

Getting started with *Campus Credit*

Your school uses Campus Credit to manage enrollment pathways for Articulation. This guide walks you through **creating your account**, **linking it to your school**, and starting your enrollment. **It takes about 10 minutes.**

BEFORE YOU BEGIN — HAVE THESE READY

- ☐ Your school's Campus Credit portal link: <https://portal.mycampuscredit.com/login>
- ☐ Your school student ID number:
- ☐ Your email address (use a personal email)

1. Open your school's Campus Credit portal

Go to the **portal link your school gave you**. It opens in your web browser — there's no separate app to install. Bookmark it so you can come back and check your status anytime.

2. Create your Campus Credit account — and link it to your school

Sign up to create your own Campus Credit account. Then, inside the system, **link your account to your school** so your records connect to the right place — this is where you'll enter your **school student ID**. Your account won't be tied to your school until this step is done.

3. Find your program or course

Browse the courses your school offers **by term**. Use the search and filters to find the specific courses that meet your Articulation interest.

4. Start your application or registration

Open your program and begin the **guided form**. It walks you through each step — just follow the prompts and fill in your details.

5. Submit, then track your status

After you submit, you can **check your status anytime in the portal** — no need to call or email the office. You'll see when your request is approved, needs more information, or has a next step for you.

Need help? Questions about your program or signing in? Contact your school's Campus Credit coordinator:
