B. Programs:

• **Law Enforcement Certificate of Achievement- New Program**

  • **Presented by Mark Tarte:** This is a new certificate to mark the successful completion of the long standing POST Basic Training Academy program, which consists of one 29 Unit Course (AJ 9997). It will also serve as a way to track the amount of graduates from the program, as mandated by the state. This is a CTE program. This certificate will not be eligible for financial aid, as it is only a six-month program. Alternative funding has been discussed with the foundation. Most of the recruits, except for about five percent, are already employed by a law enforcement agency which pays for the program. This program will move forward for voting next meeting.

• **Philosophy A.A.-T-Program Modification**
• **Presented by Jeremiah Bodnar:** This is an update to an already approved program. The courses have been updated in order to increase articulation, combinations of courses and allow students more opportunities to transfer. This program will move forward for voting next meeting.

• **Teaching Intermediate Piano Certificate of Achievement- Program Modification**
  • **Presented by Daniel Marschak:** This is an update to a program that Las Positas has offered for the last ten years. We are, as far as we know, the only Community College in the state that offers a program like this. MUS 38 is being added to the program. This program will move forward for voting next meeting.

• **English A.A.-T-Program Modification**
  • **Presented by Michael Sato:** Michael Sato stated that they reconfirmed the requirements for the degree. This program will have the same electives as the English AA. Units were updated in List B. In order to submit English AA modification, non-English courses that are part of the program will need to be updated. This program will move forward for voting next meeting.

C. **Deactivations:** **Presented by Craig Kutil:** Mark Tarte requested that AJ 9957, AJ 9962, AJ 9970, AJ 9978, and AJ 9984 be removed from the list for deactivation. All of these course deactivations have been requested by faculty. Math 71 was never offered as a one semester course, instead it is offered as Math 71A and Math 71B over two semesters. The programs for deactivations were found in CurricUNET with only the program name having been entered, no units or program description. Many of these degrees are pre-1992 before the college was individually accredited. The majority of these programs were not under a current course descriptor. These programs are not in the Chancellor’s Office Curriculum Inventory. Many of the paper records have been lost. This will serve as an official deactivation. There are two programs Web Design/ Development Certificate of Achievement and Real Estate A.A., which are not yet listed for deactivation as they were awarded to students. More research will be completed before those programs will be deactivated. These deactivations will move forward for voting next meeting.

8. Discussion Items

**Course Descriptor Mapping**

Craig Kutil stated that for Communication Studies the course numbers will transfer directly from the SPCH to CMST. Next semester one of his goals is to further investigate the history of the 9 and 29 Courses and whether those courses are still needed. If so, they will need to be updated. These will be submitted to the Curriculum Inventory as non-substantial changes, with the updated course outlines. However, 29 courses do not have course outlines. Thus, when Biology changed their descriptor from BIOL to BIO they created course outlines for their 29 courses (including Botany and Zoology). They did not update their 9 courses. He will ask Communication Studies if they will want to keep the 29 and if not the course will be deactivated. The course descriptor will be changed through an administration revision function in CurricUNET. The course numbers will also transfer directly across from the PSCN to PCN. The deactivation of PSCN 9 will be discussed by Student Services.

**Discipline List**

Craig Kutil stated that we will need to come up with a system by which we will approve the discipline list. While some of the discipline selections should be straight forward, others will require more discussion. He stated that he would like to request from Human Resources a list of all of the disciplines that faculty have been hired under. If the discipline is switched for a course from what HR currently had on file, the faculty member may no longer be able to teach that course. We believe that the HR department assumed that the department was the same as the discipline. He proposes that the Deans will return their portion of the completed discipline list by November 27th. He stated that at other community colleges the course discipline is a major discussion when approving curriculum. The disciplines will be brought for first reading and approved in stages starting with some of the straight forward discipline selections and
moving then to disciplines that will require more discussion. It was discussed that perhaps the Dean’s could discuss the Discipline List at the next division meeting to further finalize the discipline decisions. If requested, Craig Kutil will attend the division meetings. The first discipline selections will be brought for first reading in December to the Curriculum Committee. Roanna Bennie will reach out to Human Resources to receive a list of what disciplines faculty are currently hired under.

**Non-Credit**

Craig Kutil discussed how Las Positas College has never had a non-credit program before. We are trying to further understand non-credit and how the Curriculum Committee will approve non-credit. He stated that he hopes that the Academic Senate will provide guidelines on how the Curriculum Committee will approved non-credit. Non-credit is free to students and aids underserved students. These courses are repeatable, not subject to some basic skills limitations and have flexible scheduling options. Non-credit also offers certificate options, such as Certificates of Completion. Non-credit Certificates will be submitted to the Curriculum Inventory. Non-credit will generate FTES. It was discussed whether TOP Codes should appear on the Course Outline of Record for all courses. Roanna Bennie stated that non-credit is being negotiated this week at the District. There is synergy around the idea of having three identified levels of non-credit that correlate to pay- for instance having the lower level for courses like non-credit tutoring and having at the top CCDP courses where faculty are creating exams and preparing for lecture. We would need to come up with guidelines of how we will place courses in each of these levels. Craig Kutil stated that he will begin with the help of Kristy Woods and others to create the new non-credit pages in CurricUNET. We will be working in tandem with the union. It was suggested to reference the non-credit PowerPoints provided on Blackboard.

9. Reports

**Vice President’s Report**

Roanna Bennie reported that she and Madeline Wiest had completed the Pre and Co requisite Survey, which was submitted to the state. She stated that she received the letter from the Chancellor’s Office to certify all of the non-substantial changes that both she and the Curriculum Chair will need to sign.

**Chair’s Report**

Craig Kutil reported that he believes that the document that Roanna Bennie received actually will certify all non-substantial changes, as well as stand-alone courses. It was stated at the Curriculum Institute that the only courses that the Chancellor’s Office needs to approve are non-credit and new courses for new programs. Currently the existing Curriculum Inventory does not have a function to distinguish those course groups, so all new courses and substantial changes are being reviewed by Chancellor’s Office. This new process will not speed up the current Curriculum year to year process. Our Curriculum Committee has one of the fastest turnaround time for curriculum. There are courses in Assist that need to be removed including old course descriptors and the defunct 49’s. These courses, if not already deactivated, will be formally brought to the Curriculum Committee for deactivation at the next meeting. There are still a lot of courses that still need to be updated, but some of them are in departments that do not have a full-time faculty member. This is an issue that will need to be discussed next semester and along with creating a five-year process to update courses. There are changes that are being made to CurricUNET so some dates will be automatically entered.

**Articulation Officer’s Report**

Marina Lira
Marina Lira reported that she has several items that she would like to discuss at the next meeting, including a new law AB 1985, the Liberal Arts AA can’t be updated until courses in every emphasis are updated, student services are moving forward with the Social Work AD-T.

10. Good of the Order: Craig Kutil stated that the Academic Senate passed a resolution that you AD-Ts can be submitted even if it includes courses that are still pending C-ID approval. This will mean that we should be able to put AD-Ts through quicker.

11. Adjournment at 4:38 PM
