6	Sometimes the tc is really cold (AC should be monitored to a normal temperature that isn't freezing). I would also reccomend a section of the room where tutors can help people with their work, and the other section of the room where students can just come in to study or do their work as well. It's just an idea to control the volume of the room so students can focus better.	12/4/2018 1:47 AM
