Total Cost for Position:	\$ 64,287	flours of less per week		
Justification: Why is this position necessary?		5D 10/2014 SD Review / Date		
villy is this position necessary:				

This position has been on the table of organization for many years, but the incumbent left the college in December 2008 and the position has remained unfilled since that time. At the time the incumbent left the position it was a 40 hour a week position. This position will be responsible for multiple demands in the business office, particularly related to Banner Data entry, bank reconciliations, filing, and assisting with the Club/Co-Curricular Accounts. This will allow us to more effectively utilize our current staffing in the business office.

Up until 2008 there was a long standing history of having two fiscal tech positions, filled on an hourly or permanent basis. This position handles over 130 accounts such as ASB Club, Co-Curricular, and Restrict accounts (like CTE, Basic Skills, 3SP funding, Calworks, EOPS, etc).

Account Type	Number of ASB Accounts	Co-Curricular Accounts	Restricted Accounts
Fiscal Year 2008	30	40	30
Fiscal Year 2014	40	58	35
Percentage Increase	33.33%	45%	16.66%

This is all in addition to the general fund accounts that each department on campus has with a combined approximately \$28 million dollars. Currently, we have two people (Natasha Lang and Alesia (Lisa) High) to support all of these accounts, inquiries, research, reports, etc. To keep up with the demand we need this additional position. One daily technical position (Lisa) cannot keep up with the day to day inquires and normal business operations that is requested from our department.

We have an increasing demand for information requests and technical budgeting/accounting assistance. Departments and programs are requesting help with reports for payroll expenses, support dealing with daily business transactions, budget planning, and assistance on general business procedures.

In addition, we need to address some internal control issues. We had a visit from our audit team and they indicated that there is a strong need for tighter internal controls. A key component of a strong internal control system is a division of labor. This means, more than one person being responsible for a part of the process. This ensures that the person starting the process is not also responsible for completing the process. This can only happen with more staff. This is necessary to avoid future audit findings.

As the college becomes larger and more activities take place, we need to have more than one person handling the accounting functions and daily transactions. We need to address department requests for more regular reporting, and

training. Having this position restored would allow the office to make this possible. We provide services to the campus, but without the support of the campus, it is very difficult to meet the demand.

Where will the individual work? To whom will the person report? Are there any special equipment/ facilities needs not already budgeted?

This person will work in the Administrative Services Office in the common cubicle area. There is a dedicated work space for this individual. The College Administrative Officer will be the first line supervisor and the Vice President of Administrative Services will be the second line supervisor. There is no special equipment or facilities required for this position.

What is the consequence of not funding the position?

The work of this individual will continue to be distributed to the remaining staff. With the support of funding for the Fiscal Technician position, the supervisor will be able to assist in providing other essential services to the campus including financial training, procedure writing, and process improvement. Workload for the Administrative Services Office has exceeded its current capacity and is anticipated to grow with the implementation of the new District Resource Allocation Model. There is a strong need for integrated planning, budgeting and assessment for the college. The Administrative Services office can provide data and additional detail that would be very helpful to the process, but we need more help to keep up with the demands. Should this position not be approved, the workload will continue to grow, but efficiencies and effectiveness will continue to decline.

What alternative approaches have been considered in meeting the programmatic demands of this request? We have hired student assistants at various intervals to assist with items like filing, coping, and general distribution of paperwork, etc., but we cannot hire student assistants to do Regular classified work. However, a consistent and reliable person is what is needed for the work and demands of our office. In addition, we have to be very careful with who handles money, payroll data, etc. We will continue to utilize student assistants in the areas where we are able, but we cannot hire student assistants to do Regular classified work.

How will the campus community (students, staff, faculty, and community) be positively impacted by filling this position?

The Administrative Services Office will run more smoothly by filling the vacancy we have had since 2008.

What other personnel currently provide support to this program and these students?
