   A. Courses
      • Art History Course Presented by David Wagner- Currently Las Positas
does not offer a course in modern art, which is a specialty of a long
time adjunct faculty member. Marina Lira raised a concern that much
of the content of the course overlapped with ARHS 5. ARHS 5 was
submitted for C-ID ARTH 150, but was not approved. David Wagner
stated that he will update ARHS 5 and eliminate overlapping content.
He believes that in ARHS 5, since there is not currently a modern art
history course, faculty are trying to put too much information into one
course. This course will move forward for voting next meeting.

Updates include increasing content on vineyard soil and the basics of irrigation. This course will be tabled until VWT 12 can be submitted for approval at the same time with the same course outline. For Horticulture 58 a no unit value lab was added by mistake and removed from the course outline. For this course updates included textbooks and simplifying the measureable objectives, as they are currently too restrictive. Revisions to HORT 60 includes typical assignments, textbooks and included a statement about other materials that students may need to have. HORT 71 is a new course on Hydroponics and Aqua-Urban horticulture, which are topics that are only touched on briefly in our current horticulture courses. This course will offer students more job opportunities. Topics will include backyard food production, using the nitrogen cycle, water chemistry, and safe food production. **Humanities Courses Presented by Elizabeth Wing-Brooks** - HUMN XX is a new course that will incorporate a lot of the content of HUMN 44, which is being deactivated as it focuses on the narrow topic of music in film. This course will focus more on film analysis and film history, but is not a practical film making course. The course is requesting IGETC Humanities, but Marina Lira suggested that it might actually fall under both Arts and Humanities. It was decided that the course will be submitted under both categories. In an effort to globalize curriculum HUMN ZZ includes content on the developments in film history around the world including film traditions in Africa, the Middle East, and Asia. The course content includes the basics of how to analyze film and more about national traditions and history. The is a course that is common at many other Community Colleges. These courses will move forward for voting next meeting.

**Math 55C and 65 C Presented by Ashley McHale** - These courses are designed to be one-way co-requisite support courses for Elementary Algebra and Intermediate Algebra. This allows students who placed one level below the next level to take the higher level if they take the support course in conjunction. The courses are meant to develop study skills and catch up on certain topics. These courses are a means for students to accelerate through the math program. These courses are common practice at other community colleges. These courses will move forward for voting next meeting.

**Math 55E, 65E, and 107E Presented by Jennie Graham** - Jennie Graham reported that the Math Department is changing their Math X program to the Emporium Program, which will no longer allow students to take a course in two parts. Students will be manually added into this course if they are taking a course in the emporium mode, but have only completed the A portion of the material and will not successfully complete full course. Students will not be able to sign up for these courses themselves and the Math Department has had discussions with Admissions and Records to how they will communicate to them which students will need to be moved into these courses mid-semester. Marina Lira requested that the Math Department come to a counseling meeting in order to fully explain these courses. These courses will utilize online grading in order to free up more time for the instructors to have more contact with the students. These courses will move forward for voting next meeting.
• Math 71A and 71B Presented by Kristy Woods- Kristy Woods reported that the Math Department deactivated Math 71. B. **Programs:**

- **Global Studies AA. -T**
  - *Presented by Catherine Eagan* - The Global Studies AA-T includes the two new Global Studies courses. The AA-T allows students to pick courses from five different areas. Political Science courses could not be added to the degree, as they have not yet been updated. Craig Kutil stated that he had met with Paul Torres and that next semester those courses will be updated. After those courses are updated, the Global Studies AA-T can be modified to include those courses. Catherine Eagan stated that after being in communication with the Economics Department, it was decided to include Macro, instead of Micro, Economics in the degree as it most majors are looking for Macro Economics. Students can still take Micro Economics as an elective. Rajinder Samra in Institutional Planning states that about 20 students a year reported that they would be interested in a Global Studies program. This program will move forward for voting next meeting.

C. **Deactivations:**

- **Courses** - Craig Kutil stated that the Photography Department has decided to deactivate PHTO 52, as the course descriptor was never updated from PHOT at the state and the course would require an updated Course Outline to be submitted to the state. The course has not been offered in quite some time.
  - PHTO 52: Beginning Camera Use

- **Courses in Assist** - Craig Kutil stated part of our effort to clean up our curriculum is to remove courses from assist that are no longer offered. Especially 49’s and 99’s, which in the past the college could offer for one year as an experimental course before submitting the course to the state. Also, many of the courses are from outdated course descriptors, as indicated in bold (EX. ANAT and CRAR).

Programs- Craig Kutil state that the Horticulture 3: Floristry A.S. is being deactivated as the majority of the required courses have been deactivated. The Real Estate and Web Design/ Development are old programs for which students were awarded degrees and show as active in CurricUNET. We are still researching to get as much information as possible on those degrees. Social Science (General) A.A. is the old Social Science degree which students believe that they are receiving, rather actually receiving the Liberal Arts: Social Science A.A. The division that held the majority of the courses, voted to deactivate the program. Also, there was not anyone who wanted to take on the Social Science (General) A.A. for program review.

• Horticulture 3: Floristry A.S.
• Real Estate A.A.
• Web Design/ Development Certificate of Achievement
• Social Science (General) A.A.

7. Discussion Items

Discipline List

Craig Kutil reported that he had heard back from some of the Divisions regarding the discipline list. Starting in the spring the committee will ask a division at a time to come for discussion and approval of their discipline selections. It would be too much for the committee to take on all of the discipline selections for every course at once. There will need to be more discussion for some courses, especially if the multiple disciplines have been selected. A place to indicate a course’s discipline is currently being added to CurricUNET and will be presented for each new future course to the committee.

Support for Updates

Craig Kutil stated that currently he is acting in the role of a Curriculum Technician, which would assist in writing curriculum. He stated that hiring a Curriculum Technician has been discussed in planning for quite some time or to give reassigned time to a full time faculty member to help write curriculum and update degrees. There are several areas that do not have full time instructors, for which curriculum updates are not part of their responsibilities. However, there are funds available to adjuncts in order to make curriculum updates. Some of these courses, which do not have a full time faculty member overseeing them, have not been updated since the 1990’s. There needs to be support for these adjunct faculty members. This will also be on the agenda for the next meeting, as the administrators had a conflicting meeting and could not attend today.

Creating Course Update Cycle

Craig Kutil stated that currently anyone who logs into CurricUNET can pull up a report of when courses should be updated. This relates to how codes and dates are entered into the back end of CurricUNET for courses. Madeline Wiest has been working with Governet so that dates will automatically be entered into the back end of CurricUNET through the course approval process. Then we will be able to see when a course was created, curriculum committee approved, board approved and state approved. That way we would be able to pull a report that will show when a course needs to be updated. Roanna Bennie suggested to Craig Kutil that we create a five-year cycle where every year one division is required to update all of their courses. They would still be able to create new courses and make course modifications at any time. This is necessary because we do have a lot of courses that are out of date, which makes it difficult to update programs. This topic will be on the agenda again for the next meeting.
Non-Credit

Craig Kutil stated that they would like to put together a non-credit taskforce. It has been decided that there will be three levels of non-credit. One level will be tutoring, one will be like a credit course, and then a middle level course. It will be our job, as a committee, to give a recommendation to the academic senate that the criteria in terms of content and rigor. So far the taskforce includes, Roanna Bennie, Kristy Woods, Ashley McHale, and Craig Kutil. Michael Sato also volunteered to participate. There still may be some other people outside of the committee who might also be interested. There are 10 different areas of fully funded non-credit. Categories include Adult Education, Basic Skills, Workforce Training, as well as courses designed to people with disabilities. Full funded courses can be assembled into a non-credit certificate. Non-credit courses are flexibility and repeatable. Non-credit does generate FTES.

Course Catalog Descriptions

Madeline Wiest stated that she has begun work on updating the college catalog for 2017-18. She reported that currently there are inconsistencies in the course descriptions whether the course description includes if the course is CSU GE, IGETC, or local degree applicable. She posed the question to the committee whether they would like to have that information included for every course. The consensus from the committee was that the more information that we can provide students the better.

8. Reports

Vice President’s Report- No Report

Chair’s Report

Craig Kutil reported that he and Madeline Wiest met with Scott Vigallon the Distance Education Coordinator. We will be making some changes to the Distance Education section of CurricUNET, including a previously approved for DE button. There will be updates to the interactions and the Sample DE language will be moved to be the first item in the Distance Education section. Another part of the discussion was about accessibility for individuals with disabilities. DE courses are supposed to be accessible and there is a check box that individuals select that they will make the course accessible, but not sure how to make sure that has been followed through. Canvas is supposed to have increased accessibility features. We are working to make CurricUNET more user friendly and the course outlines a little cleaner. We are going to eventually, as a long term project, add as much information as possible in CurricUNET for degrees, as currently there is not a lot of information.

Articulation Officer’s Report

Marina Lira reported that there is a new bill that was passed with regards to AP scores. It states that community college districts need to have a policy implemented prior to Fall 2017 and if they don’t they revert to following the CSU AP chart. It is not a college policy, but a district policy. It is not foreseen that we will be able to create a policy with Chabot prior to Fall 2017, so the campus will default to using the CSU AP chart. In the fall 2017 catalog any local department decisions with regard to AP scores will no longer be applicable. This will effect both prerequisites and degrees. She also stated that she and Christina Lee, were ready to update the Liberal Arts degrees, but found they were unable to as the majority of the courses were outdated. There will need to be discussions with the disciplines that house these outdated courses to make sure they understand that they will need to update their courses in order to update degrees.
9. Good of the Order: Craig Kutil stated that next semester he hopes to investigate the 9 and 29 courses. Specifically, if we as a college need to have them and, if so, if they need to have updated course outlines. The ASCCC passed a resolution to revert back to the policy that an AD-T could be submitted if the courses were submitted for C-ID, but not yet in effect. This is in part because there is a lack of people to approve C-ID courses. He stated that the Curriculum Committee must adhere to ED Code, Board Policy and the Brown Act. Thus, we do not have a lot of say as to our process, specifically having a 1st and 2nd reading of new and modified curriculum. He cautioned that if anyone on the Curriculum Committee feels that they are being harassed by anyone to let him and the Vice President of Academic Services. He stated he appreciates everyone on the committee’s hard work.
