LPC Mission Statement

Las Positas College is an inclusive learning-centered institution providing educational opportunities and support for completion of students' transfer, degree, basic skills, career-technical, and retraining goals.

LPC Planning Priorities

- ❖ Establish regular and ongoing processes to implement best practices to meet ACCJC standards.
- ❖ Provide necessary institutional support for curriculum development and maintenance.
- ❖ Develop processes to facilitate ongoing meaningful assessment of SLOs and integrate assessment of SLOs into college processes.
- ❖ Expand tutoring services to meet demand and support student success in Basic Skills, CTE, and Transfer courses.

- o **Deactivations:** Last semester, a mass list of current courses was sent out to the Dean's and then distributed to faculty in order to identify the discipline each course should be in and if any of the courses should be deactivated. Of the courses identified for deactivation, any courses from an old course descriptor that had not been used in many years, was then deactivated. Those courses had already been previously deactivated, but due to an error in the Chancellor's Office Curriculum Inventory every course that had been in their system and our Banner system had been reactivated. The remaining courses that had been marked on that initial list for deactivation were resent to the faculty and, once confirmed, were put through CurricUNET as deactivations.

There were also courses in the College Catalog that were not in the Curriculum Inventory. All of these courses were old and several of them had already been deactivate at Board. We notified the faculty in the department that those courses are being removed from the catalog and deactivated in CurricUNET. If the faculty members would like to offer those courses in the future, they will need to be submitted as a new course. All of the courses confirmed so far for deactivation are below. There were also two programs, Computer Programming A.S. and Computer Programming for the Web A.S., that faculty asked to be deactivated. There will still be some more deactivations to come. It was discussed that though HLTH 8 was taken off the agenda as a deactivation, Lisa Everett and the committee decided that the course move forward for deactivation.

7. Discussion Items:

- **Courses without Faculty Leader:** Craig Kutil reported that currently there are courses under the HSCI and RECL course descriptor, which do not have lead faculty members. These courses have not been offered recently and we do not plan to offer them in the future. HSCI 52 has been offered under EMS 62, as it is cross listed. Lisa Everett gave some background that the Health Science Program was created about 8-9 years ago to house Farm Technology, Surgical Technology, the Health Science Certificate & Degree and the Administrative Medical Assistant Certificate. The Administrative Medical Assistant Certificate of Achievement is the only program of those that is still active and about five of those certificates are given out each year. As the HSCI courses are not offered, student completing the certificate must have course substitutions to complete the program. Also, many of the other courses in the program, which is interdisciplinary, are not offered. It was pointed out that in the Curriculum Inventory four of the HSCI courses were never changed from HLTH. The RECL 71L was a backpacking course taught by a physical education teacher, which has not been taught since 2008. It was decided by the committee that this course will be deactivated. The issue of the HSCI courses will be discussed by the dean's and faculty and brought back to the committee.
- **Interdisciplinary Programs:** Craig Kutil confirmed with Michael Schwartz that he will take on the University Transfer programs. Craig also reported that he has reached out to the faculty of the Sociology Department to see if they would be interested in taking over the Social Science (General) and Social

Science portion of the Liberal Arts and Science Programs, but has not yet heard back. The Math department will be meeting this Friday and will discuss whether to take on the Mathematics section of the Liberal Arts & Science A.A. Craig explained that Roanna Bennie and the President's idea was to have a Dean to oversee these Interdisciplinary Programs. Roanna Bennie added that part of the idea was that the Liberal Arts and Sciences A.A. with six areas of emphasis would all be part of one program review with six parts, which would be coordinated by the Dean. It was clarified that in the state curriculum inventory every emphasis of the Liberal Arts and Sciences A.A. has its own control number and is considered individual programs. Marina Lira stated that she believes the Student Services will be willing to house the Liberal Arts and Science A.A. if only one program review is required and there is input from faculty and the Curriculum Committee. She will bring this back to Student Services to confirm. There was also discussion that as Student Services has the graduation rates of these interdisciplinary programs, perhaps there can also be discussion around whether all of these programs need to be continued. It was discussed that Katie Eagan is interested in being the lead faculty member for the International Studies A.A. Don Miller will take the Social Science (General) A.A. back to his division to see if anyone is interested in being in charge of that degree.

- **Discipline Lists:** Craig Kutil stated that he is continuing to update the courses on the disciplines list as old courses are being deactivated. Once updated he will make two lists to send out to be discussed at division meetings: one list ordered by discipline and one list with the courses organized by their descriptor. It was clarified that the course discipline and the course descriptor are completely separate. Roanna Bennie explained that every course is put into a discipline and that discipline is then used to determine hiring minimum qualifications or equivalency. She put forward the example of KIN FSC which is for Fire Service students. Currently the course descriptor is being used to determine hiring, so the KIN descriptor can lead to an individual with a degree to Kinesiology being hired to teach the course. However, the content is very specific to Fire Science. Content of the course should dictate the discipline of a course rather than the descriptor. Multiple disciplines can be used for a course using either "or" or "and", meaning the faculty member would need to have a masters in one discipline and 12 graduate units in the other discipline. "And's" are thus very limiting on what faculty member can teach that course. This disciplines list, once completed, will go to HR so that they can make sure that the faculty member hired to teach a course has the minimum qualifications. This should have been happening in the past and in the future the committee will be approving the discipline as part of the course outline. The establishment of these disciplines can lead to having faculty members who currently teach a course, not being qualified to teach that course in the future. The discipline categories are determined by the state. Craig Kutil stated that by this weekend he will send out the current discipline list for review and will attend division meetings to help clarify this issue.

8. Reports:

- **Vice President's Report:** None
- **Chair's Report:** Craig Kutil reported that there is still a lot of clean up happening, including more deactivations that will be coming through. The Communication Studies A.A.-T is almost complete and will be on the next committee agenda. He also stated that he is working with faculty on Friday's and some Monday's and Wednesday's to update degrees.
- **Articulation Officer's Report:** None
