Creating and Updating Your Program Maps

Program Mapper & Career Coach Institutionalization Process

This website is designed to support our LPC community with the process from how to go from a faculty idea for their program to realizing these in degree/certificate maps and career links that are student and community facing. Depending on whether the idea is for a **new program,** a **modified program** with curriculum changes, **revised**/reorganized, or **deactivated** program, the steps for reflecting these in our Academic & Career Pathway Degree & Certificate Maps (/programmapper/index.php) and linking to Career Coach (https://laspositascollege.emsicc.com/?radius=10%20miles&region=Alameda%20County) are different and detailed below.

To get started, select which option best fits the idea:

- Create a new program (/programmapupdates/new.php)
- Modify an existing program, requiring curriculum changes (/programmapupdates/modified.php)
- Revise/reorganized an existing program, without curriculum changes (/programmapupdates/revised.php)
- Request a removal of a program map that has been deactivated (/programmapupdates/deactivated.php)

Timeline for Program Updates

For **new program,** a **modified program** with curriculum changes, or or **deactivated** program will be updated:

- **Programs with Fall effective date:** program maps and Career Coach links will be updated over the summer with a goal of publishing August 1st.
- **Programs with Spring effective date:** program maps and Career Coach links will be updated over the winter with a goal of publishing January 10th.

For **revised**/reorganized that do not involve curriculum changes will be updated:

- **Revisions requested by October and March 1st** will be be published by the end of the month in time for registration.
