

TECHNOLOGY COMMITTEE

Monday, January 25th, 2009
2:30 pm, Room 1603

AGENDA

1. Welcome & Review of November Minutes
2. Unaddressed topics from November meeting
 - DreamSpark.com - free Microsoft software for students. Chabot students have access, what is required for access for LPC students?
 - GMail secure login; This works sometimes, in some places, often slowly, if at all, apparently because of HTTPS errors. When will this be fixed?
 - A number of features listed and discussed in planning meetings and for the ZONE rollout are not yet implemented. Why is that, and what is the timeline for completing these?
 - There is as yet no way to email all LPC students
 - There is no way to target announcements to just LPC Blackboard students
 - eSARS - send email?
 - Email function in Group Studio doesn't work
 - The CLASS-Web prompt screen giving DE info to students prior to registration has not yet been implemented; At a joint DE meeting with Chabot in May, Eric said he would work on it this Fall. However, Eric said recently that because of "higher priorities, ITS would not work on this until either late Spring (2010) or sometime during the Summer (2010)
 - In early Portal planning meetings we discussed and agreed on the imperative for a written password policy for all accounts. Please bring a copy of that, as it is alluded to in the district security audit report, but we have not yet seen that.
3. New items for Discussion:
 - a. IPv6 – What is our status on net and website support?
 - b. There is no WIFI in classrooms in the MD Building? When will there be?
 - c. Spam sites that have been repeatedly reported through Guardian, are still not being discarded. Why is that?
4. Campus Reports
5. District Reports
6. Other

**Next Meeting: February 22nd, 2010
at 2:30pm in Room 1603**
