What is the OEI?

- ❑ It is a statewide effort to dramatically increase the number of CCC students who obtain associate degrees and transfer to four-year universities by providing online courses and support services within a single environment.
- ❑ Allows students from any CCC to take courses from any other CCC and receive credit
- ❑ Brainchild of Gov. Brown. Funding from the state legislature
 - ❑ \$16.9 million for Dec. 2013-June 2014
 - ❑ \$10 million a year for the next 4 years.
 - ❑ Money pays for OEI staffing, statewide technology solutions, etc.

Key Points

- ❑ Initial focus will be on Associate Degree for Transfer courses
- ❑ For subsequent phases, the focus will be other degrees and courses, basic skills courses, and credit by exam
- ❑ Teaching college (the college teaching the course) and home college (the college where the student is enrolled).
 - ❑ Teaching college issues credit, gets FTES
 - ❑ Home college provides the students
- ❑ Reciprocal agreements between all colleges for enrollment priority, assessment scores, prereqs, and transcript transparency

Key Points

- ❑ Other services include online tutoring, proctoring, high tech/high touch analytics
- ❑ A federated ID
- ❑ Colleges have to opt in, and once they do, they will have to follow all rules and procedures
- ❑ All courses will be reviewed for quality and web accessibility
- ❑ A common course management system

Common CMS

- ❑ Request for Proposals sent Oct. 27 with responses due Nov. 26
- ❑ A contract is supposed to be signed by March 30
- ❑ Go live with pilot courses Summer or Fall 2015
- ❑ LPC and Chabot would probably have to agree to opt in or not together

OEI Pilot – not LPC

- ❑ 24 colleges were selected to participate in the pilot
- ❑ Colleges divided into 3 groups of 8 each:
 - ❑ Full Launch Colleges, Student Readiness Staging Group, and Tutoring Staging Group
- ❑ 19 courses selected to go into the exchange for Summer/Fall 2015
 - ❑ Based on C-ID approval status, inclusion in ADTs, student demand data, and course fulfillment of transfer area requirements.
 - ❑ Courses include Intro to Psyc, Intro to Phil, College Composition, Physical Geology, etc. See web site for full list.

Some issues to consider

- ❑ Additional course options for students; faster path to graduate/transfer
- ❑ Funding guaranteed for 4 more years
- ❑ Possibility of using a different CMS
 - ❑ Committees and areas that use Blackboard might not be able to use a CMS in the future
- ❑ Training, support, and CMS administration moved from local to state level
- ❑ Possible contractual issues
- ❑ Possible technical issues connecting our systems to the state's systems
