I. LOWER THE PROJECTOR SCREEN & TURN ON THE DATA PROJECTOR

The switch to lower or raise the screen is located on the front wall of the classroom, to the right side of the whiteboard.

II. CHOOSE ONE OF THE FOLLOWING ACTIONS:

Point this remote at the projector hanging from the ceiling and press the “ON” button. You should hear the fan come on. It will take a minute or two for the unit to warm up.
A. SHOW A DVD OR VHS:

1. Turn on the audio amplifier unit - the orange light will glow.
2. Point this remote at the projector on the ceiling and press the “INPUT 3” button.
3. Insert a disc or tape into the DVD/VCR. The remote operates similarly to one from a home DVD/VHS unit.
4. Press the button labeled “DVD/VCR” on the audio/video selector box.
5. Adjust these knobs on the amplifier to suit your needs.
6. Turn on the audio amplifier unit - the orange light will glow.

Press the button labeled “DVD/VCR” on the audio/video selector box.

Adjust these knobs on the amplifier to suit your needs.

Turn on the audio amplifier unit - the orange light will glow.
B. SHOW THE SCREEN IMAGE & PLAY SOUND FROM THE PC OR MAC

Point this remote at the projector on the ceiling and press the “INPUT 1” button.

Press the button labeled “PC” or “MAC” on the audio/video selector box.

Turn on the audio amplifier unit - the orange light will glow.

Switch the video selector box to “PC” or “MAC.”

Adjust these knobs on the amplifier to suit your needs.
C. SHOW THE SCREEN IMAGE FROM A LAPTOP

Point this remote at the projector on the ceiling and press the “INPUT 1” button.

Switch the video selector box to “LAPTOP.”
III. RETURN THE SCREEN TO THE FULLY RAISED POSITION.

IV. TURN OFF THE DATA PROJECTOR.

You will see the bulb shut off and the status light will change from green to red when the unit cools down.

Press the “Standby” or “Power” button on the projector remote two times.

V. TURN OFF THE AUDIO AMPLIFIER.

The orange light will turn off.
