

CNT IT Support Professional Spring 21 Course Offerings

This program includes innovative curriculum from Google and the Computer Technology Industry Association (CompTIA) designed to prepare you for an entry-level role in IT support. A job in IT can mean in-person or remote help desk work, either in a small business or at a global company, like Google. Whether you've been tinkering with IT or are completely new to the field, you've come to the right place. Through a dynamic mix of live and video lectures, quizzes, and hands-on labs, this certificate program will introduce you to trouble-shooting and customer service, networking, operating systems, system administration, and security.

Join our networking courses and start your path to a career in IT Support this Spring.
