groups (students, faculty, staff and administrators) opportunities to participate in the institution’s governance. Decisions at the committee level are made in accordance with the college’s mission statement, values statement, and guiding principles. One of the best examples of the organizational theme can be found in the Facilities Committee. With the passage of the municipal bond, known as Measure B, came the means with which to upgrade many buildings and classrooms on campus. The Facilities Committee receives requests from the Academic Services program review, the Student Services program review, the institutional planning for new and renovated buildings, and from the educational master plan.

With this input, the committee has worked diligently to ensure that all facilities projects are planned in the best interests of students and designed to enhance students’ learning. Evidence of this was a recent decision to reallocate Measure B funds to a renovation project centered on the needs of our students who are taking science and science/lab classes. In addition, the committee agreed that all classrooms in any of our new buildings must be “smart” classrooms with state-of-the-art technology that supports innovative teaching and makes instruction more accessible to students.

Student learning has also been supported and enhanced with the Facilities Committee’s commitment to LEEDS standards. The emphasis on sustainability assures students that the campus is committed to a learning environment that supports environmental efforts that will ultimately reduce the college’s energy expenses through solar panels installed in the college’s parking facility, as well as energy-efficient cooling systems.

As the campus community grows, the Health & Safety Committee works to ensure that Las Positas College remains a place where students are and feel safe. Emergency call boxes are in convenient places around campus, escort service is provided if a student requests it, and emergencies are handled by campus security staff in a timely, organized, and efficient manner. In service to the health of the entire community, revision of the current smoking policy will confine smoking to the parking lots, away from the walkways through campus, beginning in spring 2009.
To better serve our students’ needs and support their learning, Academic Services was reorganized approximately three years ago. The process of realigning the divisions included participation of every constituent on campus. Focus groups, working teams, and college-wide meetings were held to collect the broadest amount of input possible. The reorganization resulted in a more equal division of responsibilities for administrators and their staffs, helped us improve productivity, and enhanced our curriculum.

Las Positas College has an organizational structure in place that provides students and campus staff with the open and inclusionary communication and decision-making processes that support student learning. As the college vision takes us to deepening understandings of how learning is occurring, the campus will be better prepared to evaluate its structure as a learning, student-centered institution.
THEMES

THEME V
DIALOGUE

As a college, we are exploring a variety of methods and opportunities for dialogue. These have included innovations ranging from web streaming out of the Office of the President to focus groups charged with the evaluation of dialogue opportunities on campus. As LPC explores the surprises that come with the dialogue experience, we persist in finding additional opportunities to develop this theme campus wide.

The institutional commitment to open dialogue may best be illustrated by examining discussions held in monthly all-college Town meetings, division meetings, and informal discussion groups. Faculty and staff organize their schedules so that they can participate in the Town meetings on the first Wednesday of each month. These meetings provide opportunities for members of the campus community to discuss student success and reflect on organizational challenges. The September 2007 Town meeting was devoted to discussing the traits, competencies, and challenges facing the incoming LPC president. In other months, meetings have been held to discuss important issues facing the college including the budget, consideration of a compressed academic calendar, and updates on campus facilities. In short, Town meetings serve as an opportunity to dialogue openly and honestly and use dialogue to guide institutional change.

Monthly division meetings are held the third Wednesday of each month. These are an opportunity for faculty members to meet with colleagues in their division and address the business of the institution. At division meetings, new curricula from various disciplines are introduced, reviewed, and approved by the division’s faculty. This encourages dialogue between divisions and helps faculty keep current with the content of courses that are outside their own areas. In addition, faculty have the opportunity to share their concerns with their colleagues in a safe, relaxed atmosphere. As busy as faculty are with the work of their own disciplines, the monthly meetings allow them to reconnect a larger field of instruction at the college. The division meetings also give the division deans the opportunity to discuss the campus’ administrative issues with the faculty.

In addition to the formal, standardized meetings, the president of Las Positas College has instituted more informal opportunities for meaningful dialogue, feedback and reflection. When she began her tenure in spring 2008, the president instituted Listening Tours during which the campus community could discuss issues that were important to students and staff. These were informal gatherings to which all were invited. She has also asked for feedback, anonymously or otherwise, about the institution’s successes and areas for improvement. The president is continuing this trend by having monthly “Yak N Saks” on different days and times to continue to dialogue with as many members of the college community as possible.

Finally, to encourage dialogue with the broader community, the president has instituted a President’s Advisory Council comprised of members of the larger community, including elected officials, business people, representatives from the faith communities, and other interested parties. In their monthly meetings, they address emerging trends in the community, ways the college can meet the expanding needs of all the different segments of the community, and ways to best serve the community.
The college will continue on its pathway to dialogue and will integrate reflection and committed follow up to dialogue as well. Las Positas College will move forward with its promise to listen and learn, and to make an astonishing difference as a result.
THEMES

THEME VI
INSTITUTIONAL INTEGRITY

The college strives for honesty and truthfulness in all of its self-assessments. This accreditation self-study is evidence of the intention of Las Positas College to demonstrate the integrity that it expects of its students, faculty, employees, and administrators.

During this accreditation cycle, a faculty accreditation chair took the helm for the writing of the self-study. In spring of 2007, Las Positas College established a steering committee to facilitate the accreditation process. A faculty member and administrator, along with the Accreditation Liaison Officer, were selected to work collaboratively as co-chairs. These candidates were approved by their constituency groups. The steering committee worked together to find co-chairs, one classified and one faculty, to head each of the standards groups in the self-study, taking into account prospective co-chairs’ experience, constituency representation, gender, and ethnicity. Each standard was also assigned a resource support team, comprised of administrators selected on the basis of expertise, as well as committee and processes participation. Student representatives were assigned through the Associated Students of Las Positas College.

The Las Positas College Accreditation Team represented a variety of constituencies, providing the foundation for college-wide participation and collaboration in the self-study process. Over summer 2007, the steering committee and the technical support team began work preparing for the year ahead, creating, as an example, the Las Positas College Document Repository. This online repository would serve as the data base, available college-wide, of all documents needed as evidence for the self-study and a Wiki site for accreditation, which would serve as the college-wide discussion board for drafts of the self-study. This provided universal access to the document and a chance for everyone to comment on the draft reports and review the comments of others, creating dialogue across all constituencies. These two pieces of the process ensured transparency of the process for all internal stakeholders throughout the writing of the self-study.

In addition to the college-wide accreditation self-study, various entities on campus conduct their own program reviews and self-studies within self-determined time frames. Academic Services conducts its program review with a primary objective to assure the quality of the educational program as one that fosters student learning and reflects student needs. Academic Services Program Review connects to all college planning processes and helps maintain institutional integrity through its several purposes:

- To evaluate how well an instructional program functions in relation to student learning objectives, the mission of the college, the college’s institutional goals and priorities, and the needs of the community and the external stakeholders according to the educational master plan and Student Learning Outcomes;
- To strengthen the planning, integration, development, and implementation of educational programs in accordance with the overall college educational master plan;
- To strengthen outreach and articulation through Student Learning Outcomes and the educational master plan.
Student Services also conducts periodic division-wide program review with the intention to promote truthfulness, to demonstrate honesty in its services and among its staff members, and to showcase and increase regard for equity and diversity on campus. Each program that is housed in the student services segment of the college conducts a self-study. These results are then published for the campus-wide community on the intranet.

Planning documents such as the educational master plan, information on the progress of Measure B, and a variety of other materials that are important to the community are mailed out periodically to the community service area, and they include specific information and updates on college programs, planning, and procedures. This ensures that external stakeholders are kept aware of the activities that take place for the college. Another way that external stakeholders are kept informed about campus planning and activities with regard to equity and diversity is through the college website. The website contains specific information on college activities, a word of welcome and introduction from the college president, and links to the accreditation wiki, campus initiatives such as the Student Success Initiative (also known as the Basic Skills Initiative), and other planning documents which can be accessed by both internal and external stakeholders.

Las Positas College works on demonstrating to its internal and external community a sense of institutional integrity and of performance to the college’s potential. The paths the college has followed to bring it this far include creating and implementing clear and consistent processes and procedures, involving all constituents in developing and demonstrating the college mission, and evaluating how our demonstrations of integrity are perceived by the community at large. We will continue to follow paths that unite the college community’s rich stores of knowledge, experience, and skills with the values it holds as an institution.
RUBRIC ABSTRACTS

PROGRAM OVERVIEW

The program review process, developed and implemented beginning in 2005, was a direct result of the Las Positas Accreditation visit of 2003. In order to promote awareness of the process and the importance of the review, a collaborative effort between the Office of Academic Services and the Academic Senate was begun. The ensuing dialogue included a review of program review models, a process for inclusion of pertinent quantitative data from the Office of Institutional Research and Planning, and a timeline for process development.

The first program review model (2005/2006) is on the Intranet and accessible from both the Academic Senate and the Office of Academic Services websites. The initial review document included analyses by faculty of quantitative and qualitative data, the development of goals based on those analyses, and limited resource-allocation planning. The completed reviews were sent to division deans for review and approval, and then forwarded to the Vice President of Academic Services; they were also posted on the Intranet.

The second phase of the program review process was the collegial review. This phase included evaluation and discussion of each program review by faculty in the same division but from a discipline other than that of its original authors. As facilitated by the Vice President of Academic Services, faculty and staff then dedicated a division meeting to the review of goals, placement of goals into institutional planning categories, prioritization of goals, and a summary of goals to be documented. The outcome of this collegial review was disseminated to the college at a town meeting with open discussion by the entire campus.

The final phase of the original program review included an evaluative review of the process, a review of the integration of the program review plan into the educational master plan, and a review of the program review process as it relates to institutional planning. It also included a survey of faculty to determine what changes were needed for improvements in procedural effectiveness.

In 2006, a formal review of the 2005 program review process was undertaken by a Program Review Task Force. This team consisted of four faculty representatives, the past and present Academic Senate Presidents, the Director of Institutional Research and Planning, and the Vice President of Academic Services. The review included discussions by campus constituents regarding the final phase of the process and the consideration of faculty responses to guide improvements.

The review of the 2005 process initiated several changes, including a revised timeline for process frequency (from every two years to every four years); a planning template for program review assistance and for increased ease of process; data review and analysis assistance per discipline sponsored by the Office of Institutional Research and Planning; and continued integrated planning every fall semester.

10 2005-06 Documents
11 2006 Program Reviews by Discipline
12 Vice President Responses to 2006 Program Reviews
13 2006-09 Program Review Process
14 Planning Cycle Grid
This integrated planning included Student Learning Outcomes planning in fall 2007 and a Curriculum Review planning template to be integrated into the program review process in fall 2008. The Program Review Task Force agreed to provide faculty with a resource allocation chart for inclusion in the process. The resource allocation chart provides program faculty with a list of potential institutional resources, a timeline for resource requests, and appropriate forms and processes for resource allocation approval. The Office of Academic Services, in collaboration with the Academic Senate and the Student Learning Outcomes Committee, informed the college about the Student Learning Outcomes planning process in fall 2007. Each discipline was asked to move forward according to the Student Learning Outcomes timeline and to consider possible resource allocation requests for their specific planning needs.

In fall 2008, faculty were trained in the implementation of the Curriculum Review planning process. Preparation for the divisions included a college-wide Curriculum Celebration/Workshop, followed by focused training for division representatives through the Curriculum Committee and division meetings. The revised process with Student Learning Outcomes and Curriculum Review integration was shared with the faculty at large through campus memo. The Program Review Task Force agreed to reconvene in fall 2008 to review the yearly update summaries for each discipline’s review. The fully integrated program review process will be implemented in fall 2009 with a complete integrated model to be used for institutional planning.

In spring 2008, each discipline submitted a one-year evaluation and review of its program goals through the use of a spreadsheet that had been revised based on feedback from faculty. This process included faculty review of completed goals, qualitative response to completed goals and increased program effectiveness, and creation of new goals as necessary. New goals submitted by disciplines were reviewed by the division deans and forwarded to the Vice President of Academic Services; they were then entered into a database. This database was distributed to both the discipline faculty and to every planning committee and/or resource allocation body to be used for yearly planning and decision making. This one-year evaluation process provides the college with a regular continuous planning effort that fosters decision making based on updated needs, completed goals, and program effectiveness, along with resources requested for the attainment of goals.

A program review process is also completed by the Student Services programs. This review, occurring every three years, responds to data and input from several sources. In point-of-service surveys, conducted over a two-week period, students assess their own experience with a Student Services program. College-wide surveys are distributed to faculty and staff whose work connects directly to Student Services. Survey results are documented and reported by the matriculation researcher. These surveys, in addition to internal evaluations and retention and persistence data, help to identify areas of focus for future planning. In 2006, Student Learning Outcomes were also included in program review. Student Services has now submitted SLOs in each program area, and SLO assessment data was used to modify practices in fall 2008.
RUBRIC ABSTRACTS

Feedback from the college surveys states that at present staff consistently agree that there is a clear connection to program planning and the college mission and that such planning has a link to resource allocation. The survey responses also note a majority agreement that student learning planning and program planning is connected to allocation planning; however, a large enough contingency noting that they “don’t know” indicates that the college needs continued communication and development of resource allocation linked to program planning. A majority of staff agreed that there is consistent evaluation of planning process and constituent input into planning as well as a majority of agreement that the college traces progress made through planning and that the college dialogues, reviews and modifies all parts of planning including institutional planning and research efforts.

In the 2008/2009 academic year, the college will begin its full integration of the program review process into the educational master plan. The development of integration processes and timelines has been assigned to responsible offices by the President. Continued research on integration, budget allocation integration, and effectiveness review will be discussed by the college throughout fall 2008 and spring 2009.23

Over the past several years, program review has become a vital planning process at Las Positas College. Through dialogue, development, process review, revision, and evaluation, the college has developed the process into a tool for the college to use in maintaining and improving its quality programs. As the college moves forward with increasingly integrated processes, the program review model serves as a foundation for the pursuit of excellence through planning.

Using the rubric for Evaluating Institutional Effectiveness, Program Review the college places itself in the Proficiency Level.

23 Presidential Priorities 2008 – 10
RUBRIC ABSTRACTS

STUDENT LEARNING OUTCOMES
Las Positas College has made great strides in implementing a student learning outcomes assessment cycle. It has been a long and challenging, but ultimately rewarding experience. The following is a brief synopsis of the process and decision making that went into developing the Las Positas College Student Learning Outcomes and Assessment Cycle that is referenced throughout the self-study.

Las Positas College began discussing the concept of Student Learning Outcomes (SLOs) in fall 2002, responding to the new Accreditation standards presented by WASC. Early in 2002, lead administrators, faculty, and classified staff attended workshops and conferences, collecting information about SLOs and introducing these concepts to the entire campus community at several town meetings and key committees. Informal dialogue began as faculty, administrators, staff, and students discussed how Las Positas College would incorporate the SLO assessment process, while adhering to the college’s culture, values and mission. This inclusive and candid opening dialogue allowed the college community to begin a “bottom-up” understanding of SLOs and an open reflection about each constituency’s involvement in the SLO and assessment process.

2004: Planning
In January 2004, a large group of interested faculty and staff attended a WASC workshop on SLOs at Chabot College, after which the campus community felt ready to form SLO leadership roles. In fall, 2004, the SLO Task Force (a body reporting to the college president and the Academic Senate) was established; faculty co-chairs for the SLO Task Force were selected by the Academic Senate and approved by the college president, and funds were allocated for continued faculty training. SLO leadership attended the “Assuring Improvement in Student Learning” conference in October 2004, which highlighted the importance of campus culture and timeline planning, as well as the integration of course, program, and institutional outcomes and assessment. With this foundation, the faculty co-chairs collaborated with the college’s institutional researcher to create a rough timeline based on the priorities revealed in the preliminary campus dialogue and the information retrieved at workshops.

One of the Task Force’s main goals for the first year was to create a list of core competencies for the college. The Task Force decided that this would be a way for the college to work collaboratively on shared student learning goals, rather than begin our SLO process working individually and without coordination on course or program SLOs. With representation from all constituencies at the college, the Task Force worked to complete a list of institutional SLOs.
RUBRIC ABSTRACTS

(LPC’s Core Competencies). The Core Competencies were presented and discussed as drafts at town meetings and a final draft was ultimately approved by the college president, the Academic Senate, and the district. The Task Force agreed that the Competencies would be revisited on a regular basis, serving as the college’s general education, student services and elective outcomes, coordinated with both program and course outcome goals. The Task Force then began to create plans for a course/service-embedded assessment of Core Competencies, forming the foundation of LPC’s assessment process.

The second main goal set by the Task Force was to begin hands-on training in writing authentic SLOs and creating effective assessment tools at the course level. To achieve this goal, the Task Force organized an SLO flex-day workshop, facilitated departmental SLO workshops, and established a pilot program for SLO projects. Anxious to ensure that open dialogue about SLOs at Las Positas College would continue, the Task Force established an intranet (college access only) site, providing a repository for documents and tutorials. At the end of fall 2004, the LPC community had a foundational understanding of SLOs and assessment, some hands on work with creating SLOs (core competencies), and the training needed to initiate the course SLO and assessment process that was planned for the spring.

2005-2006: Development and Practice

In spring 2005, the SLO Task Force continued to hold several college-wide training sessions, providing the faculty and staff with the LPC-specific terminology, reporting process, and timeline that had been developed in the planning phase. With the information and experience from training sessions, many faculty decided to begin developing course-level SLOs, realizing the potential for immediate classroom benefits. To facilitate the development of course-level assessment, the SLO intranet site was made fully public on the Internet at this time, along with a revisable timeline for implementation of the LPC assessment cycle.

The Task Force also recruited a “vanguard” group of faculty to serve as mentors in the SLO process. These faculty began setting up course and assignment-level SLO Pilot Projects; project proposals were then presented to fellow faculty during a Flex Day held at the beginning of the fall 2005 semester. During the fall semester, ten SLO pilot projects were implemented by LPC faculty and five SLO-focused departmental workshops were held. Also in fall 2005, an Assessment Philosophy Statement was drafted and submitted to the Academic Senate and the college president for approval. This statement provided the college community with a clearly articulated philosophy of SLO assessment at LPC, based on the dialogue and development of SLOs that had occurred over the past two years. As a summative report of its year-long process, the SLO Task Force drafted, revised and submitted “Student Learning Outcomes: Report and Recommendations” to the college president and the Academic Senate, as well as a semester-by-semester action plan for a two-year trial of the proposed SLO assessment cycle.

24 SLO homepage
25 SLO timeline
26 SLO Faculty Projects
27 SLO Assessment Philosophy
28 SLO Plans
At the spring 2006 Flex Day, the “vanguard” faculty presented their SLO Pilot Project assessment results, which led logically to suggested modifications for improved teaching and learning.\textsuperscript{29} During the spring 2006 semester, meetings were held between the SLO Task Force, the Curriculum Committee Chair and the Staff Development Chair to coordinate SLO activities and plans for the following year; Staff Development faculty offered seven SLO department workshops over the course of the semester. Revisions were made to the “Student Learning Outcomes: Report and Recommendations” document based on Senate, Curriculum and Staff Development feedback, and the Academic Senate approved LPC’s “Assessment Philosophy Statement” (2/22/06).\textsuperscript{30, 31}

At this point, LPC was actively creating course SLOs, coordinated with the institutional SLOs (Core Competencies); however, it was clear that some electronic repository and data analysis process was needed if we were to avoid a collection of SLOs and assessment that was difficult to access and use for improved teaching and learning. The Task Force began to vigorously research, analyze and evaluate technology support for SLOs and assessment reports, listening to presentations/demonstrations made by eLumen, Trac Dat and WEAVE. After analysis of all options, eLumen was selected as our electronic support system, and a budget and human resource recommendation for SLO efforts was submitted to the college president (3/2/06).\textsuperscript{32}

Summer 2006 saw the purchase of a license to use the eLumen software for the college’s SLO assessment cycle tracking. At this point, the Task Force established one of its co-chairs as an SLO Technology Liaison, who would establish a working relationship with the eLumen vendor. The liaison communicates faculty needs to the company, which revises its software to suit the college’s needs as much as possible. This unique relationship creates a feedback loop that gives the college maximum flexibility for a sustainable assessment of SLOs which is ongoing, systematic and used for continued quality improvement.

Fall 2006 marked the beginning of the SLO Task Force’s third year of engagement with the SLO assessment cycle. LPC’s SLO Technology Liaison continued to work with the vendor, the college, and district ITS to configure eLumen for use by the faculty.

A second “vanguard” group of faculty was established to serve as SLO department leaders, and an adjunct faculty member was officially designated as the campus SLO and eLumen trainer. Much time and energy was spent in configuring the software and making it available to faculty. Realizing that the research and planning phases were coming to a close, the SLO Task Force re-named itself the SLO Steering Committee.

RUBRIC ABSTRACTS

2007-2008: A Systematic, Ongoing Process

The spring 2007 semester saw the continued development and revision of the eLumen software as faculty wrote outcomes for their courses and designed appropriate assessments.33 “Vanguard” faculty began training to use the eLumen software; they also began to develop program-level SLOs, working on ways to incorporate this level of assessment into the software.34 Meanwhile, the SLO Steering Committee began to examine the relationship between SLOs and the “Expected Outcomes” that are listed on our Course Outlines of record.35 Committee members began serving as SLO faculty mentors to their colleagues, providing multiple workshops and training sessions throughout the semester.36

In fall 2007, revisions were made to the eLumen software, reflecting requests by the SLO Steering Committee for best adapting it to the LPC assessment cycle. The college’s SLO website provided faculty members with a new Frequently Asked Questions (FAQ) document, as well as an extensive online tutorial which led them, step-by-step with video examples, through the process of writing SLOs and entering them and their corresponding assessment plans into the eLumen software.37, 38 Once provided with these tools, faculty members were directed to develop a minimum of one SLO, along with an accompanying assessment plan, for each of 10 courses by the end of the semester. Faculty support for this process began with an August Flex Day eLumen training session and a block of time dedicated for SLO-related work during the first division meeting; SLO mentors/trainers were there to provide assistance. As in the previous year, the second hour of each monthly town meeting was devoted to writing SLOs and eLumen training. Additional support was added by an increase in reassigned time for the SLO Steering Committee Chair from 5 to 6 CAH in order to allow more time for one-on-one mentoring across the campus.

RUBRIC ABSTRACTS

Looking Forward

The LPC SLO assessment plan indicates that all courses will be assessed on a rotating basis; while the first semester (spring 2008) will see the assessment of two courses per discipline, next semester these courses will be reassessed, and two additional courses will begin the assessment cycle. The plan, therefore, calls for the rotating assessment of four courses per discipline per semester, beginning in fall 2008. Disciplines with more than ten courses will create SLOs and assessment plans for two more courses each semester until all courses are provided with SLOs and accompanying assessment plans.39

By fall 2008, all disciplines were asked to create timelines in which each course is scheduled for assessment. This 24-month plan is as follows:

Fall 2007: Write course-level outcomes, design scoring rubrics, and establish assessment tools;
Spring 2008: Assess two courses;
Fall 2008: Re-assess two courses, assess two new courses;
Spring 2009: Re-assess two courses, assess two new courses.

Additionally, in fall 2009 and spring 2010, the college will engage in an assessment of this SLO plan. This will be a time for reflection, dialogue, and evaluation. Based on our experiences and this reflection, we will make changes to the SLO assessment cycle, always with an eye to creating a systematic, sustainable plan.

Concurrently with the above goals, the Committee will continue to engage the faculty in discussions involving the publication of SLOs, linkages between course-level, program-level, and institutional outcomes, and the relationship of SLOs to institutional planning.40, 41

The committee plans for the assessment of program outcomes and Core Competencies (institutional outcomes) in numerous ways. Primarily the data in eLumen will be used to assess each Core Competency. Individual course/service assessments are each linked to a Core Competency. It is possible to compile these assessments and analyze them for trends, benchmarks, successes, and challenges. Additionally, faculty will be able to create Learning Outcome Case studies using eLumen. Once the assessment data is in eLumen, it can be used to create case-studies of actual students who achieve certain goals such as a degree or certificate. All the outcomes and assessments from courses in a certain degree patterns can also be examined. This can be done for hypothetical students by pulling up courses the “typical” transfer-student would take or the “typical” student in a Career Technology program would take.42, 43, 44, 45

RUBRIC ABSTRACTS

The SLO data in eLumen will become the basis upon which programs evaluate themselves in the program review process. Programs will have access to their data as well as the data from other programs for comparison purposes. Data is only available in summary form. Faculty can only look at their own data at the class level.

In addition to this quantitative data, the SLO committee plans to examine qualitative data by creating “Institutional Portfolios.” The college’s institutional researcher plans to collect samples of student course work demonstrating competency in course-level outcomes. These portfolios will be in themes based on the Core Competencies. The college will produce a “Communication” portfolio that gives examples of student work that provides evidence of Communication. This qualitative option may give the college another way of understanding, evaluating, documenting, and publicizing student learning.

This timeline provides a clear narrative of the extensive dialogue and planning that went into developing the Las Positas College SLO assessment cycle. All constituencies in the college were involved in the decision making and have accepted responsibility for student learning outcomes implementation. This institution has clearly shown a commitment of resources, including training, reassigned time for leadership, meeting time, and technology support. These are the early stages of a sustainable, continuous, systematic cycle of SLO assessment and improvement – one that reflects the culture and mission of this unique institution – that will move the college forward on its path of continuous improvement in teaching and learning, as well as allocation of institutional resources based on our assessment-improvement cycle.

Using the rubric for Evaluating Institutional Effectiveness, Student Learning Outcomes the college is completing the Development Level and is poised to enter the Proficiency Level.

INSTITUTIONAL PLANNING AND EFFECTIVENESS

Institutional Planning

The three major planning cycles at Las Positas College are program review (Academic and Student Services), the educational master plan, and discipline planning. The college is developing a system for coordinating program review with the educational master plan and other college processes. The College Enrollment Management Committee oversees the discipline planning process, which is central to program development and resource allocation.

46 Program Review
47 Educational Master Plan
**RUBRIC ABSTRACTS**

**Program Review**

The instructional program review is conducted every four years, with annual goal updates. During this process, each program performs a data-driven analysis of its progress toward meeting its stated goals. The Annual Goal Spreadsheet keeps track of the status of progress toward each goal, links actions related to the goal to the appropriate college funding source, process, office, or college governance body, and tracks how that goal has improved institutional effectiveness. Student Services, which conducts a separate program review process, does complete the same Annual Goal Spreadsheet as the instructional programs. The program review process links each program’s goals and mission with the college’s mission, uses quantitative data to support actions, and documents improvement in institutional effectiveness. The program review processes for instruction and Student Services are ongoing, systematic, and designed to continually assess and improve teaching and learning. The addition of SLO assessment will further quantify the effects of each program’s activity on student learning, and with the fall 2008 addition of curriculum review to program review, the college will have integrated instructional and Student Services planning into one inclusive cycle.48

Currently, there is no formal program review process for non-instructional offices. LPC is researching models and will begin to review these programs in the 2008-2009 academic year. All reviews (instructional, student services, non-instructional) will complete the same Annual Goal Spreadsheet for review by the college so that any future planning in any of these sectors can be evaluated and integrated into long-term strategic planning.

In fall 2008, the Program Review Task Force met to review the program review template and process. This task force will evaluate how well the last process went and consider emerging needs that suggest template and procedural changes. This template will then be approved via the collegial collaboration process, with the Academic Senate taking primary responsibility for the final outcome. The next full program review will be written in fall 2009, with validation occurring in spring 2010.

**Educational Master Plan**

The current form of the educational master plan was originally developed in 2003.49 Two years later, the 2005-2015 educational master plan was created, and a hard copy of this comprehensive plan was distributed to all faculty and staff at the College. Since fall 2005, there have been two updates to the educational master plan 2005-2015. In 2006, the status of progress toward each program goal was updated. In 2006-2007, progress toward goals was again updated to reflect any changes that occurred through the program review process. All updates have been distributed to all staff for inclusion into their individual hard copies.

---

48 Program Review Cycle and Timeline
49 Educational Master Plan
Currently, the college is refining processes for coordinating the program review and educational master plan. The next edition of the educational master plan (spring 2010, after the program review) will incorporate all goals from each program review (instruction, student services, non-instructional). In essence, the educational master plan will become the Annual Goals Spreadsheet from each program review with college goals and vision integrated into the long-term strategic plan. Additionally, the educational master plan will systematically include all developing college planning: the Student Equity Plan, the Facilities Master Plan, the Technology Plan, and the Distance Education Strategic Plan.\textsuperscript{50, 51, 52, 53} In this way, the college’s component plans will be integrated into a comprehensive plan that describes the role of every college function in advancing the college’s mission, thereby guiding the college to ongoing improvement of institutional effectiveness through resource allocation planning.\textsuperscript{54}

**Resource Allocation**

The Program Review Annual Goals Sheet ties each program’s goals to a funding process, committee, or college resource.\textsuperscript{55} The responsibility to engage in the process to acquire the resources to implement their goals lies with the individual programs. Some areas, such as technology and facilities, have their own budgets. Educational master plan goals are also tied to college funding processes, but historically these processes have not been evaluated for effectiveness.

**Discipline Planning**

The annual Discipline Planning Process is a primary activity of the College Enrollment Management Committee (CEMC).\textsuperscript{56} This process determines the size of each of the College’s programs as measured in units of Full Time Equivalent Faculty (FTEF) and Full Time Equivalent Students (FTES). It also determines the character of each program as summarily expressed by the efficiency ratio of contact hours with students per faculty unit (WSCH/FTEF). The outcome of the process is a class schedule that maximizes student access to courses by allocating a limited resource in a way that maximally promotes student success and is consistent with the principles of equity.
RUBRIC ABSTRACTS

The Discipline Planning Process, while continually revised for improvement, follows the outline described in the committee’s charge. Each fall, the CEMC analyzes historical enrollment and demographic trends, and then dialogues with the District Enrollment Management Committee (DEMC) to determine a college enrollment (FTES) target, a defined resource (FTEF), and an efficiency goal for the forthcoming academic year. Next, the committee uses these decisions to develop a planning guidance document that is distributed to each program and office at the College. Faculty, in consultation with their deans, use this planning guidance, in conjunction with local enrollment data and their own program mission and goals, to develop a schedule proposal—a discipline plan—for each program or area. Faculty and deans present their proposals to the CEMC, who then considers the plans both individually and in aggregate, and adjustments rising from the ensuing dialogue bring the aggregate plan into alignment with the College’s enrollment projection and efficiency target. The final approval of the aggregate plan represents the largest regular allocation decision made by the college through shared governance. Since its inception in 2001, the process has shown increasing ability to guide enrollment growth through collective planning while responding to shifting community needs and financial circumstances.57

Evaluation of Planning Processes

New leadership, new faculty, and a 4% average enrollment growth rate has mandated that the college become more aggressive in its decision-making processes as they relate to planning and budget allocation. In the 2008-2009 academic year, a planning task force will be formed to review current planning cycles and recommend changes to the overall planning processes and mechanisms for evaluating institutional effectiveness. Areas of attention will include integrating the program review/educational master planning cycles, instituting non-instructional program review, building in the use of data to form and evaluate plans, building in systematic ways to evaluate progress made on plans, building in a systematic method of evaluating planning cycles, using technology to publicize, integrate, track, and evaluate plans, updating strategic plans, updating college goals, centralizing all planning cycles, templates, and evaluations.

Using the rubric for Evaluating Institutional Effectiveness Planning, the college places itself in the final phases of Development and is and is poised to enter into the Proficiency level.

57 Faculty Contract
STANDARD ONE: INSTITUTIONAL MISSION AND EFFECTIVENESS

1 The institution demonstrates strong commitment to a mission that emphasizes achievement of student learning and to communicating the mission internally and externally. The institution uses analyses of quantitative and qualitative data and analysis in an ongoing and systematic cycle of evaluation, integrated planning, implementation, and re-evaluation to verify and improve the effectiveness by which the mission is accomplished.

1A The institution has a statement of mission that defines the institution’s broad educational purposes, its intended student population, and its commitment to achieving student learning.

Las Positas College’s current mission statement was approved at a meeting of the Planning and Budget Committee on September 4, 2003. The Board of Trustees had accepted the Las Positas College Mission Statement on February 18, 2003.

The mission of Las Positas College is to foster growth and success, both in its students and in its community. The college strives to fulfill this mission by offering high-quality, comprehensive educational programs and services. It augments and strengthens its mission by partnering with local businesses and organizations to promote the welfare of its students and the economic and social health of its service area.

Las Positas College:
- Enables students to transfer to baccalaureate-granting institutions;
- Prepares students for career entry and advancement;
- Provides basic skills and English as a Second Language instruction;
- Delivers quality, substantive student support services; and
- Fosters student success through committed, exceptional faculty and staff.

Las Positas College offers a strong instructional foundation for its students and aims to cultivate in them:
- The ability to think critically;
- An understanding and respect for difference and diversity;
- The ability to make humane, informed, and ethical decisions;
- The willingness to adapt to change in the workplace; and
- The desire to participate in society as responsible citizens.

---

58 PBC minutes, 9/4/2003
59 Board of Trustees Approval of Mission Statement
60 LPC Mission Statement
Values Statement:

Las Positas College thrives as a teaching and learning community committed to integrity and excellence. To nourish this environment and the communities served, we

- promote and celebrate lifelong learning;
- anticipate and meet the needs of the ever-changing workplace;
- demonstrate social and environmental responsibility;
- promote tolerance and mutual respect in a diverse community;
- foster a climate of discovery and creativity; and
- hold firm to the belief that each of us makes an astonishing difference.

The mission statement and values statement address the broad educational purposes of the college, placing emphasis on transfer, career entry and advancement, basic skills, and English as a Second Language. They identify the college’s students as those interested in general education, transfer education, and career-technical education. The mission is accomplished via comprehensive educational programs and services, which are in line with the overall goals of a higher educational institution.

In December 2006, copies of the Las Positas College Mission Statement, Values Statement, and Guiding Principles were distributed to the Planning & Budget Committee, with the note that these documents needed to describe a commitment to Student Learning Outcomes. A Planning and Budget Committee (PBC) Task Force has written a draft mission statement which has been reviewed by campus constituents and the community. The PBC approved the revised statement in fall 2008. In addition, the PBC has determined to review the mission statement every three years to ensure the continuing integration of the mission statement and institutional planning.

SELF EVALUATION

The college partially meets this standard. The current mission statement has been effective since 2003, when it was last approved, and the statement accurately supports the goals of a higher education institution. However, since 2003, the broad educational goals have shifted from a teaching-centered focus to a student learning focus. The fall 2008 approved mission statement reflects the nature of the college’s educational philosophy and commitment to student learning but the new mission needs to be integrated into college committees and planning.

PLANNING AGENDA

1. Incorporate regular review of the mission statement and values statement into the institutional planning cycle.

---

61 LPC Mission Statement
62 PBC Minutes, 12/7/06
S1A1 The institution establishes student learning programs and services aligned with its purposes, its character, and its student population.

Las Positas College is a comprehensive community college serving the residents of the Bay Area’s Tri-Valley and beyond. The purpose of Las Positas College, as expressed in the mission statement, is to “foster growth and success, both in its students and in its community.” The character and purpose of Las Positas College provide the foundation for its student learning programs and services, which are responsive to the student population served by the college. As such, the college provides developmental, transfer, technical, and personal development education for over 9000 students, offering 21 Associate of Arts degrees, 17 Associate of Science degrees and 46 certificate programs, as well as community education courses for cultural enrichment. In addition to meeting the needs of these broader groups, programs are designed to serve specific, targeted populations. For example, the Honors Transfer Program creates agreements with several colleges and universities throughout California and encourages independent and creative learning achievements, designated by an “H” (for Honors) on the honor student’s transcript and special recognition at graduation. Other examples of targeted programs include developmental education (basis skills) programs that prepare students assessed below college-level math or English for degree-credit instruction. In fall 2008, assessment validation studies are underway in the areas of both English and math. Additional options for students, depending on their goals and preparation, include credit by examination, noncredit articulated high school courses (2+2), advanced placement, and College-Level Examination Program (CLEP) credit. Las Positas College also offers fast-track, weekend, daybreak, and evening classes to facilitate student learning.

The LPC CalWORKs program serves CalWORKs students and their families by providing educational and career opportunities combined with an array of high-quality support services that enable CalWORKs students to meet their educational goals, find meaningful employment, and successfully transition into the workforce. Through collaboration and advocacy within the college and the community, the program prepares students for economic self-sufficiency through the attainment of higher education. Some of the support services that the CalWORKs program provides include career counseling, academic advising, coordination and advocacy with the Department of Social Services, assistance with Welfare-to-Work plans, transitional child care funding, transportation resources, referrals to college and community resources, job development, and work study employment. Additionally, special workshops, classes, and support groups are offered to aid students on their paths to success.

Transfer-related programs engage in continuous dialogue with transfer institutions to ensure that programs provide lower-division preparation for students desiring to transfer. One result of this dialogue is a rigorous curriculum process for all baccalaureate level courses. The college has 167 courses that have been certified as California Articulation Number (CAN) courses, and it maintains articulation agreements with individual campuses of the University of California and the California State University systems. Additionally, it holds articulation agreements with local independent colleges.

The campus Transfer Center is headed by a transfer officer who has access to regularly updated online transfer information. Each semester, the Transfer Center invites representatives from local four-year colleges (CSU, East Bay, Sacramento State, San Jose State, San Francisco State, CSU Stanislaus, UC Berkeley, UC Davis, UC Santa Cruz and St. Mary’s) to meet with students individually. College applications and testing information (SAT/ACT/CBEST/GRE), as well as transfer application workshops, are held in October and November. Personal essay workshops are offered through the Transfer Center, and faculty from a variety of disciplines provide assistance in the Open Writing Center. Transfer Day in September brings 35 college representatives to campus, as well as a variety of workshops on majors such as Business, Liberal Studies/Teaching Credential, Science, Human Development, and Graphics. College catalogs and Internet access to ASSIST for articulation agreements and tours to four-year universities, as well as the President’s Transfer Reception, are also provided.

Counseling Services provides accurate and extensive information to students at the Counseling Center and Transfer Center. Counseling Services includes academic, career, and personal assistance. Further, the Center provides employment services for students qualified for federal work study, and it advises students on strategies for resume writing and interviewing.

Las Positas College’s commitment to student learning is growing and evident in its effort to address its growing diversity. In 2003, the campus became part of a growing network of community colleges by joining the Campus Change Network (CCN). A group of administrators, faculty, students, and clerical staff meet monthly to address the needs of all students at LPC, particularly its increasingly diverse population. CCN has created an opportunity for campus dialogue and sponsors on-campus events, including a monthly speaker’s bureau that allows the voices of diversity to speak to the campus community. The CCN also sponsors a Brown Bag event each semester for faculty, students, and staff to explore topics related to diversity and equity. The college has also begun to conduct outreach efforts to the Tri-Valley community, using student ambassadors from LPC who serve as role models by providing information when visiting high schools, participating in community events, and conducting campus tours.

71 Transfer Center
72 Transfer workshops
73 Open Writing Center
74 Counseling Center
75 Campus Change Network
In addition to the above, the college has established a range of programs and services aligned with its student-centered character and purpose:

- The Open Writing Center, housed in the Integrated Learning Center (ILC) allows students to work one-on-one with a writing tutor on any writing assignment.\(^{76}\)

- The speech and debate team, also known as the LPC “Talk Hawks,” provides students with an intensive focus on research, writing, and performance skills. Forensics students compete on an inter-collegiate basis at tournaments locally, nationally, and internationally. The Talk Hawks are award winners across the range of competitions.\(^{77}\)

- Community education classes are designed to provide personal development, cultural enrichment, and job training for the LPC community. Courses are offered in areas including fitness and health, home and garden, computers, arts and letters, and college preparatory skills.\(^{78}\)

- Continuing education classes are designed to provide in-service education for those who must maintain a professional license by periodic training and upgrading of their skills. Courses offered have included nursing, real estate, and accounting.\(^{79}\)

- Contract education classes are offered through contracts with the district for educational services with public or private agencies, corporations, associations, or individuals. An active outreach program is conducted by the district to help develop training programs tailored to meet their needs. Examples of programs offered include Business Communication, Supervision, CPR and First Aid, ESL, Word Processing and Computer Skills, and Pre-Retirement Planning.\(^{80}\)

- The QUEST program provides an opportunity for lifetime learning and is designed to meet the educational needs for adults 55 or older. Classes are offered in a variety of disciplines such as art, English, and physical fitness.

- The Tutorial Center offers student and faculty tutoring for a variety of courses and disciplines.\(^{81}\)

- LapTechS – Business, Electronics/CIS is an innovative entrepreneurial venture offering technical support services as a work-based learning that allows students to get hands-on training in a workplace environment. Students practice hardware and software installations, computer repair, and maintenance and troubleshooting techniques. Business applications include storage and retrieval, document preparation, customer service, and other job skills.\(^{82}\)

Internships provide interested students, who meet qualifications, to be placed in carefully structured work environments with local employers. Students gain opportunities to apply knowledge gained in the classroom.  

Extended Opportunity Programs and Services (EOPS) provides a comprehensive program of services for low-income and academically under prepared students, as well as students with language and social challenges.  

Disabled Students Programs and Services (DSPS) coordinates needed services and courses for students with disabilities in pursuit of a community college education. The program is staffed by a program coordinator, and instructor, and a counselor.  

The Financial Aid office helps ensure that students have sufficient resources to enable them to attend college. This is done through grants, fee waivers, scholarships, loans, and federal work study.  

The Office of Veterans’ Services provides instructional assistance to service personnel, reservists, and other eligible persons under Title 38, U.S. Code and Department of Veterans Affairs.  

Occupational Work Experience Education brings business, industry, and all levels of governmental agencies together to allow students to apply their classroom instruction to related career employment opportunities. Students have an option of concurrent enrollment in college courses while working, or full-time study for one semester and full-time work the following semester.  

Tech Prep (Technical Preparation Programs) establishes a balance between academic instruction, technical/vocational training, and career development for students. The Tri-Valley Educational Collaborative (TEC) is comprised of representatives from the Tri-Valley Regional Occupational Program (ROP) of LPC, local school districts, CSU-East Bay, local business, and community partners.  

Online application and telephone registration streamline the admissions process, facilitate access, provide faster service, reduce wait-lines, and increase accuracy.  

Health Services provides confidential health counseling, screening tests, health education, and emergency first aid.  

Psychological Services provides crisis intervention, faculty consultation, and psychological testing and assessment.  

The Employment Resource Center assists with job placement services for students, graduates, and employers.

SELF EVALUATION

The college meets this standard. As set forth in the mission statement, Las Positas College provides a wide variety of well-used and evolving programs and services responsive to the learning needs of its population. These offerings include programs targeted to specific populations; flexible class times; and courses in many academic, occupational, and certificate areas.

The Faculty and Staff Survey showed agreement among administration, faculty, and staff that Las Positas College makes a conscious effort to facilitate and support student learning and makes necessary changes to improve student learning.

PLANNING AGENDA

None.

1A2 The mission statement is approved by the governing board and published.

The institution has a statement of mission, adopted by the governing board on February 18, 2003, and “the statement of mission identifies the broad-based educational purposes it seeks to achieve.” 94 In December 2006, the Planning and Budget Committee started the process of rewriting the mission statement. 95 In spring 2008, the draft went through a process of campus-wide review. This review was completed in fall 2008, and the new mission statement was approved by the PBC by the end of that term.

SELF EVALUATION

The college meets this standard. The Board of Trustees has approved the mission statement on February 18, 2003, and the approved mission statement can be found in the college catalog. A revised college mission statement was approved fall 2008 by college constituents and will be submitted for board approval in 2009.

PLANNING AGENDA

None.

94 Board of Trustees Approval of Mission Statement
95 PBC Minutes, 12/7/06
1A3 Using the institution’s governance and decision-making processes, the institution reviews its mission statement on a regular basis and revises it as necessary.

The mission statement conveys the goals of the college and serves as the guide for planning and decision-making. The Planning and Budget Committee is responsible for a review and revision of the mission statement every three years to ensure that it remains current with the goals of the college. Input for revision is garnered from all campus constituencies, including faculty, administration, classified staff, and students, and decisions are made through shared governance processes.

The need for the mission statement and vision statement revision was identified by the PBC in December 2006. A task force was created to develop a draft while the PBC crafted a process to invite and consider input from the college community, as well as a timeline for approving the new mission statement by fall 2008.

**SELF EVALUATION**

The college meets this standard. The PBC is charged with regular review of the mission statement so that it maintains alignment with the values and goals of the college as informed by the changing character and needs of the students. When identifying a need for revisions, the PBC initiates a process comprising the designation of a task force and forums for dialogue with all constituencies as a draft is developed. Final college approval of the mission statement rests with the College Council.

**PLANNING AGENDA**

None.
1A4 The institution’s mission is central to institutional planning and decision making.

The mission statement is connected to the major planning and budgeting process. The educational master plan combines the goals for all programs at the college into one comprehensive and updatable document. For the Academic Services’ program review, conducted every four years, programs articulate their relationship to the college’s mission. Student Services’ program review also describes its programs in relation to the college mission. Major budgeting processes such as those for identifying new faculty positions, new classified positions, and new instructional equipment are conducted through the PBC, which ranks requests and forwards recommendations to the college president. Applicants must orient their requests to the college’s mission by describing how the personnel or equipment requested will contribute to progress toward stated program or college goals. The rubric used by the PBC for instructional equipment requests specifically reflects the college’s mission and values statements.

The organization, membership, and charges of the college’s shared governance committees are consistent with and support of the college mission. However, while the college’s shared governance committees are encouraged to refer to the mission as a guide to actions, there is no process to track or assess the specific effects of actions on the promotion of the mission.

Generally, staff feel that the mission statement does drive the college’s decisions. In the fall 2007 Staff Survey, 84 percent of respondents strongly agreed/agreed with the statement “The Mission Statement is central to institutional planning and decision-making.” Eighty-two percent strongly agreed/agreed with the statement, “LPC programs and services are aligned either Mission Statement.”

SELF EVALUATION

The college meets this standard. The college makes an effort to connect planning processes and to use the mission statement as the driving force for decision making, and as evidenced by the survey, most staff feel that this in fact is achieved.

PLANNING AGENDA

1. Develop an instrument for tracking links between institutional decisions and the college mission.

99 Educational Master Plan
100 Program Review
101 PBC minutes, 2/7/08
102 Shared Governance
103 Fall 2007 staff survey
1B The institution demonstrates a conscious effort to produce and support student learning, measures that learning, assesses how well learning is occurring, and makes changes to improve student learning. The institution also organizes its key processes and allocates its resources to effectively support student learning. The institution demonstrates its effectiveness by providing 1) evidence of the achievement of student learning outcomes and 2) evidence of institution and program performance. The institution uses ongoing and systematic evaluation and planning to refine its key processes and improve student learning.

1B1 The institution maintains an ongoing, collegial, self-reflective dialogue about the continuous improvement of student learning and institutional processes.

While ongoing, informal dialogue focused on the improvement of student learning is and has always been central to the activities and the identity of Las Positas College, more formal and highly structured dialogue has also been an emerging and exciting characteristic of college culture as the institution grows. In fall 2007, focus groups were held with each standing shared governance committee, the Academic and Classified Senates, and each of the college’s deans; their purpose was to create an understanding, shared across the college, of how to define dialogue, how to understand its purpose and its role in creating change, and where and when formal dialogue would occur. At this college, formal dialogue is now understood as communication that creates understanding, rather than simply make a point: Dialogue creates new knowledge. Dialogue causes reflection. Reflection leads to action, and action leads to change. Examples of formal dialogue taking place recently at the college include a campus-wide brainstorm, at the fall 2007 convocation, of values and skills that the college community felt to be of special importance in the selection of the new college president, in preparation for the ending of the interim president’s term. The whole college also dialogueed, at a town meeting, on the effectiveness of the program review process. In fall 2007, the Director of Institutional Research and Planning facilitated dialogue with each standing committee on the emerging SLO cycle. The Campus Change Network has sponsored dialogue in a variety of settings that focused on issues related to diversity. The forthcoming mission statement was drafted through dialogue with whole college at town and division meetings. Finally, faculty flex day activities, along with other staff development opportunities, have facilitated reflective dialogue on processes, learning, student success, and student services/instruction integration.

SELF EVALUATION

The college meets this standard. Informal dialogue, which has always been central to this college’s culture, has been emerging in more formal settings to drive decision making.

104 Classified Senate minutes, 9/27/07
105 Town Meeting, 9/5/07
106 Faculty Flex Day Program, 08/17/06
107 Faculty Flex Day Program, 10/07/08
As is shown in the table below, selected from the 2007 Staff Survey, 22-27 percent responded “Neither Disagree nor Agree” to questions on the character of dialogue on the campus. While in all cases a majority did Strongly Agree/Agree, this degree of ambiguity does suggest that the college should continue to promote faculty and staff awareness and effectiveness of dialogue.

</tbody>
</table>

PLANNING AGENDA

1. Train committee chairs on the character and use of dialogue as a tool for continuous improvement of programs and processes.

2. Work with committees on the process for communicating committee outcomes and information to campus constituents. Work with campus constituents on communicating needs or concerns through committee representation.
1B2 The institution sets goals to improve its effectiveness consistent with its stated purposes. The institution articulates its goals and states the objectives derived from them in measurable terms so that the degree to which they are achieved can be determined and widely discussed. The institutional members understand these goals and work collaboratively toward their achievement.

Las Positas College sets goals to guide its progress, and in June 2006 those goals and the objectives derived from them were articulated in a document supporting the mission statement and included in the educational master plan.\textsuperscript{108} As they are stated, not all of the objectives are readily measurable, although many of them are. While the college continually works toward its goals through the processes facilitated by bodies such as the Enrollment Management Committee, Planning and Budget Committee, Curriculum Committee, Facilities Committee, and Academic Senate, as well as program review, progress in reaching institutional goals has not been systematically assessed since they were published.\textsuperscript{109} In spring 2009, the college will develop institutional strategic goals and help guide institutional planning.

Seventy-three percent of respondents to a 2007 survey strongly agree or agree that LPC employees understand institutional goals and work collaboratively toward their achievement while 18 percent neither agreed nor disagreed, 10 percent disagreed, and 12 percent responded “don’t know/missing.” In general, staff feel the planning process adequately identifies priorities; however, many are not sure or do not have an opinion, (27 percent responded “don’t know/missing”), possibly indicating some unfamiliarity with the goals or the process of setting them.\textsuperscript{110}

SELF EVALUATION

The college partially meets this standard. Generally, the college community feel that they understand institutional goals and work collaboratively to achieve them. Some of the college’s objectives are not readily quantifiable, however, which makes progress toward them difficult to assess.

PLANNING AGENDA

1. Develop and update institutional strategic goals.
1B3 The institution assesses progress toward achieving its stated goals and makes decisions regarding the improvement of institutional effectiveness in an ongoing and systematic cycle of evaluation, integrated planning, resource allocation, implementation, and re-evaluation. Evaluation is based on analyses of both quantitative and qualitative data.

The educational master plan was adopted in 2005 to go through 2015, and it is a fluid document constructed to accommodate revisions and updates according to changes in program and college goals, enrollment patterns, the economic environment, and other internal or external factors.\footnote{Educational Master Plan} Changes in the educational master plan can also be a result of the program review process. Recommendations made in program reviews are peer reviewed by divisional faculty; then they are sent to the Vice President of Academic Services and the Planning and Budget Committee, which help facilitate actions as needed.\footnote{Program Review}

SELF EVALUATION

The college partially meets this standard. Las Positas College's educational master plan is oriented around explicit college goals that are consistent with and supported by the program goals identified in program reviews. The educational master plan is updatable according to changes made to program goals, as well as emerging student learning outcomes assessments. College planning cycles have been coordinated in an inclusive, longer-term schedule that also describes the continuing development of the SLO cycle.

PLANNING AGENDA

1. Make updates to the educational master plan systematic, and include in updates an assessment of progress made toward college goals.

\footnote{Educational Master Plan} \footnote{Program Review}
The institution provides evidence that the planning process is broad-based, offers opportunities for input by appropriate constituencies, allocates necessary resources, and leads to improvement of institutional effectiveness.

Las Positas College is a tightly-knit, cooperative community, basing its decision-making process on a broad-based participation in self-governance. Although the college has grown dramatically in the last decade, commensurate with the residential and commercial expansion of the Tri-Valley, LPC faculty and staff have worked diligently to maintain a cordial, harmonious atmosphere where employees and students can feel that they not only belong but that they have a voice.

Two major institutionalized components of LPC’s organization assure that decision making adheres to the principles of self-governance. One is the Planning and Budget Committee, whose charge is to gather broad-based input and to coordinate planning and budgeting. This committee, consisting of equal representation from administration, faculty, and staff, communicates its work to the college community, and, in turn, solicits input from the college community. It also oversees and evaluates resource allocation decisions to make sure they are guided by the college’s mission statement.

A second key component of self-governance is the college’s program review. There are two program review processes; one is housed in Academic Services, and the other is housed in Student Services. Academic Services program review is performed through four-year cycles of self-study and collegial review, evaluating the entire instructional program, and making subsequent recommendations. The primary objective of both program review processes is to assure the quality of educational programs by seeking to improve their effectiveness at fostering student learning and reflecting student needs.

The first stage of the program review process begins with a self-study, consisting of an in-depth evaluation of instructional programs by faculty teaching in a program. It also includes any relevant input from students, support staff, and advisory boards. The second stage is a collegial review, consisting of a comprehensive review and validation of the self-study. The collegial review team includes a dean, faculty in the discipline of the self-study, and faculty in related disciplines. Not only does this peer-validation process help programs strengthen their plans; it also helps the college to identify college-wide concerns.

The findings of program review serve as an essential source of data to guide the work of the Planning and Budget Committee, the Curriculum Committee, and the Academic Senate. The College Council, whose membership includes representatives from all sectors of the institution, assists the college in developing policies, processes, and institutional plans.
SELF EVALUATION

The college meets this standard. Planning processes clearly reflect the principles of shared governance. To properly fund the college’s needs, the Planning and Budget Committee requires each division to set its priorities for the acquisition of new faculty, staff, and instructional equipment. To assure quality and measured growth in the instructional programs, program review identifies strengths, needs, and overarching institutional themes, beginning at the discipline level and then moving forward to the college as a whole. The Program Review Annual Update Recommendation Sheet links planning to action and noted areas of improved effectiveness.

While broad-based planning and budgeting processes are increasingly integrated at the college, the improvements made to institutional effectiveness, however demonstrable, have not been measured in an analytical and systematic way. Looking forward, the Program Review Annual Update Sheet and the eLumen software to track SLOs will facilitate this kind of assessment of institutional effectiveness. The educational master plan, through updates, will track and document progress made toward attainment of college goals.

Seventy-five percent of staff strongly agreed or agreed that LPC’s planning process offers opportunities for input by appropriate constituencies, 15 percent neither agreed nor disagreed, and 10 percent strongly disagreed or disagreed.

PLANNING AGENDA

None.

1B5 The institution uses documented assessment results to communicate matters of quality assurance to appropriate constituencies.

Las Positas College collects assessment data on a range of its programs and services, and communicates matters of quality assurance to constituencies. Some examples of this data include program review data supplied to the disciplines to help them assess their programs, enrollment data used by the College Enrollment Management Committee to assess the efficacy of allocation processes and actions, student satisfaction surveys and graduation surveys that assess institutional efficacy from a student’s experiential perspective, student learning outcomes data to assess learning achievement, basic skills data, high school reports, special surveys of basic skills courses to assess specific access and retention concerns, data on Math Lab persistence to assess the influence of the Integrated Learning Center on success in math; benchmarking data, course combination data, and course sequencing data...
to assess relationships between programs or courses within a program, the annual Student Characteristics Report, and the Student Characteristics and Outcomes Report.\textsuperscript{120, 121, 122, 123, 124}

Assessment results are used both internally and externally, depending on their application. For example, the High School Report that fosters understanding of concerns of preparation and expectations is presented to high school principals and counselors at the annual High School Breakfast. The Office of Institutional Research and Planning presents data assessing institutional effectiveness to the PBC in a monthly report, and presents data at town meetings to inform dialogue and action in the college community. This office also serves as a general resource of assessment data for the college in regard to program review.

The college has assessed its own effectiveness at communicating matters of quality assurance to the public. The Incoming Student Survey gathers information on high school students’ impression of the college, reasons for attending LPC, and where they have received most of their information about the college.\textsuperscript{125} In 2007, the district hired CLARUS, a market assessment firm, to determine how the college is perceived in the community and how to better provide programs and services that suit the needs of the service area. That comprehensive report was presented through appropriate bodies to faculty, staff, and administrators.\textsuperscript{126}

**SELF EVALUATION**

The college meets this standard. It regularly distributes assessment results to constituencies; however, survey results indicate that there is still room to improve the measurement of how effective the college is in communicating information about institutional quality to the public. Fifty-five percent of staff strongly agreed or agreed that LPC uses documented institutional assessment results to communicate matters of quality assurance to appropriate constituencies. Fully 38 percent neither agreed nor disagreed, and only 5 percent strongly disagreed or disagreed. An additional 44 percent of respondents did not answer the question.

**PLANNING AGENDA**

1. Create an annual report summarizing assessment data collected and indicating how and where this data is disseminated to the community.

\textsuperscript{120} Program Review
\textsuperscript{121} CEMC website
\textsuperscript{122} Student surveys

\textsuperscript{124} Student Characteristics & Outcomes Report
\textsuperscript{125} Student surveys
\textsuperscript{126} CLARUS Market Assessment results
1B6 The institution assures the effectiveness of its ongoing planning and resource allocation processes by systematically reviewing and modifying, as appropriate, all parts of the cycle, including institutional and other research efforts.

The Program Review Annual Recommendations Sheet, to be coordinated with the educational master plan, facilitates the tracking of progress made toward program and college goals, and therefore aids in the assessment of related allocation processes.\footnote{Program Review SLO Cycle} Student learning outcomes assessment data, as stored in eLumen, will comprise a database of changes made to assessments as a part of the SLO cycle.\footnote{eLumen (Login required)} Faculty will be able to use student learning outcomes data as a part of the program review resource allocation process and as a part of program effectiveness measures as well. The most recent program review cycle culminated with a survey that sought faculty assessment of the program review process effectiveness and the results have been used to modify the program review template for 2008 and the program review process in 2009.

SELF EVALUATION

The college partially meets this standard. The program review cycle is regularly reviewed for effectiveness, and this process connects to the college’s major planning cycles. However, not all of these cycles are themselves systematically reviewed. The college is now developing an integrated planning model that could use the strengths of program review for strategic planning and the educational master plan.

PLANNING AGENDA

1. Conduct an institutional review of the college’s major planning and allocation processes, in coordination with program review.
The college partially meets this standard. The college provides for the systematic and comprehensive review of all instructional, student services, and library services programs through program review, and it regularly collects evaluative information and uses this information to make changes to these processes.

This evaluative process can be strengthened by ensuring that evaluative information is systematically used and incorporated into the redesign of evaluative processes such as program review. Additionally, the college could further enhance this mechanism by tracking whether the changes made to processes have in fact resulted in improvement. The lack of a review process for non-instructional units is a further weakness in the college’s ability to assess effectiveness.

PLANNING AGENDA

1. Assess the effects of changes made to existing process at the college, on a regular basis.

2. Develop and implement a review process for non-instructional units.

3. Develop an integrated planning model that shows district links to program review and the educational master plan.

129 Fall 2007 staff survey
130 Program Review
STANDARD TWO:  
STUDENT LEARNING PROGRAMS AND SERVICES

2A  The institution offers high-quality instructional programs in recognized and emerging fields of study that culminate in identified student outcomes leading to degrees, certificates, employment, or transfer to other higher education institutions or programs consistent with its mission. Instructional programs are systematically assessed in order to assure currency, improve teaching and learning strategies, and achieve stated student learning outcomes. The provisions of this standard are broadly applicable to all instructional activities offered in the name of the institution.

2A1  The institution demonstrates that all instructional programs, regardless of location or means of delivery, address and meet the mission of the institution and uphold its integrity.

The mission of Las Positas College is to foster growth and success, both in its students and in its community. The college addresses and meets this mission and upholds institutional integrity by offering high-quality, comprehensive instructional programs.

The college’s educational master plan demonstrates the comprehensiveness of instructional programs by connecting them to student and community needs characterized by analyses of student performance, population trends, and labor market trends.\textsuperscript{131, 132, 133}

Faculty in instructional programs use educational master plan components as a guide for their work during the program review process, in which each instructional program articulates both its own mission and its supportive relationship to the college mission. Consideration of student success, transfer, degree completion, and enrollment data helps programs demonstrate and maintain their appropriateness in higher education.\textsuperscript{134, 135, 136, 137} The program review process also maintains course and program currency by regulating the revision of course outlines. Upon each revision, the relevance and integrity of a course outline is evaluated separately by faculty members of its division, the College Curriculum Committee, and the office of instruction. Results of the planning and formal assessment processes are published and shared extensively with internal and external constituencies.\textsuperscript{138, 139}

In order to extend open access and better serve students, Las Positas College offers many courses and substantive portions (50 percent or more) of some certificates and degrees via technology mediated distance learning. To

demonstrate the quality of programs using this mode of delivery, in 2007 the college applied for and received WASC approval for these distance learning programs via the WASC Substantive Change approval process.\textsuperscript{140}

**SELF EVALUATION**

The college meets this standard. The institution demonstrates that all instructional programs, regardless of location or means of delivery, address and meet the mission of the institution and uphold its integrity. The 2007 student survey shows that 62 percent of students were satisfied or very satisfied with their “preparation for transfer to a four-year college or university,” and 58 percent were satisfied or very satisfied with “preparation for employment in my field.” Sixty-seven percent of students agreed/strongly agreed that “compared to other community colleges, LPC has a reputation for high quality education.”

**PLANNING AGENDA**

None.

2A1a The institution identifies and seeks to meet the varied educational needs of its students through programs consistent with their educational preparation and the diversity, demographics, and economy of its communities. The institution relies upon research and analysis to identify student learning needs and to assess progress toward achieving stated learning outcomes.

Las Positas College provides a wide array of instructional programs and courses consistent with the diverse needs and goals of its students and community. The college serves a student body that is more ethnically diverse (44 percent non-white) than its service area (27 percent non-white). The students the college serves are also diverse in terms of age, culture, educational preparation, and educational goals.\textsuperscript{141} The college serves multiple purposes for the community: transfer to four-year higher education; career-focused, two-year associate degrees and certificates; job skill development; career exploration; basic skills development; and enrichment and life-long learning. Across all instructional areas, institutional programs such as tutoring, CalWORKs, which supports students developing welfare-to-work plans, Disabled Students Programs and Services (DSPS), and Extended Opportunities Programs and Services (EOPS), promote students’ access and success according to their individual needs.\textsuperscript{142, 143, 144}

\textsuperscript{140} Substantive Change Approval
\textsuperscript{141} Student Characteristics and Outcomes Reports
\textsuperscript{142} CalWORKS
\textsuperscript{143} Disability Resource Center
\textsuperscript{144} EOPS
To identify the varied education needs of its students, the college collects data at several points. The Office of Institutional Research and Planning annually analyzes data describing the populations of the college’s service area, and the analysis is publicized in the annual Student Characteristics Report. This report profiles local population demographics, registration patterns, student characteristics, and analyses of demographic trends over time. To determine how best to prepare students for careers, the college also bases program planning on data from other sources such as the State of California Labor Market Information data base and the local industry study, “Wellspring for Entrepreneurship and Innovation: The Changing Economic Role and Responsibilities of the Tri-Valley Region.”

The college also uses research and analysis to meet student needs once they enroll in the college. Many entering students participate in an orientation experience (EXPO), and an entering student survey is administered as part of that experience in order to identify incoming student profiles and educational goals. The college currently uses multiple assessments in order to ensure that new students begin course sequences in a way that matches their level of academic preparedness. Accuplacer is used to assess students in English, math, and chemistry. ESL students are assessed using CELSA (objective test) and are asked to complete a writing sample.

The college also conducts course-sequence analyses to examine student success over time, and it uses this data in program evaluation and planning. This type of analysis has been used to examine progression through developmental and transfer sequences in English and math, and also to look at the relationship of successful completion of English and math to success in other general education courses. Benchmarking data is also analyzed to ascertain how many students become transfer-prepared. The Accountability Report for the Community Colleges 2007 (ARCC), the annual evaluation of community college performance that measures educational outcomes, was presented to the Chabot-Las Positas College Board of Trustees on 5 February 2008.

Student views of the institution and their own success are gathered via a biannual student survey, as well as an exit survey for students participating in graduation ceremonies. These surveys contribute to the college’s understanding of overall student progress toward learning objectives over time.

The college is also considering mandatory orientation and assessment under the guidance and direction of the Vice President of Student Services and the Dean of Student Services, as well as instituting a “first-year experience” to promote student retention and foster first-year student success is underway. Progress is also being made on the college’s Basic Skills Initiative; an assessment report

was completed in spring 2008. This report identifies themes including the need for staff development in teaching of developmental courses and continued development of learning communities such as the College Foundation Semester, which the college has already instituted. In fall 2008, the college continued its basic skills staff development with a two-day, all-college workshop run by Dr. Vincent Tinto.\textsuperscript{156}

Research and analysis are incorporated into program planning and assessment in a variety of ways. The College Enrollment Management Committee, in their annual discipline planning process, sets college enrollment and productivity targets based, in part, on demographic projections for the ensuing academic year, and provides enrollment data to the college’s programs, which in turn use it to maximize student access and equity in their schedule proposals.\textsuperscript{157} This information is also used in the development of program reviews, in program goal-setting that will maximize student success. Program reviews are updated annually, to document advancement toward goals, and then reviewed by the Vice President of Academic Services in conjunction with faculty.\textsuperscript{158}

While the college has historically included course-level student outcomes on all course outlines, in 2004 it initiated a formal process to transition to a formal Student Learning Outcomes Assessment Cycle framework to align outcomes at the course, major, and degree (institutional) level. The history of the process’s development is kept in the college’s educational master plan. Each semester, faculty enter student learning outcome data into an automated repository application, eLumen, and rotational assessment will continue until all courses have assessed outcomes.\textsuperscript{159}

SELF EVALUATION

The college partially meets this standard. Since mandatory assessment is not yet in place, however, some students still “fall between the cracks,” and as their needs are not well-identified, they cannot be easily addressed. Some students struggle in their first semester in college, which suggests that the college should have a more rigorous process to identify students’ needs during this transition. The college also needs to provide more academic counseling; at present, counselors have too many students to see and cannot provide the kind of frequent and ongoing contact that would guarantee a student’s needs are being met.

PLANNING AGENDA

1. Improve the orientation and assessment process for increased student success by working with math and English faculty on consistent validation of assessment cutoff scores.

2. Make orientation for new students mandatory.

\textsuperscript{156} Student Success: A Shared Responsibility with Dr. Vincent Tinto

\textsuperscript{159} eLumen (Login required)
2A1b The institution utilizes delivery systems and modes of instruction compatible with the objectives of the curriculum and appropriate to the current and future needs of its students.

Las Positas College uses face-to-face, online, hybrid, and web-enhanced delivery methods of instruction to meet the objectives of course curriculum and the diverse needs of its approximately 9000 students. In addition to the opportunity for personal enrichment, job preparation, and preparation for transfer to four-year institutions, LPC currently offers seventeen Associate of Science degrees, twenty-one Associate of Arts degrees, and forty-six certificate programs.

To the extent allowed by classroom availability, the college offers scheduling options designed to meet the diverse needs of students. On-site, face-to-face classes are offered during days, evenings, and Saturdays during the traditional 17.5-week semester, as well as a 16-week late start, an eight-week fast track, and one eight-week shortened term. The college also partners with the community to offer off-site classes, including a retail management certificate program with Safeway at their corporate headquarters in Pleasanton.

Las Positas College has made a commitment to student access via distance education. As a result of focused efforts, students may now meet more than 50 percent of the requirements on-line for five certificate programs and seven associate degrees in areas of business and computing technology. According to 2007-2008 DE Figures, of the 835 sections offered in the fall of 2007, 71 sections were offered online, consisting of 2349 enrolled students. To ensure that systems of delivery and modes of instruction are compatible with the course objectives, every course outline and course proposal form must be vetted and approved by the discipline, division, and Curriculum Committee. For a course that is offered fully or partially online, the DE Course Proposal Form must be submitted and approved by the discipline, division, and Curriculum Committee. "Through this process, the institution ensures that differing systems of delivery contain the same course content and meet the same course outcomes. According to 2007-2008 DE data, of the 835 sections offered in the fall of 2007, 71 sections were offered online, serving 2349 enrolled students.

The institution offers extensive support to instructors designing and teaching distance education courses. Group and one-on-one training for course development and design is offered in the college’s Innovation Center by the Instructional Technology/Open Learning Coordinator, with support from the Instructional Technology Support Specialist. In addition to these face-to-face training sessions, the institution offers online resources for instructors, including the Online Course Development Program (OCDP), Blackboard Online

164 2007-2008 DE Figures
Learning Team (BOLT), an Online Learning Faculty Handbook, and a regular newsletter.\textsuperscript{165, 166, 167}

The institution offers additional support to students to help them meet the objectives of courses taken online. A face-to-face Online Learning Orientation is offered before and during the first weeks of each semester, as well as an orientation offered online which includes a tutorial for success in an online course.\textsuperscript{168, 169} Technical support for distance education students is made accessible through email, by phone, or in person.\textsuperscript{170} In addition, counseling is available to online students via email. Increased counseling, along with online tutoring and other academic support services, are included in the recently approved Distance Education Strategic Plan.\textsuperscript{171, 172} Several of those support services were also included in the Substantive Change Report that was approved in 2007.\textsuperscript{173}

Aside from online counseling and tutoring, LPC stated in the proposal that it would enhance its DSP&S, Financial Aid, and Health Center online services. Since then, LPC has added an online study skills course (Psychology Counseling 15) that teaches study skills for online learners, added a counseling web page specifically dedicated to online students to its Online Learning web site, produced a video explaining counseling services, and begun investigating other online counseling and tutoring resources.\textsuperscript{174, 175} The Online Learning web site’s Students with Disabilities page has been updated with links to tutorials on how to make Windows XP and Vista more accessible.\textsuperscript{176} It also now contains links to make the Internet Explorer and Firefox browsers more accessible. In addition, projects currently in progress include training counselors on using DegreeWorks (a web-based academic advising, degree audit, and transfer articulation tool), producing a video tutorial for students on how to register for classes, adding a video tutorial to the Financial Aid web site to help students better understand Cal Grants, allowing students to make appointments with the Health Center online, allowing students to assess their health by completing an online survey, and allowing students to ask health-related questions online.

The Substantive Change Report also listed challenges for our college as it pursues the growth of quality online education, and the college has identified specific measures to meet those challenges:

- Maintain and expand institutional equipment and resources to keep technology and staff current in this ever-evolving arena. LPC faculty now have the ability to capture live lectures

\textsuperscript{165 Innovation Center}  
\textsuperscript{166 Online Learning Faculty Handbook}

\textsuperscript{170 Online Learning student support}  
\textsuperscript{171 Online Learning Counseling}  
\textsuperscript{172 DE Strategic Plan}  
\textsuperscript{173 Substantive Change Report}  
\textsuperscript{174 Online Learning Counseling}  
\textsuperscript{175 Online Learning Counseling video}  
\textsuperscript{176 Online Learning Students with Disabilities}
digitally to post on the web.\textsuperscript{177} They also now have access to digital video and digital image repositories, and they can post online multimedia onto the college’s iTunes U site.\textsuperscript{178, 179}

- Further integrate planning, decision-making, and support into other college areas and constituencies. The new DE Strategic Plan will be incorporated into LPC Educational Master Plan, and a goal within the DE plan is to integrate DE into the college’s program review cycle.\textsuperscript{180}

- Identify and implement supporting policies including ensuring quality of course design. An evaluation process for faculty teaching online has been negotiated into the faculty contract.\textsuperscript{181}

- Pursue and implement innovative programs and services that promote access and success concerns specific to online learners. LPC implemented a DE Counseling pilot whereby an adjunct counselor was proactive in contacting at-risk online students in an attempt to help them succeed in their classes. The college upgraded to Blackboard version 7.2, which includes a tool called the Early Warning System, designed to identify and communicate with students who might be falling behind in class. Furthermore, Dr. Vincent Tinto, an expert on retention and learning communities from Syracuse University, addressed LPC faculty during a two-day seminar.\textsuperscript{182} Although more work needs to be done in this area, retention and success rates have improved in online courses, going from an average of 72.3 percent and 57 percent, respectively, in the 2006-07 academic year, to an average of 76.3 percent and 60.3 percent in 2007-08.\textsuperscript{183}

- Work with the community and local industry to plan for online development in areas which meet local needs. Two of the activities within Goal 6 of the DE strategic plan are to design and develop additional courses for both traditional and nontraditional students, and to market specific courses to potential students throughout the community.\textsuperscript{184}

The Distance Education Committee meets once a month to discuss the ongoing and future needs of distance education faculty and students. Reports are submitted to the Academic Senate, the Vice President of Academic Services, and each division; minutes are also available online. The Distance Education Strategic Plan will ensure that issues of access, diversity, and support are addressed in an ongoing and timely manner. This committee also regularly reviews distance education student surveys results—including those that measure general distance education outcomes, such as technical and course navigation skills, and it uses success rates to evaluate student needs and incorporate them into the DE

\textsuperscript{177} Example of a live lecture capture

\textsuperscript{182} Student Success: A Shared Responsibility with Dr. Vincent Tinto
\textsuperscript{183} Retention and Success Rates, 2006-07 through 2007-08
\textsuperscript{184} DE Strategic Plan
Strategic Plan.\textsuperscript{185, 186, 187, 188, 189} The Open Learning Coordinator submits an annual Distance Education Report to the Board of Trustees. The college’s distance education substantive change report was approved by WASC in March 2007.\textsuperscript{190}

A number of processes have been established to monitor students’ success at meeting course objectives. Student learning outcomes are being developed and stored by all instructors for all courses in the eLumen system.\textsuperscript{191} Regular evaluation of all instructors as described in the faculty contract gives students, instructors, and administrators the opportunity to evaluate the success of delivery systems and modes of instruction.\textsuperscript{192, 193, 194} Statistical data for completion and success rates is gathered for all courses and analyzed by faculty as part of the program review process. These processes, in addition to the surveys, are reviewed by disciplines, divisions, and the appropriate committees as part of ongoing curriculum evaluation and regular program review.

Like most community colleges in California, LPC is beginning to address issues related to the requirement in the Higher Education Act of 2008 that stipulates that institutions authenticate the identity of distance education students submitting coursework. Blackboard’s encrypted password system is one step, but the district is looking to improve upon that by adding SSL security to the system. During training in the Online Course Development Program, faculty are encouraged to design multiple alternative assessments to evaluate student work, as opposed to relying strictly on exams.\textsuperscript{195} Furthermore, the college has posted a Reading and Writing Resources website that, in addition to providing writing help to students, teaches faculty to design writing assignments that help ensure that it is the enrolled student who does the work.\textsuperscript{196} As far as additional technological solutions to authenticate student identity can go, LPC will work with other colleges and the State Chancellor’s Office to identify and implement such solutions.

**SELF EVALUATION**

The college meets this standard. The institution, faculty, and administrators commit significant resources to curriculum review, course and instructor review, and student learning outcomes. In addition, appropriate resources are available to faculty and students using online learning delivery systems. Dialogue at the discipline and institutional level has resulted in procedures and policies that ensure “delivery systems and modes of instruction compatible with the objectives of the curriculum and appropriate to the current and future needs of its students.”
PLANNING AGENDA

1. Discuss and review planning to offer technical support to online students on Saturdays and Sundays since many students take online courses because they work full-time during the week.

2A1c The institution identifies student learning outcomes for courses, programs, certificates, and degrees; assesses student achievement of those outcomes; and uses assessment results to make improvements.

In response to a change in the WASC/ACCJC standards, Las Positas College began discussing the concept of student learning outcomes in 2002. The SLO Task Force was formally convened in fall 2004; this culminated in a period of extensive dialogue across the college about concerns including pedagogical appropriateness, performance evaluations, practical relevance, and curriculum duplication. A central achievement of the task for this first year was the creation of “core competencies,” or institutional learning outcomes; these would eventually overlap with degree outcomes. An intranet website was also set up to be used as a repository for documents and tutorials. In spring 2005, faculty, with the guidance of the task force, prepared to begin developing course-level SLOs: these would most immediately lead to benefits for students. The task force also developed and posted a revisable timeline for implementation.

In fall 2005, the Assessment Philosophy Statement was submitted to the Academic Senate, which approved it in spring 2006. The task force submitted the document “Student Learning Outcomes: Report and Recommendations” to the college president and the Academic Senate. In spring 2006, selected faculty presented their SLO Pilot Project assessment results, which led logically to suggested modifications for improved teaching and learning. After evaluating several products for technological support, the college purchased a license for eLumen, which would be used for SLO assessment cycle tracking. The SLO Task Force, renamed the SLO Steering Committee, has been communicating with the vendor about the college’s specific needs.

The fruits of assessment began to appear at the end of spring 2008. LPC assessed course-level SLOs for 83 courses in the spring 2008; in fall 2008, the number of courses assessed reached 160. The Steering Committee has set in place a rotating assessment schedule that will see the eventual assessment of every course. Now that faculty members are actively conducting course-level assessments and collecting data, the SLO Steering Committee expects to have major and certificate-level outcomes and assessments in place in 2009.

204 SLO Pilot Projects
205 SLO home page
206 eLumen (Login required)
SELF EVALUATION

The college partially meets this standard. By spring 2008, faculty assessed 83 courses, and by fall 2008, approximately 160 had been assessed. Extensive, college-wide dialogue, consensus building, and careful planning will be the foundation for major and certificate-level outcome development, the formalization of their alignment to core competencies, and the ongoing refinement of SLO processes through the institution.

Survey results show that while many faculty understand SLOs, assess them, and use results for improvement, some faculty do not. Since the college is at the beginning of its SLO assessment plan, these results were not unexpected, though they do indicate areas for improvement as the college moves forward with SLO processes. Faculty understand SLOs at the course level (71 percent strongly agree/agree) but not as much at the program level (52 percent strongly agree/agree), Student Services area (50 percent strongly agree/agree) and Core Competency level (50 percent strongly agree/agree). Assessments for SLOs are in place for courses (59 percent strongly agree/agree), programs/majors (49 percent strongly agree/agree), Student Services (50 percent strongly agree/agree), and core competencies (53 percent strongly agree/agree). Results of SLO assessment are used to improve learning at the course level (54 percent strongly agree/agree), program level (49 percent strongly agree/agree), Student Services area (48 percent strongly agree/agree), and Core Competency level (50 percent strongly agree/agree). It is important to note that many of the survey questions measuring SLO assessment had 27 percent-56 percent missing values. This means that between 1/3 to over ½ of respondents did not know enough about the process to have formed an opinion. This is another important indicator that the college needs to spend more time on understanding SLO assessment generally and the particulars of SLO assessment at LPC. Seventy-seven percent of respondents strongly agree/agreed that the administration is supportive of the assessment of SLOs.

PLANNING AGENDA

1. Identify certificate and major SLOs.

2. Assess the alignment of major and certificate SLOs with core competencies.

3. Articulate the role of SLOs in college policies, processes, and resource allocation.
2A2 The institution assures the quality and improvement of all instructional courses and programs offered in the name of the institution, including collegiate, developmental, and pre-collegiate courses and programs, continuing and community education, study abroad, short-term training courses and programs, programs for international students, and contract or other special programs, regardless of type of credit awarded, delivery mode, or location.

The college offers a full range of courses including pre-collegiate credit and non-credit courses, credit non-degree courses, and degree-applicable courses. These pre-collegiate courses are offered by disciplines such as English, mathematics, music, and ESL. The Community Education Program is an extended-learning program offering self-supporting, not-for-credit, fee-based classes and workshops that do not fit the mandated lower-division credit or noncredit areas.

The institution uses a variety of criteria in deciding to offer these various programs and courses, including the institution’s Vision and Mission Statements, student and community needs, the results of assessment tests, the needs of the labor market, and input from the college’s advisory boards. The nature of the identified need helps determine whether classes are offered for credit, on a noncredit basis, as a community education offering, or via contract education. One important process through which the institution makes decisions on offerings is the annual discipline planning activity, which is managed by the College Enrollment Management Committee. Through this process, the college allocates FTEF to the disciplines, according to their program goals and enrollment projections, in a way that maximizes student access and success.

Another central process through which the college ensures that its programs and courses are all of high quality is program review, executed on a four-year cycle. The college’s curriculum process, described in the Curriculum Handbook and overseen and implemented by the faculty through the college’s Curriculum Committee, also helps maintain quality instruction by guiding the updating of course outlines every five years for academic classes and every three years for career technical educational classes, as well as overseeing adherence of course outlines to Title 5 requirements. Advisory board input helps maintain programs’ currency. Shared governance committees such as the Planning and Budget Committee and the Staff Development Committee provide programs with resources, training, and equipment they need to maintain and improve their quality.

The International Students Program serves over 110 students from over 30 different nations. Program quality is measured by program review surveys as part of the student services program review every three years. Significant government oversight is now in place post 9/11, with increased reporting requirements to the

207 LPC Catalog
208 LPC Schedule
209 Advisory boards
210 Curriculum committee minutes
211 Curriculum Handbook
Department of Homeland Security through their SEVIS system. Program staff works closely with faculty and staff to provide accurate educational planning, health screenings, and housing and to provide a welcoming environment to support their success.

**SELF EVALUATION**

The college meets this standard. As evidenced by demand for its programs, the college’s criteria and processes assure programs’ quality and improvement while guiding the institution’s continuing growth according to student and community needs.

**PLANNING AGENDA**

None.

**2A2a** The institution uses established procedures to design, identify learning outcomes for, approve, administer, deliver, and evaluate courses and programs. The institution recognizes the central role of its faculty for establishing quality and improving instructional courses and programs.

At Las Positas College, the faculty have primary leadership in the development and evaluation of courses and programs. During their first term at the college, all new faculty experience a New Faculty Orientation program that prepares them for their central roles in assessing and improving their instructional programs through processes such as curriculum development and program review. This orientation also introduces faculty to the breadth of programs across disciplines that function collaboratively with the specific programs of their own focus to create student learning and success.  

In 2005, the Academic Senate, working with the Office of Academic Services and the Office of Institutional Research and Planning, created a program introduction process to help faculty and the college identify an instructional need not addressed by any existing program, to assess the scope of that need, and to anticipate demographic and other factors important to the development of the program best suited to meet the need. In the same year, the Academic Senate and Academic Services created and approved a program discontinuance/revitalization process to help faculty and the college work to adapt existing programs to the evolving needs of the community.

The Curriculum Committee reports directly to the Academic Senate and has faculty representation from all divisions, with nonvoting membership of division deans, a student representative, and the Vice President of Academic

---

212 New faculty orientation
213 Board Policy 6200 Program Revitalization / Discontinuance Process
Services. All new courses, as well as changes made to existing courses, are examined by this faculty-driven committee. The policies and processes of the course and program guide are noted on both the curriculum website and in Board policy. Throughout 2008, faculty had opportunities for involvement in recent Title 5 curricular changes and the integration of curriculum review in the program review process.\textsuperscript{214}

The ongoing evaluation of courses and programs, and the setting and updating of program goals, occurs through the program review process.\textsuperscript{215} During this process, faculty in each discipline examine data on student enrollment, success, and retention, as well as resource allocations, to help them improve the effectiveness and efficiency of courses and programs. In many areas, advisory committees also help faculty respond rapidly to changes in their students’ needs.\textsuperscript{216, 217}

Faculty are responsible for the identification and development of appropriate student learning outcomes at the course, major, and certificate level. Faculty are developing student learning outcomes for the courses in their disciplines and have begun to identify major and certificate outcomes in the fall of 2008. Continuous assessment of outcomes is facilitated by the student learning outcomes eLumen software that allows faculty to track multiple semesters of SLO implementation, assessment, and revision.\textsuperscript{218, 219}

SELF EVALUATION

The college meets this standard. Effective, well-established, regularly implemented procedures are used by faculty to develop and deliver courses and programs.

PLANNING AGENDA

None.

2A2b The institution relies on faculty expertise and the assistance of advisory committees when appropriate to identify competency levels and measurable student learning outcomes for courses, certificates, programs including general and vocational education, and degrees. The institution regularly assesses student progress towards achieving those outcomes.

Faculty members are responsible for creating, updating, and maintaining the integrity of all degrees, certificates, programs, and courses. Faculty also develop

\textsuperscript{214} Curriculum committee minutes

\textsuperscript{216} Program Review
\textsuperscript{217} Advisory boards
\textsuperscript{218} eLumen (Login required)
\textsuperscript{219} Student Learning Outcomes Committee minutes
student learning outcomes that reflect student competency based on both the Las Positas College core competencies and course competencies. Additionally, faculty of vocational programs integrate technical and discipline-specific skills into their course SLOs. 220, 221

The advisory committees for vocational programs at Las Positas College meet two times each academic year. 222 These twenty advisory committees actively support programs by facilitating the establishment of pre- and co- requisites, standards of performance, equipment and facilities required, financial and legislative matters, internships, donations of cash or equipment, resource development, student scholarships, and guest lecturing. 223 Members of the advisory committee typically include full and/or part time faculty, administrators, representatives of the constituency served by the program, and students. 224, 225, 226

The contributions made by advisory committees have not yet been made fully transparent, as some of them have not ensured consistent posting of their minutes. Of those advisory committees whose membership is posted, only 15 percent have student representation.

SELF EVALUATION

The college partially meets this standard. Faculty, with advisory committees as appropriate, identify all competencies and develop student learning outcomes. As major and certificate-level student learning outcomes have not yet been fully developed, however, the institution does not assess students’ progress at achieving core competencies.

Eighty-five percent of staff strongly agreed/agreed with the statement, “The faculty has a major and effective role in the design, implementation, and revision of the curriculum.”

PLANNING AGENDA

1. Identify and query advisory committees to determine if any is inactive.
2. Seek consistent student representation on advisories.
3. Monitor the regular posting of advisory committee minutes.

226 Fire Safety minutes, March 07
2A2c High-quality instruction and appropriate breadth, depth, rigor, sequencing, time to completion, and synthesis of learning characterize all programs.

The college’s mission statement mandates that it provide high-quality programs. Curriculum, the program review process, and the use of advisory boards for vocational and some transfer programs are the main avenues by which the institution ensures their delivery. Programs update their courses every five years (every three years for vocational programs), per Title 5, to better respond to the characteristics of their students, keep current in the field, and encourage proper sequencing of courses. The curriculum handbook helps faculty make their courses sufficiently rigorous by referring to the LPC and CSU GE philosophies and by giving examples of model assignments and methods of evaluation in the outline. When developing an online course, faculty also receive guidance from instructional technology staff and from the distance education portion of the curriculum proposal, which models ways to deliver course content and teach critical thinking online. Vocational programs that have advisory boards also have professional guidance to help those programs make their courses’ content sufficiently rigorous, deep, and broad. When the Curriculum Committee reviews the outlines, it provides additional guidance if a course seems insufficiently demanding. Instructors’ petitions to have a course counted for LPC GE, CSU GE, or transferability to the CSU or UC systems are reviewed according to LPC, CSU, or UC criteria for GE. Courses seeking UC transferability are also compared by the articulation officer to counterpart UC courses in consideration of rigor, depth, and breadth. Instructors who want their courses to apply for UC Berkeley American Cultures credit must apply separately to the American Cultures Program at UC Berkeley for their course to be approved by the UCB Academic Senate.

Program review mandates that faculty assess their programs and courses in rigor, depth, and breadth; and the dean, the Vice President of Academic Services, and faculty from across disciplines review this document and its recommendations. The integration of curriculum review will help the Curriculum Committee plan for upcoming curriculum and program development, as well as facilitate staff development requests when related to curriculum and assessment development. The college is now beginning to assess the rigor of its courses and programs through the SLOs. The assessment rubrics for all SLOs measure a level of achievement beyond proficient, and many of the assessment rubrics also assess mastery. In spring 2009, the college will be able to assess how many students have done well in their achievement of particular course outcomes and, in many cases, how many students have demonstrated mastery of the outcome. In many areas, faculty will also know how many students are achieving mastery in courses and programs and how many are achieving mastery for specific core

227 Mission Statement

231 LPC Catalog
232 Program Review process
competencies.\textsuperscript{233} The instructor evaluation processes for on-campus and DE courses also helps to maintain consistently high-quality instruction.\textsuperscript{234, 235}

SELF EVALUATION

The college meets this standard. Curriculum, program review, and the developing SLO processes ensure the appropriate breadth, depth, and rigor of instruction.

Surveys of our students indicate that most of them feel stronger or much stronger in their communication and critical thinking abilities since coming to LPC, and 25 percent of them or more feel this was “very much” due to LPC in the areas of writing skills, oral communication and speaking skills, gathering information from multiple sources, and mathematical skills and abilities.

PLANNING AGENDA

1. Create opportunities for increasing the number and scope of learning communities and interdisciplinary courses.

2A2d The institution uses delivery modes and teaching methodologies that reflect the diverse needs and learning styles of its students.

Las Positas College recognizes and addresses the diverse needs and learning styles of its students by providing a variety of delivery modes, teaching methodologies, and support services that address the learning needs of its students. Instruction is offered in semester-length lecture/lab courses, short courses, independent study courses, off campus courses, hybrid courses, and online courses.\textsuperscript{236}

The discussion of student needs, student success, learning styles, and teaching styles occurs at the college on an ongoing formal and informal basis. Staff development days and flex day workshops have addressed student learning styles. On the informal side, Teachers Teaching Teachers workshops, in which faculty discuss successful teaching methodologies in their own classrooms and share the learning experiences of their students, have been very well attended.\textsuperscript{237, 238, 239}

The college offers many opportunities for students to participate in orientation workshops and study skills courses, such as Psychology/
Counseling 15, that help students understand and adapt to their own learning styles. The Disabled Students Program and Services office (DSPS) offers academic and personal support for students with physical, learning, communication, and psychological disabilities by identifying the characteristics of their learning disability and preparing them for basic reading, writing, math, and computer courses.240

Teaching methodologies are selected by faculty based on the appropriateness of course content and the diversity of student learning styles (visual, aural, and kinesthetic). Teaching methods employed by instructors at the college include field trips, demonstrations, guest speakers, hands-on learning, group discussions, collaborative learning, internships, research projects, real-world based learning, and problem solving tasks. When faculty create or update a course outline, the Curriculum Committee requires a formal description of the teaching methodologies and an explanation of their use in that course. This process of review and approval of new or updated course outlines by the Curriculum Committee facilitates a productive dialogue on pedagogy and learning styles. One example of the adaptation of teaching methodologies and delivery modes to diverse learning styles is the Basic and Intermediate Algebra sequence in mathematics (Math 65 and Math 55). These courses are taught in a straight lecture mode, in a distance education mode, in a self-paced mastery learning mode where the courses are broken into two halves (X and Y), and in a lecture mode in which the one-semester courses are split into two parts taught over two semesters. To maximize their chances of success, students can choose the course that best suits their individual learning style.241

The college continues to investigate effectiveness of delivery modes and methodologies. Research of best practices is a focus of the Basic Skills Initiative, now underway at the college.242 Training of faculty on learning-related issues is an ongoing process, and the Staff Development Committee facilitates workshops and encourages faculty to attend conferences and seminars that help them more deeply understand and effectively respond to the various learning styles of their students.243

SELF EVALUATION

The college meets this standard. Las Positas College recognizes and addresses issues related to diverse needs and learning styles of its student body. The college has invested resources to increase faculty awareness of learning issues in a variety of informal and formal contexts. The college has also provided tools for assessment such as new student expo workshops, study skills courses, student counseling, and a variety of assessments via DSPS.

PLANNING AGENDA

None.

240 Disability Resource Center
241 LPC Catalog
242 Basic Skills Initiative data
243 Staff Development
The institution evaluates all courses and programs through an ongoing systematic review of their relevance, appropriateness, achievement of learning outcomes, currency, and future needs and plans.

The college evaluates all courses and programs through the ongoing program review process, which includes a review of SLO and curriculum data. Program review is guided by student learning and student needs. The process begins with department-specific self-studies which comprise in-depth assessment of an instructional program by faculty teaching in the program. The written report includes interpretation of data, a description of program effectiveness, and finally the program's plan to address the findings of the self-study. Validation of the self-study reports takes place via a collegial peer-review process. The program review process requires each discipline to utilize the findings of the self-study to make curricular changes and plan for the future. Program review is carried out by all college programs; vocational programs also receive additional input for their evaluations from twice-yearly advisory board meetings. These meetings ensure that course offerings reflect current and relevant industry technology and meet the needs for effective education and training of the community’s workforce. The advisory boards are made up of educators, students, and representatives from local businesses and relevant industries.

The data used to evaluate programs includes student surveys, the program review self-study, and emerging course-specific SLO data. The study includes a comprehensive review of the role of each individual program within a discipline in the overall college curriculum. A comprehensive collegial review of programs assesses the success of programs, their roles in supporting core competencies, and areas to focus on for planning for improvement.

The relevancy of programs is determined by an assessment of transfer data, articulation data, and student surveys conducted by the Office of Institutional Research and Planning. Vocational programs undergo additional evaluations by advisory boards. Student learning outcomes have been developed for many courses; these will generate data to further deepen our understanding of students’ achievement.

The results of program evaluation are intended for use in all areas of institutional planning, including administrative, programmatic/curricular, budget planning, and hiring. Data gathered from program review can also initiate revisions to the educational master plan, as well as the course schedule, where improvements can be made in accessibility and currency.

245 Advisory boards
246 eLumen (Login required)
247 Program Review
248 Surveys
SELF EVALUATION

The college partially meets this standard. The one area where criteria has not been met is in major and certificate-level student learning outcomes, though many departments have developed course-specific outcomes.

PLANNING AGENDA

1. Develop student learning outcomes for all majors and certificates.

2A2f The institution engages in ongoing, systematic evaluation and integrated planning to assure currency and measure achievement of its stated student learning outcomes for courses, certificates, programs including general and vocational education, and degrees. The institution systematically strives to improve those outcomes and makes the results available to appropriate constituencies.

Las Positas College engages in ongoing, systematic evaluation and increasingly integrated planning for courses, certificates, and programs through the program review, student learning outcomes, the educational master plan, the catalog planning cycle, program advisory boards, the College Enrollment Management Committee, and the Planning and Budget Committee. Ongoing review and integrated course planning also occurs within specific disciplines informally and at departmental meetings.

Although the institution engages in planning on many levels, the systematic review of instructional programs occurs primarily through the program review and educational master plan processes. Program review, occurring every four years with annual updates, is guided by student learning and student needs. The process assures the quality of the college’s educational programs through an ongoing process that involves a discipline self-study and written report. The self-study report is an in-depth assessment of an instructional program performed by faculty teaching in the program. The written report includes interpretation of data, commentary, and finally the program’s plan to address the findings of the self-study.

The data used for program review includes the following: program access, program resources, program efficiency, program success, student input, and, in some cases, advisory board input. SLO data, as it becomes available, will also be used.

249 Program Review
250 SLO home page
251 Educational Master Plan
252 Advisory boards
253 CEMC data
254 PBC site
Once the reviews have been drafted, peer-reviewed, revised, and reviewed by the Vice President of Academic Services, they are available for college constituents and planning committees to use for the college’s planning and resource allocation. Through the PBC, the disciplines can also refer to their program review reports to request faculty and classified positions and instructional equipment to address identified areas of program need. The program review update process can also be used to align program planning with the educational master plan to ensure consistency as well as efficiency in reaching institutional goals relevant to resource allocation to programs, and even new program initiatives. In 2008, an additional allocation resource chart was added to the program review model, allowing disciplines to request additional resources.255

Notably, all areas in Student Services and Academic Services conduct a formal program review, but many non-instructional units do not, even though they are considered in the educational master plan.

The Office of Institutional Research and Planning provides research and assessment of student success, student retention, and student self-report surveys to facilitate better understanding of the college community. This information is disseminated at Town Meetings, various committee meetings, and via the Institutional Research Briefs.256 Still, the community’s access to some of this information is uneven, as is the information’s role in the college’s decision-making processes.

SELF EVALUATION

The college partially meets this standard. The institution effectively engages in ongoing systematic evaluation and integrated planning of its programs and services and strives to improve them. However, since course, major, and certificate SLOs are in development, these planning and evaluation processes are not yet geared to assure their currency or measure student achievement of them. When all SLOs have been developed and assessment data becomes available, the program review process will consider SLO achievement and currency.

PLANNING AGENDA

1. Complete the SLO development for courses, certificates, and majors.

2. Develop a process for evaluating SLO assessment data for currency and achievement.

255 Revenue Allocation model
256 Research Brief: Assessment of Planning Cycles, Fall 2008
2A2g If an institution uses departmental course and/or program examinations, it validates their effectiveness in measuring student learning and minimizes test biases.

2A2h The institution awards credit based on student achievement of the course’s stated learning outcomes. Units of credit awarded are consistent with institutional policies that reflect generally accepted norms or equivalencies in higher education.

Some departments at LPC use departmental course and/or program examinations that validate their effectiveness in measuring student learning and minimizing test biases. The final examination for courses that are one level below transfer in the English basic skills program, for example, is holistically graded to a rubric that also describes the student learning outcomes for those courses. A biannual “norming” workshop and a grading process that averages scores of two independent readers for each exam help to preclude bias.257, 258

In addition to outlining grading policies, the Faculty Handbook (C-6 – C-7) describes the connection between the grading policy, class syllabus, and course outline.259 All course outlines describe the course content, the expected outcomes from the course, methods of instruction, typical assignments, and methods of evaluation. The outlines are reviewed by the appropriate division, and the Curriculum Committee scrutinizes outlines to minimize bias and assure that credits awarded will accord with the practice of defining the units of credit per the California Code of Regulations – title 5 CCR section 55002.260, 261

This code is consistent with what is referred to as a Carnegie unit standard, which is recognized by the Accrediting Commission for Community and Junior Colleges – Western Association of Schools and Colleges. Student learning outcome assessment tools, now in development for all courses offered at the college, are published on the LPC SLO website, and they can also be accessed through Class Web. SLO achievement will be considered by instructors as they determine students’ grades in accordance with the California Education Code and the Chabot- Las Positas District Board Policies.262, 263

SELF EVALUATION

The college partially meets this standard. Where present, “norming” and holistic grading practices work to minimize biases. Credit is awarded according to policies in line with norms of higher education. Data that would show whether credit is awarded according to achievement of learning outcomes has not yet been made available, however.

257 English 104 final exam evaluation, fall 2008

260 Curriculum committee minutes
261 California Code of Regulations title 5 section 55002
262 eLumen (Login required)
263 SLO home page
Students feel that the grading practices are fair (70 percent strongly agree/agree). Additionally, 76 percent of staff strongly agreed/agreed with the statement, “Grading is consistent with student learning and is based upon generally accepted norms or equivalences.”

PLANNING AGENDA

1. Investigate the correlation between outcome achievement and the awarding of credit as SLO data becomes available.

2A2i The institution awards degrees and certificates based on student achievement of a program’s stated learning outcomes.

Through means including the work of the Student Learning Outcome Committee (comprising faculty training, pilot projects, and flex day and department workshops), Town Meetings, and other discipline-specific workshops, the college has made steady progress in the development of course-level student learning outcomes, and is now also advancing dialogue on certificate and major learning outcomes and their incorporation to the eLumen software. Certificate and major outcomes, in development, are not yet directly used as the basis for awarding degrees and certificates. However, since degrees and certificates are awarded according to student success in a given sequence of courses, many of which do have student learning outcomes, there is an inherently increasing proximity of certificate and degree awards to the achievement of learning outcomes, as the development of major and certificate outcomes progresses.

SELF EVALUATION

The college partially meets this standard. While the college has made consistent and steady progress in the development of student learning outcomes and reporting software utilization, it has yet to identify all major and certificate-level outcomes, complete an entire assessment cycle, or formalize the role of outcome achievement in the awarding of degrees and certificates.

PLANNING AGENDA

1. Develop major and certificate SLOs.

264 eLumen (Login required)
2A3 The institution requires of all academic and vocational degree programs a component of general education based on a carefully considered philosophy that is clearly stated in its catalog. The institution, relying on the expertise of its faculty, determines the appropriateness of each course for inclusion in the general education curriculum by examining the stated learning outcomes for the course. General education has comprehensive learning outcomes for the students who complete it, including the following:

a. An understanding of the basic content and methodology of the major areas of knowledge: areas include the humanities and fine arts, the natural sciences, and the social sciences.

b. A capability to be a productive individual and life long learner: skills include oral and written communication, information competency, computer literacy, scientific and quantitative reasoning, critical analysis/logical thinking, and the ability to acquire knowledge through a variety of means.

c. A recognition of what it means to be an ethical human being and effective citizen: qualities include an appreciation of ethical principles; civility and interpersonal skills; respect for cultural diversity; historical and aesthetic sensitivity; and the willingness to assume civic, political, and social responsibilities locally, nationally, and globally.

The General Education philosophy for the college is published in the college catalog, as are the General Education requirements for both AA and AS degrees. In addition, flyers that outline the General Education requirements for AA and AS degrees have been made available by Student Services. In 2004-05, the campus engaged in a lengthy process (described in 2A3a) to determine the General Education pattern for AA degrees. This discussion resulted in the current pattern, which consists of 25 units selected in eight areas: Language and Rationality, Mathematics, Natural Sciences, Social and Behavioral Sciences, Humanities, Wellness, American Institutions, and American Cultures. The college has also reviewed and revised the degree requirements for AS degrees.

Courses that are considered for inclusion in the General Education pattern are evaluated by the Curriculum Committee. The Curriculum Committee uses GE criteria developed for each of the areas in the GE pattern. The criteria were developed based on Title 5, the college's GE philosophy, and the college's core competencies. The GE philosophy and core competencies were developed through a process of campus-wide discussion and input. The Curriculum Committee also evaluates the measurable objectives, content, methods of

265 LPC Catalog
266 Degrees & Certificates
267 LPC GE Criteria (pgs 45-46)
268 District Curriculum Council
269 Curriculum committee
270 Core Competencies, Final Draft
271 LPC GE Philosophy (pg 9)
instruction, typical assignments, and evaluation sections of the course outline of record when determining whether a course should be included as part of the General Education pattern.272, 273

At this time, course SLOs are not used to evaluate courses for inclusion in the LPC GE pattern. However, courses proposed for GE are evaluated using criteria based on the college’s GE philosophy and core competencies. Meanwhile, the college is continuing to formalize the processes through which SLOs will be used more directly in evaluating the GE pattern.

SELF EVALUATION

The college meets this standard. General Education requirements are based on a clearly defined philosophy. This philosophy was developed by faculty and is stated in the college catalog. The college evaluates courses for inclusion in the GE pattern based on criteria developed from the GE philosophy, which was also a source for the development of core competencies.

PLANNING AGENDA

None.

2A3a An understanding of the basic content and methodology of the major areas of knowledge: areas include the humanities and fine arts, the natural sciences, and the social sciences.

During the last accreditation cycle, the accreditation team recommended the college review the number of units required for the AA degree and come to a consensus about how to revise that degree and reduce the number of units of GE required. This led to the formation of an ad hoc GE philosophy committee (a subcommittee of the Academic Senate) charged with reviewing and developing a coherent GE philosophy which would guide the discussions about the AA degree. The committee was comprised of faculty from both the academic and career-technical constituencies and a broad spectrum of disciplines. After extensive research of Title 5 regulations and best practices, a GE philosophy was drafted and made available to the faculty-at-large for a period of review and comment.274 Based on the feedback received, the GE philosophy was finalized and approved by the Academic Senate.275

In 2004-2005, the District Curriculum Council (DCC), under the direction of the Academic Senates, revised the AA degree, reducing the number of units required in Title 5 Area E, the Local Option area. The re-defined Area
E includes four units in Wellness (Health and PE), three units in American Institutions, and three units in Writing and Critical Thinking. In revising the degree, the DCC also discussed the meaning of the associate degree. Discussions took place on the district’s two campuses, and the results of those discussions informed the decision making by the DCC. In 2006-2007, a similar review of the AS degree was conducted, resulting in a redefinition of Area E for that degree. The redefined area includes one unit of Wellness and a program-based GE option consisting of three units from a Title 5-defined GE area, which fits a general education student learning outcome specific to that program. This allows programs to select an additional GE course which best fits the needs of their program.276, 277

Following approval of the GE philosophy, the Curriculum Committee, under the direction of the Academic Senate, began to develop GE criteria for the Title 5 defined GE areas, American Institutions, American Cultures, Writing and Critical Thinking, and Wellness. In some cases, disciplines associated with a particular Title 5 GE area drafted the initial criteria (for example, the natural science disciplines drafted the criteria for the natural science area). Criteria for areas such as American Institutions and American Cultures follow guidelines laid down by CSU and UC. The criteria were then reviewed by the Curriculum Committee for consistency with Title 5 guidelines and rewritten in one style. The rewritten criteria underwent a second review by the disciplines before final adoption in 2006 by the Curriculum Committee. The GE criteria serve two purposes: they provide guidelines for faculty developing courses for inclusion in a GE area, and they provide criteria by which the Curriculum Committee determines whether to approve a course for inclusion in a GE area.278, 279, 280

When a new course is proposed for inclusion in an LPC GE area, the faculty member making the proposal must include a written justification for the requested inclusion along with the course outline and curriculum forms. The Curriculum Committee reviews the request and the outline using the GE criteria to guide its decision to approve or not approve the request. The course content and learning objectives must meet the established GE criteria.281

Each GE area has within it a number of courses, and, in general, these courses reside in a variety of disciplines. Each discipline has the responsibility to write SLOs for the GE courses within their discipline and to develop assessment tools for these SLOs. These SLOs should tie into the core competencies defined by the college. The eLumen software cross-lists courses with core competencies so that achievement of core competencies can be assessed by examining achievement of course, certificate, and major SLOs. In turn, achievement of core competencies will demonstrate students’ understanding of the basic content and methodology in the major areas of knowledge.282

SELF EVALUATION

The college partially meets this standard. The institution has done an excellent job in defining a GE philosophy and GE criteria, and it has solid processes in place for ensuring that GE courses include the basic content and methodology of traditional areas of knowledge. However, the overlap of GE course SLOs with the college’s core competencies is basically incidental, and there is no formal mechanism to assess or coordinate the alignment of GE course SLOs with core competencies.

PLANNING AGENDA

1. Assess the alignment of GE course SLOs with core competencies, and establish a cyclical process whereby the alignment of GE course SLOs with core competencies is regularly reviewed.

2A3b A capability to be a productive individual and life long learner: skills include oral and written communication, information competency, computer literacy, scientific and quantitative reasoning, critical analysis/logical thinking, and the ability to acquire knowledge through a variety of means.

2A3c A recognition of what it means to be an ethical human being and effective citizen: qualities include an appreciation of ethical principles; civility and interpersonal skills; respect for cultural diversity; historical and aesthetic sensitivity; and the willingness to assume civic, political, and social responsibilities locally, nationally, and globally.

The standards for general education courses are established by Title 5, and all of these courses are reviewed by the departments, the divisions, and the Curriculum Committee. To complete an Associate’s Degree, students must attain a level of proficiency in math, and they must satisfy other competencies through coursework in the areas of English composition, Writing and Critical Thinking, Communication and Analytical Thinking, Humanities, Social and Behavioral Sciences, Natural Sciences, Wellness, American Institutions, and American Cultures. These courses develop students’ skills in oral and written communication, scientific and quantitative reasoning, and critical analysis and logical thinking; students can further develop their skills in computer literacy through coursework in business or computer science courses.

283 Curriculum Handbook
284 Core Competencies, Final Draft
285 LPC Catalog
286 Curriculum committee
In order to ensure that all course outlines include expected skill levels, all courses must be proposed to the department and Curriculum Committee, whose rigorous process assures that courses meet the standards set out in Title 5, Section 55806, and requires that all course outlines include measurable objectives that explicitly address students’ expected skill levels in line with stated program objectives.287 In addition, the college has begun the process of developing and entering into the eLumen database student learning outcomes that specifically address and measure students’ achieved competencies and skill levels.288 As per Title 5 guidelines, all curriculum must go through a full review process every five years (every three years for vocational programs), at which time expected skill levels and measurable objectives are updated. This curriculum review is linked to the college’s four-year program review, which is updated annually.289

Students’ skills are measured throughout the students’ time at the college. This measurement process begins with validated placement tests for English, ESL, mathematics, and chemistry when students enter the college, and continues in their courses through a variety of assessments, including written exams, presentations, group projects, research papers, portfolios, and lab work.290 The ESL department, for example, has established specific course completion standards, which appear in course outlines, for courses within their sequence of skills-based courses. This department also uses holistically graded common exams for all courses to determine if the students have obtained the skills listed in the course outlines.291 The English department follows a similar procedure for basic skills English 100A/100B/104, courses that are pre-requisites for students not placed through the assessment process into transfer-level English 1A.292

The college’s mission statement includes a commitment to ethics, demonstrated cultural sensitivity, and social responsibility; the college’s core competencies include the development of “lifelong learning habits” in these areas, and the college catalog includes clearly stated objectives of the general education program, including, among other goals, the development of “skills and aptitudes that can aid the student in furthering personal and social usefulness and in living in the environment as thinking and contributing citizens.”293 In addition, as part of the Student Learning Outcome Task Force, the college identified the following areas of core competencies: communication, critical thinking, creativity and aesthetics, respect and responsibility, and technology.294 Courses in a variety of departments are designed to address concerns about ethics and effective citizenship; examples of these are Cultural and Racial Minorities, Gender Studies, Intercultural Communication, American Cultures in Theater, Multicultural Issues in America, Ethics, Cultural Geography, and Cultures of the U.S.295 Individual departments and the Curriculum Committee ensure that course objectives stated in the outlines reflect the college’s general education philosophy and refer to core competencies that include student learning leading to the development of these

293 Mission Statement
294 Core Competencies, Final Draft
295 LPC Catalog
qualities. The college is in the process of developing student learning outcomes specific to these stated objectives.296, 297

The Office of Institutional Research and Planning conducts regular surveys of continuing students, entering students, and graduating students regarding self-reported gains in critical skills areas. Two questions are of particular value for measuring student achievement of skills and abilities: Students are asked to report gains in 34 academic and affective areas of development. This question has been asked on the 2001, 03, 05, 07 Student Satisfaction Survey, the 2005 and 2007 Incoming Student Survey, and the 2006 and 2008 Graduating Students Survey.

Additionally, students were asked to what extent LPC was responsible for that change (not at all, somewhat, very much) on the 2008 Student Satisfaction Survey and the 2006 and 2008 Graduating Surveys. These 34 areas of knowledge, skills and abilities map directly to the core competencies. 298

The Student Satisfaction Surveys are monitored to determine change over time. Skill attainment is correlated with variables of interests such as GPA, number of semesters at LPC, overall satisfaction, and age. Separate analyses of correlations suggest that the number of semesters a student has completed is positively correlated with all of the knowledge, skills and abilities on the list. Age is also correlated with some skills, but in general, the number of semesters a student is enrolled is correlated with more. So while natural maturity is likely contributing to the increase in skills, the number of semesters likely plays a stronger role. This finding has been consistent for all four years the analysis has been done.299

Analysis of skill development in all three surveys at different points in time (entry, mid-point, graduation) draws a similar picture of student development. Students report the least strength in their skills on the Incoming Survey, increased gains on the Student Satisfaction Survey, and the most gains in the Graduating Student Survey. Students who have completed more courses at LPC show increased self-reported gains in academic and affective development.300

SELF EVALUATION

The college meets this standard. Through a rigorous process of course development, review, and evaluation at the department and Curriculum Committee levels, the college has developed and clearly communicated the expected skill level goals, which are designed to meet collegiate standards of general education students, in the college catalog, course outlines, and specific student learning outcomes. The initial and ongoing assessment of students does an adequate job of measuring students’ achievement of the required skill levels. The variety of courses dealing with ethics and citizenship issues assures that students will receive a substantial exposure to issues of cultural sensitivity, aesthetic appreciation, and civic responsibility. Finally, the college’s progress in

296 LPC GE Philosophy (pg 9)
297 Curriculum committee
298 Surveys
299 Surveys
300 Graduation survey presentation
the area of student learning outcomes should only improve its measurement of students’ achievement of these outcomes.

PLANNING AGENDA
None.

2A4 All degree programs include focused study in at least one area of inquiry or in an established interdisciplinary core.

2A5 Students completing vocational and occupational certificates and degrees demonstrate technical and professional competencies that meet employment and other applicable standards and are prepared for external licensure and certification.

Las Positas College offers both associate of arts and associate of science degrees. Each includes focused study or an interdisciplinary core. A list of the programs and degree requirements may be found in the print or online versions of the college catalog. Students must complete 60 semester units with a grade point average of 2.0 for either degree, and of these at least 18 units must be in the major. The Liberal Arts Degree has been revised by the Curriculum Committee to bring it into compliance with Title 5 regulations.301

The college currently does not track graduates who pass external or licensure exams. Each vocational program which prepares students for external licensure or certification must follow the structured curriculum to comply with the regulations of the relevant licensing agency.

Occupational programs meet with advisory boards to promote the goal of meeting employment competencies. The membership of the advisory boards is listed in the catalog.302 Adjunct faculty who work in the field are also able to provide insight into current industry practice and standards.

In the EMT program, the program itself is accredited by the appropriate county agency, and students who successfully complete the course EMT-1 take a national test to be certified by the State of California. In the Fire Service Technology program, the curriculum, where appropriate, meets state-specified criteria to meet requirements in such areas as Fire Investigation, wild-land firefighting, Hazardous Materials First Responder Operational, and Hazmat First Responder “Decon” Certifications under California Government Code Section 1503, Principles of Incident Command System, basic ICS structure and common responsibilities to meet the State Fire Marshall’s Office ICS 200 Certification Requirement. In Administration of Justice, all students, except for non-affiliates, who attend the Basic Peace Officer Academy and graduate

301 LPC Catalog
302 Advisory boards
are sponsored by a law enforcement agency, and thus have a job waiting for them when they graduate. The graduates receive a POST completion certificate which allows them to work as peace officers. Non-affiliates receive the same certificate, and theirs are valid for three years after graduation.303

Individual program review documents address the issue of student success. ARCC (Accountability Reporting for Community Colleges) is regularly reviewed to compare program performance at this institution with a similar program elsewhere.304

In 2007 Student Survey results, all students report growth in the three job-related variables. Terminal AA/AS and students with job-related goals report more growth in “Skills I can use in my current and future career” (34 percent much stronger for job-related educational goal students vs. 21 percent much stronger for all students). They are also more likely to attribute that growth (34 percent vs 28 percent) to LPC than the total population of students.305

**SELF EVALUATION**

The college partially meets these standards. All degree programs include focused study in one area of inquiry or in an established interdisciplinary core. The Liberal Arts Degree has been revised to meet this standard. There is, however, no systematic method for collecting data on graduates’ employment or licensure/certification exam success.

**PLANNING AGENDA**

1. Review a feasible vehicle for tracking student employment following graduation as well as for tracking success rates on licensure/certification exams.

---

303 Program Review
304 ARCC data
305 Fall 2007 student survey
2A6  The institution assures that students and prospective students receive clear and accurate information about educational courses and programs and transfer policies. The institution describes its degrees and certificates in terms of their purpose, content, course requirements, and expected student learning outcomes. In every class section students receive a course syllabus that specifies learning objectives consistent with those in the institution’s officially approved course outline.

2A6a  The institution makes available to its students clearly stated transfer-of-credit policies in order to facilitate the mobility of students without penalty. In accepting transfer credits to fulfill degree requirements, the institution certifies that the expected learning outcomes for transferred courses are comparable to the learning outcomes of its own courses. Where patterns of student enrollment between institutions are identified, the institution develops articulation agreements as appropriate to its mission.

A primary publication used to inform students and prospective students about the college’s programs, courses, and policies is the college catalog, which is published every two years.\textsuperscript{306} The Curriculum Committee ensures that all requirements are clearly and accurately described on the course outlines that shape the catalog text, and as the catalog is developed contact is maintained with the academic divisions that produced them. The Executive Assistant to the Vice President of Academic Services also verifies that all curricular changes are accurate. A catalog addendum is published in intervening years to account for curricular and policy changes which occur between the publications of catalogs.\textsuperscript{307, 308}

The catalog and addendum are available for purchase in the student bookstore, for free download from the college web site, as an inclusion to the Student Handbook, and for consultation in the Admissions and Records / Counseling Office. All new students are strongly encouraged to participate in a college orientation, where a counseling faculty member reviews the catalog and provides the most up-to-date information about the programs available at the college.

Handouts for certificate and degree programs that include a list of required courses are available in the Counseling Office.\textsuperscript{309} The college’s Articulation Officer oversees the development of the hard-copy program flyers and updates them on an annual basis. As a permanent member of the Curriculum Committee and the Catalog Committee, the Articulation Officer ensures that the program flyers contain the clear and accurate information. In addition, these requirements are published on the college website.\textsuperscript{310}

\textsuperscript{306} LPC Catalog
\textsuperscript{307} Curriculum committee minutes
\textsuperscript{308} Curriculum Handbook
\textsuperscript{309} LPC Catalog
\textsuperscript{310} Degrees & Certificates
All faculty submit course syllabi to their division deans, who verify all required course information is presented in the syllabi. According to the faculty contract, “The syllabus must include...course content and expectations (general course content, course objectives and prerequisites)...” The distribution of syllabi to students is also assured by contractual agreement. The campus Student Learning Outcomes Committee oversees the process by which course and program SLOs are developed, stored, assessed, reviewed, and revised.

Students seeking to transfer credits into the college must submit official transcripts from other accredited colleges and universities to the Office of Admissions and Records for consideration. Students with international records are required to obtain a written evaluation from a campus-approved foreign transcript evaluation service prior to determination of transfer credit. To be credited by Las Positas College, coursework must meet the following criteria:

- The course(s) must have been taken at an accredited college/university;
- The course(s) must be lower division;
- The course(s) must have been completed with a grade of “D” or higher. All transferred grades (including “F” grades) will be used in the calculation of units attempted, units completed, and the grade point average;
- The content of the course(s) must be determined to be equivalent to the current Las Positas College course standards. The initial evaluation of course credit is done by the Records Evaluator under the supervision of the Dean of Admissions and Records. The final responsibility for determining course equivalency is the discipline faculty.

This policy is communicated to students in the college catalog, in student orientations, on new student checklists, in the student handbook, in counselor-student meetings, and by Admissions and Records staff.

Policies and procedures of incoming transfer credits are currently under review as part of the implementation of Degree Works, a newly-purchased degree audit system.

Articulation agreements are in the purview of the Articulation Officer, who is responsible for coordinating general education requirements and major requirements with baccalaureate institutions. The college submits and updates CSU General Education and Intersegmental General Education Transfer Curriculum (IGETC) courses on an annual basis. These agreements are published in the catalog, on the web site, and in flyers available in the Counseling Office and Transfer Center.
The Articulation Officer maintains all course-to-course and major articulation agreements between this college and California State University (CSU), University of California (UC), and independent colleges and universities. Articulation agreements between Las Positas College and the public California universities are available through project ASSIST, the California articulation database, which is accessible through the college website. Articulation agreements between Las Positas College and independent universities are indexed on the college website, with direct links to the agreements. Courses which have been accepted for transfer to CSU and/or UC campuses are indicated in the catalog, in the schedule of classes, and are published on flyers available in the Counseling Office and Transfer Center.

To evaluate articulation agreements, the articulation officer works closely with faculty to ensure that articulation issues have been fully considered for all new and revised curriculum proposals. The review and signature of the Articulation Officer is required for all new and revised curriculum proposals prior to consideration by the Curriculum Committee. The Articulation Officer is in regular communication with her counterparts at UC, CSU and independent universities, and attends district, regional and statewide articulation meetings to ensure the accuracy and consistency of the college’s articulation agreements.

All new students are encouraged to participate in a college orientation, which reviews transfer requirements, transfer programs, and transferable courses available at the college.315

315 EXPO website
SELF EVALUATION

The college meets this standard. Established processes assure that accurate information of courses, programs, and policies is available to students and the community in a variety of forms. Course syllabi are reviewed for accuracy and completeness by division offices and distributed by all faculty to students.

PLANNING AGENDA

None.

2A6b When programs are eliminated or program requirements are significantly changed, the institution makes appropriate arrangements so that enrolled students may complete their education in a timely manner with a minimum of disruption.

2A6c The institution represents itself clearly, accurately, and consistently to prospective and current students, the public, and its personnel through its catalogs, statements, and publications, including those presented in electronic formats. It regularly reviews institutional policies, procedures, and publications to assure integrity in all representations about its mission, programs, and services.

The Chabot-Las Positas district has clearly defined program revitalization and discontinuance policies. The policies were jointly created by the Chabot and Las Positas Academic senates. Program discontinuance is a two-year process.316

The college works to accommodate students who are impacted by program discontinuance, and the college catalog describes rights for students that would apply when changes to the catalog are made, including changed due to program discontinuance. When a program is discontinued, any affected students work with counseling and within their disciplines with the faculty and/or the dean to create a course of study that will meet each individual student’s goals. Options include course substitution, waivers, or in some instances, an individualized degree tailored to the student.317, 318

The college catalog and class schedules are widely distributed and accessible online. The CLPCCD has a marketing plan, as well as a Board of Trustee’s Policy on Community Relations. A Community Outreach Committee has been established and integrated into the shared governance structure of the college. The LPC Foundation also engages in community outreach.319, 320

---

316 Program Revitalization and Discontinuance policy
317 LPC Catalog
318 LPC Schedule
319 Newsroom, including District Newsletters
320 Community Outreach Committee
SELF EVALUATION

The college meets these standards. The discontinuance and renewal policy is an effective policy and is closely adhered to by the college. The college represents itself clearly and accurately through the college catalog and other publications.

PLANNING AGENDA

None.

2A7a Faculty distinguish between personal conviction and professionally accepted views in a discipline. They present data and information fairly and objectively.

The college’s policy on academic freedom states, “Academic freedom exists and is nurtured in our community for the common good of all citizens. Students, faculty, administrators and society itself derive benefits from the practice of academic freedom with its open search for truth and its free exposition. Academic freedom is fundamental for the protection of the instructor’s right in teaching and the student’s right in learning in the classroom and on the campus. Academic freedom carries with it responsibilities correlative with rights, such responsibilities being implicit in all freedoms and assured by all members of the college to insure the rights of others.

“Any issue involving the alleged violation of academic freedom on campus shall follow the procedures of academic due process as provided for the students, faculty, and the college, whichever is appropriate.”

This policy defines and supports academic freedom; however, it does not distinguish between personal conviction and professionally accepted views since this distinction would be discipline-specific. Course outlines specify the course content which is to be covered regardless of an individual instructor’s opinion. Faculty evaluations are the mechanism the college uses for determining how effectively instructors differentiate between course content as described by the outline and personal opinion. Tenured faculty are evaluated every three years by a committee consisting of two tenured faculty peers; part-time faculty are evaluated every three years by a faculty member, and untenured faculty are evaluated both of their first two years at the college, and once more during their third or fourth year, by two full-time faculty members and their dean. All faculty evaluations also include a student survey.

321 Board-approved academic freedom policy
The college’s board-approved academic freedom policy is made public in three ways. First, it is posted on the CLPCCD website. Second, it is printed in the Full Time Faculty Handbook. Third, it is printed in the Adjunct Faculty Handbook.

The policies demonstrate institutional commitment to free pursuit and dissemination of knowledge by emphasizing the importance the college places on academic freedom and integrity, and by making these policies widely available.

**SELF EVALUATION**

The college meets this standard. There is a clear board-approved academic freedom policy, which is made public and accessible in a variety of ways. Instructor evaluations ensure that instruction content follows the course outline.

Eighty-six percent of staff strongly agree or agree with the statement, “The faculty of LPC protects the academic freedom of its members.” Additionally, 87 percent of staff strongly agree or agree with the statement, “In the classroom, faculty members at LPC encourage a balanced perspective of multifaceted issues, beliefs and world views.”

**PLANNING AGENDA**

None.

2A7b The institution establishes and publishes clear expectations concerning student academic honesty and the consequences for dishonesty.

2A7c Institutions that require conformity to specific codes of conduct of staff, faculty, administrators, or students, or that seek to instill specific beliefs or worldviews, give clear prior notice of such policies, including statements in the catalog and/or appropriate faculty or student handbooks.

Las Positas College has clearly defined guidelines concerning academic honesty, student conduct, and due process. The Academic Senate Academic Honesty Statement is the standard adopted by the college. The college catalog, college website, Student Handbook, Academic Senate intranet site, course syllabi, and the CLPCCD Board Policy Manual all contain statements about academic honesty. The Student Conduct Code and Due Process are likewise stated in the college catalog, college website, and the CLPCCD Board Policy Manual.

---

322 Board policy 4320
323 FT Faculty Handbook (pgs C-6, A-7,8)
324 PT Faculty Handbook (pgs 1, 28)
325 Academic Honesty Statement
326 Student Conduct Code
327 Grievance Procedures
The Student Handbook includes an FAQ on cheating and plagiarism, a discussion of Academic Honesty, and the Student Conduct Code. Many faculty members include in their class syllabi policies with regard to academic honesty and disruptive behavior. The College Mission, Values, and Guiding Principles are clearly communicated in the 2006-2008 College Catalog.328, 329, 330

SELF EVALUATION

The college meets the standard. Academic dishonesty is not tolerated at Las Positas College. Depending on the severity of the infraction, students may receive a failing grade on the assignment, a lower course grade, or a failing grade for the course. Additionally, students may be put on probation, suspended, expelled, or given a lesser sanction. Students have access to due process.

Many faculty include in their syllabi the Academic Honesty Statement and other statements related to student conduct, and state the consequences of dishonesty or improper student conduct. Anti-plagiarism tools, such as services of turnitin.com, are used by the faculty to identify cases of academic dishonesty.

Policies on academic honesty, student conduct code and due process, Mission, Vision, and Values are communicated in various print and online sources.

Eighty-two percent of staff strongly agree or agree with the statement, “LPC represents itself in and honest and truthful manner.”

PLANNING AGENDA

None.

2B The institution recruits and admits diverse students who are able to benefit from its programs, consistent with its mission. Student support services address the identified needs of students and enhance a supportive learning environment. The entire student pathway through the institutional experience is characterized by a concern for student access, progress, learning, and success. The institution systematically assesses student support services using student learning outcomes, faculty and staff input, and other appropriate measures in order to improve the effectiveness of these services.

2B1 The institution assures the quality of student support services and demonstrates that these services, regardless of location or means of delivery, support student learning and enhance achievement of the mission of the institution.

328 LPC Catalog
329 Mission Statement
330 Values Statement
2B2 The institution provides a catalog for its constituencies with precise, accurate, and current information concerning the following:

a. General Information - Official Name, Address(es), Telephone Number(s), and Web Site Address of the Institution
   - Educational Mission
   - Course, Program, and Degree Offerings
   - Academic Calendar and Program Length
   - Academic Freedom Statement
   - Available Student Financial Aid
   - Available Learning Resources
   - Names and Degrees of Administrators and Faculty
   - Names of Governing Board Members

b. Requirements
   - Admissions
   - Student Fees and Other Financial Obligations
   - Degree, Certificates, Graduation and Transfer

c. Major Policies Affecting Students
   - Academic Regulations, including Academic Honesty
   - Nondiscrimination
   - Acceptance of Transfer Credits
   - Grievance and Complaint Procedures
   - Sexual Harassment
   - Refund of Fees

d. Locations or Publications Where Other Policies May be Found

Las Positas College is committed to admitting a diverse population of students that are able to benefit from its programs. Admission is open to anyone who has graduated from high school or the equivalent, or anyone age 18 or over, who can benefit from instruction. Concurrent enrollment is also offered to high school students grades 10 to 12 with high school administration and Las Positas College Admissions approval. A comprehensive set of student support services is provided to assure admitted students are given the opportunity to benefit from the college’s programs. Student support programs include Admissions and Records, Assessment Center, Counseling, Career/Transfer/Employment Center, Financial Aid/Veteran’s Office, CalWORKS (California Work Opportunities and Responsibilities to Kids), EOPS (Extended Opportunity Programs and Services), CARE (Cooperative Agencies Resources for Education), DSPS (Disabled Students Programs and Services), Tutorial Center, International Students Office, and Student Health Center. Other programs within Academic Services that support students include the Integrated Learning Center (ILC), which houses the Open
Writing Center and the library. All programs are involved in one or more components of students’ institutional experience (access, progress, learning, and success) and reach students at all stages from outreach to graduation.

Outreach is targeted to people that present the ability to benefit from instruction with the support of these programs. Counselors act as liaisons to the local high schools, making presentations about what Las Positas College offers and requires. Student ambassadors and the Outreach Coordinator also attend high school and community events to disseminate Las Positas College information. A Spanish-speaking counselor reaches out to the Latino community including organizing a campus event called “Learning to Triumph” that offers workshops about Las Positas College in Spanish and English. The college also holds an annual Major Exploration Faire to expose current and prospective students to its academic programs and faculty. Another on-campus event is the annual High School Senior Parents’ Night open to local high school seniors and their parents.

Once admitted, new students, unless they are exempt, are required to take the math and English assessment tests in order to enroll in math and English courses or courses requiring math and English as prerequisites. The assessment process determines whether students are prepared for college-level courses or whether they should begin by taking pre-college courses that cover basic skills in English, mathematics, or English as a Second Language (ESL). Separate placement testing for ESL is required for students who need or would like to take ESL courses or who have scored correspondingly on the initial English assessment. For interested students, chemistry testing for Chemistry 1A (General College Chemistry) is also available. Assessment testing increases the likelihood of placement into the appropriate level of courses for all disciplines, which increases the likelihood of student success.

Students who have not graduated from high school and wish to apply for financial aid are administered the “Ability to Benefit” test by the Assessment Center, which is comprised of the regular math and English assessments. If they do not pass in two attempts, students receive counseling to discuss their results and further options. Students also have the option of taking the Wonderlic test at Chabot College.

After assessment testing, students meet with counselors during orientation or by individual appointment to review their scores and understand their course placements. Scoring determines potential referrals to the Disabled Students Programs and Services (DSPS) office, which then further assists students in selecting the appropriate courses based on their goals and needs. This process guides students into registering for courses appropriate to their ability to succeed and benefit. Responding to evidence gathered during the college’s most recent matriculation categorical site visit that shows students are more likely to persist and succeed when they attend orientation, the college is exploring turning orientation into a mandatory requirement after admission. This evidence is being considered as support for the creation of a “First Year Experience” program for new students.

331 Learning to Triumph Flyer – Outreach Event to Latino Population
332 Assessment Testing Flyer
333 Research for First Year Experience
Throughout each academic term, the college requests midterm progress reports for students from each instructor. Through early detection of potential problems, actions can be taken to increase students’ chances for success. The Student Interventions Developer also administers a program focused on students on academic and progress probation or dismissal status. These students are required to submit progress reports twice a semester for each course to monitor progress and promote success. These reports also facilitate early intervention, when advantageous to the student.334

A special first semester program, called the College Foundation Semester, was recently created to provide broader access and support to disadvantaged students.335 This learning community incorporates a first semester of courses in English, math, computer information systems, and psychology-counseling (“Bridge to College and Careers”) that is designed to prepare students to be successful in college and benefit from its programs.

From the beginning to end of a student’s experience at Las Positas College, the Counseling Division renders services to guide students through academic, career, and personal issues and concerns to support progress toward their goals.

Las Positas College offers faculty, staff, administration, and students a variety of opportunities to engage in discussions centered on student access, progress, learning, and success. In addition to weekly student services departmental meetings, a range of committees and task forces meet on a regular basis:

- **Learning Task Force** – This group reviews persistence and retention rates in basic skills courses.336
- **The Campus Change Network** – This group of administrators, faculty, staff, and students focuses on increasing diversity, equity, and inclusion in order to create an environment that better supports access, progress, and success for all students.337
- **Counseling Division** – The division meets on a weekly basis to discuss issues such as assessment, orientation, and other counseling services that affect student access, progress, learning, and success. Under current discussion is development of a “First Year Experience” student program responding to data that demonstrates that participation in such programs increases persistence and success.338
- **The Foundation Semester** – The faculty from each participating discipline meet weekly to discuss how their lesson plans are working, how students are learning, progressing, and succeeding, and how to create future lesson plans.
Student Success Committee – This committee engages in discussions about student access issues, such as students’ awareness of Las Positas College and how to get started and participate in all the components of matriculation. Retention rates within basic skills courses are reviewed to assess student programs. The structure and process of assessment and orientation are also examined, as these components are known to increase student progress and success. All student support services are consistently evaluated to assure that students are receiving quality information and assistance. For example, each counseling faculty member is evaluated by administration, faculty, and students. Counselors are observed during counseling sessions and/or during instruction of a psychology-counseling course and are evaluated on relevant competencies. During this time period, students with whom these counselors meet are given evaluations immediately following their sessions or classes. Student and peer evaluations are shared with counselors to improve their strategies to benefit students.

Programs that support students are evaluated through a process called “Student Services program review.” In a cyclical review, strengths and weaknesses are identified and documented through a series of surveys given to students, staff, and faculty. Faculty review the goals and objectives of each program to determine to what extent and how they were met. Based on the findings, recommendations are made for future program improvement. Faculty also develop plans for addressing the recommendations or identified areas for potential growth and development.

In order to demonstrate that student services is supporting student learning, each program is in the process of developing and assessing at least one SLO per program. For example, one SLO created by the Counseling Division is “Students will plan and execute a program of study,” and it is currently being assessed by counselors during student appointments and by using student records to determine course registration. The results are currently being entered into the eLumen assessment software, and this process will inform the division of how effective several of their current practices are and whether modifications need to be made with the goal of improving student learning.

The Vice President of Student Services holds a planning retreat each year with all of the Student Services Program Coordinators and full time faculty. Each year for the past several years a portion of the retreat has been dedicated to learning outcomes. For the past four years, the DSPS Coordinator has been the lead in providing professional development and support to the programs. His “give me an hour and I’ll give you an SLO” individual workshops have been successful and assisted all programs to have outcomes and assessments in place.
Categorical programs in student services undergo a “categorical site visit” from the state chancellor’s office every six years. The site visit for DSPS, EOPS/CARE, CalWORKS/TANF, and Matriculation occurred in February 2008. The college submitted a self-study to the visiting team in preparation for their visit. The exit interview provided the college with substantial positive feedback on these programs. Additionally, the team recommended that the college examine the administrative structure in Student Services to provide greater support to programs and recommended significant space and staff increases. Unfortunately, the college has not yet received the official report from the state chancellor’s office. The report will be added to the addendum when received.

Las Positas College publishes a catalog every two years that is comprehensive in providing accurate and current general information, information on admissions requirements, academic programs and requirements, student programs and services, college policies, and the location of additional information.343 In alternate years, an addendum with curricular and policy updates is also provided. The organization of the information into clear, logical sections makes the catalog easy to use and understand. The college recently received the following award for its catalog and has received it on several occasions in the past:

- National Council for Marketing and Public Relations
- Paragon Awards
- College Catalog, Division A
- Bronze Award

A catalog committee is formed each catalog cycle to update the catalog, and is typically comprised of the Vice President of Academic Services, Vice President of Student Services, Executive Assistant to the Vice President of Academic Services, Visual Communications Coordinator, and Articulation Officer. The committee ensures that the content is reviewed for accuracy and currency in a timely manner and coordinates the final edit. Each academic and student services division is responsible for reviewing and modifying its particular programs and/or services as necessary. The respective deans within the divisions work with their individual departments in this process. The Executive Assistant to Vice President of Academic Services ensures that the curricular changes are accurate. The Articulation Officer ensures that the transfer information is accurate within the program information and for each individual course. The Visual Communications Coordinator organizes the process of catalog layout, graphics, print production, and web format. An addendum is published in intervening years that includes curricular and policy changes which occur between the publications of catalogs. Some policies are also communicated via counseling appointments or during orientation, for example, the process for international transcript evaluation.

343 LPC Catalog
The catalog and other publications such as the schedule, student handbook, and informational flyers are made accessible to students, prospective students, and the public in multiple formats and locations. Students can purchase the catalog and schedule in the bookstore or access them online via the Las Positas College homepage. Catalogs and class schedules are made available during orientation and in the Counseling and Admissions and Records Offices. Student handbooks are given to students for free at orientations and during counseling appointments. Catalogs, schedules, and handbooks are also distributed to local high schools by counselors during outreach events. The Outreach Coordinator distributes these materials during various community events. Selected publications from the International Student Office and the Financial Aid Office in addition to outreach materials are distributed in Spanish to reach out to the Latino community and are available online. During this current catalog cycle (2008-2010), the catalog will also be made available in compact disc format.

Many instructors also include information about college policies in their syllabi, which is reviewed by their respective deans.

SELF EVALUATION

The college meets these standards. The college offers an excellent set of student support services that ensures students are given the opportunity to benefit from its programs and are provided with adequate access and support to progress, learn, and be successful. The services are routinely evaluated for quality, and student learning is assessed with the implementation of student learning outcomes.

The catalog provides all necessary and accurate information in a way that is well-organized and accessible. All aspects of the catalog’s content and formats are regularly reviewed.

The college catalog includes all relevant information students need to guide them through college policies and processes. However, due to the previously smaller size of the college, student services sometimes internally operates on past practice and its ability to communicate informally with staff regarding key processes. Most processes, grade reporting, etc. have written procedures that are followed carefully. Processes for transcript analysis, pre-requisite waivers as examples, are done consistently, but could benefit from written procedures for the training of new staff.

PLANNING AGENDA

1. Assess policies and processes for reviewing student documents and where appropriate create written procedures for consistent actions.

344 LPC Schedule
345 Student Handbook
2B3 The institution researches and identifies the learning support needs of its student population and provides appropriate services and programs to address those needs.

The learning support needs of the student population are identified in a variety of ways within Student Services. The initial online application includes a section that allows students to identify specific support needs and concerns, such as academic counseling, services for disabled students, or housing information. These requests can be used by student support services to contact the potential students and provide information about requested services.346

When students complete the required math and English assessment test as part of the admissions process for new students, they are assigned to an orientation and program planning session conducted by counselors. During this orientation, information concerning all available learning support services is presented to students. Students also have an opportunity to talk one-on-one with a counselor and are able to identify specific learning support needs they may have, focusing on their initial semester at the college. The results of the assessment process also indicate student strengths and weaknesses with respect to math and English skill levels, as well as students with learning disability needs. This initial contact with a counselor begins the overall support process for students. Depending on specific student needs and goals, counselors encourage students to become involved in learning communities, to take appropriate basic skills courses, to utilize services available through the Independent Learning Center and the Tutorial Center, and to become involved in campus activities and clubs.

Each year, all new students enrolling for the fall semester are strongly encouraged to participate in the special EXPO LPC orientation program. This one day (six-hour) focused orientation provides students with an exposure to various strategies for college success through an exploration of available programs and services. A required element of this program is completion of the Student Inventory Needs Assessment instrument.347 This survey instrument is designed to identify specific student academic strengths, concerns, and needs. It also allows students to indicate and request help with or information about various student support services including tutoring, improving basic skills, financial aid assistance, transportation, personal counseling, and educational guidance. The instrument also provides an evaluation of personal student attributes such as academic confidence, goal commitment, time management skills, perseverance, and study skills. All students are given an opportunity to meet with a counselor to discuss the survey results and determine which specific support resources fit their interests and needs. The overall student inventory results are also used to plan academic and student support services at the college. This data concerning students’ needs helps the institution target and prioritize available student support resources.

346 Online Student Application
347 Assessment Center
For students with special needs, the various Student Services departments dedicated to serving special populations meet, monitor, and develop ongoing relationships with these students to help ensure their academic success. These departments include CalWorks, CARE, DSPS, EOPS, and Financial Aid.

**SELF EVALUATION**

The college meets this standard. The college has a well-developed process for identifying the learning support needs of its students. Over 90 percent of students reported a positive level of satisfaction with the new student orientation program at Las Positas College. Overall, students indicated high levels of satisfaction with all basic student support services available to them.

**PLANNING AGENDA**

None.

**2B3a** The institution assures equitable access to all of its students by providing appropriate, comprehensive, and reliable services to students regardless of service location or delivery method.

Comprehensive access for students to various support services begins with outreach activities and continues with the institutionalized matriculation components of admissions, orientation, assessment, counseling, and student follow-up. Additional support services available to students include services offered through Admissions and Records, Financial Aid, Transfer Center, Student Health Center, Tutorial Center and International Students program. Information concerning various service components can be accessed online through the college web site. All Student Services areas and departments have websites including a specific email address that provides students with online access to help with their questions or concerns.

The Student Services area conducts outreach activities in the surrounding community to meet prospective students’ needs in a variety of ways. Visits to local high schools are conducted each semester by staff and faculty from Counseling, Financial Aid, Disabled Students Programs and Services and Extended Opportunity Programs and Services. College brochures and other printed information are distributed to all local high schools and also made available at many special local events.

Student Services staff and faculty are available to work with non-English speaking students in several languages including Chinese, Farsi, Japanese, Tagalog, Spanish, Vietnamese, and American Sign Language.

---

348 Bilingual Interpreter Listing
Students can apply for admission to the college via paper application or online through the college web site. Computers are provided in the Admission and Records area to assist students with the application process and registration for courses. Orientations for new students are provided online and on campus. Assessment testing is web-based and is conducted through the Assessment Center. Testing sessions are also provided at local high schools.

Counseling and student follow-up services are provided through the main on-campus counseling area, and in psychology-counseling courses, such as Educational Planning, Study Skills, and Personal Development. General information about counseling, and extensive counseling resources, is provided on the Counseling Services web site. Students can schedule appointments in-person, by phone, or request appointments online by email.

For students with specific learning or physical disabilities, application, registration, orientation, assessment, and counseling services are provided by DSPS faculty and staff. Specific needs are identified and subsequent appropriate accommodations provided.

Registration for all students can be accomplished in person or online using the CLASS-Web student information and registration system. Financial Aid FAFSA applications may be completed online or at the Financial Aid office. Students may also access online information concerning university transfer, tutorial assistance, health related issues, and all other areas of Students Services through specific web sites provided by each service area. All Student Services areas also hold extended evening hours on certain days to accommodate students completing evening classes.

SELF EVALUATION

The college meets this standard. The college has utilized technology extensively and effectively to provide appropriate delivery of services to students. The current level of services is very good, considering the limitation of staff and faculty available. Nearly 90 percent of the students indicated they were either satisfied or very satisfied with the convenience of the online application process and the online CLASS-Web registration system.

PLANNING AGENDA

None.

2B3b  The institution provides an environment that encourages personal and civic responsibility, as well as intellectual, aesthetic, and personal development for all of its students.
Through its programs and services, Las Positas College provides a learning environment that promotes personal and civic responsibility, as well as intellectual, aesthetic, and personal development for all of its students. Students have a variety of opportunities to serve on student government, join or create clubs based on social, recreational, or intellectual interests, and participate in other co-curricular activities. One student club, the Alpha Gamma Sigma Honor Society, requires a certain number of community service hours per semester from its members. Events held annually at the college include Constitutional Club Day, Major Exploration Faire, Transfer Day, Latin-American Awareness Week, Brain Awareness Week, and the Honors Symposium. Students can also compete in speech tournaments held throughout the country and internationally by joining the Speech (Forensics) team.

In addition to courses in the social sciences and other programs that emphasize personal development and learning about civic responsibility, the college offers two courses designed specifically to teach these values and skills. One of these is a student leadership class for members of the Associated Students of Las Positas College to learn about parliamentary procedures and leadership skills. Other students enroll in Mass Communications 15 to develop their leadership skills while producing the student newspaper.

The college engages in dialogues to discuss what constitutes a good learning environment. The Campus Change Network (CCN) was created in spring 2005 as a result of a proposal to implement the Student Equity Plan. The CCN made a presentation to the Board of Trustees in May 2006 to share their findings. It also developed a planning matrix with timeframes to target their strategies and major activities, including a speaker series. In 2008, the CCN invited Dr. Doris “Lucki” Allen to speak in recognition of Women’s History Month. The campus change matrix also identifies expected outcomes and supports the evaluation of actual results.

**SELF EVALUATION**

The college meets this standard. It maintains a robust variety of events on its Student Life activity calendar. The college also holds monthly Campus Change Network and Student Success meetings to identify areas for improvement. As the campus is changing, it has facilitated dialogues on issues of diversity, equity, access, how the campus communicates information about student life opportunities, and how to provide a learning environment conducive to the development of personal and civic responsibilities of students.

According to the Student Surveys given in 2005 and 2007, a majority of students feel that there is a general respect for racial, ethnic, gender, physical disability, religious, and sexual orientation differences. A majority of students also expressed satisfaction with the current level of student activities at the college.

354  Campus Change Network Minutes
PLANNING AGENDA
None.

2B3c  The institution designs, maintains, and evaluates counseling and/or academic advising programs to support student development and success and prepares faculty and other personnel responsible for the advising function.

Las Positas College has developed comprehensive counseling services to support student development and success. Counselors provide the full range of services to students, including academic, career, and personal counseling; they also teach classes in academic and career counseling. The Counseling Division holds bimonthly meetings to dialogue and evaluate the effectiveness of these services. The Counseling Division completed a program review in 2006-07 to identify strengths and weaknesses and evaluate services, and the results of the program review are being used in the counseling work plans. For example, one area that needed to be addressed was that “new technologies” were not being fully utilized in delivering counseling information. As a result, counselors are currently working on developing an online orientation program to reach more students by enhancing the delivery of information for matriculation. Other recommendations from this program review include strengthening staff development for faculty and staff, developing interventions for students who fail a class the first time, and increasing counseling participation in the matriculation services. These suggestions have been incorporated into a program activity plan along with timelines and measurable objectives.

Counseling services are provided by both permanent and adjunct counseling faculty on weekdays throughout the year, including summer, winter, and spring breaks. Services are provided in a variety of formats, including set appointments, drop-in visits, and via email. Set appointments are thirty minutes in length, and drop-in meetings are between five and fifteen minutes, depending on the student’s needs. Electronic counseling services are provided by a faculty counselor. To support students in online classes, there is also a webpage describing counseling services for online students. This page also allows students to submit questions to counseling staff at any time of the day or year.

Counseling faculty have also developed a comprehensive website to provide students with a variety of important information, including hours of service, pictures and email addresses of counselors, access to forms, graduation and transfer requirements, answers to frequently asked questions, and information for new students.

355 Counseling Division Minutes
356 Counseling for Online Students
357 Counseling Department
Counselors coordinate special programs such as the Student Intervention Program, a program for students on probation or dismissal. The program requires students to see a counselor to discuss their situation and how they can succeed in school, to meet with a counselor at least twice a semester, and to complete a progress report with their instructors.

Counselors also coordinate EXPO—new student orientation day—where new students can connect with faculty, staff, and other new and continuing students, attend various student success workshops, and experience a personal welcome to Las Positas College.358

Counselors provide outreach services to the community at large. They make classroom visits to inform students of counseling services, make presentations at high school events, and serve as liaisons to academic divisions.

Counselor training is provided in a variety of ways to ensure that accurate information is provided to students regarding degree and transfer requirements. Regular updates are provided at Counseling Division meetings, at the monthly counselor-only meetings, sent via email, and posted on the counselor intranet website. Counselors also attend annual statewide and regional counselor conferences.

SELF EVALUATION

The college meets this standard. Counseling and advising programs support student development and success, and these programs are maintained and regularly evaluated.

According to the 2005 Student Survey, a majority of students are satisfied with their overall experience with counselors. Students also indicated that counselors were available when they needed to see them, and they approved the assistance provided by counselors in helping students identify an educational goal and select appropriate courses. In the 2007 Student Survey, students gave similar responses to the same questions, and two additional questions demonstrated how counselors enhanced student development and success by helping them develop a student educational plan (SEP) and provide information concerning transfer requirements.

A focus group of students were also surveyed in spring 2006 to assess student satisfaction of counseling services. Students responded that the services they received were helpful and responsive to their needs and that they would recommend this service to other students.

While evaluations of counseling services have been positive, there are indications that not enough counseling time is available for all students. For instance, only 25% of students attend an orientation and assessment to the college. Counseling is currently designing an online orientation which will be coupled with the college’s move to mandatory orientation for non-exempt students.

358 EXPO 2008
A program planning session will follow this orientation so that more students will have education plans earlier. The current general counseling faculty number nine; however, with various assignments within those positions (transfer, articulation, interventions, veterans, international students, matriculation research) only 5 FTEF are available for the 9,000 students at the college. Additionally, the visiting team from the Categorical Site Visit made recommendations for increased counseling in EOPS, CalWORKS, and general counseling.

PLANNING AGENDA

1. Identify resources to provide sufficient counseling services.

2B3d The institution designs and maintains appropriate programs, practices, and services that support and enhance student understanding and appreciation of diversity.

Las Positas College celebrates its commitment to diversity, equity, and inclusion, and it continually strives to enhance and empower diversity throughout the community. The importance of these values to the college is reflected in the college’s mission statement, educational master plan, and student equity plan. All areas of the college incorporate diversity, accessibility, and equity within their course work, programs, services, outreach efforts, marketing tools, as well as Student Life activities and events.

As a result of the college’s Midterm Accreditation Report’s Recommendation 9, three years ago the college connected with California Tomorrow and established the Campus Change Network (CCN), whose goal is to enrich and empower diversity. During the past three years, CCN has provided the college with activities and events such as the Gay-Straight Panel, Women’s History Month, Brown Bag Session on Disabilities, La Semana Cubana, and the American Indian History event.

Student Services, through its program review process, has developed SLOs that include access, diversity, and equity outcomes. Student Services faculty have had training on how to prepare and submit student learning outcomes. The college has also been heavily engaged in the Basic Skills Learning Initiatives. This cross-campus engagement has resulted in a review of Basic Skills components. The Basic Skills Programs in English and math have all their courses available in the Blackboard online learning system to give students online access to resources for those courses. To help students persist and succeed in demanding math, English, and ESL course sequences, four years ago faculty and staff developed the Integrated Learning Center that provides focused support in those areas, as well as writing tutoring for all students and the college.

359 Educational Master Plan
360 Student Equity Plan
361 Campus Change Network
Student Services is continually striving to empower diversity within their programs, services, and outreach. There are two college web-based calendars, the Activity Calendar and the Outreach Calendar, that identify the various diversified activities and events of the college. Student Services also sponsors EXPO student orientation, Major Transfer Fair, High School Senior Parent Night, Annual Transfer Fair, Job Shadowing, and an Employment Job Fair. Student Services also oversees the rapidly expanding Tutorial Center.

Student Life currently has thirty-five active clubs, including the World Cultures Alliance, Asian Student Alliance, Gay-Straight Alliance (GSA), Latino Student Alliance (LSA), EOPS Club, Earth Club, Black Student Union, Alpha Gamma Sigma, Math Club, Psi Beta, Transfer Club, and Bacchus & Gamma. Events that these clubs sponsor include GSA’s National Awareness Coming Out Day; LSAs Cinco DeMayo, Day of the Dead, and Cesar Chavez Day; and the EOPS Club’s award ceremony at the end of every academic year.362

The college also maintains the following practices and services that support the appreciation of diversity:

- Faculty training for diverse learning styles
- An Alternate Media Technology Specialist to assist with web page design363
- An annual listing of bilingual faculty and staff who can assist with translation and interpretation364
- Multilingual outreach to the community
- Programs including CalWORKs/TANF, EOPS, DSPS and International Student Program (ISP)
- An American Cultures requirement for the Associate Degree.

The college regularly evaluates its services to determine their effectiveness. Students attending the EXPO orientation, for example, are asked to complete a survey to indicate their impression of the event. Student Services programs participate in the program review process, which also uses student surveys to assess process systems, outreach effectiveness, customer service, and marketing tools.365 The Director of Institutional Research and Planning annually creates a student characteristic report that includes outcomes data that programs analyze to further assess their effectiveness.366 Finally, all faculty are regularly evaluated by their students and peers.

Goals regarding diversity and equity are in the equity plan, the educational master plan, the Basic Skills Task Force and Campus Change Network documents, and it various program reviews. The Campus Change Network has also created a mission statement that has been endorsed by a significant number of faculty and staff.

362  Student Club Listing
363  Adaptive Media Program
364  Bilingual Interpreter Listing
365  Program Review
366  Student Characteristics and Outcomes Reports
SELF EVALUATION

The college meets this standard. The college has a mission statement on diversity and equity, which appears in the college’s education master plan and the college’s student equity plan. The college community innovatively strives to continually address, promote, and enhance diversity in the classroom, in its programs and services, and its student life activities and events. The college community values the understanding of diversity and what empowerment can be derived from it.

PLANNING AGENDA

None.

2B3e The institution regularly evaluates admissions and placement instruments and practices to validate their effectiveness while minimizing biases.

All California Community College Admissions Offices must abide by the rules and regulations of Title 5 as well as the California Education Code. All assessment instruments are in compliance with the California Community College’s State Chancellor’s Office. Las Positas College evaluates its admissions and placement programs, policies, and processes annually to validate their effectiveness and reduce bias. Enrolled students, including international, disabled, and English as Second Language (ESL) students are encouraged to take English, math, and chemistry assessment tests as well as attend an orientation to fulfill matriculation requirements.

The Assessment Center provides ability-to-benefit (ATB) tests for students that do not have a high school diploma or General Education Diploma and wish to apply for Financial Aid. Non-native speakers take the CELSA test for ESL placement. ESL faculty select topics for the writing component of this test. The Student Education Plan (SEP), includes multiple measures that help to validate assessment testing, consequential validity, cut score analysis, and disproportionate data.\(^\text{367}\)

To check for bias, staff review and assess each test item for potential cultural misunderstandings. For disproportionate impact, placement results are statistically analyzed by gender, ethnicity, age, learning disability, and the categories of native/non native speaker. Test scores are adjusted with faculty-identified multiple measures criteria based on levels of education and high school grades.

Student Services evaluates their programs and effectiveness through their program review process. Student surveys are provided and information also includes how our current process systems are working, outreach effectiveness, customer service, and marketing tools.\(^\text{368}\)

---

\(^{367}\) Assessment Center

\(^{368}\) Student Services program review
SELF EVALUATION

The college meets this standard. The campus is culturally diverse and continually focuses on accessibility and equity. Faculty, staff, and administrators have an ongoing and systematic cycle of evaluations, integrated planning sessions, implementation of new procedures and processes, and the continual re-evaluation of their programs, services and placement instruments.

PLANNING AGENDA

None.

2B3f The institution maintains student records permanently, securely, and confidentially, with provisions for secure backup of all files, regardless of the form in which those files are maintained. The institution publishes and follows established policies for release of student records.

Student records from summer 1994 to the present are maintained on Banner, an online automated Enterprise software package provided by SunGard Higher Education. CLPCCD Information Technology Services (ITS) personnel support the Banner baseline system and the unique CLPCCD customizations, with access granted to the ITS staff as appropriate to install new modules or upgrade and fix existing modules. The Banner System has been set up to meet the compliance obligations for FERPA, ADA, and PCI credit card. The server is housed at Chabot College in Hayward in a restricted area where only district ITS and security personnel possess a key for entry. Data are backed up daily on tape and stored in a fireproof vault in a separate building at Chabot College. District system backups are performed on an automatic nightly and weekly schedule. Full weekly backup tapes done on Friday are stored offsite at one of the alternate computer room locations at the district office in Pleasanton. Offsite tapes are rotated back to the central data center as new tapes are generated. As this is a district-maintained function, access to documentation or processes requires district login.369

Access to the Banner system is available through two methods: (1) the web self-service (CLASS-Web), which provides local or remote access (2) Banner client feature (INB), which is restricted to local on-campus access only. The web self-service uses a HTTPS browser which requires server authentication using a VeriSign certificate. This allows the user's browser session to be encrypted over the Internet. The user then logs in to the system using a system generated W-ID and a six-digit PIN number, which must be updated by the user very six months. The Banner client portion of the system is not available via the internet and it is limited to local on-campus access from

369 Banner (Login required)
the CLPCCD internal network from either one of the two college sites or the
district site. The Banner client requires a login ID and password that is also
updated by the user and expires within six months. For all Banner access, the
Banner role security defines what forms and functions the user has access to and
the Dean of Enrollment Services authorizes what access will be granted, either
update or query, through a Computer Access Request form submitted to the
district ITS department. Besides the login access with user ID and password or
PIN, the Banner system has been setup with a built in timeout of fifteen minutes
to prevent inadvertent intrusions. Currently enrolled students can access their
current registration status and academic history online. Each student is assigned
a random ID number (system generated W-ID) which is used with a student PIN
number for secure student access to online personal information.

To maintain confidentiality and ensure compliance with federal and college
regulations, document security levels have been established. Beginning in 1998,
the college implemented an image scanning system for electronic storage of
permanent records. Document scanning is performed in an isolated, secure office
area that is only accessible by authorized personnel. Scanned images are backed
up daily. Copies of the tape are stored in a fireproof safe. Security levels for
viewing and scanning student records are established by department deans and
enforced by technology department system administrators. Access to the server
is restricted and can only be accessed through the Technology Departments
administrative users. Electronic student records may only be accessed by
authorized viewers. The authorized viewer cannot edit or delete student records
this is reserved for document administrators. The Admissions and Records
administrator must approve requests for access.

Active student records are housed in Admissions and Records, building 700. This
area is locked and is accessible to authorized personnel only. Microfilm copies of
LPC student records prior to 1994 are located at LPC and the CLPCCD offices.
Original microfilm tapes are stored at Chabot College in a fireproof, secure
room. The copy of the microfilm sent to LPC is for access only.

All student records are kept confidential and destroyed in accordance with
the guidelines of the Family Rights and Privacy Act of 1974 (FERPA).370 All
Admissions and Records staff are knowledgeable about FERPA and college
guidelines related to student record confidentiality. Information is not released
to a third party without written authorization from the student. Records are
retained, scanned, and destroyed according the guidelines of Title 5 Retention
Manual. In addition, computer access to our Banner system is reviewed
periodically and access is restricted to a “need-to-know” basis. All users are
required to sign an agreement stating they will adhere to FERPA mandates.371

The college does have a policy for releasing student records.372 Transcripts are
released through a request process in the Admissions and Records Department.
Only three individuals have the authority to release transcripts, and each request
is logged and documented. Other student records, such as those related to

370 Family Educational Rights and Privacy Act (FERPA)
371 Board policy 5310
372 Board policy 3311
student discipline, can only be released with a written request from the student. Each written request is verified via telephone with the individual before the information is released. Legal requests are handled through the Dean of Enrollment Services Office.

**SELF EVALUATION**

The college meets this standard. LPC has policies and procedures in place to safeguard student records which meet federal and state requirements. Due to budget constraints and more urgent ITS priorities, the district has delayed the purchase a new document-imaging system. Until it is feasible to move toward a more robust and scalable district-wide scanning solution, appropriate software and maintenance on the existing system will depend on the support of the district.

**PLANNING AGENDA**

None.

2B4 The institution evaluates student support services to assure their adequacy in meeting identified student needs. Evaluation of these services provides evidence that they contribute to the achievement of student learning outcomes. The institution uses the results of these evaluations as the basis for improvement.

Student Services performs a program review every three years.\(^{373}\) The program review model includes a self-assessment, point of service survey, and college-wide surveys. The surveys are based on the regulations and goals of each program, and they gather both student and college personnel’s assessment of program outcomes.

Through point-of-service surveys, students are asked to assess their experience of the programs to determine if the programs are meeting their needs. These surveys are conducted over a two-week period and are gathered in a locked ballot box and tallied. Student Services has its own research process, which is completed by a counselor who is assigned as the Matriculation Researcher. Each program is then provided with both quantitative and qualitative feedback.

College-wide surveys are also administered to faculty, staff, and administrators who have some knowledge or connection to the programs. The surveys are returned to the Matriculation Researcher who similarly reports the data to the Vice President of Student Services.\(^{374}\)

---

373 Program Review

374 Student Services Program Review
Each program reviews progress on the action plan from the previous review and reviews program goals and objectives. Strengths, program weaknesses, and their implications are identified, and then action plans are developed into activity plans.

New in the 2006 process was the formal inclusion of student learning outcomes. As of 2006, some programs had written and begun assessment of SLOs; however, they had not been included in the previous review cycle. For purposes of action planning, each service area has developed at least one learning outcome which has been entered into eLumen, which will align Student Services outcomes to college outcomes.

Evaluations are reviewed carefully to reveal areas that need attention and development. Additionally, each program regularly reviews their service numbers, retention, and persistence. Program staff make adjustments each year to move towards the use of data for program improvement. Student Services has submitted SLOs in each program area, and in most cases assessment has begun for one SLO. In the forthcoming semesters, SLO data will be used to modify practices.375

SELF EVALUATION

The college meets this standard. Student support services are regularly evaluated for efficacy, and evaluations are used to improve support services. SLO assessments in development should allow these services to more precisely describe their role in supporting student learning outcomes. In addition, the college is awaiting its Student Services Program Review and Technical Assistance site visit report based on the team visit in 2008. Recommendations noted in that report will be added for college implementation.

PLANNING AGENDA

1. Use SLO data to modify practices, as the data becomes available.

2. Combine the program review outcomes from Academic Services with those of Student Services to create a more integrated college approach to planning and resource development.

3. Determine appropriate planning based on Student Services site visit report.

375 eLumen (Login required)
2C1a The institution supports the quality of its instructional programs by providing library and other learning support services that are sufficient in quantity, currency, depth, and variety to facilitate educational offerings, regardless of location or means of delivery.

Relying on appropriate expertise of faculty, including librarians and other learning support services professionals, the institution selects and maintains educational equipment and materials to support student learning and enhance the achievement of the mission of the institution.

In support of the college’s educational programs, the Las Positas College Library provides resources, information services, classes, and facilities that directly contribute to the achievement of student learning outcomes. To accomplish this, the LPC Library selects and maintains educational materials and equipment while providing comfortable facilities to support the varied learning needs of a diverse student population.

Information Resources/ Materials
The LPC Library’s collection is balanced between print, audio-visual, and online materials to support LPC curriculum and student needs. Online materials are an increasingly important part of the library resources. These resources are accessible at all times from the library web page, providing convenient access to research materials for both the on-campus or off-campus student.376

The current collection is approximately at follows:377

LPC Library faculty actively review, order, weed and maintain a variety of resources to enhance student learning outcomes for a diverse student body. To develop a collection of print, audiovisual, and online resources that reflect student learning needs, the following methods are used: requests submitted by faculty and students on library request forms, discussions with faculty, review of curriculum outlines, analysis of syllabi, examination of faculty course reserve materials, documentation of student inquiries at the reference desk, and library staff review of materials in typical library reviewing sources.378

Faculty are encouraged to email or visit the library to confer with the Instructional Librarian over assignments and the resources required to support these assignments. A librarian serves on the Curriculum Committee. The curriculum proposal form requires the signature of the Library Coordinator.

376 Library
377 Online library Catalog
378 Collection Development Policy
which provides the library with further access to new curricular areas under development. The library has also established an account at the local Borders Bookstore to meet immediate needs that arise and cannot be adequately accommodated using the regular vendor.

To weed the collection, librarians analyze checkout or use statistics, currency, and physical condition as guidelines for discard. Areas are reviewed systematically with replacements or newer editions considered for purchase as part of the process. The library also offers faculty regular opportunities to select and deselect materials pertaining to their areas. One example is Flex Day of spring 2005. As an activity choice, the faculty were invited to review the library collection for weeding.

Policies for Collection Development and Faculty Services are online. These include the guidelines that dictate collection choices such as the number of students/classes expected to use a database or resource, suitability for community college level students, closed captioning for audio-visuals, and cost. Since 2004, funds from the Measure B Bond have helped to update and improve the library collection. Despite elimination of monies in the general library funds for audio visual and book resources, the Measure B Bond has helped to develop new collections to reflect current curriculum and update certain areas such as the sciences. Future budget planning is needed to discuss a steady, consistent funding source for the library so that support for instructional programs will continue uninterrupted when the Measure B Bond money is depleted.

**Equipment and Facilities**

The library has 60 computers for student research, five circulating wireless laptops, and one disability-accessible computer setup provided and maintained by DSPS. All computers are equipped with headsets to accommodate DVDs and CDs. Library computers are replaced every four years as part of the college's Lifecycle Plan. The computers are continuously maintained and updated to meet standards set by the Technology Department. Sixteen of these computers are part of an instructional lab that has been eeked out of a corner of the library. These computers are not always available for student use if workshops or classes are being taught by the library. During heavy library use, computers are greatly impacted. The Student Satisfaction Survey Fall 2007 indicates that although students give the library as a whole high marks, they are dissatisfied with the number of available computers.

There are approximately 25 tables for group seating and 56 carrels for individual seating. Two large group study rooms that will hold 8 – 12 students and three sound proof rooms that will hold 3 -4 students suitable for quiet study, speech practice, music practice and other small group activities are available by reservation. Two carts with complete audio-visual setups that include TV/DVD/VHS player and CD player are available for use in the library study rooms.

379  2008 Course Proposal form
380  Collection Development Policy
381  Collection Development Policy
382  Faculty Services / material request
383  Technology Lifecycle Plan
384  Fall 2007 student survey
The LPC Library also offers a variety of other equipment to support the curricular needs of the on-site student including four TV/VCR/DVD combination players, DSPS cassette player, slide projector, color/ black-and-white copier, networked printers, a microfilm reader and two CD players.

The library continually advocates for new equipment and enhanced materials to improve the student learning environment. For example, in 2004 and 2005, the library requested and received better ergonomic multi-task chairs to replace the wooden chairs used by students in the computer lab areas. In 2006, the library requested five laptops for circulation to students to increase access to computers.

**Reference / Information Services**

The reference desk and circulation desk are staffed by professional librarians and library assistants all hours that the library is open to the public. The circulation staff prepares and monitors the Faculty Course Reserves for faculty and students. Librarians have been enhancing the Faculty Course Reserves by providing linked, full-text articles that meet copyright standards and evaluated website resources for students to access from the Library Homepage.385

LPC Library faculty provide assignment-specific orientations in the library and in the classroom for instructors requesting this service. Classes for credit in library research skills are taught each semester.386 However, LPC has not yet committed to an information competency program, and further dialogue on this project is needed. To support the off-campus and distance-education student, the LPC Library services found on the library homepage include Email a Librarian, directions for remote authentication, a plagiarism tutorial, research guides or pathways with linked resources, a variety of databases, and a bibliographic citation help section.387

**Staffing**

LPC Library staff consists of four full-time tenured faculty librarians and four classified staff members. Adjunct librarian and student assistant hours vary depending on funding, which has been inconsistent over the past several years. Stable funding is needed to have adjuncts available during peak library hours, evenings, and Saturdays, along with sufficient student assistant support. Proper staffing, including student assistants, is essential to provide flexibility in scheduling and services that support student learning. Adjuncts librarians enable the library to provide many more assignment-specific orientations, cover the reference desk efficiently during peak times, create online library instructional tools, and conduct classroom visits to demonstrate research strategies and library resources than could be done with just the library faculty.

In addition to library services, the college supports a number of learning labs:

---

385 Library
386 Collection Development Policy
387 Library
**Athletics Academic Center for Excellence (ACE)**
ACE supports the student athlete academically by providing individual and group tutoring, study groups, workshops, adjunct courses, and access to a quiet and convenient place to study. The Center is open five days a week.388

**Computer Center**
The Computer Center is a quiet open lab environment for school assignments. Computers are available on a “first come, first served” basis. The center has over 100 computers for student use and also provides access to various software and printer options. The center is open five days a week including nights.389

**Disability Resource Center**
This center provides a supplemental instruction lab that serves the needs of a specialized population. The lab is open for specific hours posted five days a week with access to adaptive workstations using assistive technology and software.390

**Innovation Center**
The Innovation Center offers training and support to faculty and staff who want to learn best teaching practices using technology -- whether to enhance a face-to-face class or to design a hybrid or fully online course. Pedagogical training, as well as technical training, is provided. All training includes methods for making online instructional materials accessible to students with disabilities.391

**Integrated Learning Center (ILC)**
The Integrated Learning Center (ILC) provides assistance to students in mathematics, English, English as a Second Language (ESL), and reading and writing as applied to any course. The ILC houses four primary functions: Open Math Lab, Writing Center, English 1A Lab and ESL Lab. The ILC contains 20 personal computers and has a computer-based tracking system used to monitor student hours within the lab. The ILC, open five days and four nights a week, is staffed by English, ESL, and mathematics faculty members.392

**The Open Writing Center**
The Open Writing Center, located in the Integrated Learning Center, provides writing services for students across the disciplines using a 20 minute drop-in, first-come, first-served format. Services include one-on-one help, use of ILC computers, online grammar and reference resources, and a collection of standard and ESL dictionaries.393

**Self-paced Math Lab (MATH X)**
Math X Lab program provides the student with an alternative way to learn mathematics, specifically Math 55, 65, 71 and 107. This is a mastery program for basic skills students who can work independently using a self pace style asking for help as needed.394
Tutorial Center
The Tutorial Center provides both drop-in and scheduled tutoring in individual and group settings. Peer and faculty-led sessions take place in the newly opened reading room in the multidisciplinary building. Previously the center was co-located with the assessment center, significantly limiting space and hours of operation. Services have expanded to being open 5 days per week, 8 hours per day Monday through Thursday and 9-12 on Fridays.

SELF EVALUATION
The college meets this standard. Because of the Measure B bond money, LPC Library has been able to update the collection and enhance the online collection of electronic resources to some extent. However, the elimination of general library funds stifles the original intent of the Measure B Bond money to act as supplemental funds to improve the library resources and access for students. Measure B has become the major source of library funding along with state’s Telecommunications & Technology Infrastructure Program (TTIP) funds for databases. This is not a permanent fix for the library finances. A stable budget funding solution needs to be developed. A sufficient staffing budget is also needed to help ensure adequate staffing with student assistants and adjunct librarians to keep instruction and services at an acceptable level.

At one point, the remodel of the library was considered with several other state projects for submittal. With state project funding in question, it is uncertain if, or when, this remodel may occur. Since the library remodel may be further in the future than previously anticipated, certain basic problems should be addressed, especially the lack of computers as noted in the student survey, the need for more shelving to accommodate the growing collection, and a separate lab area for orientations and classes.

The college is committed to successful student learning and has developed a number of learning support services. However, stable funding, adequate staffing, and flexible hours need to be discussed to ensure continued and improved access for students at their specific time of need.

PLANNING AGENDA
1. Plan and develop a library budget that is part of the institutional process that ensures library funds that are stable and consistent which will allow for better planning to meet student and faculty resource needs; ensure student access to resources both on and off campus and provide a suitable physical environment for both student learning and a growing collection.

2C1b The institution provides ongoing instruction for users of library and other learning support services so that students are able to develop skills in information competency.

395 Tutorial Center
The LPC Library supports student success and learning by providing a suitable environment that promotes students’ acquisitions of information competency skills. Librarians teach the components of information competency in a variety of ongoing ways:

- **Library Research Courses:** The LPC Library previously used a self-paced book for library research skills instruction. In fall 2006, the self-paced book was replaced with four hands-on courses worth .5 credits each: Introduction to Library Research, Introduction to General Databases, Introduction to Specialized Research Databases, and Introduction to Internet Research teach the full range of information-competency components following the standards set by Association of College & Research Libraries (ACRL).396, 397

  Student learning outcomes have been written for each of the courses and are being tracked in eLumen, the institution’s software repository for assessing, analyzing, and tracking improvement goals for student learning outcomes.398 Enrollment for these new courses are as follows: 38 (fall 2006), 28 (spring 2007), 16 (fall 2007). The overall success rate for completion was 85 percent.399

- **Library Orientations:** In fall 2007, librarians taught 89 bibliographic orientations, to approximately 2800 students.400 Classes that attend library orientations are generally those requiring a research assignment; instructors use these orientations to help prepare their students. These orientations are scheduled for one class period and are tailored to specific course content and assignments while covering a limited number of information-competency components. Orientations most often focus on teaching the basic use of the library’s online research tools (e.g., magazine & journal databases and the library online catalog for books and audio-visuals), search techniques to locate and retrieve relevant information, and evaluation of information sources. Also addressed in the library orientations are the ethical and legal issues surrounding information and information technologies including citation formats. In conjunction with these course-related library orientations, librarians regularly create library guides, tip sheets or other instructional handouts related to specific research assignments.401

- **Workshops:** LPC Library provides workshops as needed for both students and faculty to introduce new library features or learning tools. For example, in fall 2006 several workshops were given to students and faculty on NoodleBib, a citation generator that had just been purchased as an instructional tool for creating MLA and APA citations. This tool is part of the library’s instructional

---

396 Collection Development Policy
397 ACRL Information Competency Standards
398 eLumen (Login required)
399 Library Statistics
400 Library Statistics
401 Student links – LPC Library
emphasis on how to avoid plagiarism. Since the workshop, librarians have created online handouts for using NoodleBib. Meanwhile, instructors can also make arrangements for a librarian to come to their classroom to demonstrate and field questions concerning NoodleBib.

- **Reference Service:** The reference desk is staffed by professional librarians during all hours that the library is open to students. Reference services are delivered in person, by phone, and by email. In this setting, librarians provide information competency instruction in an informal but individualized manner suitable to each student’s learning needs at that moment. In this manner, librarians are able to address some of the following information competency issues: identifying manageable topics including narrowing or expanding the topic, using proper citation format, finding appropriate information sources, evaluating web site resources, and formulating basic search strategies to ensure the best results.

- **Library Website:** The LPC Library website is an integral part of the library services and a pivotal part of the instructional process. The site includes databases, online catalog, access to faculty course reserves, library guides and tip sheets, a plagiarism tutorial, and a citation generator tool.

### SELF EVALUATION

The college partially meets this standard. Student access of information skills for life-long learning are contingent on information competency skills as identified by the Academic Senate for California Community Colleges and defined by the ACRL.

The issue of Information Competency (IC) has not been discussed campus-wide. The college needs to develop a dialogue on Information Competency (IC) and commit to a plan for IC by defining what constitutes IC for the LPC campus and by determining the best means to integrate IC into the student learning experience. At the same time, the Library would like to see the promotion and integration of information competency skills into online classes.

A dedicated classroom for library research classes, orientations or workshops is also needed to provide the students with a hands-on learning experience and an appropriate learning environment.

### PLANNING AGENDA

1. Begin the college dialogue on Information Competency (IC), and develop a formalized plan that includes both Library-based information competency courses and an interdisciplinary approach.

2. Plan and design a dedicated hands-on instructional lab for Library orientations, workshops, and research skills classes.

---

402 Library citation style guides
403 Library
Las Positas College strives to support adequate access to the Library and other campus learning support services. However, in spring 2008, Saturday access to the on-campus learning support services was eliminated for that semester.

Library Hours: Regular hours during fall and spring semesters are Monday – Thursday 8 am to 9 pm, Friday 8 am to 2 pm, and Saturday 10 am to 2 pm. Summer session hours vary. The Circulation and Reference desks are staffed with professional library personnel during all Library hours.\textsuperscript{404} The LPC Library web page is designed to support on-campus and remote access to information resources. Electronic access to all of the Library’s subscription databases, the online catalog of the Library’s print and audio-visual collections, and learning tools on the Library’s website are available at all times.\textsuperscript{405, 406} To access the databases from off-campus, students and faculty login with their college assigned ID number and password. All resources on the Library’s website, including databases, are accessible from all on-campus computers without any log-in necessary other than STARS.

Reference assistance by LPC librarians is available in person and by phone whenever the Library is open. The Library also provides an email reference service with a response time of within twenty-four hours Monday through Friday (with somewhat longer response times for requests submitted on weekends and holidays).\textsuperscript{407} The Library faculty strive to accommodate all faculty requests for orientations or other types of Library instruction even when the Library is normally closed such as in the summer sessions or Saturday hours.

The Library also maintains a Disabled Student Program and Services (DSPS) computer workstation in the Library computer lab. The specialized software and adaptive equipment provides students with learning differences, physical disabilities, and vision impairments the means to successfully use the library. This workstation also provides the student an alternative place to study besides the DSPS lab.

\section*{SELF EVALUATION}

The college meets this standard. Access to the Library homepage and electronic resources is adequate. However, providing these electronic resources, including the much used magazine and journal databases, is costly. Currently the Library receives TTIP funding from the state to offset the cost, but the amount has not increased in years while the cost of databases has. As new curriculum, especially online classes, are developed, even more database resources will be needed. A budget process and consistent funding for electronic resources is required to

\begin{footnotes}
\item[404] Library Hours
\item[405] Online Databases
\item[406] Online Catalog
\item[407] Reference Librarian Contact Information
\end{footnotes}
maintain and ensure access to research information for students and faculty both on and off campus.

PLANNING AGENDA
None.

2C1d The institution provides effective maintenance and security for its library and other learning support services.

2C1e When the institution relies on or collaborates with other institutions or other sources for library and other learning support services for its instructional programs, it documents that formal agreements exist and that such resources and services are adequate for the institution’s intended purposes, are easily accessible, and utilized. The performance of these services is evaluated on a regular basis. The institution takes responsibility for and assures the reliability of all services provided either directly or through contractual arrangement.

The LPC Library occupies approximately 16,000 square feet of Building 2000. Built in 1993 just as technology was changing, the infrastructure of the library is showing age, unable to handle today’s technology, and it lacks physical space. The library’s infrastructure, holdings, computer hardware/software, and public safety are maintained and secured as described below.

- **Maintenance and Security**
  Environmental control and electrical systems are maintained and serviced by the campus Maintenance and Operations department (M & O). Telecommunications equipment is maintained and serviced by the college’s Technology Department. The library facility is secured by an alarm system monitored by Security. A fire alarm system also protects the library. Evacuation and emergency procedures have been developed. The college conducts campus drills every semester.

Maintaining an organized, easily accessible book, periodical, and audiovisual collection is an ongoing process. Due to shelf space limitations, weeding the collection is done on a continual basis as is shifting the collection and double shelving.

The Library uses 3M brand security system to safeguard the collection. This security system was replaced in 2008 with the newest version. Each book and periodical is tagged with an anti-theft device that sets off an alarm at the entrance should the material be removed without being properly check out.

---

*Evacuation Procedures*
The library employs a computer tutor/student assistant for morning hours only to help with basic maintenance and minor troubleshooting of the computers in the student use lab and the audiovisual equipment. Primary maintenance and upgrades of the network, hardware, and software is performed by the college’s Technology Department or the District ITS according to their policies and procedures.409

- **Resource Sharing:**
  Las Positas College Library has in place a long standing resource sharing agreement with Chabot College Library. Items are transferred between libraries when requested by faculty and students. With a current and valid Las Positas College ID, students may also check out materials from the Chabot Library. Holdings information for both libraries is in the SIRSI online catalog, which can be searched from campus and remotely.410

The LPC Library also subscribes to numerous subscription databases.411 Most of the databases the library subscribes to are contracted through the Council of Chief Librarians California Community College Electronic Access and Resources Committee (CCL-EAR), a consortium of California Community College libraries which conducts a program of cooperative buying to leverage purchasing power, assists individual libraries with database contracts or services, and shares evaluations.412 This information is used by Las Positas College librarians to select appropriate databases. The database companies also provide regular usage reports for each database the library subscribes to. These reports are considered by the librarians in reviewing the selection of databases to purchase.413

Through a formal arrangement with California State University East Bay, Las Positas College students can check out materials from the university library. Students need to show a current and valid Las Positas College ID, and agree to all circulation polices posted by the university.414

**SELF EVALUATION**

The college meets these standards. Maintenance and basic security of the library’s infrastructure and computer hardware and software is adequate. Maintenance issues will be resolved when the remodel occurs. Meanwhile, minor problems still have to be dealt with. Shelving space in the circulating stacks area will be exhausted as the collection continues to grow to meet the needs of new and expanding programs. Facilities (such as carpeting and furnishings) show heavy wear and tear and need to be replaced. Minor cracks in the walls are becoming more noticeable. The limited housekeeping staff can not maintain general cleanliness of the older carpeting, furniture, and shelving. An expansion and renovation of the library is needed to provide not only a library instruction classroom, but to update the building infrastructure, accommodate growing reserve collection, increased need for group study rooms, staff and storage areas.

---

409  CLPCCD ITMP ITS Detailed Specifications
410  Online Catalog
411  Online Databases
412  Council of Chief Librarians California Community Colleges Electronic Access and Resources Committee
413  Library Database Statistics
414  California State University, East Bay Library Resource Sharing Letter
Public safety issues and improved overall security for the library staff and users could be reassessed to better accommodate the changing campus and library environment. Thefts of headphones and a laptop used for teaching have occurred in the past two years. Students also have reported personal items stolen.

PLANNING AGENDA

1. Work with Campus Security and Health & Safety Committee to create a plan to address the increasing security and safety needs of Library staff, students and other patrons.

2. Continue to plan and explore remodel ideas in preparation for the future remodel to ensure that an appropriate infrastructure and environment adequately accommodates the needs of library services and staff, student access, and information competency instruction.

2C2 The institution evaluates library and other learning support services to assure their adequacy in meeting identified student needs. Evaluation of these services provides evidence that they contribute to the achievement of student learning outcomes. The institution uses the results of these evaluations as the basis for improvement.

The LPC Library services are evaluated by a variety of methods to assure adequacy in meeting student needs, such as student and faculty surveys, annual data surveys to the state, and usage data of the library website, databases, and circulating materials. The library also participates in the college’s program planning process. Library assessment of student learning includes faculty and student evaluation of workshops, pre- and post- testing in the Library Research Skills classes, and informal feedback from faculty and students concerning assignments. Moreover, Las Positas College includes several items about the library on its annual student satisfactions survey. In the most recent student survey, fall 2007, 97.5 percent students considered the library satisfactory or better.

Usage statistics that are generated online through library web site and database use, as well as in-person statistics generated through circulation, class orientations, and reference queries, are used to track patterns that result in budget requests, equipment requests, collection development, weeding, database purchase, retooling of the library webpage, and other resources that will assist student learning.
An important method used by the college to evaluate library services and to assure that the library adequately meet students’ needs is the program review process, which describes and evaluates the library’s role and how it contributes to the mission and priorities of the college.417

Library instructional classes are evaluated with pre- and post-testing plus an evaluation form.418 Additionally, the library also uses student learning outcomes to evaluate effectiveness of the Library Research Skills classes in meeting student needs.419 Using an analysis of this data, the library identifies areas needing improvement or modification and redesigns based on student needs.

The Integrated Learning Center, which opened in fall 2005, is involved in ongoing assessment of its effectiveness, though the methods vary according to the program (English 1A, ESL, and math). The ILC, as a whole, surveyed students in spring 2007, and the results were presented to faculty and used to improve the lab delivery.420, 421, 422

Each semester, the ILC coordinator revises the English 1A lab assignments common to the program based on informally collected student and faculty feedback. In addition, English 1A students were surveyed in fall 2006, and they were surveyed again in fall 2008.423 Data from STARS—a software program that assists with capture of non-credit student hours and tracks student attendance in open labs—shows continued growth each semester.424

A faculty survey was also administered in fall 2008. The ILC has held orientations and workshops for faculty on integrating the lab into individualized sections and on ideal outcomes for the lab. The group-designed outcomes in particular have driven the evolution of the lab over the past year-and-a-half.

The English 1A program has also used the lab to assess one of the SLOs for English 1A: “Integrate researched material into your own writing with appropriate context, explanation, punctuation and citation.”425 All instructors in the lab for spring 2007, both full- and part-time, had their students write a paragraph focused on the introduction, transcription, citation, and analysis of a quote. They then assessed how well their students met the assignment criteria using a rubric developed by the department.

The Open Writing Center in the ILC does not have a formalized system of evaluation. However, in fall of 2007, the Center performed two different types of informal response surveys. For first-time tutors, students filled out a survey evaluating the individual tutor. For all other tutors, students filled out a survey evaluating the Open Writing Center in general.426 The Open Writing Center coordinator also observed a tutoring session with each first-time tutor.

417 Program Review

421 English 1A Lab Hour Survey
422 Writing Center Evaluation
423 English 1A Lab Hour Survey
424 STARS reports
425 eLumen (Login required)
426 Writing Center Evaluation
The coordinator then met with each new tutor to discuss the results of the surveys and observation. This allowed new tutors to receive both positive feedback and suggestions for improvement of their tutoring. The Open Writing Center was also able to make a few minor improvements in hours and accessibility based on student feedback on the general surveys.

Also in the Integrated Learning Center, students who attend the Open Math Lab (OML) are evaluated in two ways. First, a student enrolled in a mathematics course with a TBA lab hour attends the OML on a regular basis and completes lab assignments. These lab assignments support the learning of course content and the student learning outcomes associated with the course. When the SLOs for that course are assessed, they provide an indirect measure of the effectiveness of the lab assignments and the OML. Second, informal, unscientific surveys are conducted from time to time which ask students about their OML experience and whether they think it has helped them in their mathematics course. The survey was written by the mathematics coordinators for the Open Math Lab.\footnote{Open Math Lab Survey Spring 2008}

Data gathered since the opening of the Open Math Lab in the Integrated Learning Center shows increased persistence (6 percent higher persistence rates) in basic mathematics courses. The LPC institutional researcher, in a comprehensive survey of success rates in Math 65 and 55, has shown a strong correlation between students’ success in these courses and time spent in the Open Math Lab.\footnote{Math ILC report}\footnote{Math ILC report} Data from STARS attendance-tracking software consistently shows a high level of usage of the Open Math Lab by mathematics students, indicating a strong desire on their part to access the help offered by the Open Math Lab.\footnote{STARS reports} Students’ most frequent need is for increased space, as the current building can become crowded and noisy during hours of peak use, and a need for additional staff. During peak hours, even with two or three mathematics instructors on duty, it can be difficult to keep up with students’ requests for help.

In the Tutorial Center, both students who are receiving tutoring and the tutors themselves are surveyed. Students receiving tutoring are asked for demographic information, an evaluation of the tutor with whom the student has worked, a short evaluation of the student’s own efforts and outcomes, and an evaluation of the tutorial program in general.\footnote{Tutor Services Evaluation} The survey for the student tutors seeks information from the tutor’s point of view on the Tutorial Center program and staff, as well as the job of tutoring.\footnote{Tutor Evaluation} The Tutorial Center’s faculty coordinator tallies these evaluations and uses the information to help determine who should be rehired and/or which issues to discuss with tutors at the end-of-the-semester review.
In addition to the tutorial survey—since the Tutorial Center is also the college’s Study and Reading Room—the coordinator gives short evaluations to all students who enter during a one-week period at the end of the semester to determine room usage, satisfaction level and suggestions for change.  

In the Computer Center, evaluation is conducted during meetings between the Computer Center staff and the Division Dean at least twice a semester. The Dean and the Instructional Computer Laboratory Specialist meet as needed to review and refine Computer Center projects, focus, procedures, and services. Constant, immediate communication via email/phone, as needed, maintains an open dialogue between all staff and the dean/administration, and faculty.

Evaluation of the Innovation Center is conducted periodically by surveying faculty and staff who use the Center’s services. The survey seeks their level of satisfaction and to determine what training can be added and improved.

SELF EVALUATION

The college meets this standard. The Library has excellent means of gathering internal data and statistics from SIRSI reports, database usage reports and reference queries. But the college survey data is limited. The campus-wide student/faculty satisfaction surveys needs to include more relevant questions regarding library services, instruction, and collection.

Alternately, a survey tool designed specifically for the library might be considered for development in order for the library to conduct more extensive surveys of the student population on a regular basis.

PLANNING AGENDA

1. Work with the Director of Institutional Research and Planning to develop a survey tool that can be administered on a regular basis to provide more quantifiable data for Library purposes.

2. Collaborate with the Director of Institutional Research and Planning to improve Library questions for the campus wide student/faculty satisfaction surveys.

432 Tutorial Center Short Evaluation
433 Innovation Center Satisfaction Survey 2008
STANDARD THREE: RESOURCES

3A1 The institution assures the integrity and quality of its programs and services by employing personnel who are qualified by appropriate education, training, and experience to provide and support these programs and services.

Las Positas College ensures the integrity of its programs and services by recruiting, selecting, evaluating, and retaining qualified personnel using a process based on policies set forth by the Board of Trustees. The first assurance of personnel qualifications takes place through the recruitment, screening, and selection process. Pursuant to board policies, the CLPCCD Recruitment and Hiring Procedures have been developed to ensure that:

- the hiring of all employees is in accordance with the District Staff Diversity and Equal Employment Opportunity Plan and with federal and state laws relating to equal employment opportunity;
- applicants are judged based on evidence of professional and personal qualifications including educational background and experience;
- an understanding of the roles of a community college and the kinds of students served shall be an important consideration in the assessment of all applicants.

The process that Las Positas College employs to ensure that the qualifications of its personnel meet overall institutional goals and specific programmatic needs is centered on the educational master plan that provides a comprehensive blueprint to address the growing and changing needs of the college’s students and community, based on economic trends and regional demographics. For each organizational branch (academic services, student services, institutional support), specific program clusters identify the staffing requirements to address their individual programmatic goals and needs.

Programmatic needs and staffing requirements are first identified at the discipline level through the program review process. The self-study involves an analysis of program access, enrollment and success data, resources including staffing, and a statement of how the program helps fulfill the mission of the college. The report is coordinated and reviewed by a division dean before it is submitted to the Vice President of Academic Services for collegial review. Faculty and deans from other divisions then perform a comprehensive review and validation of the self-study, which culminates in a divisional discussion facilitated by the vice president that summarizes the needs that require immediate focus, consolidates resource requests that follow a similar theme, and provides immediate solutions when available. A yearly summary report allows discipline faculty to assess and report on what needs have been accomplished from the original program review before the next cycle begins.

434 Board Policies 4100-4400
435 Add in 4 amigos docs (scan)
436 District Hiring Responsibility & Objectives
437 LPC Educational Master Plan
438 Program Review Process 2006-2010
Results of the self-study report can then be used to update the educational master plan.

The process that ensures that personnel hiring is aligned with stated institutional goals and specific programmatic needs involves several levels of analyses and discussion from the discipline level to final board approval. The faculty position selection is the process by which each division determines and prioritizes new and replacement full-time faculty positions. In consultation with the dean, the discipline faculty puts in a position request to fill the personnel need. The faculty position request must address a list of criteria that includes current enrollment and staffing numbers, program characteristics, any cross-curriculum impact, justification for the position (as supported by information from the educational master plan, program review, advisory committees, etc.), projected enrollment growth, and specific program, college, or district goals addressed. For each classified personnel request, a justification must be made according to specific educational programs and institutional purposes supported. The position request form does not indicate how the information provided on it is weighted in the decision-making process.439

The next level of discussion takes place at the division level of each request’s origin. This is where each request is presented. After division reviews, the position requests are forwarded to the Planning and Budget Committee, where a representative from the discipline or program is given the opportunity to discuss the request with the committee members. The PBC determines the value of all information provided in the position request and makes a recommendation to the president.440, 441 Upon the president’s approval, the position request is forwarded to the board for final approval.

Following position request approvals, personnel specific to college function follow specific hiring procedures. Manuals and procedures for classified represented, supervisory/confidential, and administrative each have a philosophy, general principles, job announcement, development, recruitment, application process, selection committee size and membership, orientation, application review, minimum qualifications review, screening process (paper and interview) and approval process as a part of a consistent district-wide approach to hiring. Contract faculty procedures are based on recent consultation beginning in November of 2008 and continuing into 2009. In 2009, the guidelines, processes and procedures will be discussed and approved. Past contract faculty hiring, before the 2008/09 consultation followed a draft hiring process.442 Current personnel hiring procedures for classified, administrative and supervisory/confidential contain approved compliance training, and adherence to EEO mandates and law. The draft contract faculty hire process has not yet been formally approved by board but the proposed procedure includes compliance with the district EEO plan, training in EEO law, diversity, recruitment, screening, and interviewing procedures.443

439 Guidelines for 2007-2008 Faculty Position Requests 
440 Guidelines for 2007-2008 Faculty Position Requests 
441 PBC Minutes 
442 District Recruitment and Hiring Procedures (draft) 
443 Hiring Procedures
Assurance of qualifications is achieved by the inclusion of state mandates followed through the job description process with the minimum qualifications review done by the Office of Human Resources. Minimum qualifications state the necessary education and experience required for a faculty or administrative position as established by state regulation and conforming to general responsibilities for the position. Supplemental questionnaires addressing other eligibility factors may be included dependent on the hiring manual procedures. Assurance that these qualifications are met takes place in the paper screening process and the selection process.

The first assurance of qualifications takes place through the recruitment, screening, and selection process. Regular evaluations of all staff (administrative, classified, untenured, tenured, and adjunct faculty) provide the next level of quality assurance. The faculty contract, the classified contract, and district policy specify the systematic and timely evaluations of all personnel.444, 445 Student surveys (e.g., class surveys, student services surveys) provide a way to relate the job performance evaluation to the effectiveness of programs and services delivery.446 Feedback from faculty, classified, and administrators, as they relate to performance evaluations of other personnel, also indicate how well the integrity of programs and services is maintained. Faculty, classified staff, and administrators are given opportunities for professional development and job-specific training to maintain and strengthen their qualifications.

SELF EVALUATION

The college meets this standard. Through the implementation of its mission, Las Positas College ensures “the integrity and quality of its programs and services by employing personnel who are qualified by appropriate education, training, and experience to provide and support these programs and services.” Based on its mission and values statements, the college’s day-to-day operations are guided by the principle of providing “instruction and student support that are excellent, consistent and improved continually.”

The levels of analyses and discussion that take place, initiated at the discipline level, ensure that the hiring of personnel directly addresses programmatic needs and institutional goals. The strong emphasis on specific job characteristics as outlined in the job announcements helps the discipline faculty to ensure that programmatic needs will be addressed by the qualifications of the position. A current example shows that one job characteristic for a chemistry position calls for the “ability to work with computer-based instruction and integrate computers and associated peripherals as teaching and learning aids in lecture and laboratory settings and familiarity with analytical instrumentation in organic and inorganic chemistry including ability to make minor repairs,” which directly addressed a need identified in the chemistry program review for “software and instrumentation upgrade and maintenance.”

444 Board Policy 4120 Evaluation of Management Personnel
445 Classified and Faculty Contracts
446 LPC Student Survey Fall 2007
A wider involvement from the campus community ensures that a broad spectrum of ideas is presented to the search committee in developing qualifications that address areas that may be impacted by the hiring decision. This was illustrated recently in the college’s search for its new president. In addition to participating in the search committee, staff were given opportunities to provide their input through a town meeting dialogue about traits, competencies, and campus challenges that should most strongly influence the selection of a college leader. Results of staff survey seem to indicate, however, that, in general, the hiring process has not cast its net wide enough to give everyone a sense of participating. According to the fall 2007 LPC Staff Survey, only 62 percent agree or strongly agree that “all personnel have adequate opportunities to participate in all aspects of college hiring process.” On a broader scale, according to the same survey, only 51 percent agree that “human resource planning is integrated with institutional planning.”

The current processes for administrative, classified and supervisory confidential hiring meet the standard. The consultation process occurring with the Academic Senates on the contract faculty procedure is the last piece to be put in place for a uniform process across the personnel sectors.

Timely evaluations and feedback ensure that job performance and the delivery of programs and services correlate with personnel qualifications. According to the fall 2007 LPC Staff Survey, 86 percent and 82 percent, respectively, either agree or strongly agree that evaluations of their job performance seek to assess job effectiveness and encourage improvements in job performance. While not a direct measure of qualifications, opportunities for professional development and job-specific training do provide a means for personnel to maintain and strengthen their qualifications, especially as new methods and techniques become available to improve the delivery of these services and programs. Administrative, classified, and faculty personnel are provided such opportunities for professional development and job-specific training. Some examples of these are flex-day activities for both faculty and classified, staff development activities including the newly revived Teachers Teaching Teachers, subject-specific conferences, the Great Teachers Seminar, and safety training for lab science classified and faculty staff.

Student satisfaction surveys provide one measure of gauging the integrity and quality of programs and services. Programs and services delivered with success, based on student satisfaction survey results, can be correlated with sufficiently qualified personnel involved in the process. Some results of the fall 2007 Student Survey relevant to addressing this standard are listed below:

- When asked to rate their overall experience with student services programs, the average ranking was 3.75 (with 1 = very poor and 5 = excellent), with 92 percent providing a satisfactory or higher rating.

- An average of 71 percent indicated at least a satisfactory rating when asked about their overall experience with instructors, college administrators, counselors, admissions and records staff, librarians, and other college staff.
Eighty-one percent of students rate the overall quality of instruction as at least satisfactory with 82 percent and 78 percent agreeing or strongly agreeing that their instructors are “highly knowledgeable in the subjects that they teach and are highly skilled teachers that come to class well-prepared.”

Seventy-three percent are satisfied or very satisfied with the assistance provided by admissions/records staff.

Sixty-six percent are satisfied with the assistance provided by counselor(s) in helping students select appropriate courses.

Sixty-five percent are satisfied with information provided by counselor(s) concerning transfer requirements.

PLANNING AGENDA

None.

3A1a Criteria, qualifications, and procedures for selection of personnel are clearly and publicly stated. Job descriptions are directly related to institutional mission and goals and accurately reflect position duties, responsibilities, and authority. Criteria for selection of faculty include knowledge of the subject matter or service to be performed (as determined by individuals with discipline expertise), effective teaching, scholarly, and potential to contribute to the mission of the institution. Institutional faculty play a significant role in selection of new faculty. Degrees held by faculty and administrators are from institutions accredited by recognized U.S. accrediting agencies. Degrees from non-U.S. institutions are recognized only if equivalence has been established.

Las Positas College has processes and policies in place to assure that classified, faculty, and administrative personnel meet the requirements of their position as well as the goals and standards of the college and district. District policies for hiring are found in the CLPCCD Board Policies: Sections 4000 - 4400 Personnel. Hiring procedures for classified, supervisory/confidential and administrative are also in place and are available through the Office of Human Resources. Prior to the consultative hiring process discussions which began in November of 2008 between and district and the Academic Senate, draft hiring procedures were used for contract faculty.

Job specifications for all personnel have been approved by the Board of Trustees and are available through the Office of Human Resource Services. Any job descriptions that are specific to one position (e.g., dean) are reviewed and updated, if necessary, at the time a vacancy is announced. Collective job

447 CLPCCD Board Policies: Sections 4000 - 4400 Personnel
448 District Recruitment and Hiring Procedures (draft)
449 Hiring Procedures
descriptions (e.g., College Clerk II, Maintenance Technician I) typically are not reviewed for individual job openings. Criteria and job qualifications are stated clearly in job announcements and are based on the job description and the State Chancellor’s minimum qualifications.

Because duties, responsibilities, and organizational needs may change over time, the Classified Collective Bargaining Agreement (CBA) includes a reclassification process for staff positions. Requests for reclassification can be initiated by either the incumbent or the manager. A review of the position is conducted by an outside reclassification consultant who provides the district with a recommendation. The reclassification process is addressed in the Classified CBA, in Article 14: Reclassification. A district-wide classification and compensation study is being conducted currently for all classified, confidential, and supervisory staff positions.

Job announcements for positions at the district office, Chabot College, and Las Positas College are posted on the Office of Human Resources website. In addition, the office maintains an exhaustive mailing list for distribution of job announcements. The office can select from ten district lists when advertising an opening. Some are broad-based, but can be generally categorized as follows:

- California Public and Private Universities and Colleges
- Historically Black Colleges and Universities
- Bay Area Public and Private Businesses and Public Assistance Organizations (classified positions)
- California Community Colleges
- Early Childhood Development Centers
- California Community College Affirmative Action Officers
- California Graduate School Programs
- California K-12 School Districts
- California Nursing Programs
- Local and Bay Area Businesses and Public Assistance Organizations (general)
- National and local newspapers
- Local job fairs

Each category contains numerous individual listings, implying a very large distribution of announcements both locally and nationally.

Hiring committees and committee training is addressed in the 2005 approved procedures manuals for classified, administrative and supervisory confidential.

Committee make up and training for contract faculty is under consultation, but past practice for faculty hiring followed a draft process in previous years. New positions must be approved through a process of recommendation by appropriate
areas or divisions, review and recommendation by the Planning and Budget Committee, and approval by the college president. The hiring committee reviews the goals and purposes of the job and creates the specifics of the job description, including minimum qualifications, desirable qualifications, particular job characteristics, and desired qualities. District and state-mandated requirements are also included in job announcements, as are a description of the application process and basic selection procedures.

For classified personnel, the recommended composition of the hiring committee is one administrator, one faculty, one classified supervisor, and two classified staff members. For classified staff, the hiring manager establishes the hiring committee in coordination with classified union SEIU Local 1120 and the Classified Senate. Before the 2008/2009 consultative process, for faculty positions, the recommended hiring committee was four faculty, one administrator, and two classified-represented employees. For administrators, the recommended committee makeup depends on the position, but each consists of classified, faculty, and administration representation, with the college president’s hiring committee also including a member of the community. All committees are selected with an attention to ethnic and gender diversity.

The initial meeting of the hiring committee involves training in the process to be followed, including interview procedures, guidelines for rating candidates, and the Equal Employment Opportunity Policy. After the job description and desirable characteristics have been determined and articulated, the committee determines the criteria to be used in evaluating the applications. Each member of the committee reviews all applications and rates the candidates on a numerical scale. This paper screening narrows the pool down to those who will be invited to an interview. Before the interviews, the committee determines a set of questions to be asked of each candidate, determines guidelines for a teaching demonstration, and, when appropriate, determines at-the-interview written work included in the interview process. Interview questions target the applicant’s knowledge of the subject matter, knowledge of the community college environment, approach to teaching, and style of communicating. The teaching demonstration reveals how effectively the teacher engages students, organizes information, and delivers specific content. Once all interviews have been conducted, the committee compiles the numerical ranking of its members and determines the two or more candidates to move to second-level interviews.

Prior to the consultative 2008/2009 process, second-level interviews for faculty were conducted by three or more people, including the President, Vice President of Academic Services, and faculty member of the appropriate discipline. These interviews focused on an applicant’s knowledge of the field.
teaching experience or potential, and the contribution the candidate will make to the college’s mission and goals. Reference checks performed by members of the second-level committee provided another means of determining the applicant’s effectiveness as an instructor or staff member, his or her experience in working as part of a learning community, and his or her collegiality. The current consultation second level faculty interviews are expected to be completed by 2009. Finally, all hiring decisions require board approval. For faculty positions, an equivalency process exists for qualified applicants who do not have the specific degrees or meet the specific requirements of the job description. The equivalency standard is based on professional experience in the field, academic background equivalency, or degree equivalency. For faculty applicants whose degree is from a non-U.S. institution, it is the responsibility of the applicant to acquire a validation from an independent evaluation service. The listing of agencies is provided by WASC, Western Association of Schools and Colleges:

- Center for Applied Research, Evaluations, and Education Inc.

- North American Educational Group International Education Credentials
- SpanTran Educational Services, Inc.
- World Education Services, Inc.

SELF EVALUATION

Las Positas College meets this standard. The college, working with the district, assures the integrity and quality of its programs and services by employing qualified personnel. Agreed upon process and process documentation should be included as part of a regular information sharing between the district and the college.

459 Reference check form
460 Board Policies: Sections 4000 - 4400 Personnel
461 Equivalencies granted
PLANNING AGENDA

1. Approve the consultative contract faculty hiring procedure for implementation in 2009.

2. Provide consistent information and training for the college when hiring processes change.

3A1b The institution assures the effectiveness of its human resources by evaluating all personnel systematically and at stated intervals. The institution establishes written criteria for evaluating all personnel, including performance of assigned duties and participation in institutional responsibilities and other activities appropriate to their expertise. Evaluation processes seek to assess effectiveness of personnel and encourage improvement. Actions taken following evaluations are formal, timely, and documented.

All personnel at Las Positas College are evaluated systematically and at prescribed intervals. Evaluation procedures for faculty and classified employees are negotiated with the bargaining units. Articles 14, 15, and 18 of the faculty contract describe evaluation procedures for untenured faculty, tenured faculty, and adjunct instructors. Evaluation procedures for classified personnel are covered by article 9 of the classified contract. Evaluation procedures for administrators are established by board policy.

All tenured and non-tenured faculty are evaluated on four standards which assess effectiveness of the faculty member. The standards, which are excellence in working with students, collegial participation, professional and personal enrichment, and professional responsibilities, are described in the faculty contract. In addition, there are special standards for instructional faculty, counselors, and library faculty. Each dean’s office establishes the timeline for conducting evaluations and monitors their completion. The Office of Academic Services also oversees the process.

Evaluations of contract faculty are conducted to ensure that these probationary instructors demonstrate the qualities and performance necessary to meet professional responsibilities. Untenured faculty are evaluated over a four-year time period. Two one-year contracts and then a two-year contract are offered to successfully evaluated faculty during this time. Evaluation is performed by a level-one committee consisting of two faculty members and a dean or supervisor, and then by a level-two committee consisting of a faculty member and a college officer, and finally by the college president. Probationary faculty undergo a rigorous evaluation, which includes self-review, student evaluation, peer faculty observation, dean observation, and a faculty instructional material packet, before a recommendation is made. Recommendations are signed by the level-one committee and the level-two committee before the final recommendation to the board is made by the college president.
The evaluation process for tenured (regular) faculty members is designed to assist faculty in examining their objectives, techniques, and accomplishments, and to provide a means to recognize outstanding performance, a means to identify areas in which professional development might provide benefits to students’ learning, and a two-way channel of communication about program needs. Tenured faculty undergo a regular evaluation every three years. In addition, a non-scheduled evaluation may be performed when there are specific faculty performance concerns. The evaluation is done with a Peer Review Committee consisting of two tenured faculty members. The faculty being evaluated prepares a professional review report based on an assessment of performance in relation to the standards and a discussion of achievements and any relevant obstacles. The Peer Review Committee visits class, administers student surveys, and discusses the professional review with the evaluee. The Peer Review Committee then forwards a report to the appropriate dean or supervisor. The dean or supervisor’s report is then sent to the appropriate vice president.465

The purpose of part-time (adjunct) faculty evaluations is to ensure that these faculty provide students with instruction consistent with the high standards of the instructional program. The process is also designed to assist adjunct faculty in examining their objectives, techniques, and accomplishments, and as a means to recognize outstanding performance. The evaluation of adjunct faculty is done in the first semester of service and at least once every three years afterwards. The review is peer-driven and coordinated by the department dean. Evaluation consists of student surveys, observation and review by a full-time faculty member, and review by the dean.466

New classified employees are evaluated after the end of the third, fifth, and ninth month of employment. After this probationary period, classified employees are evaluated every year or as deemed necessary. Performance areas evaluated include quantity of work, quality of work, job knowledge, initiative, interpersonal relationships, dependability, and potential. Evaluation consists of a written evaluation, an optional self-review, and a conference with the supervisor. The employee may request a review of the evaluation. Reports are retained by the human resources department at the district offices.467, 468

The purpose of administrator evaluations is to recognize and develop leadership ability and to assess job performance. The evaluation process used in the Chabot-Las Positas Community College District is designed to assist and guide the individual whose work is assessed, improve the unit to which the individual is assigned, and benefit the entire district through improved performance. The structure of the process guides the administrator being evaluated to consider institutional priorities and values, to discuss the relationship between policies and actions with his/her supervisor, and to clarify and define leadership attributes. Specifically, the primary purposes of the evaluation as described in the Administrator Performance Evaluation System Guide are:469

465 Faculty contract
466 Faculty contract
467 Classified contract
468 Board policy 4417
469 Administrator Performance Evaluation System Guide
• To guide professional development of the administrator;
• To recognize and enhance the effectiveness and job performance of the administrator;
• To make the administrator and the supervisor aware of the perceptions of those who work directly with the administrator;
• To develop plans for improvement and innovation.

Procedures for evaluating administrators were developed by shared governance and are established in Governing Board Policy. There is an annual performance evaluation, and every third year, there is a comprehensive evaluation. The administrator’s immediate supervisor serves as the evaluator. The Office of Human Resources facilitates the process. The annual performance includes goal-setting, appraisal, and formal feedback. In addition to these elements, the comprehensive review also includes a multi-rater feedback and analysis and a self-assessment. The multi-rater feedback and analysis process is an anonymous performance feedback survey administered by an independent, external agency to a sample of persons who interact with the administrator. The self-assessment process asks the administrator to consider a wide range of questions concerning accomplishments, opportunities for growth, and focus on support of a learner-centered institution.

SELF EVALUATION

The college meets this standard.

PLANNING AGENDA

None.

3A1c Faculty and others directly responsible for student progress toward achieving stated student learning outcomes have, as a component of their evaluation, effectiveness in producing those learning outcomes.

The complex question of the role to be played by SLOs in describing the effectiveness of individual instructors and staff has been a topic of discussion across the college comprising a range of teaching philosophies and practices, faculty association positions, and logistical concerns, for example, related to the implications of mandating SLO assessment for part-time faculty.

While the college embraces SLOs as a means to improvement in student learning, an effective method for achieving improvement might be through a focus on adjustments made to curriculum, program structure, and assessments.

470 Board policy 4200
471 Administrator evaluation forms
472 10-1-07 SLO Committee Minutes
473 9-10-07 SLO Committee Minutes
themselves as guided by inferences drawn from SLO data. On the other hand, since SLOs and assessment tools are inherently subject to continual revision, and since full-time faculty are likely to be their primary authors, a statistical measurement of effectiveness in any given individual instance might be difficult to value fairly.\textsuperscript{474} According to the college’s SLO assessment philosophy, “The assessment of student outcomes is ultimately the assessment of the institution’s ability to provide learning opportunities consistent with its mission. Assessment data is used solely to improve teaching, learning and services, not for the evaluation of individual faculty members, staff or students.”

SELF EVALUATION

The college does not meet this standard. Student learning outcome achievement is not explicitly considered on existing evaluation tools or processes. An agreement with faculty verifies that student learning outcome achievement cannot be included in a faculty evaluation procedure.

PLANNING AGENDA

None.

3A1d The institution upholds a written code of professional ethics for all of its personnel.

In fall 2008, the Academic Senate adopted a code of standards to guide the professional behavior of college faculty.\textsuperscript{475} Foci of the standard include maintaining behavior that is sensitive to students’ diverse backgrounds and needs, working collaboratively and respectfully with peers, fostering habits of personal enrichment, and mindfully attending to all professional responsibilities.

The Board of Trustees’ policies contain a very general statement about responsibility and objectives.\textsuperscript{476} There is no written code of ethics for college administrators or classified staff.

SELF EVALUATION

The college partially meets this standard. Administrators and staff have not yet adopted a written code of ethics.

\textsuperscript{474} SLO Assessment Philosophy
\textsuperscript{475} Academic Senate website
\textsuperscript{476} Board Policy 4005: Responsibility and Objectives
PLANNING AGENDA

1. Develop and adopt a code of ethics for staff and administration.

3A2 The institution maintains a sufficient number of qualified faculty with full-time responsibility to the institution. The institution has a sufficient number of staff and administrators with appropriate preparation and experience to provide the administrative services necessary to support the institution’s mission and purposes.

The staffing needs for each program and service at the college are identified in their program reviews. Upon their annual review, staffing needs are also updated according to any progress made toward program goals. A program’s request for a new faculty or staff position is documented and presented in the division of the request’s origin. Requests are then forwarded to the Planning and Budget Committee, which ranks all the requests it receives from the divisions and forwards a recommendation to the college president. The number of requests ultimately granted depends on the number of requests funded by the district.

Las Positas College is staffed by highly committed faculty, administrators, and support personnel who effectively meet the needs of students and instructional programs. Faculty and administrators meet or exceed minimum educational qualifications as defined in AB 1725 and other state regulations. They also meet employment standards stated in the CLPCCD policies specified at the time of application. All classified personnel meet or exceed minimum qualifications for their positions, and each is screened and hired on the basis of training, experience, and general suitability.

Sixty-seven percent of the students surveyed in fall 2007 believe that, ‘Compared to other community colleges, LPC has a reputation for high quality education.’ In addition, 81 percent of the students surveyed believe that LPC instructors are willing to spend time outside of class to discuss issues with students. However, only 51 percent of the students felt a counselor was available when they needed one. In the fall 2007 staff survey, 59 percent of faculty, classified staff, and administrators agreed that there are not enough classified staff to meet the needs of the college.

The four tables below list the current staffing of faculty, classified, and administrator personnel. Of particular note is the increase of 29.74 percent in the full-time equivalent of part-time faculty. In fall 2007, only 50.79 percent of FTEF were full-time faculty, down from 55.1 percent in 2002. Also, the college has seen the addition of only one full-time administrator in five years, a period of significant enrollment growth.

SELF EVALUATION

The college meets this standard. It is committed to providing high-quality education to its students. Adequate classified staffing is least stable in areas most affected by the college’s growth, and the student survey suggests that the level of counselor availability could be optimized. The full to part-time ratio of instruction falls well below the 75/25 ratio recommended by the state, and the administrative staff size has not kept pace with the growth of the college.

PLANNING AGENDA

1. Assess the impact of growth and changing service demands as outlined in program reviews and the educational master plan in comparison to staffing levels for faculty, staff, and administrators.

3A3 The institution systematically develops personnel policies and procedures that are available for information and review. Such policies and procedures are equitably and consistently administered.

3A3a The institution establishes and adheres to written policies ensuring fairness in all employment procedures.

3A3b The institution makes provision for the security and confidentiality of personnel records. Each employee has access to his/her personnel records in accordance with law.

Las Positas College develops and publicizes its personnel policies by producing district brochures that are made available to the public and mailed to the community.\textsuperscript{487} The college also regularly creates current job listings and posts them on the district website.\textsuperscript{488} Personnel policies conform to the faculty and classified contracts and board policies.\textsuperscript{489} Human Resources keeps related forms on its website that are consistent with contracts, board policies, and educational code.\textsuperscript{490} Frequent communication between district managers and college administrators helps ensure fairness. Human Resources also provides continued training and review of the personnel policies.

The district will create an updated board policy for unlawful discrimination. This revised policy will further the district’s commitment that no person shall be unlawfully denied full and equal access to the benefits of Chabot-Las Positas Community College District. This policy will provide an educational and employment environment free from unwelcome sexual advances, requests for sexual favors, and other verbal or physical conduct or communications constituting sexual harassment.\textsuperscript{491} Additional personnel were hired in late fall of 2008 to take responsibility for this policy and procedure.

\textsuperscript{487} District brochures  
\textsuperscript{488} Current job listings  
\textsuperscript{489} Board Policies (Series 4000)  
\textsuperscript{490} Human Resources forms  
\textsuperscript{491} Board Policy 4006: Faculty and Staff Diversity & Equal Employment Opportunity Administrative Rules
At the time of employment, each new staff member is issued a packet of payroll and personnel information to be completed and returned to the Office of Human Resource Services. This information comprises the foundation of each new employee’s personnel record. The Office of Human Resource Services reviews the contents of this file using a checklist to ensure that all of the necessary documents are completed, returned, and filed appropriately.

Personnel records are kept in locked files in the Office of Human Resources. The files are opened in the morning and locked at the close of the business day. New employees of the Human Resource Services Office are given explicit directions regarding the importance of file confidentiality and are instructed about the circumstances in which employees and managers can review the files.

Personnel files are kept “active” (in paper form) for five years. After a period of five years, the files are microfilmed, the paper copies are purged from the files, and the microfilm is kept as part of the district’s permanent records.

Employees and former employees are allowed to inspect their personnel files at reasonable intervals during regular business hours by completing a Personnel File or Payroll Records Request. The employee is notified of a date and time the file may be reviewed. If the request is denied, a notice is provided to the employee. The district monitors the employee’s inspection of their personnel file to ensure that nothing is removed, destroyed, or altered. The employee is able to copy any document he or she has signed relating to obtaining or holding employment. This includes documents such as signed employment applications, employment contracts, warning notices, and records of employee discipline. Employees are also allowed to take notes about any contents of the file.

**SELF EVALUATION**

The college meets this standard. It has developed and implemented policies that comply with faculty and classified contracts, board policies, and the educational code. The personnel policies are updated to guarantee fairness in personnel procedures. The college also ensures that personnel files are kept in a secure location at the District Human Resources department. According to a staff survey, only 57 percent of college staff believes that human resources policies and procedures are clear and available.

**PLANNING AGENDA**

1. Develop and disseminate HR policies and procedures that are clear and accessible to the college on a continued basis. Provide opportunity for college personnel feedback on effectiveness of procedures and forms.

   3A4 The institution demonstrates through policies and practices an appropriate understanding of and concern for issues of equity and diversity.

---

492 District Payroll office
493 Classified and Faculty Contracts
Las Positas College shares the values and goals attending the creation and maintenance of a respectful, safe, and inclusive working environment for all employees. It is committed to hiring faculty and staff from diverse backgrounds and welcoming them to an environment that makes the college a place where they will want to stay.

The law creates two different, but related, legal obligations for community college districts with respect to hiring – both of which the District Office of Human Resources embraces fully: 1) that they act as equal opportunity employers; and 2) that they hire staff with a demonstrated sensitivity to the diversity of community college students.

This implies taking steps to eliminate arbitrary barriers to employment that may discourage the hiring of traditionally underrepresented groups. It also includes taking steps to attract highly diverse groups or pools of qualified candidates from which to hire.

Pursuant to the State Chancellor’s Office’s regulations, the district will develop an Equal Employment Opportunity (EEO) Plan. This plan will provide the framework for an ongoing compliance with state law and regulations that both prohibit discrimination and require positive steps to maximize the diversity of community college staff. The Office of Human Resource Services staff and many college administrators have already received training regarding both how to properly develop the district’s EEO Plan and how to train individual hiring committees in the areas of nondiscrimination, valuing diversity, counter-acting personal bias, and cultural fluency.

The district enforces board policy 4006 that provides for equal opportunity in all areas of employment practices and ensures that there shall be no discrimination against any person on the basis of sex, ancestry, age, marital status, race, religious creed, mental disability, medical condition, color, national original, physical disability, family or sexual preference status, and other similar factors in compliance with Title 9, Sections 503 and 504 of the Rehabilitation Act, other federal and state non-discrimination regulations, and its own statements of philosophy and objectives. The district encourages the filing of application by both sexes, ethnic minorities, and the disabled. District personnel responsible for the equal opportunity plan and training were hired in late fall 2008.

Las Positas College demonstrates its commitment to equity and diversity through programs serving the needs of its diverse student body, student clubs, and campus events. In addition, several special campus-wide projects have focused on issues of diversity and equity on our campus, including the Campus Change Network, the College Foundation Semester, and the Learning Task Force.

494 Board Policy 4006: Faculty and Staff Diversity & Equal Employment Opportunity Administrative Rules
495 Hiring processes
496 Board Policy 4006: Faculty and Staff Diversity & Equal Employment Opportunity Administrative Rules
497 Student Equity plan
Programs
Las Positas College has a variety of programs that support the needs of its diverse student body. These programs include CALworks (for students with children), the Disability Resource Center, Extended Opportunity Programs and Services (EOPS) (for low-income and educationally disadvantaged students), and the Veterans’ Services Office.498, 499, 500, 501

Clubs
Student clubs celebrating a diverse campus include the Asian Student Alliance, Black Student Union, Christ on Campus, Gay Straight Alliance, Latino Student Alliance, Muslim Student Association, Veterans Club, and World Cultures Alliance.502

Events
The college regularly hosts special events highlighting diverse cultures and groups. Recent events have included a Dia de los Muertos Exhibit (November 1, 2007), Week of Cuban Culture (Dec 3-8 2007), and Brain Awareness Week (March 3-7, 2008). The World Cultures Alliance has sponsored two movie nights showing an international film and providing food from that country (November 13, 2007, March 20, 2008). Recent campus speakers have included Doris “Lucki” Allen, discussing her experiences as a female veteran of the Vietnam War (March 14, 2008) and Temple Grandin, an autistic woman who discussed her celebrated work as a livestock behavior specialist (March 13, 2008).503 The Campus Change Network also regularly hosts discussion groups dealing with issues of diversity and equity which are open to all members of the campus community. Town meetings (for all full-time faculty, staff, and administrators) frequently include subjects relating to issues of equity and diversity, including a student panel on diversity in which student leaders discussed their feelings about how to create a more collegial atmosphere amongst students.

Campus Change Network
In partnership with the social justice nonprofit “California Tomorrow,” Las Positas College participated in a fifteen-month project to examine issues of student equity and access at the college. This project, known as the Campus Change Network, involved Las Positas and seven other California community colleges.504 This project, begun in spring 2005, was an opportunity to work toward realizing the goals stated in the Student Equity Plan. Members of the Campus Change Network participated in three retreats and various professional development opportunities as well as regular meetings on campus. The group has worked to institutionalize policies encouraging equity by including them in the educational master plan, thus engaging mechanisms for resources to be allocated toward these goals. Although the original fifteen-month project has ended, the Campus Change Network has continued to work on campus, organizing roundtable discussions and speaker events on issues of equity and diversity;

498  CalWORKS program
499  Disability Resource Center
500  EOPS
501  Veterans’ Benefits
502  Student clubs
503  Activity calendar
504  Campus Change Network website
members of this group also serve as campus advocates and resources for equity issues.505, 506

**College Foundation Semester**
The College Foundation Semester (CFS) is a semester-long learning community that serves as a foundation for at-risk students entering the college or those who may have already started but faced difficulties.507 Based on the model of Cabrillo College’s successful Digital Bridges Academy, CFS has served students for the four years, with one cohort established in fall of 2005, 2006, and 2007, and two cohorts for fall of 2008. The program begins with an intensive two-week “foundation course” that emphasizes interpersonal and student skills. The students then take an integrated set of classes, which the instructors design collaboratively, culminating in a final, interdisciplinary project at the end of the semester. The program also provides counseling and helps students access other campus resources such as the disabled student services or EOPS. CFS has addressed the needs of students facing issues such as physical and learning disabilities, poverty, non-native English ability, and emancipation from foster care. While this program is currently limited in size, the learning community model represents one direction that Las Positas College would like to pursue more widely in the coming years for serving the needs of a diverse student body.

**Learning Task Force**
This committee was formed in response to the statewide Basic Skills Initiative. It was comprised of faculty members from math, English, and ESL, as well as administrators. The goal of the committee was to read and assess the basic skills best practice literature, implement the college assessment tool developed by the BSI, and develop a plan addressing the assessment needs. The Learning Task Force completed its goal and has now begun the process of looking at an institutional basic skills committee whose mission will be developed and implemented on a much broader scale. The issues of equity and diversity, as noted in the basic skills best practice literature, will be forwarded to the new Basic Skills Committee for further review and follow up.508

**SELF EVALUATION**
The college meets this standard. Generally, Las Positas College has been quite successful in creating a campus climate that values diversity and equity. The 2007 student accreditation survey indicated a high level of satisfaction in this area. Students were asked whether LPC fostered a respectful attitude towards various types of differences amongst students. The following are the combined percentages for “agree” and “strongly agree” answers: differences in race/ethnicity—79 percent, gender—82 percent, physical disability—77 percent, age—80 percent, sexual orientation—76 percent, religion—75 percent. These results seem strong, particularly given the small numbers of “disagree” and “strongly disagree” responses, which are all 3 percent or less (Student Survey 2007).

---

505  LPC Campus Change Network
506  “Student Services Leaders and Equity,” by Pam Luster
507  Fall 2008 printed schedule, pg. 110
508  Learning Task Force
Las Positas’s Student Equity Plan notes that, while the campus has a relatively small proportion of students of color, the college is in fact more racially diverse than the communities surrounding it. This indicates the college’s accessibility to students of color (Student Equity Plan 2004).

A comparison of the 2005 and 2007 Student Survey data does show that white students feel more encouragement from their instructors to participate in class and share different points of view than do non-white students. White students are also less likely to report growth in their ability to get along with different kinds of people and to demonstrate respect for the rights, views, and work of others. African American and Asian students were less likely to agree with the statement, “Instructors are diverse enough to meet my needs.” In 2005, African American students reported less respect for issues of race-ethnicity, gender, physical disability, age, sexual orientation, and religion than did non-African American students; however, this was not the case in 2007. Since the numbers of each ethic-racial group at this college is small, it’s possible that correlations might not be reliable for any specific group.

PLANNING AGENDA

None.

3A4a The institution creates and maintains appropriate programs, practices, and services to support its diverse personnel.

Personnel benefit from the campus climate described in Standard 3A.4. In addition, particular personnel provisions are made to prevent discrimination and support a diverse staff.

Contract

The faculty contract provides for reasonable accommodations for mental or physical disabilities (article 9M), pregnancy leave and parental leave (11E and F), and non-discrimination (35a-c) which includes the anti-discrimination/sexual harassment training.509

Harassment Training

All full-time Las Positas College personnel received training on preventing harassment and discrimination in the workplace (Preventing Harassment, Discrimination and Retaliation in the Academic Setting/Environment: February 7, 2007).510

SELF EVALUATION

The college meets this standard. The results of the 2007 staff survey indicate general satisfaction with issues of equity and diversity. The survey asked for

509 Faculty Contract
510 Board Policy 4027: Sexual Harassment Administrative Rules and Procedures
degree of agreement or disagreement with the following statement: “The college demonstrates its commitment to diversity through its hiring process, including job descriptions, diversity of the applicant pool, and the selection of hiring committee members.” Responses to this statement were 22 percent strongly agree, 56 percent agree, 11 percent neutral, 11 percent disagree, and 0 percent strongly disagree. This means that in total, 78 percent of those surveyed either agreed or strongly agreed, representing a strong show of support for the college’s commitment to diversity in hiring. However, 11 percent of respondents in disagreement could be seen as a high proportion for such an important goal. One reason for this may be that the school has no affirmative action policy for hiring, and diversity is not explicitly included in the standards used by first-level hiring committees. Including diversity as an explicit hiring goal would strengthen our institutional commitment to this outcome.

Another salient prompt on the survey was “Personnel are treated equitably.” The responses were as follows: 27 percent strongly agree, 58 percent agree, 8 percent neutral, 8 percent disagree, and 0 percent strongly disagrees. In total, 85 percent of the respondents expressed either agreement or strong agreement. While this is a strong response, the majority of respondents only agreed, indicating that they had some reservations. The survey does not describe the reasons for these reservations, but the result could motivate deeper exploration.

PLANNING AGENDA

None

3A4b The institution regularly assesses that its record in employment equity and diversity is consistent with its mission.

Part of Las Positas College’s mission is to foster in students “an understanding and respect for difference and diversity.” Implicit in this mission is the college’s observance of the district policies, as well as federal and state laws, that ensure equal opportunity in hiring practices.

Staff diversity at the college has increased only slightly since 1995. The proportion of Hispanic, Asian, and African American employees has remained fairly constant.

Assessment of staff diversity and satisfaction is not done in a systematic manner. Numbers of staff by gender and race are available, but there is no process for that data to affect policy.

511 Mission Statement
512 Employee Demographics 1995-2007
The Office of the President and the Office of Institutional Research and Planning began a regular survey of staff satisfaction in fall 2008. In addition, the Campus Change Network has initiated a subcommittee to consider equity and diversity issues in the hiring process. This group will examine and recommend changes in policy and procedures to increase diversity amongst staff.

SELF EVALUATION

The college partially meets this standard. Diversity and equity are emphasized in the hiring processes developed by human resources, but the record of employment equity and diversity is not regularly assessed.

PLANNING AGENDA

1. Work with the district on developing a regular assessment of employment equity and diversity in relation to the college mission, and communicate that assessment to the college.

3A4c The institution subscribes to, advocates, and demonstrates integrity in the treatment of its administration, faculty, staff and students.

The Chabot-Las Positas District provides services and policy to the college that ensure fair hiring processes through adherence to affirmative action practices. Board policy 4006 clearly states the district’s position and commitment to fair hiring practices.\(^{513}\) In addition, the district has updated its board policy recently to include unlawful discrimination including sexual harassment. These policies prohibit anyone from being unlawfully subjected to discrimination on the basis of ethnic group identification, national origin, religion, age, sex, race, color, ancestry, sexual orientation, or physical or mental ability. Board policy 4012 ensures fairness in employment by requiring the selection procedures to be in accordance with the District Staff Diversity and Equal Employment Opportunity Plan in addition to federal and state laws relating to equal employment opportunity.\(^{514}\) The Chabot-Las Positas Community College District requires all management to attend annual sexual harassment training to ensure that the employment environment is free from unwelcome sexual advances, requests for sexual favors, and other verbal or physical conduct or communications constituting sexual harassment.

SELF EVALUATION

The college meets this standard. The institution maintains policies that ensure integrity in the treatment of employees and students.

---

513 Board Policy 4006: Faculty and Staff Diversity & Equal Employment Opportunity Administrative Rules
514 Board Policy 4012
PLANNING AGENDA

None.

3A5  The institution provides all personnel with appropriate opportunities for continued professional development, consistent with the institutional mission and based on identified teaching and learning needs.

3A5a  The institution plans professional development activities to meet the needs of its personnel.

Las Positas College offers its personnel a range of professional development opportunities through its Staff Development Committee, which is a standing committee in the college’s shared governance.\textsuperscript{515, 516} This committee includes representatives from administration, classified and faculty groups. The Staff Development Coordinator is given reassigned time to lead the committee in monthly meetings in planning the annual budget, reviewing and awarding conference proposals, planning and developing programs, requesting funding from other sources, and soliciting suggestions and ideas for future programs from the various campus constituencies. Funding for professional development is uncertain from year to year, making the number of programs that can be offered unstable.

The staff development coordinator, with the college president, Academic Senate president, and chair of the Enrollment Management Committee, create the campus flextime program for mandatory and non-mandatory flex periods. A flex day program might include workshops on teaching strategies, the use of technology in instruction, program development, SLO training, and working with students with special needs. Following the union contract, adjunct faculty who have classes during mandatory flex activities are obligated to fulfill the same number of flex hours as they would have taught on the designated flex days. With administrative approval, adjunct faculty who attend flex activities outside their teaching time are compensated.\textsuperscript{517}

In addition to overseeing flex day activities, the Staff Development Committee supports the following activities:\textsuperscript{518}

\begin{itemize}
\item Funding conference proposals and mini-grants
\item Help Desk (individualized computer training at the staff member’s work area)
\item Teachers Teaching Teachers
\item Great Teacher’s Seminar scholarships
\end{itemize}

\textsuperscript{515} Staff Development committee
\textsuperscript{516} Shared Governance
\textsuperscript{517} Faculty contract
\textsuperscript{518} Staff Development activities
• Teaching and Learning Innovation grants
• Symposium on Developmental Education
• New faculty orientation program

Some opportunities for professional development, such as the Academic Faculty Symposium, have been made available through other district and college resources.

The Innovation Center provides training and support for faculty, staff, and administrators on the following topics:

• Blackboard
• Blogging
• Capturing screen movements: Camtasia
• Narrating PowerPoints for the Web: Camtasia
• CCC Confer
• Classroom Response Systems
• Creating Accessible Word Files for the Web
• Creating Accessible PowerPoint Files for the Web
• Document cameras
• Dreamweaver Basics
• Improving Teaching and Learning with Technology
• Inspiration
• Mobile Learning
• Photoshop Basics
• Podcasts
• PowerPoint Basic Skills
• Streaming Media
• StudyMate
• Teaching with PowerPoint
• Turnitin
• Using the Tablet PC
• Web Accessibility Overview and Basics

519 Innovation Center
Some activities also focus on administrative skills:
- Administrative Staff Development training
- District workshops
- ACCA workshops
- Community College Leadership Institute
- Leadership Livermore/Leadership Pleasanton

SELF EVALUATION

The college partially meets this standard. While the institution supports some valuable opportunities for professional development, a truly comprehensive program would require more robust and stable funding, such as has been allocated to the staffing and technology of the innovation center. Coordination between staff development services is sometimes insufficient. The relationship between staff development and the college mission has not been fully articulated.

PLANNING AGENDA

1. Develop a well-coordinated and appropriately funded staff development program that incorporates faculty, classified, and administration professional development into a centralized program with a centralized location.

3A5b With the assistance of the participants, the institution systematically evaluates professional development programs and uses the results of these evaluations as the basis for improvement.

In spring 2005, the college administered a campus-wide survey to identify staff development needs. Also, the Staff Development Committee requests written feedback from faculty and staff who participate in staff development workshops and flex day activities. The results of these assessments, however, are not directly connected to an allocation process, and programmatic responses to them have not been formally documented.

SELF EVALUATION

The college partially meets this standard. Needs assessment does not occur regularly, and there is no formal process for responding to assessments. The proximity of some staff development opportunities to the immediate concerns of teaching and learning is not always clear.

520 Staff Development Needs Assessment Survey
PLANNING AGENDA

1. Systematically evaluate staff development committee processes and opportunities, and link staff development to increased program and service effectiveness.

3A6 Human resource planning is integrated with institutional planning. The institution systematically assesses the effective use of human resources and uses the results of the evaluation as the basis for improvement.

Human resource planning and institutional planning are connected through the program review process, in which programs identify their staffing needs according to program goals. Annual requests for new faculty and staff positions originate from programs and are presented to divisions that then discuss the urgency of the need as expressed by, in part, the proximity of the program goal that the new position supports to the college mission.\(^\text{521, 522}\) Requests from each division are forwarded to the Planning and Budget Committee, which in turn ranks requests and forwards its recommendations to the college president. The president consults with the chancellor to finalize position priorities.\(^\text{523}\)

The Office of Human Resources is responsible for the implementation of District Board of Trustees’ HR-related policies and procedures. In addition, the office provides leadership and support in the following areas:

- providing high-quality professional service;
- engaging in proactive employee relations processes;
- facilitating the recruitment and selection of employees;
- developing, interpreting, and applying HR-related board policies and procedures;
- overseeing and facilitating the application of HR and HR-related board policies and procedures at the colleges and the district office;
- administering payroll;
- administering benefit programs, and employee health and welfare programs;
- negotiating with collective bargaining units and administering labor contracts;
- developing and administering the classification and compensation system;
- developing and implementing employee development programs;
- maintaining official personnel files.

\(^\text{521}\) PBC minutes 02-05-04
\(^\text{522}\) PBC minutes 04-05-07
\(^\text{523}\) College Council minutes 04-17-08
All of the above is supported and outlined in the Office of Human Resource Services Strategic Plan as a tool to determine the needs of human resources.\textsuperscript{524}

**SELF EVALUATION**

The college partially meets this standard. Human resource planning is connected to institutional planning; however, the educational master plan has not been consistently integrated with human resource planning processes, and the PBC criteria for ranking faculty and classified staff position requests is not transparent. Looking forward, the educational master plan lacks a projection of administrative staffing needed to keep pace with the institution’s growth. While communication between the college and the district has been improving, there is no mechanism for verifying alignment between the college and district planning documents and processes. Enrollments at this college have exceeded the funding required to support them. The effective use of human resources is not systematically assessed. The self-study survey results indicate that many faculty and staff at the college are not sufficiently aware of integrated human resource and institutional planning and processes.

**PLANNING AGENDA**

1. Ensure that all faculty and staff position needs are identified in respective program reviews and that revisions to the educational master plan include long-term projections for staffing in faculty, staff, and administrator positions. Encourage classified staff participation to this process.

2. Develop a long-term projection for staffing in administrative, classified, and faculty positions, in conjunction with budget development.

3. Include a process for requesting new administrator positions into the request cycle outlined by the Planning and Budget Committee.

4. Review, revise, and streamline existing policies and procedures related to the District Human Resources office. Work in consultation with the district on review process.

**3B1** The institution provides safe and sufficient physical resources that support and assure the integrity and quality of its programs and services, regardless of location or means of delivery.

Las Positas College provides safe and sufficient physical resources that support and ensure the integrity and quality of its programs and services, regardless of location or means of delivery. The college is situated on 147 acres on the boundary between rural and suburban settings. The campus consists of 23 buildings including a new PE complex and a new multi-
disciplinary building completed since the last accreditation cycle. Several new buildings are being planned as part of the Measure B bond passed in 2004. The bond provides $217,000,000 for the modernization of existing infrastructure and campus expansion. Construction has begun on a campus aquatics facility, new multi-use athletic fields, and infrastructure and site development including electrical, plumbing, outside wiring, and extension of the campus computer network. Construction will begin in 2008 on the Early Childhood Development Center, the Center for the Arts, a new parking lot covered with solar panels, and the Central Plant. The college is in late stages of planning on the Student Services/Administration building, the Maintenance and Operations (M&O) building, and the IT building. The college is also adding covered parking with solar panels to an existing lot as part of a project that will generate one megawatt of solar power generation. In the next few years, the college will design and construct Phase II of the Science and Technology Building and begin the Library Renovation and Expansion Project.\textsuperscript{525}

In preparing for the bond, the district took a conservative approach to budgeting. Specifically, it assumed that costs would escalate three to four percent annually over the life of the bond measure. Unfortunately, contemporaneous with passage of the bond, the cost of construction in the greater San Francisco / East Bay area skyrocketed.

At Las Positas this implied two major shifts in the approach to the campus build out: Some projects were deferred to the future, while those that were to be constructed were put on a fast track. The latter approach compressed an approximately seven to ten-year schedule to five to seven years. The goal of this strategic shift was to outrun soaring construction costs. The postponed projects include tennis courts and a classroom building.

There is both financial management and user involvement in the expenditure of Measure B funds. With respect to financial oversight, the District Board of Trustees reviews all major spending decisions. Operationally, the district has a team of project managers under the direction of the Vice Chancellor of Facilities. Las Positas College projects are guided by a Project Planner/Manager, with oversight by the Vice President of Administrative Services. Finally, a seven-member Citizens’ Oversight Committee represents the voters of the district to ensure that bond funds are managed responsibly. At the campus level, all decisions and processes are also monitored by the Facilities Committee.\textsuperscript{526}

The Facilities Committee (comprised of faculty, administrators, classified staff, and students) addresses the planning and development needs of the college and makes recommendations to the college president. In addition, the Facilities Committee deals with the “domino effect” that results from new buildings being completed and other buildings becoming vacant. For example, when the PE Complex was completed, the existing weight room no longer needed to be housed in building 1200. Now, building 1200 is home to the Integrated Learning Center, a facility for tutoring in math, English and ESL. The committee

\textsuperscript{525} Facilities Master Plan
\textsuperscript{526} Facilities committee
is also developing standards on items such as trash cans, hand rails, and furniture. Similarly, a Landscape Committee ensures that plants are grown in appropriate areas and that bioswails are included to assist with run off. The Campus Climate committee consists of students and staff who work to ensure that the campus is safe, well-lit, and clean.

The college maintains appropriate policies to ensure the campus’ safety. Most campus buildings are open from 7am to 11pm. All students and staff members are issued identification cards which they may be asked to produce if there is any question about their authorization to be in a specific area. Security standards are being incorporated into the design of the new buildings. The college is considering card key access, in addition to video cameras, used to protect safe environments by allowing the college to track entry and exit, and even limit access to certain buildings when necessary. The newly built Campus Hill Drive provides a second point of access to emergency vehicles.

Campus Safety and Security at Las Positas College works with all members of the campus community to ensure safe learning and working environments, to protect persons and property, and to effectively promote compliance with rules and regulations approved by the Board of Trustees for the orderly facilitation of higher education. Crime reporting statistics are available online and are reported at regular meetings of the Health and Safety Committee. These reports record all crimes that occurred on campus, in certain off-campus buildings or property owned or controlled by Las Positas College, and on public property within, or immediately adjacent to and accessible from the campus, during the last three years. These reports also include institutional policies concerning campus security, alcohol and drug use, crime prevention, the reporting of crimes, sexual assault, and other safety matters. Campus security has also developed a schedule of routine inspections and maintenance to continue to assure the safety of the college’s facilities.

The Livermore/Pleasanton Fire Department conducts periodic inspections of the campus to insure the college is storing and handling hazardous waste properly. A private consulting company, Premier Chemical, was consulted to advise and develop a complete set of Standard Operating Procedures (SOPs) to standardize laboratory safety and hazardous waste handling according to OSHA. The college’s liability insurance company, Keenan and Associates, conducts a yearly safety inspection of the campus as well.

Las Positas College is committed to achieving academic, ecological, economic, and social sustainability. The Sustainability Task Force consists of faculty, staff, and students, and is endorsed by the college administration. The sustainability goals of the college are to fashion a campus that uses water and resources responsibly, incorporates life cycle planning and decision making, builds LEED Silver and Gold buildings, achieves low maintenance and operating costs, applies renewable energy sensibly, and creates building forms and landscapes that do not influence climate. The college designs landscape

527 Campus Safety website
528 Health & Safety Committee
529 Livermore – Pleasanton Fire Department
530 Keenan Insurance Report, 01/29/2009
to be low maintenance and water conserving. In addition, the Sustainability Committee has been involved with the plan to install one megawatt of solar power generation through covered parking structures.  

SELF EVALUATION

The college meets this standard. It has made tremendous strides in meeting the needs of the community through a major campus facilities expansion funded through Measure B and state bond funds. Processes are in place to ensure that construction and planning are done correctly, according to the needs of the community and its students. Because of construction or mechanical problems, wheelchair access to all buildings has not been maintained at all times. Communication devices installed in all classrooms that would allow instructors to contact campus security, the health center, or M&O in the event of a special need would further enhance campus safety.

In a 2007 student survey, 85 percent of students rated Campus Safety/Security as excellent, very good, or satisfactory. Eighty-three percent of students surveyed agreed or strongly agreed that they feel safe on campus.

PLANNING AGENDA

1. Resolve instances of wheelchair inaccessibility caused by technical difficulties or construction delays.

2. Install an emergency communication system in each classroom.

3B2 To assure the feasibility and effectiveness of physical resources in supporting institutional programs and services, the institution plans and evaluates its facilities and equipment on a regular basis, taking utilization and other relevant data into account.

3B2a Long-range capital plans support institutional improvement goals and reflect projections of the total cost of ownership of new facilities and equipment.

Long range capital planning at Las Positas College is linked to institutional planning through the development and use of educational master plan documents and shared governance processes.

After the passage of the district’s Measure B bond in March 2004, Las Positas College embarked on an aggressive planning agenda. The college developed a comprehensive, integrated, collaborative approach to planning, which included three task forces – Student Learning Outcomes, Educational/Organizational, and

531 Landscape plan
532 District design guidelines
533 Sustainability committee minutes, 09-26-08
Facilities Development. The work of each task force was iterative, with each sharing information and soliciting feedback from the other task forces and the college community.

The Facilities Development Taskforce had five subcommittees, which reflected the goals, objectives, and guiding principles of the college’s master planning: Campus Climate, Sustainability, Athletics/Recreation, Community Interface/Traffic/Parking/Security, and Space Utilization/Services/Equipment. Each subcommittee was composed of administrators, faculty, staff, students, and community members. After working through the 2004-2005 year to formulate a plan consistent with the educational master plan, which was being revised simultaneous to the facilities development effort, the Facilities Development Plan, Vol 1, was rolled out May 2005. This document was written to be “a guide as future monies are applied toward the development of facilities, renovations, and site improvements.” The Facilities Development Plan outlines nine new buildings, totaling 260,000 gross square feet; seven new outdoor facilities to support PE/Athletics; and four modernization and enrichment projects. The plan will more than double the current square footage of buildings and add outdoor spaces to the college footprint.

Additional facility planning documents, including landscape guidelines, district design guidelines, and a security master plan, soon followed. These documents provide specifications in line with the Facilities Development Plan.

To assist with the development, implementation, and actual construction of facilities identified in the Facilities Plan, the district engaged an outside firm, Parsons 3DI, and eventually brought on the consultant as a district employee. The district enters existing and new facilities into the California Community College Chancellor’s Office facilities deficiencies database on a regular basis. Each year, CLPCCD submits a five-year Capital Outlay Plan to the California Community College Chancellor’s Office for consideration of funding. This gives the college the opportunity to update its five-year plan each year. Initial project proposals, final project proposals, and a comprehensive list of planned projects for both state and locally funded projects are shown in priority and sequence. The plan takes into account capacity to load ratios as future student enrollment numbers are adjusted each year. Las Positas College’s enrollment growth continues to outpace its facility space, as expressed in its “Capacity to Load Ratios” in the Plan.

Capital equipment purchases, whether acquired through college general fund, bond, or State Fixed Furnishings and Equipment (FF&E) funds associated with facility projects, are procured through processes which link the equipment requests to institutional planning. The Instructional Equipment

---

534 SLO committee
535 Facilities committee
536 LPC Facilities Development Plan, Vol 1, May 2005
537 District design guidelines
538 Facilities Master Plan
Request, for example, requires justification by asking, “What educational program or institutional purposes does the equipment support? How does the request relate specifically to the educational master plan or Program Review?”

The total cost of ownership (TCO) is considered for equipment, facilities, and operations. The Las Positas College Technology Master Plan clearly defines and projects TCO for all technology purchases.

The cost of ownership associated with new buildings is discussed and projections are attempted. During planning and design of new facilities, Maintenance and Operations projects, M&O staffing, operating expenses for lighting, and HVAC are projected. A new College Central Plant will reduce TCO associated with each building.

**SELF EVALUATION**

The college meets this standard. However, the total cost of ownership of new facilities is not accurately enough estimated, and a yearly cost of operation, including classified, faculty, curricular programs, and operations, has not been attached to each new facility project in a clear format, so that construction of new projects can be prioritized in a transparent manner by the entire institution.

**PLANNING AGENDA**

1. Provide a collaborative and transparent process for the consideration of what facilities/programs to defer.

2. Develop a TCO business plan for each new facility to accurately estimate true costs.

3B2b Physical resource planning is integrated with institutional planning. The institution systematically assesses the effective use of physical resources and uses the results of the evaluation as the basis for improvement.

Physical resource planning at Las Positas College is thoroughly integrated with institutional planning. In addition, the use of physical resources is assessed, and the results of such assessment are used to plan improvements. Some specific groups, committees, and protocols have been adopted to ensure that physical resource planning is integrated with institutional planning. Of specific importance are the educational master plan, the facilities master plan, the Planning and Budget Committee, and Facilities Committee, users committees, the Instructional Request Form, and the Schedule 25 software.

---

539 Request For Use of College Equipment and Support
540 Technology Master Plan
541 Facilities Master Plan
The educational master plan has been the pivotal document for much of the planning at Las Positas College. This document was created with the research and expertise of all active Las Positas College faculty and staff. As is written in the Letter of Introduction to the educational master plan, “the Self-study for Accreditation and the Program Review enabled LPC to carefully scrutinize and assess its programs, services, and facilities.” The facilities master plan, formulated to be consistent with the educational master plan, is the pivotal document for all facilities planning.

The Planning and Budget Committee meets regularly to determine the facilities needs of the college by considering the educational master plan, the facilities master plan, observed student and instructional needs, and current budgetary concerns. This committee was formed from the Budget Study Group and the Institutional Planning Committee to ensure that budgetary concerns and planning processes are in integrated.

The Facilities Committee meets regularly to determine the facilities needs of the college by considering the educational master plan, the facilities master plan, observed student and instructional needs, and budgetary concerns. The committee works with district bond management consultants to ensure that fiscal expertise is integrated into all planning and decisions made by the committee.

For each project proposal, Users Committees, comprised of the end users of the facilities being developed, are brought together to help with the facility development plans. Their knowledge of educational and institutional needs is drawn upon as expertise in the planning process, as well as the expertise of various departments on campus.

The College Council, which includes constituent representatives from across the campus, meets monthly. This major shared governance body provides feedback among the various committees and supports the coordination of activities. The College Council evaluates any concerns raised by shared governance committee chairs related to the educational master plan and other long-range planning strategies.

The Instructional Equipment Request Form is used by programs to acquire instructional equipment that would support program and college goals. Requests are first ranked by the division of their origin, and then they are forwarded to the Planning and Budget Committee, which makes recommendations according to the educational master plan and resource availability.

The Scheduling Software “Schedule 25” is in the process of being implemented on the Las Positas Campus. The integrated use of this software will further ensure that resource needs in program and service areas are effectively met, and that different needs and use plans are effectively

542 Educational Master Plan
543 Planning & Budget committee
544 Facilities committee
545 Measure B Master Schedule progress report
546 College Council website
547 Request For Use of College Equipment and Support
integrated. Three separate offices on campus deal with three different subsets of facilities scheduling; these are class scheduling, general facilities scheduling, and one-time event scheduling. With the use of Schedule 25, a single interactive database will ensure that scheduling activities of all three offices are integrated through automated interaction in a central database.

Effective physical resources planning also depends on feedback and assessment. In addition to what is described above, the Student Survey, the Staff Survey, Program Review, Users Committee Evaluations, and the Facilities Deficiency Database help the college understand and improve its processes.548

Las Positas College uses the Student Survey and the Staff Survey to gather information on the effectiveness of its facilities decisions and the integration of physical resources with institutional planning. Elements in the Student Survey of 2007 specifically enquire into the facilities needs of students and their satisfaction with those facilities.549 The Staff Survey of 2007 specifically asks staff to respond to how effectively the planning process of LPC allocates resources, integrates institutional research, identifies college priorities, and keeps the college mission central to institutional planning.550 The responses to these surveys have been made available to all faculty and staff to encourage use of the information in further planning and improvements.

The program review process involves a review by faculty of all aspects of the college’s programs, including their facilities and equipment needs.551 Faculty are asked to consider data on student success and enrollment trends and to evaluate the implications of this data for facilities and equipment needs. All needs are justified according to the educational master plan and data provided on current instructional results.

Evaluation of the effectiveness of physical resource planning is also done by the Users Committees that are brought together to contribute to the planning process. After facilities are completed and are in use, these groups are again brought together to evaluate the effectiveness of the facilities at meeting educational goals and serving student needs. The information from these reviews is communicated back to the Facilities Committee, the Planning and Budget Committee, the College Council, and the Las Positas Projects Manager so that further improvements can be made.552, 553, 554

The Facilities Deficiency Database is another important way in which the effectiveness of our physical resources is evaluated to provide information for further improvements. This database is generated from data on the current use of facilities, the observations of shortfalls of current facilities planning, and projected facilities needs. On-ground observation is done yearly of all Las Positas Facilities. Data thus generated are input into the Prolog management system.

548 Surveys
549 Fall 2007 student survey
550 Fall 2007 staff survey
551 Program Review
552 PBC Minutes
553 Facilities committee minutes
554 College Council minutes
The analysis of this data evaluates current facilities needs. This information is communicated to the Budget and Planning Committee, the Facilities Committee, and the other entities and individuals responsible for facilities planning, maintenance and evaluation.

SELF EVALUATION

The college meets this standard. At a rapidly growing college, there are always great challenges to meet in ensuring that physical resource needs are being effectively met, but the process is working. According to the Student Survey of 2007, 83 percent of students note that they are usually, nearly always, or always able to find classes that they need effectively scheduled at a time and place that they are able to attend. In the Faculty Survey of 2007, 82 percent of faculty agreed or strongly agreed that “LPC allocates resources to support student learning.” Overall the high level of research and the feedback among research and planning groups suggests that problems with physical resources at LPC are identified and plans are put into place to fix those problems that are discovered. In the same survey, there were no faculty who disagreed with the claim that, “institutional research is integrated with and supportive of institutional planning and evaluation.” However, there was a relatively high number (29 percent) of those who neither agreed nor disagreed. These numbers suggest that those who are aware of our research strategies find them to be effectively used, but that many are unaware of these research strategies used in the planning and evaluation of physical resources.

PLANNING AGENDA

1. Provide faculty training related to how institutional research is integrated and supportive of institutional planning and evaluation at the college and through that training assist faculty in determining what the data demonstrates.

3C1 The institution assures that any technology support it provides is designed to meet the needs of learning, teaching, college-wide communications, research, and operational systems.

3C1a Technology services, professional support, facilities, hardware, and software are designed to enhance the operation and effectiveness of the institution.

Prior to the passage of the Measure B bond in 2004, LPC had built a strong reputation for its integration of technology into its administrative and instructional operations. Since the bond passed, that reputation has been enhanced with additional, cutting-edge technologies that allow the college to meet the ever-evolving needs of the institution:

---

555 Classroom Technology Survey Results 2006
Every full-time faculty and staff member has a relatively recent desktop computer with the necessary software and network/Internet access to perform his or her job. Adjunct faculty and part-time staff have access to the same technology. There are over 1,200 computers, including those in classrooms and instructional labs on campus.

All employees have access to email, phone mail, and district database services on the Internet both on and off campus.

A lifecycle plan ensures new computers campus wide every four years.556

Students can complete the following tasks online: register for classes, pay fees, check grades, check financial aid status, purchase books, and buy a parking permit.

There are 28 wireless access points in various locations around the campus.

All classrooms have an instructor workstation that features at least one computer with appropriate software and is connected to the Internet and to a projector. The workstations also feature a VCR/DVD player, a sound system and network cables that allow laptop computers to be plugged in and connected to the Internet and projector.

Money from the bond was partly used to fund the technological infrastructure of the Multi-Disciplinary Building, LPC’s newest, which opened in June 2007. This building provides a glimpse into the technical future of the other buildings funded by the bond that have yet to be constructed. Each classroom has technology similar to other classrooms on campus, but classrooms also include a standardized “smart panel” that allows easier control over the projection and sound systems, and a document camera—a digital upgrade from the traditional overhead projector. Instructions for using the equipment are posted at the instructor workstation in each class.

The jewel of the Multi-Disciplinary Building is the 214-seat lecture hall. This room features a multiplex projection system that allows images to be projected onto three screens. The projection system is controlled by touch-screen technology and is enhanced by a state-of-the-art sound system. Instructors can use either a Windows-based computer or a Macintosh, or they can plug in their own laptops if they prefer. Like the rest of the classrooms in the building, students have wireless Internet access. In addition, students can use the provided outlets to power their laptops, and they can choose to plug in to network outlets for Internet access.

Classroom technology was selected based on analyses of other colleges’ setups, recent best practices in higher education, ease of use, and results of LPC’s Classroom Technology Survey.557 Among other things, faculty were asked what equipment they wanted in the classrooms and what were the barriers to using the equipment.

556 Technology lifecycle plan
557 Classroom Technology Survey Results 2006
Aside from administrative services online, there are a host of instructional services available to faculty, staff, and students. Faculty and other instructional staff can post learning materials on one of the LPC web servers for students to access. Materials can also be posted to Blackboard, the college’s course management system. Along with enhancing on-campus courses with online content, faculty also use Blackboard to deliver hybrid and online courses. During the 2007-08 academic year, LPC offered 23 sections of hybrid courses and 157 sections of online courses. The biggest usage of Blackboard, however, has been in enhancing on-campus courses. There were 526 of these web-enhanced courses during 2007-08.\textsuperscript{558}

The decision to purchase a license to utilize Blackboard was made by a district-wide committee with representatives from various constituencies, including several faculty members. The committee also decided to have Blackboard host, maintain, and support the server. Today, Blackboard hosts a test and development server and the Snapshot Controller function that connects the district’s administrative computing system, SCT Banner, to Blackboard. Additionally, it is responsible for ensuring reliability, disaster recovery, and security.\textsuperscript{559}

Among the other technologies that faculty have access to are an online anti-plagiarism service and a Student Learning Outcomes management system, eLumen, as well as tools for creating streaming videos, podcasts, narrated presentations, and web pages.\textsuperscript{560, 561} The tools for creating such digital content are housed in the college’s Innovation Center and are purchased based on faculty needs.\textsuperscript{562} Those needs are expressed informally and also through surveys. Furthermore, because the output of the aforementioned tools are posted online for distance education and non-distance education courses, procurement and usage of those tools are also discussed in the LPC Distance Education Committee. Technologies and technology services are detailed in the college’s technology plan, the college’s distance education strategic plan, and the district’s information technology services strategic plan.\textsuperscript{563, 564, 565}

**SELF EVALUATION**

The college meets this standard. The college’s computer support staff and the district’s Information Technology Services staff collaborative strive to not only meet the needs of the campus community, but also to enhance the administrative and instructional effectiveness of the college. The expectations here are high. For example, students expect to be able to go online to apply and register for classes, purchase books, do homework, conduct research, and even complete entire courses. They can do that from anywhere. When students come to campus, they expect to use modern, standardized technology

\begin{itemize}
\item Distance Education and Blackboard Statistics
\item Blackboard Security Policy
\item TurnItIn.com
\item SLO website
\item Innovation Center website
\item Technology Master Plan
\item DE Strategic Plan
\item ITS Projects Strategic Plan
\end{itemize}
to accomplish their tasks. They can do that, too, as evidenced by the 75 percent of students who are either satisfied or very satisfied with LPC’s computer labs. Students also expect to obtain information on a multitude of topics from the college’s web site and library databases. Considering that the web site encompasses over 50,000 pages, and the 33 databases contain approximately one million resources, there’s a good chance that students will find what they are seeking. Each of the above examples enhances students’ experiences at LPC.

Faculty and staff have many of the same expectations as students and have been, for the most part, satisfied with the technology and its services. Of course, for all of the campus constituents, there is more work to be done as both technology and institutional needs evolve. For instance, there is a need for online tutoring, as well as needs for curriculum and document management systems. This project is noted in the 2006 substantive change report.

According to the college’s faculty and staff, the use of technology on the campus has been very effective. Ninety-five percent agreed or strongly agreed that technology resources are used to support student learning programs and services and to improve institutional effectiveness. Based on the increase in number of course sections using Blackboard, that high figure is supported. In the 2003-04 academic year, there were 168 sections using Blackboard and serving 4,426 enrollments. During 2007-08, those numbers rose to 706 sections and 18,958 enrollments. Anecdotally, many instructors have noted that the use of technology has improved learning.

PLANNING AGENDA

1. Evaluate the need for increased staffing in the college information technology area to accommodate college growth.

3C1b The institution provides quality training in the effective application of its information technology to students and personnel.

Faculty and staff training takes place mainly in the Innovation Center, a 1,879-square-foot facility that opened in June 2007. The Innovation Center staff trains faculty on a variety of instructional technology topics, such as designing online courses, designing hybrid courses, and integrating technology into the curriculum. Much of the training centers around Blackboard, but it also includes tools for developing multimedia instructional content that can be delivered online, via CD/DVD, or on portable media players. Training is also available online for those who can’t, or don’t want to, come to campus. Each training session incorporates techniques for making online materials accessible to students with disabilities.

566 Innovation Center
Expert trainers also use the Innovation Center to train on more specialized topics, such as writing SLOs and entering those outcomes into eLumen, the college’s online SLO management system.

Adjacent to the Innovation Center is the Training Room. This room, which doubles as a classroom, is used for training faculty and staff on administrative software and tasks, such as online grading or using SCT Banner. Training on equipment in all classrooms is provided by the Instructional Systems staff. Furthermore, training is provided in the user’s office via a service called Help Desk at Your Desk. This service, funded and sponsored by Staff Development, sends a qualified trainer to whomever requests help with Microsoft Office applications, email, and general computer techniques.

Staff Development, which also funds faculty and staff to attend off-campus trainings and conferences, periodically disseminates surveys to determine training needs. The Innovation Center does the same. Moreover, for those faculty who want to use instructional technologies to support students online, the Distance Education Committee also identifies and discusses training for these. In fact, training for these technologies, which ultimately benefit distance education and on-campus students alike, is included in the recently approved Distance Education Strategic Plan.

Faculty and staff who undergo training are periodically surveyed to attain their level of satisfaction and to determine what training can be added and improved. Survey results are generally positive. For example, 91 percent of respondents who attended Innovation Center workshops indicated in the spring 2008 Innovation Center survey that the workshop met their needs. Also, 85 percent of the participants in the Online Course Development Program answered “excellent” when asked to rate the quality of instruction in the OCDP. Survey results are used to improve training and services.

For students who need technology training for their classes, training is typically provided by either their instructors or by instructional assistants. For student training outside of class, training is available in the Disability Resource Center’s technology lab, the Computer Center, the Library, and the Math Lab.

For distance education students, training on how to use the popular tools in Blackboard is provided both face-to-face and online. The Innovation Center staff conducts three on-campus online learning orientations near the beginning of each semester. That same orientation is provided online. A DE outcomes survey is administered to students to assess, among other things, their Blackboard technical skills. According to results of the fall 2007

576 Online learning orientation
DE outcomes survey, the vast majority of students considered themselves expert or proficient using Blackboard. Results of the DE outcomes survey are analyzed by the Distance Education Committee to determine if additional student training is necessary.

SELF EVALUATION

The college meets this standard. LPC has taken proactive steps to use technology to better the lives for students, faculty, and staff. For the student, technology training has enabled greater access to resources, learning, training, interaction with faculty, interaction with other students, as well as making the college accessible to anyone who has computer and internet access. For faculty, technology training has allowed the instructor to be more effective, creative, productive, and responsive in dealing with students and staff, both inside and outside the classroom. For administration and staff, technology training has provided better access to information and resources needed to make productive, timely, and correct decisions and use of college assets and funds, in an effort to provide the best student experience.

PLANNING AGENDA

None.

3C1c The institution systematically plans, acquires, maintains, and upgrades or replaces technology infrastructure and equipment to meet institutional needs.

The District Information Technology Services (ITS) staff and the college computer support staff collaboratively provide support for the management, maintenance, and operation of the technological infrastructure and equipment. Services provided include instructional computing, administrative computing, system design and applications programming, network infrastructure (WAN and LAN), desktop support, Web development and support (Internet and Intranet), hardware and software support, centralized Help Desk, and user training. District ITS provides the system planning, development, operational control, monitoring, and security of services offered via the district’s network infrastructure. With regard to maintaining equipment, the district and the LPC Technology Department establish vendor maintenance agreements or warranty terms to ensure service levels are sustained for all standard hardware and software.

577 DE outcomes survey
578 CLPCCD ITMP detailed specifications
579 ITS Projects Strategic Plan
District-wide standards have been established for hardware and software utilized at all locations. These standards apply to desktops, laptops, tablets, printers, servers, network server software, including operating systems, utilities, management software, and office automation applications. The district ITS network has standardized on Cisco routing and switching products for the core and heavy duty WAN/LAN connectivity. District ITS also developed a set of cabling infrastructure standards that will encompass copper and fiber connectivity for voice and data systems inside and between all buildings at all campuses. Configuration standards for all equipment are reviewed on an annual basis by the technology staff and technology committees at each location and these standards are updated to conform to new campus requirements or new technology features.

Collaboration between the district and college ITS technology groups occurs to ensure consistency of standards and procedures and to establish strategies for new technology initiatives and new standards where appropriate. The various committees include the District Technology Committee, the College Technology Committees, and the College Distance Education Committee.

The district disaster recovery methods are reliant on power continuity through UPS protection and data restoration from backup media. Among the major projects funded by the current bond, UPSs are being replaced and upgraded as needed, and generators will be installed at the key servers and data equipment locations.

All data on district and college servers are backed up to tapes using industry best practice procedures. A multi-level backup strategy has been developed. This includes disk-to-secondary disk backup of the production data, secondary disk-to-tape backup to high capacity tape drives, and tape drive rotation and offsite storage. The tapes are rotated in a daily/weekly/monthly/yearly algorithm with a selection of tapes stored in a fireproof vault in a separate location from the servers. New tape backup equipment has been installed to consolidate server backups where appropriate. All data on the Blackboard server, which is hosted by Blackboard, are backed up daily and kept on-site, as well as off-site. Each week, the backups are transferred to tapes.

**SELF EVALUATION**

The college meets this standard. Results of the 2007 Staff Self-study Survey confirm that the institution’s technology needs are consistently met.

580 Technology Master Plan
581 CLPCCD Cabling Standards
582 CLPCCD ITMP 2006 Update

584 Strategic Plan - ITS Updates Only 8/3/07
585 ITS Audit Update, 7/18/08
586 Blackboard Security Policy
587 Blackboard Security Overview
PLANNING AGENDA

None.

3C1d The distribution and utilization of technology resources support the development, maintenance, and enhancement of its programs and services.

In conjunction with the college facilities master plan, the district developed a 5-year “Information Technology Master Plan (ITMP)” for all technology installations and upgrades performed under the bond measure.\(^{588}\) This improvement plan for both colleges in the district contains new construction projects or facility renovations that require technology improvements in the data network and computer equipment. The new technology improvements include technology changes related to the facility structure such as fiber optic wiring and conduit between buildings required for the district networking infrastructure. These improvements also include classroom equipment, network devices, communication equipment to support data, video, or voice, and all technology advancements that support the instructional environment.

In addition to the bond plan for technology, a district strategic plan was adopted to identify new automation projects and process improvements for all the district services to the colleges.\(^{589}\) This district strategic plan addresses the Banner Enterprise system priorities and third party application systems as well as the bond improvements for Information Technology Services. The Chancellor’s Cabinet as well as the Banner user groups and technology committees at all locations evaluate the future projects for technology improvements to establish priorities and target dates for completion. As a complement to the district-wide technology plans, the College Technology Committees created a college technology plan specific to their instructional needs on campus.\(^{590}\) At LPC, the Distance Education Committee recently approved a Distance Education Strategic Plan.\(^{591}\)

Review of the progress for the major technology projects is performed on a regular basis by the appropriate district and college governance groups. For Banner Enterprise Projects, the Banner User Committee reviews project progress and status on a monthly basis, Chancellor Cabinet reviews are done periodically based on project progress, and annual Board of Trustees presentations are done on project accomplishments and future planned projects.\(^{592}\) For network infrastructure related to the bond measure, the activities are monitored through the College Facilities Committees and College Technology Committees with periodic updates to the Chancellor’s Bond Steering Committee and the Board of Trustees.\(^{593,594,595}\)

---

\(^{588}\) CLPCCD ITMP detailed specifications
\(^{589}\) CLPCCD Systems Strategic Plan
\(^{590}\) Technology Master Plan
\(^{591}\) DE Strategic Plan
\(^{592}\) Banner Projects Strategic Plan
\(^{593}\) Board ITS Bond Update 9/30/06
\(^{594}\) ITS Update for Bond Oversight Committee 7/25/07
\(^{595}\) ITS Update Charts for Bond Oversight Committee 6/30/08
The district ITS and college computer support departments are responsible for maintaining security and access to administrative and instructional servers at all sites. Security includes network accessibility and physical security. The servers are located in a locked room only accessible to appropriate technical staff and controlled with Sonitrol alarms after hours in the highly restricted areas. Like the servers, the core network equipment is installed in locked areas with restricted access. Under the bond improvements, the security master plan has identified information technology and telecomm rooms as secure locations that require separate card-key access. Blackboard provides all aspects of security for the district’s hosted Blackboard server.

The district uses antivirus protection on each desktop to limit the possibility of virus attack. For network monitoring and intrusion detection, Firewall PIX resides at each location with redundant firewalls to enable a fail over configuration. Logs of all connections and activity are stored on special logging servers and all server usage is monitored and logged on a daily basis. Outside Internet access to internal servers is controlled, monitored, and logged using firewalls. New Cisco switches and routers have been installed at all locations to provide improved performance, stability, advanced software capabilities, and new security features.

Disaster recovery methods are in place at all district and college locations. There is a UPS system for the critical applications. As part of the bond projects, a larger scale UPS and also a generator will be installed to support the District Data Center operations and other remote data centers for the college instructional servers.

District ITS and college computer support staff established a model to assess desktop equipment for replacement or upgrade and formulate a periodic rotation cycle. The District ITS and the college computer support staff adopted the Total Cost of Ownership (TCO) model promoted by the California Community College State Chancellor’s office. This includes PC and server hardware and software baselines standards, direct costs models, and procedures for lifecycles and periodic rotation. As part of the process to set up the TCO model, standards and procedures for the acquisition and replacement of computer hardware and software were established at various levels for vendor, platforms, and applications to maintain ITS best practices. These standards and procedures are district-wide and are evaluated on an annual basis so updates can be made as new technology is introduced.

The planned cycle for equipment replacement and upgrades will vary by category of equipment. Computers will be maintained on a four-year cycle so that each year one-fourth of the college’s PCs will be replaced. Hardware and software inventory is maintained at all locations to ensure the rotation cycle is achieved. Other external devices such as printers have a longer useful life and will be recycled on a five-year plan. Administrative and instructional servers are maintained on a five-year cycle or as significant technology advances.

596 Security Master Plan (available upon request)
597 Blackboard Security Policy
598 CLPCCD ITMP detailed specifications
599 ITS Audit Update, 7/18/08

STANDARD THREE
develop. Based on new requirements or technology advances, equipment in specific areas may be updated sooner if necessary to satisfy instructional needs.\textsuperscript{600}

The bond measure will give us an opportunity to replace or upgrade the entire campus infrastructure to achieve a state-of-the-art topology. The technology improvements will include a new fiber optic cable plant with sufficient strands of both multi-mode and single-mode fiber from the computer data center to each of the college buildings. As part of the bond initiatives, there are major changes to the network infrastructure that are planned over the next several years to accommodate the increased usage of technology throughout the campuses.\textsuperscript{601}

The network switching infrastructure has undergone a complete equipment reconfiguration and upgrade. The new network architecture design focuses on security, high availability, upgraded fiber backbone building connectivity, redundant server connectivity, transparent Internet rerouting, extensive support of advance switching features, and manageability. In addition, all campus servers will be replaced with the latest hardware technology to maximize processor capacity and speed to support the college computer needs. Redundancy of servers will be a requirement for all critical applications to guarantee system operation.\textsuperscript{602, 603, 604}

The district ITS established a Network Cabling Infrastructure Standard, which clearly details the cabling design, materials, spaces, and workmanship required during the design and installation of new and renovated buildings.\textsuperscript{605, 606} The cabling infrastructure installed at all sites provides sufficient data bandwidth and connectivity as needed by the particular building and room, allows the incorporation of other TCP/IP-based signaling and monitoring systems, incorporates the addition of new IP technologies such as VOIP and video, and enables efficient support through standardized appearance, testing, and acceptance criteria.

In spring 2002, the Chabot-Las Positas Community College District convened a district-wide committee consisting of faculty, staff, and administrators from LPC and its sister college, Chabot College, to choose a course-management system to be used for classes at both colleges.\textsuperscript{607, 608} Prior to making a decision, the committee was tasked to assess the products the colleges were using (LPC was using WebCT, Chabot was using Blackboard), the benefits and possible weaknesses of each, features and functions of the products, and costs to the district. The Blackboard Application Service Provider option, which allows the vendor to house the hardware and software, as well as provide the 24x7 service support, was the preferred option of the committee. Therefore, Blackboard was recommended to the chancellor and presidents of both colleges in July 2003. Since beginning Blackboard usage in the 2003-04 academic year, the number of course sections using Blackboard and the number of Blackboard enrollments...
have risen from 168 to 706 sections and from 4,426 to 18,958 enrollments, respectively, during 2007-08.609

SELF EVALUATION

The college meets this standard. Results of the 2007 Staff Self-study Survey confirm that the utilization of technology resources support the development, maintenance, and enhancement of its programs and services. Responses to questions presented on the Staff Self-study Survey received a 4.24 rating. Overall, 95 percent of the staff and faculty agreed or strongly agreed that the district and college technology departments are addressing and meeting these needs.

PLANNING AGENDA

1. Research and initiate disaster preparedness and recovery procedures.

3C2 Technology planning is integrated with institutional planning. The institution systematically assesses the effective use of technology resources and uses the results of evaluation as the basis for improvement.

Technology is integrated with Las Positas College’s institutional planning. LPC technology is requested and identified from several sources including the educational master plan, program review reports, Technology Committee meetings and discussions, Distance Education Committee meetings and discussions, and divisional requests.

The LPC Technology Department has a Technology/Equipment Lifecycle Plan that is posted on the LPC Intranet.610 The Lifecycle Plan contains a prioritization list for determining what equipment to buy or replace and when to do it.

The LPC Technology Department also meets on a biannual basis with discipline groups to discuss and decide software and hardware upgrades. These biannual meetings are currently based on meetings with groups that have identified formal coordinator positions (or deans). Disciplines without formal coordinators (or deans) must make special arrangements to be included in the biannual meetings.

Las Positas College has the following standing committees and areas that discuss, assess, and evaluate technological needs: Technology Committee, Distance Education Committee, Planning and Budget Committee, division meetings, Technology Meetings conducted by the head of LPC Technology with individual programs as needed, program review reports by discipline

609 Distance Education and Blackboard Statistics
610 Technology lifecycle plan
and department that include assessment and identification of technology needs and concerns, and the educational master plan. Both the student and staff institutional surveys address the issue of technology on the college campus and allow the responders to submit their personal opinions of LPC’s progress and status technologically.\footnote{Fall 2007 student survey, Fall 2007 staff survey}

### SELF EVALUATION

The college meets this standard. On the fall 2007 staff survey, 90 percent of employees agreed or strongly agreed with the statement, “Technology planning is integrated with institutional planning.” Las Positas College gives appropriate attention and recognition to the issue of technological equipment and functionality.

### PLANNING AGENDA

None.

### 3D Financial resources are sufficient to support student learning programs and services and to improve institutional effectiveness. The distribution of resources supports the development, maintenance, and enhancement of programs and services. The institution plans and manages its financial affairs with integrity and in a manner that ensures financial stability. The level of financial resources provides a reasonable expectation of both short-term and long-term financial solvency. Financial resources planning is integrated with institutional planning.

Las Positas College is part of the Chabot-Las Positas Community College District (CLPCCD) which also includes Chabot College and the CLPCC District Office. The budget for fiscal year 2007 – 2008 was $104.3 M. The majority of the budget was allocated to the two colleges based upon the number of full-time equivalent students (FTES) to be served. The balance is held at the district level to fund maintenance and operations, as well as various district services.\footnote{2005-06 Adoption Budget, 2008-09 Adoption Budget}

Based upon FTES, Las Positas College was allocated $30.1M for the fiscal year. The college has autonomy and discretion over the use of those funds. Over 90 percent of the funds are for salary and benefits, with the balance used for supplies and campus services. In addition, by law, the district is required to maintain a minimum five percent reserve. Due to a strong fiscal posture, the reserve for the CLPCCD has been maintained at a much higher level and is therefore available to offset funding shortfalls and provide for education programs. Given the above, LPC does have sufficient revenues to maintain stability and to support education improvements.\footnote{2005-06 Adoption Budget, 2008-09 Adoption Budget}
Through a shared governance budget planning process, priorities are set for funding institutional improvements. The Las Positas College Educational Master Plan, 2005 – 2015 provides the strategic direction for the college.\[617\] The College Enrollment Management Committee works with the various disciplines at the college to allocate resources for instruction in the form of Full Time Equivalent Faculty (FTEF).\[618\]

**SELF EVALUATION**

The college meets this standard. The educational master plan sets the strategic directions, and the college uses a shared governance process to identify focus areas. All budgetary decisions are made in the best interest of the students and community. Funds are allocated from the district, with sufficient reserves available to meet unexpected contingencies.

**PLANNING AGENDA**

1. Establish a transparent process, with documentation, regarding the college’s internal technological prioritizations, purchases and requests.

3D1a Financial planning is integrated with and supports all institutional planning.

The district’s and the college’s mission statements, which define institutional goals, provide direction for all district and college fiscal planning processes.

The district’s mission statement states: “The fundamental mission of the Chabot-Las Positas College District is to provide the leadership and resources to ensure that all students within the district will continue to have an equal opportunity to pursue and achieve their educational goals.”\[619\] The district’s financial plans, developed by the district’s Business Services Office and guided by board policies and priorities, reflect this mission. The fiscal planning process, which utilizes a revenue allocation model, informs the district’s budget guidelines.

Las Positas College’s mission statement states: “The Mission of Las Positas College is to foster growth and success, both in its students and in its community. The college strives to fulfill this Mission by offering high-quality, comprehensive educational programs and services.”\[620\] The Las Positas College Educational Master Plan outlines the implementation of the college’s goals and provides a “roadmap to the future: the future of [its] students, [its] community, and the College itself.”\[621\] The educational master plan is augmented by the facilities master plan and the technology master plan.\[622, 623\]

617 Educational Master Plan
618 CEMC website
619 District Mission Statement
620 LPC Mission Statement
621 Educational Master Plan
622 Facilities Master Plan
623 Technology Master Plan
These “living documents” are periodically updated to reflect an ongoing process of program review. The fiscal planning process, conducted by the college’s Office of the Vice President of Administrative Services, along with deans’ offices and the Planning and Budget Committee, informs the college’s budget guidelines.

SELF EVALUATION

The college meets this standard. The educational master plan, which is the central planning document for the college, includes specific financial planning in some areas, such as technology, and resource allocation is implied by stated program goals. However, college goals themselves do not incorporate explicit financial planning.

PLANNING AGENDA

1. Evaluate the current program review processes of the college to ensure that goals and plans are completely and clearly linked to budgetary needs and planning.

3D1b Institutional planning reflects realistic assessment of financial resource availability, development of financial resources, partnerships, and expenditure requirements.

Budgetary resources to the college are allocated through a district-wide allocation model, the fundamental driver of which is enrollment. Enrollment decisions are made through recommendations by the District Enrollment Management Committee whose principal charge, among others, is to recommend to the chancellor FTES and FTEF allocations to both colleges.624 As enrollment drivers are established, a corresponding relationship to funding allocations is determined to meet stated targets. This allocation is in the form of dollars as well as number of new FTEF to both colleges. The distribution of new FTEF between the two colleges is determined in discussions between the chancellor and the presidents.

The district’s allocation model distributes funds based on this FTES and FTEF ratio with allocations for faculty salaries and benefits being made “off the top” and remaining funds distributed by percentages to the four district entities: Chabot College, Las Positas College, district staffing, and Maintenance and Operations. The percentage between the two colleges is adjusted to reflect the ratio between the two college’s enrollments, while the percentage the district and maintenance receives has been the same for several years.625

Over the last five years, Las Positas College has seen growth in the number of FTES from 5,707 in 2003-04 to 7,001 in 2007-08, an increase of 22.7 percent

624 DEMC website
625 Revenue Allocation model
over the period. The allocation of FTEF in 2007-08 was 436.8, an increase of 32 percent over the same five years. Similarly, the total resources for the college have increased during this same five year period. Total restricted and unrestricted dollar expenditures in 2003-04 were $22,082,341 and $31,403,335 in 2007-08, an increase of 42.2 percent.

The development of the campus budget is dependent upon the amount made available by the district. As early as the Governor’s Budget in January, information is shared with the colleges regarding other budget factors influencing the campus budget including categorical fund proposals, cost of living adjustments (COLA), health and welfare costs, utility cost assumptions, etc. During the legislative process, information regarding the budget is shared district wide and by state-wide advocacy groups. Analysis of availability of resources compared to expenditure requirements is performed by the college administrative services office. The conclusions of these analyses determine the amount available for allocation.

The campus budget process for several years has been a baseline (incremental) budgetary approach. The vice presidents’ and the president’s office are allocated essentially the same amount as the prior year with adjustments as provided through a campus budget process. These adjustments come in the form of new faculty positions, new classified positions, and equipment allocations. Operating budgets other than these categories have received adjustment only through special agreements with the president; supplies and services budgets have not been a part of the formal budget review process by our planning and budget committee.

The Planning and Budget Committee (PBC) formulates a budget calendar at the beginning of each academic year. The various resource request processes are outlined at that time. This past year, the calendar was modified somewhat in an attempt to respond to the schedules of the end users, particularly in the academic areas. The committee recommended implementing a process for responding to instructional equipment needs two times per year (fall and spring), rather than once a year in the spring. Modification of the evaluative guidelines for consideration by the committee is underway. In addition, the PBC prioritizes new faculty positions (based on the number generated within the district as was mentioned in a preceding paragraph) and new classified position needs at the campus.

The proposals for all new resource needs (new positions and equipment) are linked to planning. Specific links to the educational master planning document are fundamental to the budget process. And this year, the PBC is modifying its process to ensure that all resource allocation requests considered by the committee must have a specific linkage to an academic or student service program review.

New programs and innovative projects are funded by the campus using its budget allocation made through the allocation model. Most of the new

626 PBC minutes 09-06-07
627 Planning & Budget committee
resources made available to the district are generated by enrollment and compensation factors (FTES and COLA) and, therefore, the new monies distributed to the college are allocated to related expense lines. Because of this funding methodology, total compensation ratios of expenditure over the last five years have increased as dollars have been allocated almost exclusively to salary and wage line items.628, 629

To illustrate this point, in 2003-04, combined unrestricted expenses for the categories of academic salaries, classified salaries and employee benefits totaled $17,576,814 and total expenditures including supplies, services and other operating expenses were $19,331,520. In 2007-08, unaudited actuals (as of September 10, 2008) for the salary and benefit line items are $25,957,330 compared to total expenses in the unrestricted funds of $27,616,782. During this period, salary and wage expenditures have increased $8,380,516 while total unrestricted expenditures have increased only $8,285,262. The ratio between salary and wage categories to total expenditures in 2003-04 was 90.92%. In 2007-08, this same ratio is 93.99%. The college has fewer discretionary supplies and services funds available for new and innovative programs and emergencies.630, 631

SELF EVALUATION

The college meets this standard. Historically, the college has met this standard while maintaining a healthy ending balance in addition to the district reserve, which has allowed the campus to engage in innovative and creative ways of addressing growth. In 2006-07, however, the campus reserve was exhausted in efforts the college made to help meet district growth numbers. And, therefore, the college now has faced two successive years of budgetary expenses exceeding the amount allocated to it via the district allocation model. This, in concert with the growing ratio of expenses between salaries and wages and total expenses, suggests that the current district allocation methodology needs to be evaluated. Funds to the district are limited by the amount available statewide, and it is likely the case that revenue will never be sufficient to meet demand; therefore, an analysis of revenue, allocations to the colleges and district, potential revenue sources, and current and projected expenses need to be quantified and justified. A multiple-year revenue and expense model that compares plans and projected income district wide will contribute to meeting this standard.

PLANNING AGENDA

None.

628 2005-06 Adoption Budget
629 2008-09 Adoption Budget
630 2005-06 Adoption Budget
631 2008-09 Adoption Budget
3D1c When making short-range financial plans, the institution considers its long-range financial priorities to assure financial stability. The institution clearly identifies and plans for payment of liabilities and future obligations.

The campus educational master plan outlines the institutional priorities for the college through 2015. The educational master plan includes staffing requirements as well as facility needs including instructional equipment. The program review process further delineates the various programmatic needs of the college within the academic and student services areas.

Funding requests for new positions, replacement position, equipment purchases, and facility development require justification and a demonstrable relationship to these planning documents. Forms have been developed for each of the campus financial processes and an important component of the narrative involves justifying how funding would link to specific goals spelled out in the educational master plan.

The shared governance committee structure, divisional meetings, town meetings, etc. provide necessary channels of communication for short and long-term planning. The linkage between plans and resource allocations is present; the college is always examining ways of improving the connection. Spatial and equipment needs are identified when campus position requests are reviewed. Grant requests similarly are expected to identify immediate and long term resource needs of the college including office space, equipment and maintenance.

The Foundation has established a similar linkage in its funding request process. Work has been done to coordinate the timing of requests from multiple institutional sources, for example, processes through the Planning and Budget Committee, the Bookstore Committee, and from the Foundation. Campus-wide dissemination of timelines, procedures, and review schedules are made via email and placed on the intranet.

The local bond measure has provided some relief to the general operating budget of the college in the short term to certain resource requirements including library books and instructional equipment. These are among several operational needs that are currently funded by the bond. In addition, as a result of the bond and the much needed and anticipated classroom, lab, office, and student space being constructed on campus, there will be additional staffing, maintenance, and operational needs of the college that will require future general fund resources. These funding issues will require significant planning and perhaps some modification of the current district allocation model.

632 2006-07 Adoption Budget
633 2007-08 Adoption Budget
634 Educational Master Plan
635 Program Review Process 2006-2010
636 Planning & Budget committee
637 10-03-2007 Town meeting
638 Foundation grants
Most long term human resource, payroll, and insurance issues are administered at the district level. The district adheres to generally accepted accounting practices related to its liabilities and recently is in the process of addressing OPEB liabilities outlined in GASB 45 and historically has maintained a five percent general reserve.  

**SELF EVALUATION**

The college meets this standard. The college has sufficient planning processes in place that are linked to resource allocations. The district allocation model in its current form needs review to determine whether it fully accommodates the resource needs of the college through the coming years.

**PLANNING AGENDA**

None.

**3D1d** The institution clearly defines and follows its guidelines and processes for financial planning and budget development, with all constituencies having appropriate opportunities to participate in the development of institutional plans and budgets.

The guidelines utilized by the college provide constituents with multiple opportunities to participate in budget planning and development. These opportunities include identifying funds related to new faculty positions, new classified hires, and instructional equipment needs outlined in the program reviews and included in the educational master plan.\(^{640, 641}\)

In addition to processes established for requesting new faculty and staff positions and instructional equipment, the Foundation and Bookstore grant opportunities also provide significant avenues from which faculty, staff, and students can submit requests for funding. Committees on which faculty, staff, and students serve can also make recommendations to the president regarding resource allocations.\(^{642}\) The academic service division has developed a process for faculty to submit proposals for funds identified within the divisional baseline allocation, and in addition, staff development opportunities are available through a process well-communicated to the campus. Grant proposals are currently developed and submitted by faculty, though a need exists to centralize the process of grant development and reporting.\(^{643}\)

The processes followed by the campus are outlined in the shared governance section of the educational master plan, and wide dissemination of the request process and timelines is made to the college via multiple sources, including the intranet web pages, email announcements, divisional meetings, and town meetings.\(^{644}\)

640 Program Review  
641 Educational Master Plan  
642 Business Services  
643 Foundation grants  
644 Educational Master Plan
For several years, the Planning and Budget Committee has established a budget calendar regarding these processes, which is articulated via similar communication paths as mentioned above. In addition, each year at its initial meeting the Committee reviews and modifies as needed the budget calendar to meet the institution’s changing needs. The college is continuing work on coordinating each and all of the resource allocation processes and time lines and making this information clear to faculty, staff, and students.

SELF EVALUATION

The college meets this standard. Constituencies have sufficient opportunities to participate in the development of institutional plans and budgets and communication of processes and timelines are sufficient.

PLANNING AGENDA

1. Ensure that timelines and processes for resource opportunities are consolidated and posted in a central area so all faculty, staff, and students are adequately informed.

3D2a Financial documents, including the budget and independent audit, reflect appropriate allocation and use of financial resources to support student learning programs and services. Institutional responses to external audit findings are comprehensive, timely, and communicated appropriately.

Las Positas College’s planning processes integrates all college constituencies and planning documents. The updatable educational master plan guides all planning, and the Planning and Budget Committee coordinates institutional decision making and aligns priorities to the college’s mission.

The educational master plan, which articulates the short term and long term goals and objectives of the college, was designed to incorporate program review, student learning outcomes, and the assumptions under which the college develops its annual budget, staffing plans, and allocation of all resources. Las Positas College, in recognition that it is a member of a two-college district and a participant in a district-wide collaborative planning and financial management process, also responds to district and statewide financial oversight while maintaining institutional management integrity.

As a member of the community college system, the Las Positas College adheres to reporting guidelines, the State and Federal Education Codes, and participates in the district’s annual audit. The Board of Trustees awards a
contract to an independent auditor, and the district complies with completion of the audit by the end of the calendar year, December 31, following the completion of the fiscal year, on June 30. The most recent audits of the Chabot-Las Positas Community College District have been unqualified, which means that the findings have been deemed appropriate and complete. The district offices and staff collate the report from both colleges and the district to provide the audit information, and they also incorporate the financial information from the Measure B audit. Results of the audit and financial information are provided through the Board of Trustees and administrative processes. The college utilizes the Board of Trustees and district processes to align its financial procedures and practices with the educational master plan, student learning outcomes, and college governance.650

SELF EVALUATION

The college meets this standard. As described above, the educational master plan, as a cohesive and comprehensive guide to the institutional planning process, provides the means and methodology for review and assessment of the financial resources needed to support the college’s goals and objectives vis-à-vis student learning outcomes and program review.

PLANNING AGENDA

None.

3D2b Appropriate financial information is provided throughout the institution.

The district and colleges use the Banner system, and, through the increasing use of this technology and other integrated applications, provide more real-time college input and district feedback than was previously possible. Financial information is increasingly available through the district websites in an effort to provide all information in a timely, easily accessible format. The district website includes pages for Board of Trustees, Human Resources, and Business Services functions among other things, and these are becoming more comprehensive and elaborate, and now, are developing a historical aspect as well. The Office of Business Services is working to expand its informational platforms and to provide links to both local and state reports and services.651, 652, 653

Administrators and budget managers have access to all accounts for which they are responsible. Financial information is available through direct Banner access, as is the ability to print reports. Banner reports are real-time and provide the information necessary for budgetary decision-making.654 While these reports

650 CLPCCD financials
651 CLPCCD Board of Trustees
652 CLPCCD Human Resources
653 CLPCCD Business Services
654 Banner user groups
are real-time and accurate, they are necessarily dependent on timely input of all requisitions, records, and documents. This does limit the ability for managers to access information without the assistance of the college’s budget office. Although it maintains a very small staff, the college is fortunate to have knowledgeable, resourceful, and helpful business service assistance in resolving document trails and history.

The college Planning and Budget Committee is involved in a regular cyclical review of college assets and plans, including prioritizing of funding for college resources including instructional equipment, facilities planning, and staffing levels. This information needed for decision making is gathered by college administrators and operations services, and it is provided in formats that enable decisions to be made in a timely manner.

**SELF EVALUATION**

The college meets the standard. However, the need for increasing transparency and involvement always demand more staff and financial resources be allocated to providing a liaison between the district and the colleges, thus allowing college staff and constituencies to “view” their process from initiation to outcome.

**PLANNING AGENDA**

1. Request increased efforts by district IT to improve user training in Banner software and to provide access to secure areas to more staff with appropriate clearance and accountability.

2. Devote district resources to additional user-friendly financial applications.

3. Increase communication levels between college and district regarding progress reports on changes and enhancements to Banner software.

**3D2c** The institution has sufficient cash flow and reserves to maintain stability, strategies for appropriate risk management, and realistic plans to meet financial emergencies and unforeseen occurrences.

Appropriate oversight of the financial condition of the colleges and the district are maintained by business personnel. Cash management, insurance policies, and investment strategies are all district wide administrative functions, and reserves for economic uncertainties are held at five percent on a district wide basis. In addition to the district’s ending balances, other district funds are available for cash flow purposes. The district’s capital fund, for example, had a cash balance last year of more than $400 million.

---

655 Planning & Budget committee
656 CLPCCD Business Services
Cash balances for the district have remained sufficient even in recent economically difficult times. During the recent budget stalemate in the state, as an example, the district was able to maintain operations and continue monthly payroll for several months into the fiscal year. The district was ready to borrow between funds to ensure that vendor payments were made and payroll administered with the plan to pay back the funds when the State budget was approved. These plans were outlined with full disclosure at Board of Trustees’ meetings.657, 658

District fund balances are reasonable and the ratio between assets and liabilities is prudent. In some instances, vendors have pointed out delays in accounts payables, but this is an operational matter and is not indicative of insufficient cash balances. The district invests funds in accordance with California Government Code and board policies.659

The district office manages the collective bargaining for faculty and classified employee groups. Cost analyses are performed by the district pertaining to negotiated items. The long-term consequences on the college of negotiated bargaining decisions are unclear to the college. A multiple-year budget process might lead to longer term financial planning. Similarly, as decisions made regarding enrollment, staffing, collective bargaining, and risk management will have a financial impact on the colleges, pre-planning and thorough vetting of ideas is critical.

At Las Positas College, until recently, the institution maintained an ending balance in addition to the district-wide reserve that allowed sufficient flexibility in planning for exigencies; however, in the last two years the college has met operational needs without a budgeted reserve and has exceeded its annual discretionary revenue allocation. Because 94 percent of the operational budget is used for salaries and wages, the remaining dollars are used for supplies and services, and few are left unallocated for unforeseen needs. District fund balances could be allocated up front to meet these college issues.660, 661

**SELF EVALUATION**

The college partially meets this standard. The district office retains fund balances sufficient to meet prudent cash flow levels. Risk management is a district-wide function and insurance, and other contractual safeguards are handled by that office and annual audit reports identify anomalies to business practices. And, although the college did have its own budgeted reserve until recently, the district does continue to comply with the state guidelines for budgeted financial reserves. There has not been a cash management concern.

---

657 08-19-08 Board of Trustees agenda
658 09-02-08 Board of Trustees agenda
659 Business Services
660 2005-06 Adoption Budget
661 2008-09 Adoption Budget
PLANNING AGENDA

1. Ensure that a prudent reserve is established at the college for contingencies and emergencies, and communication between the district and the college should include planning for these contingency funds.

2. Evaluate the district approach to collective bargaining to ensure that business office personnel are included in costing out the short term and long term consequences of negotiated issues.

3D2d The institution practices effective oversight of finances, including management of financial aid, grants, externally funded programs, contractual relationships, auxiliary organizations or foundations, and institutional investments and assets.

The district and the college perform many financial functions that provide appropriate fiscal integrity, ensure compliance with generally accepted accounting principles, and maintain appropriate oversight of fiscal operations and business practices. Key to the financial management system is the Banner administrative software, which as implemented includes human resources, finance, and student/financial aid systems. The Banner administrative software is managed by the district information technology staff, and upgrades are installed annually or as needed. User training is available by request.

Adequate checks and balances exist between college and district business operations regarding hiring, payroll, accounting entries, purchasing, and accounts payable to ensure that prudent business practices are in place. Audit reports are conducted on an annual basis to confirm that these business practices are performed within state, chancellor’s office, and district policies. Audit exceptions are referred to the colleges and the district for timely action, and are reported to the Board of Trustees as information.

All externally funded programs including categorical programs, financial aid, and grants require end of the year financial and programmatic reports that are prepared by the college, reviewed by the campus business office, and signed by the district Vice Chancellor of Business Services.

The Board of Trustees takes action on all contracts, grant acceptances, payroll warrants, and personnel hires. In addition, the board approves all facilities contracts and awards pertaining to the Measure B bond. Campus and district oversight and administration of procurement and contracts are sound. In addition to campus and district administration of Measure B funds, the Citizens Oversight Committee provides additional review and assurances to the expenditure of public funds.

---

662 Banner user groups
663 CLPCCD Training
664 Business Services
665 2008 Matriculation Categorical Site Visit
The district office processes payments for payroll, financial aid, and vendor payments with processing and approvals being performed at college. Requests for payments, purchases, hires, contracts, and grants are analyzed, reviewed, and approved by the college at multiple organizational levels including deans, vice presidents, and the president. Requests for payments by student organizations are submitted through prescribed procedures and reviewed within the student services division and payments prepared by the college business office.666

College investments are administered by the district office. The College Foundation maintains its own checking and investment accounts. Payments for grants and other awards are administered by that office, which has its own bookkeeper and accounting system. The Foundation reports via the president to a separate board that has a finance committee, which regularly reviews financial statements, investment policies, and cash flow.667

Financial aid awards are administered by the college with the financial aid office performing qualification assessments and processing of paperwork including requests for awards. Checks are prepared by the district office; however, recently the college and district implemented a debit card system that will help expedite financial aid payments to students and minimize the amount of checks.668

SELF EVALUATION

The college meets this standard. The institution practices effective financial management and oversight of the broad business and financial functions of the institution.

PLANNING AGENDA

None.

3D2e All financial resources, including those from auxiliary activities, fund raising efforts, and grants are used with integrity in a manner consistent with the mission and goals of the institution.

All funds of the college are used in ways consistent with the institution’s mission and goals. General funds are expended consistent with the educational master plan and new funding requests need specific relationships outlined in the master plan document and program reviews.669, 670, 671 Similarly, funds generated by cafeteria sales, bookstore income, associated students, and the LPC Foundation are also used to support goals and objectives outlined in the educational master plan.
Revenue in the cafeteria fund at Las Positas College is derived from a percentage of sales. The college contracts with Elite Catering to do its food service for the cafeteria and event catering and these funds are deposited in the Cafeteria Fund. The cafeteria, vending, and catering services of the college provide an important component of the institutional mission related to campus life.672

The campus contracts with Follett Corporation for its bookstore services; revenue to the college is based on a percentage of sales volume. Recently, a request for proposal process concluded with awarding Follett Corporation as continued provider for bookstore services. The funds remitted by Follett are used to support ancillary services of the college. The request process is referred to at the college as “Bookstore Funds” requests, although they are treated as co-curricular. Annually the Bookstore Committee of the campus conducts a proposal process with specific guidelines regarding the funding of Bookstore grants.673

These guidelines refer to 1) activities necessary to support courses offered within the college curriculum; 2) activities not directly related with courses and scheduled classes, but enhance and complement the total college experience for students; or 3) activities that provide services related to the general welfare of the total student body and are available to any registered student under given circumstances. The Bookstore Committee reviews the proposals, interviews requesting individuals as needed, and awards Bookstore Funds within the amount available for the coming fiscal year. A listing of Bookstore Funds awards for last year is on the campus intranet.674

The Associated Students of Las Positas College (ASLPC) is the campus student government, providing opportunities for students to participate in the governance of the college on both local and state wide levels.675 Through ASLPC special services are provided for students, which include social and cultural events, information on clubs and community services, and many other services to students. A student representation fee of $1.00 per semester is assessed each student in support of these various activities and services, and an optional associated students activities fee of $5.00 per semester is charged for support of college clubs, scholarships, and student-related services.676

The mission of the Las Positas College Foundation is to foster growth and success – both in its students and in the communities it serves.677 The college strives to fulfill this mission by offering comprehensive educational programs and services and through community partnerships that enhance the vitality of the region.

The Las Positas College Foundation is an independent 501(C)3 entity that supports the mission of the college and advances its vision for the future through active resource development. The Foundation is governed

672 2008-09 Adoption Budget
673 Bookstore forms
674 Bookstore committee
675 ASLPC website
676 Business Services - ASB
677 LPC Foundation
by an 18-member Board of Directors. Its main focus is the funding of student scholarships, supporting vital educational programs and continuing outreach to the community through college sponsored programs.\(^{678}\)

Generous individual and business community support makes possible scholarships, grants, and awards to members of the campus community. This is especially important in this era in which the college can no longer rely on the state to fund many important programs.

Since the LPC Foundation was founded in 2003, it has worked to underwrite activities that impact present and future students, faculty, and staff. In FY 2007-08 alone, over $180,000 in scholarships and grants were awarded.\(^{679}\)

The Foundation’s Board of Directors, and its Grant Request Review Committee, has set forth some broad areas of emphasis that are most likely to receive a positive evaluation.\(^{680}\) These are:

- Programs that have a direct academic benefit to the students of the college;
- Awards that deeply and significantly enrich the student collegiate experience;
- Programs that assist members of “at risk” groups in the campus community to have a more accessible and successful college experience;
- Activities that improve the ability of the faculty and staff to have a greater impact on the student experience;
- Projects that increase community understanding, support and appreciation for the mission and accomplishments of the college;
- Activities for which matching or significant other funding has already been received.

**SELF EVALUATION**

The institution meets this standard. The college utilizes its financial resources, including those from auxiliary and ancillary activities and fundraising, in a way consistent with its mission and goals.

**PLANNING AGENDA**

None.

**3D2f** Contractual agreements with external entities are consistent with the mission and goals of the institution, governed by institutional policies, and contain appropriate provisions to maintain the integrity of the institution.
Contracts are prepared for maintenance agreements, professional services, annual services, facility rentals, and grants. These services assist the college in meeting its objectives. Contracts initiated and prepared by the college must be reviewed by the LPC Vice President for Administrative Services for review and for signature by the Vice Chancellor of Business Services at the district. Without the signature of the Vice Chancellor, the contract is not valid. Board approval is required for contracts and no dollar threshold is established. Purchases and contract policies and procedures adhere to and are compliant with the California Education Code, the Government Code, Public Contracts Code, and Civil Code.

There are dollar thresholds for certain contract and purchasing processes that are established state wide, the amounts of which are routinely adjusted. Currently, purchases exceeding $72,400 for materials, supplies and services sold or leased must be legally advertised, formally bid, and awarded by the Board of Trustees to the lowest responsive bidder. Professional services are exempt from bid requirements and for public works projects the dollar threshold requiring a formal bid process is $125,000.

Assurance of compliance to these contract and purchasing laws is at multiple levels of the organization. Managers are provided necessary information regarding procedures and dollar threshold adjustments; the college administrative services office reviews and approves the forwarding of such agreements to the district office; and the district purchasing manager approves the agreement prior to submission to the Vice Chancellor for signature.

SELF EVALUATION

The institution meets this standard. Procedures and review processes are in place to ensure compliance with State contract and purchasing regulations.

PLANNING AGENDA

None.

3D2g The institution regularly evaluates its financial management processes, and the results of the evaluation are used to improve financial management systems.

Although the college has its Planning and Budget Committee, which regularly meets throughout the year, the Committee’s main role has been to disseminate information about the budget and financial condition of the institution and to make recommendations regarding new allocations for faculty, classified positions, and instructional equipment. The college has continued...
its financial management approach for several years, which is based on incremental budgeting and delegated responsibility of financial accounts to deans and vice presidents.686

The Banner finance and administrative system are available to account managers. Access to financial reports is available to them and training is also available upon request. Paper reports are not routinely printed and distributed as the availability of online access is promoted, particularly in support of the campus’ sustainability efforts. Individual department managers may print financial reports at their need.

Recently, the district made available an enhanced version of the financial management system called Web for Finance. Training has begun to departmental managers on its use, which is perceived to be a more user friendly and functional tool for financial managers.687 The college business office staff has been realigned to make efforts to meet additional training needs of the campus.

At the district level, the Banner Finance users’ group has not met for many years. The district chief information technology officer is in the process of reinstating that task group in an effort to address changing financial needs of the campus. The Banner software provides multiple information formats and data elements that are not currently available to users; and forming the users’ group will provide opportunities for improvement.688

The district budget study group has also not met for many years and in its reformation that group may have as its charge not only providing budgetary development guidelines, but becoming a working group to streamline processes and procedures for business and financial efficiencies at the college. Financial, business, payroll, personnel, and purchasing processes all may be improved with routine and regular review.

SELF EVALUATION

The college partially meets this standard. General financial management practices are sound, but an evaluation process is not in place. Both at the college and district level improvements in this area should be an objective.

PLANNING AGENDA

1. Establish a district task force to outline processes and procedures that could achieve improvements. Process mapping and other evaluative work should be utilized to ensure appropriate review of systems.

2. Work with the district in reinstating the Banner Finance (and other) users’ group to maximize the software system’s capabilities in support of college needs.

3. Develop a financial management training program for budget managers at the college.

686  CLPCCD financials
687  Web for finance
688  District Technology committee
3D3 The institution systematically assesses the effective use of financial resources and uses the results of the evaluation as the basis for improvement.

Assessment of the use of financial resources at Las Positas College, and the use of assessment results to make improvements, occurs in some shared governance processes. The College Enrollment Management Committee, for example, annually allocates instruction resource in the form of FTEF to the college’s programs based largely on enrollment projections to reach an enrollment (FTES) and productivity target. Then, as actual enrollments develop during the year for which allocations were made, any differences between actual and projected enrollments are analyzed for causes, and the conclusions drawn from that analysis will be applied to the allocation process of the following year, with the intention of decreasing the difference between the projected and actual enrollment numbers, thereby increasing the college’s overall efficiency. Similarly, the program review process prompts programs to evaluate the effects of activities that were supported by budget allocation processes, and then to consider future requests according to those activities’ effectiveness at driving progress toward program goals. Separately, independent auditing firms retained by the district and college may make recommendations to the Board of Trustees, which can also result in improvements made to budgetary planning processes.

**SELF EVALUATION**

The college partially meets this standard. While the college assesses its use of financial resources, an inclusive, systematic, and transparent process of assessment and improvement has not yet been fully developed.

**PLANNING AGENDA**

1. Establish an evaluation system or scoring process for measuring and communicating performance at reaching goals, evaluating those goals and the strategies used to reach them, and responding to both shortfalls and surpluses in funding.

STANDARD FOUR: LEADERSHIP AND GOVERNANCE

4A1 Institutional leaders create an environment for empowerment, innovation, and institutional excellence. They encourage staff, faculty, administrators, and students, no matter what their official titles, to take initiative in improving the practices, programs, and services in which they are involved. When ideas for improvement have policy or significant institution-wide implications, systematic participative processes are used to assure effective discussion, planning, and implementation.

Las Positas College is a community of students, staff, faculty, and administrators who strive for excellence in their individual and collective efforts. This emphasis on excellence is seen not only through the mission statement, the values statement, and guiding principles of the institution, but is demonstrated as well in the organizational structure and governance of the college itself. Las Positas College continues to affirm its commitment to student success through excellence in instruction and student support services, through college processes that operate smoothly and purposefully, through creating a climate of equity, diversity, and inclusion among all levels of the organizational structure, through dedication to self-review and the continual program improvement process, through placing student needs at the heart of our shared governance structure, and by abiding by the belief that each one of us makes an astonishing difference.

The institution’s goals and values are articulated within the Las Positas College Educational Master Plan, 2005-2015. Values, guiding principles, and mission are embodied in the organizational structure of Las Positas College, and program review goals inform decision making at multiple levels of the shared governance structure. The college catalog clearly states the mission, values, and principles by which the college participates in shared governance, and by which participatory discussion, planning, and implementation take place. The institution communicates its commitment to excellence through ongoing improvement in all sectors of the campus, through review and evaluation of its mission, and through community feedback throughout the institution. The guiding principles reinforce the college’s commitment to student success.

The shared governance structure at Las Positas College encourages broad, active participation and the creation of the programs and services that exemplify the college’s commitment to excellence. The college structure creates a process of collaboration and encourages staff and students to take an active role in creating and defining the learning experiences of students. Each constituency group of students, staff, faculty, and administrators has a defined leadership structure that encourages and supports participation in college and community life. All constituencies, including staff, faculty, and students, participate in committee

assignments, task forces, Academic and Classified Senates, and college and district committees.699, 700

Through the shared governance structure, committees are viewed as equal in importance and institutional value; however, shared governance policy issues are reviewed by the College Council.701 The Council’s membership includes the president, the three vice presidents, the Classified Senate and Academic Senate presidents and vice presidents, representation from both the classified and faculty unions, the shared governance faculty chairs of the Planning and Budget Committee and the College Enrollment Management Committee, and the Associated Students president and vice president.

The leadership for faculty includes the Academic Senate, primarily responsible for academic and professional matters, and the Faculty Association.702, 703 Shared governance committees that fall under the purview of the Academic Senate include the Student Learning Outcomes Committee, the Curriculum Committee, and the Distance Education Committee.704 The classified staff participates in college governance through the Classified Senate and the Service Employees International Union (SEIU).705, 706 The Classified Senate assists with classified professional development through Flex Day educational opportunities and teambuilding events.707 The student body participates in college governance through the Associated Students of Las Positas College (ASLPC).708 The ASLPC is the voice of students on campus, and its mission is to promote student involvement and protect student interests. ASLPC officers and senators serve on all shared governance committees, promote and encourage student activities and organizations, perform various leadership roles on campus, and advocate for students on the local, state, and federal levels. The body is committed to providing the students of Las Positas College an atmosphere for better learning and personal growth.

All Las Positas College shared governance committees are noted in the shared governance document.709 Dialogue concerning shared governance committee professional behavior, collegial decision making, consensus building, and conflict with civility was revived by the new president as a focus for the College Council in fall 2008.710, 711 The culture and climate of institutional leadership continues to be a focal point at the administrative level and is a top priority for fall 2008 and spring 2009 planning and implementation campus wide.

College leadership structures collaborate with district committees as well. In response to previous self-study recommendations, the district has established several committees to coordinate activities at the district and both colleges.
One of these is the District Enrollment Management Committee (DEMC).\footnote{712 District Enrollment Management Committee} This committee membership includes the faculty chair of the College Enrollment Management Committee as well the college president, vice president of academic services, the vice chancellor of educational planning, and dean representation from the colleges. Another is the District Curriculum Council.\footnote{713 District Curriculum Council} This district committee’s membership includes college Curriculum Committee chairs and representatives, vice president of academic services, the Academic Senate president, student representatives, counseling, and the director of institutional research and planning.

Educational facility master planning took place with the passage of Measure B, the college bond that provided for $498 million to renovate and build needed facilities on the campus.\footnote{714 Measure B bond funds} College furniture standards were developed and approved through the Furniture Standards and Fixtures Task Force, and a facility update newsletter distributed by the president was instituted in spring 2008. Campus banners were developed for nearby city streets, and a discussion has been initiated on increased parking, a new smoking policy, and improved college signage.

Institutional leadership continues to promote an environment for empowerment, innovation, and institutional excellence. In spring 2008, the newly hired college president undertook a campus-wide listening tour which encouraged staff, faculty, administrators, and students to take part in the discussion of how college practices, programs, and services could be improved. In addition, at the April 2008 all-college meeting, staff, faculty, and administrators were asked by the president to identify both the strengths of the college and areas that needed the president’s attention. Responses were disseminated to the campus leadership for review and incorporation into the improvement of institutional processes.\footnote{715 President’s Listening Tour} The environment created by the college president has empowered the college at large to take part in effective discussion that promotes both planning and implementation of planning. In addition, the campus has opportunities for discussion and initiative through the weekly student newspaper, The Express, which contains reporting on issues crucial to college functioning. The online version of the newspaper, through reader comments on stories, facilitates open discussion.\footnote{716 The Express student newspaper} A newly created community group, the President’s Advisory Council, also has an opportunity to voice input, as do the college’s program advisory boards, K-12 districts within the Tri Valley Educational Collaborative, and the workforce development task forces and groups that meet to discuss economic development issues and future needs.\footnote{717 Advisory Boards: College catalog, p. 236}

Individuals in the college community are able to access information in a variety of ways and through this access have an opportunity to respond to college initiatives and planning. College committee minutes, task forces, board and district agendas and minutes, and various forms may be found on the Internet.
and Intranet.\textsuperscript{718, 719, 720} Information is distributed both electronically and, less frequently, in hard copy for review and comment. Information is also transmitted through monthly town meetings where all campus constituents have an opportunity to hear and respond to information, through email releases, and through newsletter and other written communications.\textsuperscript{721} Once a semester or more, the chancellor publishes his chancellor’s newsletter.\textsuperscript{722} A monthly board newsletter from the college president, along with a biannual newsletter from Academic Services, gives the campus at large further access to information and the ability to comment on planning and innovation concerns.\textsuperscript{723, 724} The Vice President of Academic Services also supplies a monthly informational report to the Academic Senate. Student and staff participation is encouraged at district board meetings, student representatives sit on various college committees, and the ASLPC represents student concerns and ideas at both the college and district level.\textsuperscript{725, 726}

The college has a number of venues for institutional evaluation and program review that provide the campus with additional opportunities for input. Individual college programs go through program review, which ensures continual program improvement through evaluation of programs based in part on feedback from peers and students.\textsuperscript{727} The program review process is also evaluated and revised to ensure continual improvement. Additionally, the creation of the educational master plan made the college community reflect on and envision its programs, services, and expectations for the next ten to fifteen years.\textsuperscript{728} The creation of the educational master plan engaged all constituent groups on campus. Student Services also participates in a categorical site review process that requires program self-study and evaluation as well as program review.\textsuperscript{729, 730} These evaluations are made available to all staff.

SELF EVALUATION

The college meets this standard. It has a strong and dedicated leadership team, and its shared governance structure creates venues for participation, dialogue, and continual program improvement. The college also supports new projects, services, and continual improvement of the organization to the benefit of its students.

4A2 The institution establishes and implements a written policy providing for faculty, staff, administrator, and student participation in decision-making processes. The policy specifies the manner in which individuals bring forward ideas from their constituencies and work together on appropriate policy, planning, and special-purpose bodies.

4A2a Faculty and administrators have a substantive and clearly defined role in institutional governance and exercise a substantial voice in institutional policies, planning, and budget that relate to their areas of responsibility and expertise. Students and staff also have established mechanisms or organizations for providing input into institutional decisions.

4A2b The institution relies on faculty, its academic senate or other appropriate faculty structures, the curriculum committee, and academic administrators for recommendations about student learning programs and services.

The governance of Las Positas College is founded on the observation that inclusive policies and decision-making processes are appropriate for the many decisions made by the college that affect the college community inclusively. This means, in fact, that effective governance at the college depends on administrators, faculty, staff, and students to “actively contribute to the decision-making process and to accept ownership for the development and creation of a college environment based on these decisions.” The document “College Governance” identifies each of the bodies comprising the college’s main constituent groups, committees, task forces, and relevant district committees that make recommendations on planning, policies, and student learning programs and services. The document describes the purview of each body, its charge, and its key processes, as well as its membership (including student membership) and reporting relationship. The district policy 2015 states that the “The Board of Trustees shall ‘rely primarily’ on the advice and judgment of each Academic Senate independently on selected college matters and the two Senates jointly on selected District matters.”

Uniformly, the central values informing the membership of governance bodies are breadth and equity. Most bodies bring together management, faculty, staff, and student representatives, and where feasible, faculty and dean membership is divisional. At this college, many full-time faculty and staff serve on at least one shared governance committee, ad hoc committee, or task force. The reporting relationship also denotes the recipient of recommendations forwarded by each body, whether to the Academic Senate, college president, Planning and Budget Committee, or other appropriate office.

731 Service Employees International Union
732 Board policy 2015
An example of a significant recommendation made by a standing committee is the enrollment plan made annually by the College Enrollment Management Committee (CEMC). Its central process, discipline planning, is described in the Faculty Contract, as well as the document “Shared College Governance,” which informs existing practice. This process begins early each fall with an enrollment report and analysis, distributed to the college, that includes an enrollment target and guidelines for each instructional and student service program to use in building its next year’s schedule proposal. Through the semester, the CEMC dialogues over program proposals individually and in aggregate, assessing their contribution to the college enrollment, their efficiency, and their consideration of student access, equity, and success. Once the aggregate plan is aligned with college and district enrollment and productivity targets, the recommendation forwarded to the college president represents input from most of the college’s faculty and administrators, and many classified staff; it describes the size and content of each program, and, in the form of FTEF, signifies a major resource-allocation decision.

The structural organization and governance of the college, which is described in the educational master plan, facilitates the vigorous engagement of faculty in the activity of student learning programs and services, as does board policy 4320, Academic Freedom, which recognizes “the practice of academic freedom with its open search for truth, and its free exposition.”

Areas in the purview of the Academic Senate include:

- Curriculum, including establishing prerequisites and placing courses within disciplines
- Degree and certificate requirements
- Grading policies
- Educational program development
- Standards or policies regarding student preparation and success
- District and college governance structures, as related to faculty roles;
- Faculty roles and involvement in accreditation processes, including self-study and annual reports
- Policies for faculty professional development activities
- Processes for program review
- Processes for institutional planning and budget development; and
- Other academic and professional matters as are mutually agreed upon between the governing board and the academic senate

Organized divisionally into “families” of disciplines, academic departments at Las Positas College have a faculty department member who works with his or her colleagues in the department and the divisional dean to promote
the smooth day-by-day functioning of each program.\footnote{Academic departments} When a program issue requires the attention of another college office, the faculty and dean can initiate dialogue and advocate for the needs of the program. The dean also oversees faculty’s examination and approval of locally generated curriculum; divisionally-approved curriculum advances to the faculty-chaired Curriculum Committee, where it is further evaluated for appropriate content and form by faculty membership. Divisional faculty mentors are assigned to their division to assist faculty with the curriculum process and to advise them concerning forms and processes.\footnote{Curriculum Committee} Each division also employs a staff assistant who works with faculty to put curriculum into appropriate templates and who facilitates the curriculum application process. Instructional program concerns including course prerequisites, degree requirements, grading policies, and program review fall in the purview of the Academic Senate, whose judgment is the primary informant of actions taken by the Board of Trustees. This responsibility is given directly to the Curriculum Committee, which reports directly to the Academic Senate. The Vice President of Academic Services is an ex-officio member of the Curriculum Committee. Students and divisional deans also have non-voting representation. The Academic Senate seeks divisional faculty input on program issues monthly at division meetings, and curriculum updates are given by the curriculum mentor assigned by the Curriculum Committee.

The Associated Students of Las Positas College (ASLPC) is the student governing body on campus. This group serves the institution by representing student concerns and by placing students on campus committees. The mission of the ASLPC reads, “The Associated Students of Las Positas College is a non-partisan organization focused on advocacy efforts to promote student involvement on campus and to protect student interests. In line with the mission of Las Positas College, the mission of the Associated Students of Las Positas College is to promote and encourage campus activities, organizations, and services that will foster growth and success, both in students and in the community. This body works with students and represents the student body at the district, state, and federal level. The Associated Students of Las Positas College provides avenues and events to enhance student and community participation and legislative involvement. This body is committed to providing the students of Las Positas College an atmosphere for better learning and personal growth. The Associated Students of Las Positas College is the campus student government, providing opportunities for students to participate in the governance of the College on both local and statewide levels.”

**SELF EVALUATION**

The college meets these standards. The comprehensive, updated document “College Governance,” which is part of the educational master plan, assures broad, fair, and rational representation of constituents in decision making, and the existing divisional organization supports a strong and inclusive faculty voice in matters concerning instructional programs and services. The educational
master plan, an inherently forward-looking document, also anticipates transitions in organizational structure that might not reflect in every aspect the college’s present form. Continual review by college personnel of both the College Governance document and the educational master plan ensure updates to roles, services, and student learning programs.

PLANNING AGENDA

None.

4A3 Through established governance structures, processes, and practices, the governing board, administrators, faculty, staff, and students work together for the good of the institution. These processes facilitate discussion of ideas and effective communication among the institution’s constituencies.

The institution’s implemented system of shared governance provides all members of the college with the necessary tools for effective communication and collaboration to maximize student success. The Board of Trustees implements policies that facilitate collaborative efforts in strengthening the institution. Furthermore, the established Las Positas College Governance Procedures, approved by the Board of Trustees and also included in Policy 2015, ensure that all constituent groups (student, classified staff, Academic Senate, and administration) are actively involved in the decision-making process. This document recognizes a shared governance structure that fosters collegial consultation and inclusion of all staff and students in the running and improvement of the institution.

The Academic Senate’s main purpose as stated in the Academic Senate Constitution is “to represent faculty in making recommendations to the administration and to the Board of Trustees in academic and professional matters.” These matters may include academic policies, educational expenditures, institutional philosophy, instructional services, faculty personnel policies, academic and professional rights and responsibilities, academic and professional standards, and student personnel policies. In Policy 2014 the Board of Trustees recognizes the Academic Senate of Las Positas College as a governing body responsible for representing faculty “in collegial consultation” related to ‘academic and professionalism’ matters.” The Board of Trustees establishes within the Academic Senate the authority to create the composition, structure, and procedures of its Senate. Both full-time and temporary part-time faculty participate in and are represented.

740 Shared Governance Document
741 Board of Trustees Minutes
742 Board policy 2015
743 Academic Senate Constitution
744 Board Policy 2014
by the Academic Senate. The Executive Committee includes the Academic Senate president, vice president, secretary, and treasurer, all of whom have been elected by the faculty. Faculty membership on the Senate represents the college’s divisions, with at least two full-time faculty from each. At division meetings, faculty voice opinions and ideas they want their representatives to take back to the Academic Senate.

Faculty are encouraged to engage in professional discussions in several areas pertaining to the running of the institution, thus ensuring informed and collaborative decisions made in the best interests of the college community. The Board of Trustees relies primarily on the Academic Senate in the following areas:

- Curriculum, including establishing prerequisites and placing courses in disciplines;
- Degree and certificate requirements;
- Grading policies;
- Standards or policies regarding student preparation and success;
- Faculty roles and involvement in accreditation process, including self-study and annual reports.
- Faculty also work with other constituent groups in the development of policies and procedures in the following areas:
  - District and college governance structures, as related to faculty roles;
  - Policies for faculty professionalism development activities;
  - Processes for institutional planning and budget development;
  - Regulations and procedures relating to health and safety;
  - Educational program development;
  - Processes for program review.

The college’s governance procedures recognize the administrative staff’s authority to recommend, develop, and review all institution policies and procedures. The administration works toward implementing approved policies and procedures in a timely manner and collaborates with the other governance groups to develop the policies and procedures in several areas:

- Curriculum;
- Degree and certificate requirements;
- Grading policies;
- Administrative roles and involvement in accreditation processes, including self and annual reports;
- Student preparation and success;
- College and district governance structures;
- Professional development activities;
- Institutional planning process;
- Budget development process;
Program planning and staffing;
• Regulations and procedures relating to health and safety;
• Program review.

Classified staff members also participate in shared governance. Classified staff serve on college and district governance committees, and they provide a centralized means of communication for the college community. They reward professionalism so that it is properly recognized and valued, develop individual staff leadership, and increase the professional standards of the staff by promoting and supporting activities that develop and increase staff skills, productivity, and professionalism. Classified staff participate in shared governance by voicing the needs, concerns, and viewpoints of the staff in areas not related to union negotiations, and they have recently completed a new Classified Senate Constitution and Bylaws, April 2008.745

The Classified Senate represents the classified staff on all non-collective bargaining matters. Classified staff that serve in instructional areas are included in discussions and make input regarding academic programs, delivery of services, and other academic issues that affect their professional duties. In addition, the classified staff participate actively in the formulation and development of policies and procedures in the following areas:

• Classified roles and involvement in accreditation processes, including self-study and annual reports;
• Student preparation and success;
• College and district governance structures;
• Professional development activities;
• Institutional planning process;
• Budget development processes;
• Program planning and staffing;
• Regulations and procedures relating to health and safety.

Policy 2018 and 2015 recognize the Associated Students of Las Positas College (ASLPC) as the Student Senate and the governing body of the institution responsible for representing the student population.746, 747 The ASLPC Constitution and bylaws further establish the structure of this constituent group.748 These documents state that members of the body’s Executive Council must be appointed by the students in annual elections. The Executive Council consists of a president, vice president, director of legislation, director of finance, director of communications, director of events, and Inter-Club Council chair. The Student Senate consists of the appointed director of public relations and parliamentarian, as well as senators and representatives who are welcomed into the Senate after obtaining 150 student signatures in support of their representation. All ASLPC representatives are student advocates, focused on

745  Classified Senate Constitution and Bylaws
746  Board Policy 2018
747  Board policy 2015
748  ASLPC Constitution and Bylaws
promoting student involvement, protecting student interests, and encouraging student success. Responsibilities are carried out through the members’ representation of the students on various college and district committees, giving students the opportunity to participate in developing policies and procedures in the following areas:

- Curriculum;
- Degree and certificate requirements;
- Grading policies;
- Student roles and involvement in accreditation processes, including self-study and annual reports;
- Student preparation and success;
- College and district governance structures;
- Institutional planning process
- Budget development processes;
- Regulations and procedures relating to health and safety.

Students also have the opportunity to create and participate in clubs. The Inter-Club Council, established within the ASLPC Constitution, is designed to facilitate communication and collaboration among the various clubs.\footnote{Inter-Club Council}

Las Positas College has 20 standing committees, each charged with a function essential to effective college governance. Members from all constituent groups serve on each of these committees, so all interests are adequately represented. Specific membership guidelines are described in the College Governance Procedures. This shared governance model serves the entire college community as it fosters the communication and collaboration of all involved parties in the development and implementation of institution policies and procedures.

The College Council, an important means of communication between the constituency groups, consists of the vice president of academic services, the vice president of student services, the vice president of administrative services, the Academic Senate president, Academic Senate vice president, Planning and Budget Committee chair, Facilities Committee chair, College Enrollment Management Committee chair, Classified Senate president, Classified Senate vice president, Las Positas College Association Site vice president of CLPFA, Las Positas College Site vice president SEIU, Associated Students of Las Positas College president, and Associated Students of Las Positas College vice president.\footnote{College Council} The president of Las Positas College serves as the council chair. The College Council is responsible for the following:

- Reviewing the college mission statement as recommended by the Planning and Budget Committee\footnote{Planning and Budget Committee} 
- Formulating, reviewing, and revising the college philosophy and mission;
• Formulating annual college goals and objectives;
• Reviewing and evaluating shared governance, organizational, and committee structure, making recommendations when necessary;
• Assigning issues to shared governance committees as appropriate;
• Serving as steering committee for college-wide projects.

The college also maintains several management groups:
• Executive Cabinet: vice presidents and the president
• Administrative Leadership: president, vice presidents, deans, director of institutional research and planning, director of campus safety, executive CEO foundation
• Academic Services Leadership Team: vice president of academic services and academic services deans
• Student Services Leadership Team: vice president of student services and student services deans
• Administrative Services Leadership Team

Many of the entities described above use the institution’s email system to facilitate communication between constituencies. Agendas, minutes, constitutions and by-laws, and various other documents and announcements are posted online, as were materials related to this accreditation process.

SELF EVALUATION

The college meets this standard. The established governance process maximizes communication and collaboration among all members of the college, leading to effective management and ongoing improvement of the institution.

Results of a survey given to full-time and part-time faculty, classified staff, and administration, show agreement that the current governance processes are effective. When responding to the statement, “Governance roles are designed to facilitate decisions that support student learning programs and services and improve institutional effectiveness,” 72 percent of respondents agreed or strongly agreed and only 8 percent disagreed or strongly disagreed. Specifically, 80 percent of administration, 84 percent of classified staff, 62 percent of full-time faculty, and 60 percent of part-time faculty agree or strongly agree with this statement.

Staff was also asked to respond to the statement, “Administration has a substantive and clearly defined role in institutional governance.” Fifty percent of administration strongly agreed, 20 percent agreed, 20 percent disagreed, and 10 percent strongly disagreed. When asked if institutional support for faculty participation in governance is adequate, 5 percent of full-time faculty...
strongly agreed, 54 percent agreed, 17 percent were neutral, 20 percent disagreed, and 5 percent strongly disagreed. Twenty-one percent of part-time faculty strongly agreed, 29 percent agreed, and 50 percent were neutral. Faculty was also asked whether the faculty’s role in institutional governance is effective. Seven percent of full-time faculty strongly agreed, 33 percent agreed, 41 percent were neutral, 17 percent disagreed, and 2 percent strongly disagreed. This compared to 29 percent of part-time faculty strongly agreed, 21 percent agreed, 43 percent were neutral, and 7 percent strongly disagreed.

Classified staff were asked if the institution clearly states and publicizes the role of classified staff in institutional governance. Three percent strongly agreed, 53 percent agreed, 19 percent were neutral, 17 percent disagreed, and 8 percent strongly disagreed. When classified staff was asked if their role in institutional governance is effective, 41 percent agreed, 21 percent were neutral, 32 percent disagreed, and 6 percent strongly disagreed.

When all staff was asked if the institution clearly states and publicizes the role of students in institutional governance, 9 percent strongly agreed, 62 percent agreed, 18 percent were neutral, 8 percent disagreed, and 4 percent strongly disagreed. Nine percent of staff strongly agreed that the role of students in institutional governance is effective, 33 percent agreed, 40 percent were neutral, 14 percent disagreed, and 5 percent strongly disagreed.

Students were also surveyed and asked to respond to several statements regarding how well they felt their interests were represented, how well they felt student government was providing effective leadership and representation, and how important they felt it is for students to be involved in various shared governance procedures and committees. Results showed that most students were either in agreement or neutral when asked to respond to statements that their interests were being represented. Also, a majority of students was in agreement with the statement that students should be represented on committees and institution planning processes.

PLANNING AGENDA

None.

4A4 The institution advocates and demonstrates honesty and integrity in its relationships with external agencies. It agrees to comply with Accrediting Commission standards, policies, and guidelines, and Commission requirements for public disclosure, self-study and other reports, team visits, and prior approval of substantive changes. The institution moves expeditiously to respond to recommendations made by the Commission.
Las Positas College complies with the Accrediting Commission standards, policies and guidelines. It responded to findings in the Accreditation of 2003 with a Progress Report on the Recommendations (September 2004) in a timely and appropriate manner addressing the needed modifications and implementation of those changes.757

This college was also granted a substantive change to offer through distance delivery of various certification programs in the business department, which represent over 50 percent of course offerings. Hard copies of the Accreditation Report of 2003 and the college’s progress report(s) are available on campus in the library and in each division office. The electronic copy of the Substantive Change Report is also available.758

In accordance with the shared governance commitment of the college, all faculty, staff, and administrators participate cooperatively in virtually all activities affecting the college. The present Las Positas College self-study started with discussions in committees and the establishment of focus groups. Faculty and staff then chose the standard and the section of the accreditation self-study they wished to explore. A flex day was devoted to the collaborative work of the standards committees, which included faculty, administrators, and classified staff representatives, in addition to resource support staff, including at least two administrators per team. This was a time for exploring the intent of each of the standards sections and areas in which to begin looking for evidence of compliance or noncompliance. Individuals worked for many weeks on their assigned subsections, and they then submitted their efforts for integration to the larger document for group review using a wiki.

Steering committee: Dr. Laurel Jones, VP Academic Services, Dr. Amber Machamer, Institutional Researcher, Maureen O’Herin, Faculty Chair, Dr. DeRionne Pollard, President

Editor: Mike Sato, Faculty

757 2003 Accreditation Report
758 Substantive Change Report
Technical Support

John Gonder, Faculty - Wiki Wizard, Jeff Sperry, Classified- Document Czar

To ensure a consistent voice for the final draft of the self-study, an editor was selected by the steering committee, based on expertise and overall experience with and knowledge of the college. In addition, the steering committee put in place a technical support group to help with documentation and electronic distribution and discussion of self-study drafts.

Over summer 2007, the steering committee and the technical support team began work preparing for the year ahead, creating several tools to support the self-study:

- The Las Positas College Document Repository, which would serve as the data base, available college-wide, of all documents needed as evidence for the self-study;759
- A wiki site for accreditation, which would serve as the college-wide discussion board for drafts of the self-study;760
- A writing template for each section of the self-study, providing a guide for the standard committees once they began drafting;
- Tentative timelines.761

On August 15, 2007, the academic year’s first town meeting (attended by all administration, full-time faculty, classified staff, and some students), featured an overview presentation of the accreditation process that highlighted the importance of college-wide involvement and participation. A question-and-answer period following the presentation began the college-wide dialogue that would continue throughout the self-study process.762

On August 16, 2007, the accreditation team attended an “Accreditation Kick-Off Party” to review the timeline, process, and committee membership. After the meeting (T-shirts and goody-bags in hand), the team was energized and ready to begin the project.

To continue the dialogue on campus, the director of institutional research and planning held focus groups with each of the major college committees during August and September 2007.

In September 2007, letters were sent out electronically and in campus mail to all classified staff and full-time/adjunct faculty, inviting them to select a standard on which to serve, based on expertise, division/department knowledge, and experience with committees and processes. Final selection of membership for each standard was made by the steering committee based on the staff member’s choices, as well as a commitment to create diverse teams that represented the wide-ranging constituencies of the college. By the end of October 2007, membership for each standard was established and published college wide.

On September 21, 2007, the accreditation team attended an accreditation self-study one-day workshop in conjunction with Chabot College and Napa College. This

759 Document Repository
760 Accreditation wiki
761 Timeline for planning and accreditation
762 September 2007 town meeting
workshop, led by members of the Western Association of Schools and Colleges, provided the foundation upon which the team began its self-study process.

In spring 2008, Las Positas College launched its formal self-study writing with an all-day workshop on February 14. All participants of the standards committees attended breakout sessions to work on their sections of the self-study. Computers were available in each room, and everyone had access to the Document Repository and administrative support. At the end of the day, all groups met together to reflect on the work accomplished.

By April 4, 2008, the committees completed their first draft of the self-study. Each section of the draft was posted on the LPC Accreditation wiki site. The entire LPC community, Chabot College, and the district office were invited to review this draft and offer suggestions using the comment tool on the wiki site. This allowed universal access to the document and a chance for everyone to comment on the draft and review the comments of others, creating dialogue across all constituencies. After the open review period (April 9-23), the original authors and editor reviewed the comments posted on the wiki and made changes and revisions to the draft as needed. This was completed on May 19 and became Draft 2. Over summer 2008, the self-study editor revised the draft.

The accreditation steering committee took lead responsibility for completion of the abstracts, organization of the self-study, eligibility requirements for accreditation, and responses to recommendations. The college’s institutional researcher drafted the demographics section.

All sections of the 3rd Draft (including the editor’s revisions and the steering committee’s preamble and abstracts) were made available to the campus, again using the wiki for comments and dialogue, from September 1 through November 8, 2008. The timeline to the self-study’s submission is as follows:

The college actively communicates with the public about the quality and effectiveness of the college’s programs through a recently expanded and more user-friendly college web site as well as via press releases to the local newspapers.\(^{764}\,^{765}\) The college keeps a compilation of all newspaper articles for each school year, and it is distributed to all staff for review.

\(^{764}\) LPC website
\(^{765}\) Press releases
A variety of local, county, state, and federal grants is sought and managed by Las Positas College and the district office. Health services are provided on campus at the Student Health Center that serves students in collaboration with Valley Care Health System. The Early Childhood Development Program has a contract with Every Child Counts, which administers Alameda First 5 money from a state tax on cigarettes.\textsuperscript{766} The contract has supported two professional development coordinators to provide guidance and stipends for students pursuing the child development permit and the AA Degree. Additionally, the grant has provided for an administrative assistant to help with the administration of California Early Childhood Mentor Program, which uses federal quality improvement money administered through the Child Development Division of the California Department of Education, for which LPC is the lead college in Alameda County.

State grants, such as those awarded to the Disabled Students Programs and Services (DSPS), which includes the Workability III Program I, are increasingly important to student success.\textsuperscript{767} State grants also support the Equal Opportunity Programs and Services (EOPS), and the Foster and Kinship Care Program provide support for large numbers of students.

The International Student Program facilitates the successful transition of all international students to LPC and the American educational system.\textsuperscript{768} The program has Student and Exchange Visitor Information System (SEVIS) certification. The I-17 Certificate of Eligibility is a testament to the fact that all compliance requirements have been met in the college president’s office. The services include pre-advisement, language proficiency assessment, compliance with immigration laws, and academic and personal counseling. The number of international students has steadily risen over the past few years, and presently 112 international students are attending the college.

The Financial Aid Program office’s mission is to provide financial resources to all eligible students who would otherwise be unable to fulfill their educational goals because of financial barriers.\textsuperscript{769} Federal, state, and local agencies, college sources, and potential academic scholarships provide the funding sources. All Department of Education specifications are met as evidenced by an Annual Internal Audit Report which addresses all compliance issues. Copies of this report are available at the district office.

The college also manages, with the district office, the VTEA grant, the QuickStart SB 70 grant in Allied Health, the Industry Driven Regional Collaborative Grant, the Job Development Incentive Training grant, and the CTE grant for Nursing and Allied Health, which is partnered with Chabot College as well as the district.\textsuperscript{770} To maintain these grants, the college promotes reporting ties and a working relationship with these external agencies and advisories or community collaboratives.

\textsuperscript{770} QuickStart SB 70 grant in Allied Health
The college seeks partnerships that help enhance its programs’ offerings and potential for development. These include partnerships with industries such as the General Motors and the AC Delco relationships with Automotive Technology.

The college’s technical programs have partnerships with a number of ROP programs, high schools, and four-year institutions. Unique to Las Positas College is the TEC (Tri-Valley Educational Collaborative), which is a shared-leadership partnership for the current Carl Perkins monies for technical education. The collaboration includes K-12 membership from the Livermore, Dublin, Sunol, and Pleasanton school districts, the Regional Occupational Program, and Las Positas College, with one business member also participating on the Administrative Council. One outcome of this collaboration is a fully electronic Credit by Examination program, the present vehicle agreed upon by the college and the ROP instructors, after careful review of texts, tests, and course outlines to be articulated. Some of those collaborations have included biannual joint advisory meetings for both the ROP and LPC. Each program has the opportunity to influence membership on the advisory board. This encourages input from a combination of community stakeholders in the employment eligibility and opportunities for the graduates of these programs.

To ensure the college’s career-based programs maintain currency while being responsive to the needs of local employers and industry, the college employs a system of advisory boards to oversee these programs. These required advisory boards meet two times each academic year for updates on relevant industry technology and standards that promote the effective education and training of our community’s workforce. Advisory boards actively support college programs by examining and providing recommendations on the curricula of these programs, including their pre- and co-requisites, and by providing information on standards of performance, equipment and facilities required, labor market conditions, and financial and legislative matters. Advisory boards can also serve as a conduit for student internships, donations of cash or equipment, the development of resources, student scholarships, and guest lecturing. The division dean works closely with department coordinators to establish meeting dates and times. Members of the advisory boards typically include full and/or part time faculty, administrators, and representatives of the community and constituency careers served by the programs. Further, the college shares advisory boards with the Regional Occupational Program (ROP), where the ROP has classes and programs that feed into the college. Las Positas College has 14 advisory boards supporting its academic programs, with additional advisory boards for those student services programs which require them.

771 Advisory Boards
772 College catalog, p. 236
SELF EVALUATION

The college meets this standard. The college complies with Accrediting Commission standards, policies, and guidelines for public disclosure. Las Positas students, staff, faculty and administration have prepared this self-study utilizing a process that includes all constituencies and maintains standards of honest and openness to scrutiny and evaluation. Las Positas College demonstrates similar integrity in its partnerships and dealings with other agencies as well.

PLANNING AGENDA

None.

4A5 The role of leadership and the institution’s governance and decision-making structures and processes are regularly evaluated to assure their integrity and effectiveness. The institution widely communicates the results of these evaluations and uses them as the basis for improvement.

Las Positas College’s standing committees regularly review their charges. In 2005, all shared-governance documents were reviewed and revised for an update to the educational master plan. The Academic Senate, Classified Senate, and Associated Students are reviewing and revising their constitutions and by-laws in spring and fall 2008. In preparation for this self-study, an Employee Satisfaction Survey and a Student Satisfaction Survey were conducted in 2007 and 2008. Both surveys included a number of questions on leadership and shared governance. The results of these surveys are distributed widely across the campus and on the Office of Institutional Research and Planning website.773

SELF EVALUATION

The college meets this standard. Shared-governance documents and structures are periodically reviewed and revised. Questions included on the Employee and Student Satisfaction Surveys effectively measure the perceived value of the decision-making process and the evaluation method’s effectiveness. However, it is unclear how the survey results will influence future decision-making.

PLANNING AGENDA

None.

773 Surveys
4B In addition to the leadership of individuals and constituencies, institutions recognize the designated responsibilities of the governing board for setting policies and of the chief administrator for the effective operation of the institution. Multi-college districts/systems clearly define the organizational roles of the district/system and the colleges.

4B1 The institution has a governing board that is responsible for establishing policies to assure the quality, integrity, and effectiveness of the student learning programs and services and the financial stability of the institution. The governing board adheres to a clearly defined policy for selecting and evaluating the chief administrator for the college or the district/system.

The Chabot-Las Positas Community College District is governed by a seven-member board of trustees which is responsible for all policy decisions. Board members are elected from seven trustee districts contained in southern Alameda and a part of Contra Costa counties. These districts serve diverse communities that each elect a representative. Because members are elected from the seven distinct trustee districts, the board is an independent policy-making entity responsible to the electorate. Elections are arranged so that less than one-half of the board stands for election in any given year, ensuring continuity and stability in board membership. The board includes two student trustees, one from each college. Terms for elected board members are four years, and terms for student representatives are one year. Student representatives do not have voting rights but can make motions within the board meeting procedure. The names of current Board of Trustees members, including the area they represent, may be found on the Board of Trustees website.

New trustees are encouraged to attend the Community College League (CCL) of California annual orientation conference. The CCL provides each trustee with a Trustee Handbook and other relevant resources. In addition, student trustees are provided with a Student Trustee resource packet.

The district mission statement states that the district will provide policy, advocacy, service, and resources for the operation of its two colleges. The district assumes the responsibility to support the mission, goals, and priorities established by each college. According to the mission statement, the district is committed to providing the human and fiscal resources necessary to ensure that all programs meet rigorous standards or quality and excellence. The board reviews and approves educational programs and ensures that the programs, degrees, and certifications offered are of excellent quality and are consistent with institutional purposes.

774 Board of Trustees
775 Community College League of California
776 District mission statement
The duties and responsibilities of the board are detailed in the hundreds of individual policies incorporated in the Board Manual.\textsuperscript{777} In addition to the Manual, the board has a Code of Ethics.\textsuperscript{778} The Code was written in 1993, revised and readopted in 1998, and revised and adopted again in 2001. Each member of the Board of Trustees is required to read and sign this Code of Ethics upon election.

Section 7010 of the Board Policies outlines the expectations of board members’ conduct. For example, all meetings are in compliance with Brown Act provisions except as otherwise permitted or required by law. In addition, this section addresses the confidentiality of information discussed in closed session. Section 7050 addresses the district’s Conflict of Interest Code. According to this section, CLPCCD has adopted Title 2, California Code of Regulations, Section 18730 and its amendments, as the instrument to define its Conflict of Interest Code.\textsuperscript{779}

Operating procedures inherent in the work of the board are noted under the 7000 series and include Organization and Authority (7001); Trustee Election Districts (7002); Selection of Non-voting Student Member of the Board of Trustees (7003); Officers (7005); Authorization to Sign Warrants (7006); Executive Officer of the Board (7007); Board Self Evaluation (70052).

The board assures that the district is fiscally sound through careful budget planning and ongoing budget reporting from district staff. The board receives quarterly reports and workshops on the financial health of the district from the vice chancellor.\textsuperscript{780} In addition, the district board receives reports on the bond budget on a systematic basis.\textsuperscript{781}

The Board of Trustees conducts an evaluation of the chancellor and, in conjunction with the board, the chancellor evaluates the college presidents. Evaluations are conducted to assure that the job performance of each individual is assessed and communicated to the individuals being evaluated in accordance with established procedures.\textsuperscript{782}

**SELF EVALUATION**

The college meets this standard. The Board of Trustees effectively establishes policies that assure not only the quality, integrity, and effectiveness of college programs and college services, but also assures the financial viability of the district to support the college in its program delivery. The size, duties, responsibilities, ethical requirements, structure, operating procedures, and evaluative processes for the Board of Trustees are reasonably defined and published in the Board Manual and other documents.

\textsuperscript{777} District board manual  
\textsuperscript{778} Board code of ethics  
\textsuperscript{779} Board conduct policies  
\textsuperscript{780} Board financial policies  
\textsuperscript{781} Bond budget reporting  
\textsuperscript{782} Chancellor and management evaluations
PLANNING AGENDA

None.

4B1a The governing board is an independent policy-making body that reflects the public interest in board activities and decisions. Once the board reaches a decision, it acts as a whole. It advocates for and defends the institution and protects it from undue influence or pressure.

The board agenda allows for public comment at every meeting. Online publication of the board agendas and widespread distribution of meeting minutes keep the public informed about district and college issues, and they give members of the community advanced notice to formally comment on any district decisions or actions.\textsuperscript{783} If the board concurs that public comment on a subject requires additional discussion, it can advise the chancellor to include affected groups in a forthcoming meeting for additional comment.

The board is an independent policy-making body and as such is not bound by any statement or action of one individual board member or employee. Individual board comments are discussed as a part of a larger decision-making process. Individual board members observe the policies and board training that govern decision-making and have authority only when acting as the board legally in session.\textsuperscript{784}

On an annual basis, each board member declares his or her financial interests to ensure his or her independence in the decision making process and to assure the community that there are no conflicts of interest.\textsuperscript{785}

SELF EVALUATION

The college meets this standard. The Board of Trustees acts as a whole to represent the community interest in the colleges, and it is deliberate in its use of effective policies in order to promote transparency of actions to the public so that conflict of interests are precluded from the decision making process.

PLANNING AGENDA

None.

4B1b The governing board established policies consistent with the mission statement to ensure the quality, integrity, and improvement of student learning programs and services and the resources necessary to support them.

\textsuperscript{783} Board agenda publication
\textsuperscript{784} Board policy 7001
\textsuperscript{785} Board policy 7051
Section 0005 of the Board Policy Manual outlines the mission, goals, and philosophical guidelines of the Chabot-Las Positas Community College District. The fundamental mission of the Chabot-Las Positas College District is to provide the leadership and resources to ensure that all students within the district will continue to have an equal opportunity to pursue and achieve their educational goals.\(^{786}\)

The district provides policy, advocacy, service, and resources for the operation of its two colleges. The district assumes the responsibility to support the mission, goals, and priorities established by each college. The district coordinates the allocation of fiscal and human resources, and it promotes the fair hire process through affirmative action.

Based on the board mission statement, the Board of Governors agenda, and the district’s philosophy, the Board of Trustees has affirmed the following philosophical guidelines in its assurance of quality, integrity and improvement of student learning programs and services:

The treatment of individual student learners is the major focus and concern of the district. The district coordinates and supports each college in its development of programs and services that best serve the college student population, including its diversity, economic and community need and transfer request.\(^{787}\)

The district is committed to fair hiring processes, to affirmative action practices, and to ethical behavior in the treatment of employees and students.\(^{788}\) The district is committed to providing an ecologically and environmentally attractive and safe learning and work place.

The district is committed to operate in a cost effective manner and to provide both the human and fiscal resources necessary to ensure that all programs meet rigorous standards of quality and excellence.

The district will continue to provide the appropriate environment for innovation and creativity. Recognition of student and staff achievement is promoted and harmonious cooperation is accomplished through the participatory governance process.

The district will continue to develop a positive image in the communities it serves by working cooperatively with other educational segments, business, industry, and governmental agencies.

The district will broaden its sphere of influence to support the local and state economic development plans, the internationalization of curriculum, the recognition of diverse cultures, and the artistic and scholarly achievement of the world’s great artists and thinkers.

\(^{786}\) Board mission, goals and philosophy
\(^{787}\) Individual student learners
\(^{788}\) Fair and ethical treatment
The district is accountable and responsible for all legal and fiscal practices as they relate to ensuring the quality, integrity, and improvement of student learning programs and services.

SELF EVALUATION

The college meets this standard. The district mission and philosophy are reflective of the commitment to support of student learning programs and services. The board clearly understands its directive and responsibility for academic programs and the quality and integrity of such support. The board continues its support in the development and review of its mission statement and in its relationship to the president of the college. The Las Positas College president apprises the board of college programs and services through formal board reports and through the college representation in board workshops.

PLANNING AGENDA

None.

4B1c The governing board has ultimate responsibility for educational quality, legal matters and financial integrity.

The seven elected board members plus the two non-voting student members are subject to the requirements and limitations of Educational Code Section 72023.5. The State of California and the citizens of the Chabot-Las Positas Community College District vest the authority for the development, management, control, and operation of all properties, programs, policies, and procedures of the district and the college in the Board of Trustees.789

The board regularly monitors learning programs and services through its yearly board retreats, study sessions, and specific reports, workshops, and presentations regarding educational programs and state reporting data. Recent topics presented to the board include distance learning programs and services; basic skills and career technical education data; and student learning outcomes. Annually, the board approves curricular additions and deletions to the educational programs at the colleges.790

The board, through the chancellor, established the District Budget and Study Group, which is tasked with discussions between the colleges on specific budget issues and other topics of concern to the colleges. This committee recently outlined its charge to work on the enhancement of budget transparency and budget process integration between the colleges and the district. That committee has not consistently met for some years, but it did begin the effort to oversee budget and finance information. A meeting of this body is set for December 12, 2008.791

789 Board requirements vested in members
790 Board and retreat agendas/minutes
791 District Budget Study Group meeting, 12/12/08
The board reviews the financial statements of the district at regularly scheduled board meetings, as well as all potential or pending litigation in closed sessions. The board reviews and approves a tentative budget in May of each year, a final budget in September of each year, and a mid-year budget report in February of each year. The district has developed and followed a budget development calendar. The college’s fiscal vice president, along with the district fiscal representatives, discusses the calendar and other budget information at the District Budget Officer’s meeting.\textsuperscript{792, 793}

In accordance with state law, the board has established a Bond Oversight Committee to provide assurances that bond dollars are spent and accounted for appropriately. Fiscal reports related to the bond and to the development of college facilities are given to the board both in board workshops and as a part of the board agenda.\textsuperscript{794}

Board policy adheres to the California Educational Code and California Title 5 regulations. Board policies informed by this code are reviewed for compliance as state regulations and law change.

SELF EVALUATION

The college meets this standard. The Board of Trustees, functioning as an independent body, has ultimate responsibility in ensuring educational quality, legal soundness, and financial integrity. The board’s decisions are made with adherence to federal, state and local policy and guidelines.

PLANNING AGENDA

None.

4B1d The institution of the governing board publishes the board bylaws and policies specifying the board’s size, duties, responsibilities, structures, and operating procedures.

The Chabot-Las Positas Community College District comprises seven separate districts contained in southern Alameda County and a small portion of Contra Costa County. Board policies 7001, 7005, 7006, and 7007 regulate the board size, duties and responsibilities. Additional duties and responsibilities of the board are detailed in the Board Manual. The board also has a code of ethics that provides further information as it pertains to board duties, responsibilities, structure, and operating procedures.\textsuperscript{795}

\textsuperscript{792} Board fiscal review
\textsuperscript{793} Planning and Budget Committee
\textsuperscript{794} Bond oversight committee
\textsuperscript{795} Board policies
SELF EVALUATION

The college meets this standard.

PLANNING AGENDA

None.

4B1e  The governing board acts in a manner consistent with its policies and bylaws. The board evaluates its policies and practices and revises them as necessary.

The board follows all laws and policy in governing the district. This includes compliance with the Brown Act for open and closed meetings, posting of agendas, and reporting of minutes. The board regularly reviews policy submitted by the chancellor to make certain the institution is well managed. The process incorporates the facilitation of dialogue prior to recommendation to the board.\textsuperscript{796}

Board policy 7018 speaks to the board’s authority to adopt or change policy. Individual policies then delegate the responsibility for implementation to the college or to district personnel.\textsuperscript{797}

The board, along with the chancellor, evaluates its policies and practices on an ongoing basis. Board policy change usually occurs due to changes in state or federal law, by additions or deletions to the faculty or classified contracts, or by other shared-governance processes. The board reviews all proposed additions and changes to policies and adopts them according to justification and support to district and college mission, educational programs, and services.

SELF EVALUATION

The college meets this standard. As necessary, the board effectively reviews and revises policies related to meetings, operations, and conduct of the board. The board also reviews the area of board operations as part of its self evaluation process.

PLANNING AGENDA

None.

4B1f  The governing board has a program for board development and new member orientation. It has a mechanism for providing for continuity of board membership and staggered terms of office.

\textsuperscript{796} Board minutes
\textsuperscript{797} Board policy 7018
Orientation for new board members is the responsibility of the chancellor of the district. When a new board member is elected, the chancellor schedules six orientation workshops framed around the Trustee Handbook produced by the Community College League of California. In addition, all members of the Board of Trustees have their own copies of the Handbook, which is updated annually, and copies of board policies and procedures.

Many of the members of the Chabot-Las Positas Community College District Board of Trustees are active members of the Community College League of California and of the Association of Community College Trustees. These organizations hold regular conferences for training and informing both new and seasoned members.

Trustees keep abreast of trends and developments in higher education by regular participation in national, state, and local organizations devoted to community college issues. Board workshops are held monthly for presentations regarding innovations and projects at each college.

Policies related to election of terms of office and district representation are articulated in board policy 7002 and provide for the staggered terms of office. Board development is consistently and comprehensively addressed through members’ participation and responsibility in the community college system.

**SELF EVALUATION**

The college meets this standard.

**PLANNING AGENDA**

None.

**4B1g** The governing board’s self-evaluation processes for assessing board performance are clearly defined, implemented, and published in its policies or bylaws.

Board Policy 7052 Board Self-Evaluation was adopted on May 15, 2001 and reads: “The Board is committed to assessing its own performance as a board in order to identify its strengths and areas in which it may improve its functioning.”

Board members, including student trustees, participate in an annual board-evaluation process that includes a comprehensive self-evaluation. The purpose of the self-evaluation is to identify strengths and weaknesses in assessing board performance. The evaluation addresses board operations and policies,

---

798 Community College League of California
799 Association of Community College Trustees
800 Board policy 7002
801 Board policy 7052
instructional/student services programs, institutional planning, board-chancellor relations, and community relations.

The Chabot-Las Positas Community College District Board of Trustees concluded its self-evaluation for the prior year on May 14, 2008 at the Trustee Retreat. The evaluation included sixteen areas of review: understanding of the district and college mission and programs; clear goals relevant to strategic planning; policy related decision making; monitoring district policies; evaluation of progress as it relates to goals; review of comprehensive personnel policies; agenda setting and it relationship to timely issues; sufficient supporting materials for board review; involvement of the board; primary oversight of district finances; adequate opportunity to evaluate and comment upon performance of district employees and other items; effective representation of the district to the community; evaluation of responsibilities as an elected official; distinct leadership from district staff; continued information as it relates to relevant needs of the community and the college.

SELF EVALUATION

The college meets this standard.

PLANNING AGENDA

None.

4B1h The governing board has a code of ethics that includes a clearly defined policy for dealing with behavior that violates its code.

The board is capable of reflecting public interest and has an established process for providing continuity in its public representation. Board Policy 7001 defines the organization and authority of the board and its relationship to the college and to the constituents of the community.

Each board member signs and is held accountable to a code of ethics, which states in part, “Each Board member understands that he/she is empowered to set policy in matters that relate to the overall educational program, including, but not limited to, the fiscal stability of the district and personnel practices. Implementation of policy is carried out by the administration.”

The Policy Manual for the Board of Trustees further specifies the responsibilities of the board in relation to the colleges. These duties are detailed and specified in the hundreds of individual policies incorporated into the Manual.
SELF EVALUATION

The college meets this standard. The board has a long-standing code of conduct that has been observed throughout the life of the district and has maintained its reputation for being collegial, professional, and ethical in its treatment of staff and students at this college.

PLANNING AGENDA

None.

4B1i  The governing board is informed and involved in the accreditation process.

The Board of Trustees is informed about the accreditation process and its involvement in the process. The chancellor and the presidents of each college have informed the board of college progress in the accreditation process. Board members are invited at any time to inquire about and add to the process the college is using for its accreditation self-study. The Las Positas College review and evaluation of the self-study has been made available to the board through an open source technology site as well.804, 805, 806

SELF EVALUATION

The college meets this standard. The district currently has a vacant position in the Vice Chancellor of Educational Planning and Services. Because of this unique vacancy at the time of the self-study process, the college has indicated a desire for the position to be filled so that continued response to the self-study can be reviewed and planned for by a committed district employee to the accreditation process.

PLANNING AGENDA

None.

4B1j  The governing board has the responsibility for selecting and evaluating the district/system chief administrator (most often known as the Chancellor) in a multi-college district/system or the college chief administrator (most often known as the president) in the case of a single college. The governing board delegates full responsibility and authority to him/her to implement and administer board policies.

804 Board minutes: 1/15/08
805 Board minutes: 2/19/08
806 Board minutes: 3/18/08
without board interference and hold him/her accountable for the operation of the district/system or college respectively. In multi-college district/systems, the governing board establishes a clearly defined policy for selecting and evaluation the presidents of the college.

The Chabot-Las Positas Community College District Board of Trustees selects and evaluates the chief executive officer and confirms the appointment of other major academic and administrative officers. Board policies 4005 and 4125 give responsibility to the board for both the appointment and the retention of administrative officers and also the evaluation of the chancellor.\(^\text{807, 808}\)

The Board of Trustees retained the American Association of Community Colleges to conduct three searches for senior administrators. The searches utilized college policy and practices consistent with agreed upon processes, including representation by all constituent groups. The search for a new chancellor resulted in the chancellor appointment in July 2007. Respective searches for two college presidents resulted in appointments beginning in spring 2008.

The board operates as a governance and delegates authority to the chancellor. Board policy 7007 designates the chancellor as the executive officer of the board.\(^\text{809}\)

The evaluation of the chancellor is done on an annual basis based on predetermined goals and objectives. The chancellor provides goals and priorities for the Board of Trustees to review and to provide feedback. The chancellor submitted goals and priorities June 17, 2008, for the year 2008-2009. The process will include input, assessment, and review by the board and a written response to the chancellor by the board president. This response reflects comments from all the board.\(^\text{810}\)

Evaluation of the president occurs annually with a similar process of chancellor review of submitted goals and objectives by the president of the college. The president shared the approved goals and objectives with the campus at large at the first all-college meeting, September 2008.\(^\text{811}\)

**SELF EVALUATION**

The college meets this standard.

**PLANNING AGENDA**

None.

---

807 Board policy 4005  
808 Board policy 4125  
809 Board policy 7007

811 Presidential goals 2008-09
4B2 The president has primary responsibility for the quality of the institution he/she leads. He/she provides effective leadership in planning, organizing, budgeting, selecting and developing personnel, and assessing institutional effectiveness.

4B2a The president plans, oversees, and evaluates an administrative structure organized and staffed to reflect the institution's purposes, size, and complexity. He/she delegates authority to administrators and others consistent with their responsibilities, as appropriate.

In 2007, Las Positas College’s president since 2002 retired. For eight months after her retirement, the college had an interim president. The current president of the college was then hired to begin in spring 2008. Maintaining the existing administrative organization, the president delegates the day-to-day operations of academic services and student services to the respective vice presidents. Each vice president oversees and evaluates the planning, organization, budget, and personnel activities through shared governance committees, division meetings, and dean participation. The organizational chart for each area, academic services and student services, demonstrates the lines of authority for various units.\textsuperscript{812}

Additional institutional responsibilities have been given to various supervisors and specialists within both the academic services and student services areas. The college also employs program coordinators who have a variety of responsibilities within the academic services and student services sectors. Shared governance committees provide additional leadership in planning and organization.\textsuperscript{813}

The college’s administrative structure is reviewed through the educational master plan and evaluated for effectiveness and increased service to the college. Continued organizational refinements will be made by the college president and her staff to ensure that the college meets the high demand for services as the college grows.\textsuperscript{814}

SELF EVALUATION

The college meets this standard. The president oversees an effective organizational structure and continues to delegate to administrators and others responsible for student learning and success. Although academic services and student services are separate areas, both provide integrated services to the students of the college.

PLANNING AGENDA

None.

\textsuperscript{812} Organizational chart \\
\textsuperscript{813} Shared governance committees \\
\textsuperscript{814} Educational Master Plan
4B2b The president guides institutional improvement of the teaching and learning environment by the following:

- establishing a collegial process that sets values, goals, and priorities;
- ensuring that evaluation and planning rely on high quality research and analysis on external and internal conditions;
- ensuring that educational planning is integrated with resource planning and distribution to achieve student learning outcomes; and
- establishing procedures to evaluate overall institutional planning and implementation efforts.

Within the context of the teaching and learning environment that she inherited, the president continues to guide the college in its upcoming review and approval of the revised college mission statement; and she will also guide the college in its next review of values, goals, and priorities. The president continues to work on the implementation of the facilities planning through the college Measure B bond and continues to work with the college in the continued implementation of student learning outcomes development, assessment, and evaluation.

**Values, Goals, Priorities:** The college mission has been modified through the Planning and Budget Committee and has been reviewed by the Academic Senate and by the faculty divisions.\(^{815}\) In fall 2008 the president took the revised mission statement to the college at large via the college Town Meeting, where it was discussed as a part of the institutional review and evaluation of college purpose.

The president also works with the College Council on all college-wide policy decisions, ensuring that all constituency groups have an opportunity to review and discuss the options being considered and to bring their input to the Council before a decision is rendered. Final approval of the mission statement rests with College Council. Continued review of the college values, goals, and priorities is a part of the educational master plan process as well as the new program review process.\(^{816}\) The former planning resides in the Office of the President and the latter in the Offices of Academic and Student Services.

**Research and Analysis:** The Office of Institutional Research and Planning reports directly to the president. This office has provided the college with exceptional service and important data for program review, basic skills, student success, and student retention, as well as reports developed for discipline-specific outcomes. The information produced by the Office of Institutional Research and Planning is disseminated to the campus through Town Meetings, at Planning and Budget Committee meetings, and through the office website. The Office of Institutional Research and Planning conducted two formal surveys in 2007 to measure institutional performance. A Student Satisfaction Survey and a Faculty/Staff Satisfaction Survey were developed, implemented, and assessed. Information from both of these surveys was made available to the college self-study standard groups and was formally reviewed with the college at large in fall 2008. The Student Survey was also reviewed by the college’s associated student body in

---

815 PBC Minutes 09/06/07
816 Program review process
fall 2008. The results of the survey are posted on the Office of Institutional Research and Planning website.

Educational Planning/Resource Allocation: The college has completed its work on closely linking its budget, planning, and evaluation processes through the Program Review Model. The college has been working to integrate this planning into the educational master plan and its resource allocation process as well. To this end, the program review allocation model includes all possible resource allocation areas available on campus, as well as allocation availability through the budget planning within the Office of Academic Services. Linkages between student learning outcomes and resource allocation occur through the Program Review Model as well. The Academic Senate is preparing a proposal for a new faculty hire process to be reviewed for possible inclusion to the Program Review Model. The president continues to work with the Vice President of Administrative Services to determine improved budget development processes and training for faculty as they develop program review plans for disciplines. The president also facilitates the resource allocation for facilities designed to improve educational programs. Through the Measure B bond, the college Facility Master Plan requires several planning task forces to advise the president and the college concerning facility development and program planning.

The newly hired president came to the college in March 2008 and began the process of reviewing data reports, institutional planning reports, district summary reports, and reports specific to the Systems Office and the State of California. In addition to becoming acquainted with the processes of the college, she also spent time discussing integrated institutional process with the Director of Institutional Research and Planning. Within that discussion, the president reviewed how processes are driven and what accountability measures are included in processes. Finally, the president conducted a series of “Listening Tours” with the college as a whole and from that developed a strategic plan based on six priorities:

1. Provide visionary leadership
2. Identify and support adequate resources for student, staff, and faculty
3. Commit to excellence in teaching, student learning, and scholarship
4. Create a diverse and supportive academic community
5. Craft a culture of collective responsibility
6. Advance a culture of critical reflection

Each of these strategic priorities has individual goals and timelines built in for completion and accountability. The president will provide status reports to the college community about each strategic goal, and at the end of each

822 President’s strategic plan
academic year she will coordinate a series of measures to evaluate each goal and its effect on the institution as a whole. Built into this series are survey instruments which will be conducted and assessed. The data provided will be built into the institutional evaluation processes.

SELF EVALUATION
The college meets this standard.

PLANNING AGENDA
1. Work with college processes to integrate evaluation measures through the use of research and dialogue.
2. Develop links between completed institutional goals and institutional effectiveness.

4B2c The president assures the implementation of statutes, regulations, and governing board policies and assures that institutional practices are consistent with institutional mission and policies.

The president is responsible for the implementation of statutes, regulations, and governing board policies, and she assures that the institutional practices are consistent with institutional mission and policies.823 The president meets with both the Executive Cabinet and the Administrative Council to discuss the above and to make certain that there is consistency in implementation. Consistent monthly meetings with the representatives of Classified Senate, Academic Senate, and the Associated Students of Las Positas College offer the president opportunities to discuss board items, regulation issues, and other statutes that affect institutional practices.824 The president also holds monthly meetings with the representatives of both the faculty and classified union representatives.

SELF EVALUATION
The college meets this standard. The president assures the implementation of statutes, regulations, and governing board policies and assures that institutional practices are consistent with institutional mission and policies.

PLANNING AGENDA
None.

823 Board policy 2012
824 College Council minutes
4B2d  The president effectively controls budget and expenditures.

The president is held accountable to the district for the college resource expenditure. On a monthly basis, she meets with the Vice President of Administrative Services to review and discuss budget implications, and she ensures that we are making progress in accomplishing responses to audit recommendations. She has integrated quarterly updates to the budget into the executive staff meetings for review and discussion. Finally, the president is responsible for effective resource expenditures through the college Measure B facilities planning and through the facilities committee. Her participation in the Measure B weekly meetings provides feedback and planning for facilities needs and appropriate budget to meet those needs.

SELF EVALUATION

The college meets this standard.

PLANNING AGENDA

None.

4B2e  The president works and communicates effectively with the communities served by the institution.

Since arriving at Las Positas College in the Spring of 2008, the new president has worked intensely to communicate with the external communities served by the college. Foremost, this has been accomplished through the formation of a Presidential Advisory Council. The Las Positas College Presidential Advisory Council is a group of community leaders who share their insights and counsel concerning trends, underserved populations, educational opportunities, strategic directions and collaborative program efforts within the Tri-Valley region. The Presidential Advisory Council advises the President on strategic issues facing the College.

Vitally interested in the future of Las Positas College, this group of high-level advisers provides the College President with insight and advice from positions of diverse experience and tremendous success in their fields. Members of the Presidential Advisory Council serve renewable two-year terms. Members are selected by the President, and have demonstrated leadership for the College and in their own communities in various ways. Additionally, as a resource to the president they help to develop strategies and resources to strengthen the College within the context of its mission and traditions.825

In addition to this group, the president continued her introduction to the community by connecting with the three feeder school districts, including

825 LPC Website President's Page, Advisory Council
presenting to the school board of one. Feeder high school administrators have met with the president twice since her arrival through our Annual High School Breakfast. On the other end of the spectrum, outreach and dialogue continues with our major transfer institutions, including active solicitation from them as it relates to transfer education and curriculum development.

The president has developed strong relationships within the community and works to position the college in the business community. She has been an active presenter to various community groups since her arrival, and has recently launched a new communiqué’ to external stakeholders through a quarterly “President’s Newsletter to the Community.” This communication strategy joins several tactics she has deployed to enhance communication with both the internal and external community; those strategies include the following: monthly Yak ‘N Sak dialogues, implementing, producing monthly video message to the internal college community, sharing her monthly written report to the Board of Trustees to the college community, providing summaries of the business meeting of the Board of Trustees to the college community, and ensuring the notification of college governance meetings to the college community.

Finally, the president works to more tightly couple the college with other community colleges across this country. As such, Las Positas College is the newest member of the Strategic Horizon Network, a consortium of fifteen community colleges dedicated to examining the best strategies to enhance institutional capacity by identifying and importing ways of business from organizations outside of education into practice on their campuses.

SELF EVALUATION

The college meets this standard

PLANNING AGENDA

None.

4B3 In multi-college districts or systems, the district/system provides primary leadership in setting and communicating expectations of educational excellence and integrity throughout the district/system and assures support for the effective operation of the colleges. It establishes clearly defined roles of authority and responsibility between the colleges and the district/system and acts as the liaison between the colleges and the governing board.

4B3a The district/system clearly delineates and communicates the operational responsibilities and functions of the district/system from those of the colleges and consistently adheres to this delineation in practice.
The written delineation of the operational responsibilities and functions of the district is articulated in the Policy Manual for the Board of Trustees and in the organizational delineation chart provided to the colleges on the district website. The latter chart was developed in August 2008, but it has not been widely communicated to the college at large. Further rules and regulations provided to the colleges exist in the Administrative Rules and Procedures included in board policy. Delineations of primary and secondary leadership are also noted on specific job descriptions with clear lines of authority and direct supervision indicated on the job description.

The district office is organized into ten departments. Each department is headed by an administrator who reports to a vice chancellor or directly to the chancellor.826

**Chancellor’s Office**
The office of the chancellor serves and supports the local governing board and also provides leadership to the campuses. The chancellor’s office is responsible for helping the district fulfill its mission.

**Educational Services and Planning**
The Vice Chancellor of Educational Services and Planning reports to the chancellor and is responsible for providing overall leadership in planning, development, implementation, and coordination of the instructional and student support programs of the district, including the areas of research, strategic planning, workforce and economic development, and educational technology. This post is currently unfilled.

**Contract Education/Economic Development**
The Dean for Contract Education/Economic Development reports to the Vice Chancellor of Educational Services and Planning and is responsible for the Training and Development Solutions (TDS) for Business and Education Partnerships which serves businesses within the district by providing high-quality, high-value customized training for employees. TDS works cooperatively with Chabot and Las Positas Colleges to provide instruction, curriculum development, and technical services. TDS is also chartered to serve as a full partner in strengthening the economic development and vitality of the communities and cities in the Chabot-Las Positas Community College District by working to attract new businesses and retain those businesses, large and small, already in place.

**Information Technology Services (ITS)**
The Chief Technology Officer reports to the chancellor. The ITS department provides administrative computing services for the colleges and district communities and essential utility services that form the foundation for administrative and instructional computing throughout the district.

**Public Relations and Governmental Affairs**
The District Director of Public Relations and Governmental Affairs reports to the chancellor and is responsible for overseeing and coordinating media relations, government relations, publications, and marketing communications within the
The district also supports the colleges’ efforts to increase their visibility in the district’s service area and with targeted recruiting audiences.

**Human Resources (HR)**
The Director of Human Resources reports to the chancellor. Human Resources ensures that hiring processes are in accordance with the District Faculty and Staff Diversity and Equal Employment Opportunity Plan and other state and federal regulations. The department also is responsible for providing accurate personnel data to the offices of the California Community Colleges and other agencies. HR is also responsible for maintaining employee records and enrolling staff in benefits plans. In 2008, the Director of Human Resources position was enhanced to a Vice Chancellor position.

**Business Services**
The Vice Chancellor of Business Services reports to the chancellor and is responsible for providing professional, consumer-oriented services to the colleges and district, including the students, faculty, staff, and other constituents of the district. The vice chancellor is responsible for keeping the district financially solvent and stable. The Business Services unit includes:

- Accounting/Financial Aid;
- Accounts Payable/Accounts Receivable;
- Budgeting;
- Maintenance and Operations;
- Purchasing/Warehouse

**Accounting**
The Accounting Office is administered by the controller, who reports to the Vice Chancellor of Business Services. The Accounting Office processes the financial transactions of the district. It ensures that obligations are paid and properly recorded in a timely manner, that revenues are recorded properly, and that periodic reports are prepared for both internal and external use.

**Facilities Planning and Management**
Facilities Planning and Management is administered by the Vice Chancellor of business services. This office is responsible for providing professional leadership for the planning, development, and management of all district-owned and operated facilities. The process of constructing, renovating, rejuvenating, and repositioning sections of a college campus is an ongoing endeavor. The process also involves planning, effective communication, phasing, and scheduling with a variety of key personnel and agencies including the State Chancellor’s Office, administrators, students, staff, architects, engineers, contractors, as well as the Maintenance and Operations Department.

**Maintenance and Operations (M&O)**
Maintenance and Operations is administered by a director who reports to the District Director of Facilities Planning and Management. M&O is responsible for keeping the district’s facilities and equipment at the highest level of maintenance, cleanliness, appearance, and safety possible. M&O also works closely with the district’s architects, facilities project managers, and contractors to accomplish major capital and deferred maintenance projects.
Payroll
The Payroll Office is administered by the assistant controller who reports to the Vice Chancellor of Human Resources. The Payroll Office processes the payments of wages and salaries to staff, files required federal and state reports, enrolls staff in benefits plans and maintains employee records.

Purchasing
The Purchasing Department is administered by the Manager of Purchasing and Warehouse Services who reports to the Vice Chancellor of Business Services and is responsible for:

- Processing requisitions into purchase orders for supplies, equipment, and services in a timely manner;
- Purchasing without prejudice, to obtain the maximum value for each dollar expended; and
- Ensuring shipments of supplies and equipment are correct and undamaged and delivered to departments in a timely manner.

The district has presented its strategic plan to all employees of the college. The intent of the plan was to communicate a tool for developing plans, marketing progress of those plans, and evaluating the success of those plans. The plan integrates the district’s external and internal demands with its purposes, intents, processes, and goals and provides the college a formalized means through which the college can view and keep track of district expectations and operations based on district responsibilities. The Strategic Plan was introduced by the previous chancellor as an outcome for the district at the 2006 convocation. Board review of the plan occurred in 2007. The plan serves as an internal document that identifies key areas in which the district office and the college will work together to streamline, improve, and maximize their shared functions.

SELF EVALUATION
The college meets this standard. The college president, through the Chancellor’s Council and Cabinet, collaborates with the district on matters affecting the college and the district. Task forces created from these committees may present recommendations or processes presented to the district for review. The Strategic Plan provides an additional roadmap for future planning and role delineation. Specific roles and job descriptions for the district administration are available through Human Resources. Although the Strategic Plan was board-approved, consistent feedback from college personnel may not have been provided to the institution at large.

PLANNING AGENDA
1. Review and evaluate annually the District Strategic Plan to determine completed goals and appropriate input, revisions, or improvements. This should be done in collaboration with the district.

827 CLPCCD Systems Strategic Plan
4B3b The district/system provides effective services that support the colleges in their missions and functions.

Centralized support is provided for the colleges in the areas of Business Services, Facilities Planning and Operations, Human Resources, Educational Services (currently vacant), Information Technology, Contract Education and Economic Development, and Public Relations and Governmental Affairs. The district promotes and supports the work of the colleges through specific services and their related responsibilities. 

SELF EVALUATION

The college partially meets this standard. The Staff Survey notes Physical Resources, Human Resources, Technology Resources and Financial Resources as separate questions for standard three. However, since all of the above require integration of both the college and the district support, the responses are relevant to standard four as well. Results from the Staff Survey note the respondents see consistent support in all areas except for Financial Resources, where a number of responses noted “Neither Disagree or Agree” as a majority response. This occurred when asked about institutional guidelines and processes for financial planning and budget (clearly defined) and when asked whether institutional guidelines and processes are followed. The inference drawn is that the college is not aware of guidelines and processes to be evaluated. In addition, the staff survey noted a high degree of disagreement when asked whether the chancellor efficiently manages financial resources, and whether the chancellor implements budget expenditures based on district-wide priorities. However, the college was given an opportunity to evaluate and review the support of district services in the district Strategic Plan process where many of the responses were incorporated into the improvement of services.

PLANNING AGENDA

1. Communicate guidelines and processes for financial planning and budget development, and evaluate those processes to ensure they are followed. This should be done in collaboration with the district.

4B3c The district/system provides fair distribution of resources that are adequate to support the effective operations of the colleges.

The district uses a formula-based resource allocation model to allocate resources to the college for its needs in adjunct personnel and other hourly costs. Until 2005, the college maintained a healthy one-million dollar reserve that provided the district additional growth in years when growth was needed. By 2007, the reserves were depleted and a review of the formula and adequate

---

828 Board of Trustees
funding was undertaken by the vice presidents of academic services from both colleges, in collaboration with the district office. That review did not indicate to the district that the formula was inadequate for continued growth, though some costs due to contractual obligations were noted; however, the college took careful steps to reduce budget expenditures in the 2008 fiscal year and still incurred continued deficit.\footnote{2008-09 Adoption Budget} Distribution of resources and funds has been a discussion topic in several committees on the campus including the Planning and Budget Committee, College Enrollment Management Committee, Executive Council and at Town meetings.\footnote{Committee listing}

Distribution of funding beyond the allocation model is based on growth targets and the necessary funding to meet the district growth target. This process occurs in the District Enrollment Management Committee with feedback from both colleges as part of the process.\footnote{District Enrollment Management Committee} Percentage of growth allocation is a collaborative decision between the colleges and the district.

There is no clear indication to the college of how educational programs and services budgets are allocated or planned for, especially in light of program review at the college level. Increased costs of supplies and other program needs separate from personnel have not been addressed within the district allocation model, and increases due to supply cost increase have not been addressed by the college or the district.

SELF EVALUATION

The college partially meets this standard. Although there has been dialogue and review of the resource allocation needs, the model is not transparent to the college at large. In addition, the college has worked diligently on providing the best program review model for budgetary planning purposes, but there is no indication of increased monies allocated to the college for program review planning and budget needs.

PLANNING AGENDA

1. Work with the district on a new formula and allocation model for fiscal resources, that more accurately reflects college needs and that can provide for a more transparent budget allocation process.

\textbf{4B3d} The district/system effectively controls its expenditures.

The district has positioned itself to increase resources through several key accomplishments. The first was the negotiation of favorable rates for the district’s property and liability insurance premium (a reduction of rates). The second was bond financing that allowed the district to leverage its assets to generate
significant resources. Because of these accomplishments, the district has provided resources for its effective control of expenditures and has allowed the district to pay for contractual increases, benefit increases, utility increases, insurance increases, and funding for approved positions.

The largest expenditure is for salaries and benefits. Review of increased costs in this area has been undertaken by the board and has been discussed at board workshops. The district has also taken responsibility of the Facilities Bond Budgets, and along with the Bond Oversight Committee, oversees the effective control of expenditures as they relate to Measure B.832

**SELF EVALUATION**

The college meets this standard.

**PLANNING AGENDA**

None.

4B3e The chancellor gives full responsibility and authority to the presidents of the colleges to implement and administer delegated district/system policies without his/her interference and holds them accountable for the operation of the colleges.

The college presidents’ responsibilities and authority for implementation and administration of district policies are described in the president’s job description and in shared governance organization documents.833 The chancellor gives the president this authority and holds the president accountable for the operation of the college through an annual performance evaluation process. As a part of the evaluation process, the president of the college establishes goals, and the chancellor and president assess the progress on these goals annually.834

Additionally, the chancellor meets weekly with the presidents and vice chancellors to discuss areas of interest or concerns related to the operation of the college or the district. The president also attends meetings of the Board of Trustees where the president reports on college initiatives, programs, and various college expenditures in compliance with district policies and procedures.835

**SELF EVALUATION**

The college meets this standard. The President of Las Positas College confirms that the chancellor gives her full responsibility and authority to implement and administer delegated district policies without his interference and holds her accountable for the operation of the college.

833 College Governance Documents
834 Presidential priorities
835 Sample board minutes
None.

4B3f The district/system acts as the liaison between the colleges and the governing board. The district/system and the colleges use effective methods of communication, and they exchange information in a timely manner.

As the Chief Executive Officer of the district, the chancellor acts as the liaison between the colleges and the governing board. All matters that pertain to the college and that need to be considered by the board are submitted to the board by the chancellor on behalf of the colleges.

The district and the colleges use effective methods of communication in a timely manner to relay information to the board and others regarding upcoming board agenda items. Items are widely distributed electronically through the board packet to the board, college managers, Academic Senate representatives, union leadership, student leaders, the press, and other interested community members in advance of the board meeting.836

The board packet contains board reports which are summaries prepared by the responsible college or district personnel for review by the chancellor. Minutes of the board meetings are posted on the district website, as well as any minutes from previous workshops.837 Agendas are also posted on the district website.838

The college president, the college vice presidents, and the presidents of the Academic Senate, Classified Senate, and Associated Students all attend the board meetings and report to the board and to their constituencies. The Board of Trustees includes a student trustee who voices the concerns and interests of district students as well.

There are a variety of administrative committees through which communications between the college and the district may occur. The Chancellor’s Cabinet consists of the college presidents, vice presidents, chancellor, vice chancellor and other appointed district personnel. The Chancellor’s Council includes constituents at the college faculty and classified level along with college presidents and district administrative representation. The District Curriculum Council meets with representation from both colleges to discuss matters of curriculum and program development. The District Enrollment Management Committee meets with representation from faculty association, college administrative representation, as well as district representation. This committee discusses areas of enrollment management, resource allocation, efficiency, and scheduling.839

836 Electronic board packet dissemination
837 Board minutes
838 Board agendas
839 District Enrollment Management Committee
Additional task forces are created to focus on specific district and college concerns. A recent example of this is the task force created to implement recent Title 5 changes. In addition, the district communicates college news through its public relations and governmental affairs office which develops and implements newspaper announcements, press releases, and a variety of community marketing publications.840

In the fall of each year, the district welcomes all faculty and staff to convocation for information related to the district and the colleges.841

**SELF EVALUATION**

The college meets this standard. The role delineation of the district as liaison between the college and the governing board is effective. College information or initiatives or any other business requiring board discussion or approval are placed before the board with appropriate college personnel in attendance to answer questions if necessary. The availability of online board information is also an efficient method by which to communicate district and college matters up for discussion or review.

**PLANNING AGENDA**

None.

4B3g The district/system regularly evaluates district/system role delineation and governance and decision-making structures and processes to assure their integrity and effectiveness in assisting the colleges in meeting educational goals. The district/system widely communicates the results of these evaluations and uses them as the basis for improvement.

The district does not have a formal evaluation in place for this standard, although there was informal feedback given through the Strategic Plan process initiated by the district.842 These items are reviewed, evaluated, and discussed through other forums without a systematic approach. Workshops given to the board do promote opportunity for discussion and response to decision making structures and college goals. Board retreats also provide an opportunity to focus on strategic matters including goal setting and policy making. District committee meetings provide discussion and dialogue about governance and evaluation of decision making processes that relate to both the college and district role delineation issues.

---

840  Press releases and marketing materials
841  Convocation
842  CLPCCD Systems Strategic Plan
Evaluation takes place at the college at the program level through the program review process and the review and update of the educational master plan. Evaluation of planning processes, decision making, and role delineation occurs within all the shared governance committees and within the disciplines themselves.

As a part of the self-study process, the district has developed a function map/chart that outlines the district and college responsibilities as they relate to accreditation standards. This chart is intended to illustrate how the college and the district manage the distribution of responsibility by function and is based on board policy, administrative rules and procedures, and the strategic plan.843

**SELF EVALUATION**

The college partially meets this standard. Although there are numerous opportunities for delineation of roles, decision making, and evaluation of processes as these relate to effectively meeting college goals, there is no standard evaluation by which constituents could participate. In addition, with clear role delineations created by the district for the self-study, evaluation and response from college sectors is appropriate and necessary. It is important to the success of the college that the district employs strategic and systematic venues for response to district services and support. The district has developed clearer operational responsibilities and functions but assessment venues are not consistent nor systematically communicated to the college.

**PLANNING AGENDA**

1. Use the newly created district delineation of functions map as a foundation for discussion between the college and the district to review primary and secondary roles and to promote improvement of processes related to those roles.

843 District delineation of functions map
STANDARD ONE:
INSTITUTIONAL MISSION AND EFFECTIVENESS

1. Incorporate regular review of the mission statement and values statement into the institutional planning cycle.

2. Develop an instrument for tracking links between institutional decisions and the college mission.

3. Train committee chairs on the character and use of dialogue as a tool for continuous improvement of programs and processes.

4. Work with committees on the process for communicating committee outcomes and information to campus constituents. Work with campus constituents on communicating needs or concerns through committee representation.

5. Develop and update institutional strategic goals.

6. Make updates to the educational master plan systematic, and include in updates an assessment of progress made toward college goals.

7. Create an annual report summarizing assessment data collected and indicating how and where this data is disseminated to the community.

8. Conduct an institutional review of the college’s major planning and allocation processes in coordination with program review.

9. Assess the effects of changes made to existing process at the college on a regular basis.

10. Develop and implement a review process for non-instructional units.

11. Develop an integrated planning model that shows district links to program review and the educational master plan.

STANDARD TWO:
STUDENT LEARNING PROGRAMS AND SERVICES

1. Improve the orientation and assessment process for increased student success by working with math and English faculty on consistent validation of assessment cutoff scores.

2. Make orientation for new students mandatory.

3. Discuss and review planning to offer technical support to online students on Saturdays and Sundays since many students take online courses because they work full-time during the week.

4. Identify certificate and major SLOs.

5. Assess the alignment of major and certificate SLOs with core competencies.
6. Articulate the role of SLOs in college policies, processes, and resource allocation.

7. Identify and query advisory committees to determine if any are inactive.

8. Seek consistent student representation on advisories.

9. Monitor the regular posting of advisory committee minutes.

10. Create opportunities for increasing the number and scope of learning communities and interdisciplinary courses.

11. Develop student learning outcomes for all majors and certificates.

12. Complete the SLO development for courses, certificates, and majors.

14. Investigate the correlation between outcome achievement and the awarding of credit as SLO data becomes available.

15. Develop major and certificate SLOs.

16. Assess the alignment of GE course SLOs with core competencies, and establish a cyclical process whereby the alignment of GE course SLOs with core competencies is regularly reviewed.

17. Review a feasible vehicle for tracking student employment following graduation as well as for tracking success rates on licensure/certification exams.

18. Assess policies and processes for reviewing student documents and where appropriate create written procedures for consistent actions.

19. Identify resources to provide sufficient counseling services.

20. Use SLO data to modify practices, as the data becomes available.

21. Combine the program review outcomes from Academic Services with those of Student Services to create a more integrated college approach to planning and resource development.

22. Determine appropriate planning based on the student services site visit report.

23. Plan and develop a library budget that is part of the institutional process that ensures library funds that are stable and consistent which will allow for better planning to meet student and faculty resource needs; ensure student access to resources both on and off campus and provide a suitable physical environment for both student learning and a growing collection.

24. Begin the college dialogue on Information Competency (IC), and develop a formalized plan that includes both Library-based information competency courses and an interdisciplinary approach.
25. Plan and design a dedicated hands-on instructional lab for Library orientations, workshops, and research skills classes.

26. Work with Campus Security and Health & Safety Committee to create a plan to address the increasing security and safety needs of Library staff, students and other patrons.

27. Continue to plan and explore remodel ideas in preparation for the future remodel to ensure that an appropriate infrastructure and environment adequately accommodates the needs of library services and staff, student access, and information competency instruction.

28. Work with the Director of Institutional Research and Planning to develop a survey tool that can be administered on a regular basis to provide more quantifiable data for Library purposes.

29. Collaborate with the Director of Institutional Research and Planning to improve Library questions for the campus wide student / faculty satisfaction surveys.

**STANDARD THREE: RESOURCES**

1. Approve the consultative contract faculty hiring procedure for implementation in 2009.

2. Provide consistent information and training for the college when hiring processes change.

3. Develop and adopt a code of ethics for staff and administration.

4. Assess the impact of growth and changing service demands as outlined in program reviews and the educational master plan in comparison to staffing levels for faculty, staff, and administrators.

5. Develop and disseminate HR policies and procedures that are clear and accessible to the college on a continued basis. Provide opportunity for college personnel feedback on effectiveness of procedures and forms.

6. Work with the district on developing a regular assessment of employment equity and diversity in relation to the college mission, and communicate that assessment to the college.

7. Develop a well-coordinated and appropriately funded staff development program that incorporates faculty, classified, and administration professional development into a centralized program with a centralized location.

8. Systematically evaluate staff development committee processes and opportunities, and link staff development to increased program and service effectiveness.

9. Ensure that all faculty and staff position needs are identified in respective program reviews and that revisions to the educational master plan include long-term projections for staffing in faculty, staff, and administrator positions. Encourage classified staff participation to this process.
10. Develop a long-term projection for staffing in administrative, classified, and faculty positions, in conjunction with budget development.

11. Include a process for requesting new administrator positions into the request cycle outlined by the Planning and Budget Committee.

12. Review, revise, and streamline existing policies and procedures related to the District Human Resources Office. Work in consultation with the district on revised processes.

13. Resolve instances of wheelchair inaccessibility caused by technical difficulties or construction delays.

14. Install an emergency communication system in each classroom.

15. Provide a collaborative and transparent process for the consideration of what facilities/programs to defer.

16. Develop a TOC business plan for each new facility to accurately estimate true costs.

17. Provide faculty training related to how institutional research is integrated and supportive of institutional planning and evaluation at the college and through that training assist faculty in determining what the data demonstrates.

18. Evaluate the need for increased staffing in the college information technology area to accommodate college growth.

19. Research and initiate disaster preparedness and recovery procedures.

20. Establish a transparent process, with documentation, regarding the college’s internal technological prioritizations, purchases and requests.

21. Evaluate the current program review processes of the college to ensure that goals and plans are completely and clearly linked to budgetary needs and planning.

22. Ensure that timelines and processes for resource opportunities are consolidated and posted in a central area so all faculty, staff, and students are adequately informed.

23. Request increased efforts by district IT to improve user training in Banner software and to provide access to secure areas to more staff with appropriate clearance and accountability.

24. Devote district resources to additional user-friendly financial applications.

25. Increase communication levels between college and district regarding progress reports on changes and enhancements to Banner software.

26. Ensure that a prudent reserve is established at the college for contingencies and emergencies, and communication between the district and the college should include planning for these contingency funds.
27. Evaluate the district approach to collective bargaining to ensure that business office personnel are included in costing out the short term and long term consequences of negotiated issues.

28. Establish a district task force to outline processes and procedures that could achieve improvements. Process mapping and other evaluative work should be utilized to ensure appropriate review of systems.

29. Work with the district in reinstating the Banner Finance (and other) users’ group to maximize the software system’s capabilities in support of college needs.

30. Develop a financial management training program for budget managers at the college.

31. Establish an evaluation system or scoring process for measuring and communicating performance at reaching goals, evaluating those goals and the strategies used to reach them, and responding to both shortfalls and surpluses in funding.

**STANDARD FOUR: LEADERSHIP AND GOVERNANCE**

1. Work with college processes to integrate evaluation measures through the use of research and dialogue.

2. Develop links between completed institutional goals and institutional effectiveness.

3. Review and evaluate annually the District Strategic Plan to determine completed goals and appropriate input, revisions or improvements. This should be done in collaboration with the district.

4. Communicate guidelines and processes for financial planning and budget development, and evaluate those processes to ensure they are followed. This should be done in collaboration with the district.

5. Work with the district on a new formula and allocation model for fiscal resources that more accurately reflects college needs and that can provide for a more transparent budget allocation process.

6. Use the newly created District Delineation of Functions Map as a foundation for discussion between the college and the district to review primary and secondary roles and to promote improvement of processes related to those roles.
Success is not a place at which one arrives but rather the spirit with which one undertakes and continues the journey.
