Due to the careful subject classification of titles required, subject lists are not as current as our standard database title lists. As a result, recently added content may not be shown. See alphabetized coverage lists for more current information with ISSN, publisher, embargo information, coverage dates, PDF availability, etc.

**Please Note**
Publications included on this database are subject to change without notice due to contractual agreements with publishers. Coverage dates shown are the intended dates only and may not yet match those on the product. A small number of titles are not available through some delivery systems due to publisher restriction in distribution.

---

**Aeronautics & Space Sciences**

 Works on the design and construction of aircraft, the theory and practice of aircraft navigation, space flight, and the scientific disciplines that study phenomena in the upper atmosphere and space. Also works on aerodynamics, air transport, flight, kites, navigation, rocketry, and space and time.

Aeronautics, Astronomy & Astrophysics

Works on the design and construction of aircraft, the theory and practice of aircraft navigation, space flight, and the scientific disciplines that study phenomena in the upper atmosphere and space. Including the science which investigates all the matter-energy in the universe: its distribution, composition, physical states, movements, and evolution. Also works on aerodynamics, air transport, flight, navigation, rocketry, and the study of the physical properties of planets and stars.

Astronomy & Astrophysics

* Works on the science which investigates all the matter-energy in the universe: its distribution, composition, physical states, movements, and evolution. Also works on the study of the physical properties of planets and stars.

### Biological Sciences

_Works on the sciences dealing with life and living organisms including their structure, function, growth, origin, evolution, and distribution. Also works on anatomy, botany, cells, cytology, ecology, evolution, fertilization, genetics, heredity, hybridization, natural history, phylogeny, physiology, reproduction, sex, zoology._

Ethnic & Multicultural Studies

Works on people with a common and distinctive racial, national, religious, linguistic, or cultural heritage, and on programs that foster the preservation of different cultural identities within a unified society such as a state or nation. Also works on bilingual education, diversity in the workplace, and pluralism.

Geography

Works on the study of the earth and its features, and of the
distribution of life on the earth, including human life and the
effects of human activity. Also works on commercial
gerography, historical geography, human geography, local
geography, maps, medical, geography, and military
geography.
