NOTE: Gap Value "Rate": For Percentage Point Gap, this is the percentage difference of the focal group's performance compared to the performance of everyone else (all students minus the focal group). For the Proportionality Index it is the ratio comparison of the focal group's representation among all outcomes over the focal group's representation among all students considered. Gap Value "Students" PPG or PI value represented as number of students needed to reach equitable outcomes.

*Indicates a sub-population group for which the state provided data but is not requiring college goals to be determined.
